Writing for the Mass Media - James Glen Stovall 2006

This successful text offers a simple organization, clear writing, abundant exercises, and precise examples that give students the information about media writing and the opportunity to develop their skills as professional writers. Using a workbook-style format, it introduces and explains the major forms of media writing: inverted pyramid for print and Web, dramatic unity for broadcast, copy platforms for advertising, and the various writing structures required for public relations. "Writing for the Mass Media" also covers all major areas of media, including the Internet. In addition, its basic and practical approach makes this text an excellent book for any introductory writing course. New to the Sixth Edition A completely rewritten chapter on writing for the Web uses innovative exercises to develop writing skills, accounts for many of the structures and demands of the web environment, and helps students navigate in this medium. Many new examples of good writing are featured in the text, against which students are encouraged to model their own writing. New exercises found in many of the chapters, including those involving grammar and style, allow students to put content into practice. An updated Companion Website (www.ablongman.com/stovall6e) and Instructor's Manual, with additional material for lectures and discussion, as well as some additional exercise material, provide supplementary material for users. A glossary provides easy access to definitions of terms used throughout the book. Praise for "Writing for the Mass Media" "Stovall's strengths are many. . . the book is a bargain and the inclusion of exercises for each chapter heightens its bargain status. Likewise, the back-to-basics approach makes the book accessible to a wide range of students." "For those who are in search of breadth, Stovall's greatest virtue has to be the diversity of media writing tasks addressed. Not one of the competitors that I have used offers nearly the diversity of writing assignments treated by Stovall." "Laurence W. Fennelly, Macon State College" "Stovall's text is easy to read and the information is easy to access for any entry-level course in media writing." "Christine Cranford, East Carolina University"

Toyota Production System, Second Edition systematically describes the changes that have occurred to the most efficient production system in use today. Since the publication of the first edition of this book in 1983, Toyota has integrated JIT with computer integrated manufacturing technology and a strategic information system. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002.
