Re-educated - Lucy Kellaway 2021-07-01

'A beautifully told story of courage, determination and, above all, magnificent defiance' Alan Johnson 'Bracing and inspirational' Nigella Lawson 'A wonderful writer... life-affirming' Jon Snow 'There are lots of reasons to read this book, which has the fineness of detail, sharpness of humour and grace of a novel by Penelope Lively. But it's this business of changing one's mind - the thing most of us least like to do - that I admired the most' Observer 'I am immersed in a new world that feels a long way from my old one. Though I've not been re-invented, what has happened is just as radical and a lot more interesting: I am being re-educated.' Lucy Kellaway had a comfortable life. For years she had the same prestigious job, the same husband, and the same home. To the casual observer, she was both happy and successful. But one day, Lucy began to realise that the life she had built for herself no longer suited her. Was it too late to start again? The answer was no - so she proceeded to tear down both marriage and career, and went back to school. Retraining as a teacher, Lucy discovers there is a world of new possibilities awaiting her - and learns that you can teach an old dog new tricks (providing they are willing to un-learn a few old ones along the way). A witty and moving story of one woman's pursuit of a new life, Re-educated is a celebration of education's power to transform our lives at

any age, and an essential companion for anyone facing the joy - and pain - of starting again.

Enquiring History: The French Revolution - Dave Martin 2013-02-22

Think more deeply and work more independently at A level History through a carefully thought-out enquiry approach from SHP. Enquiring History: It makes you think! The OFSTED report on school history suggests that the current generation of A Level students have been poorly served by exam-based textbooks which spoon-feed students while failing to enthuse them or develop deeper understandings of studying History The Schools History Project has risen to this challenge with a new series for the next generation. Enquiring History is SHP's fresh approach to Advanced Level History that aims: - To motivate and engage readers - To help readers think and gain independence as learners - To encourage enquiry, and deeper understanding of periods and the people of the past - To engage with current scholarship - To prepare A Level students for university Key features of each Student book - Clear compelling narrative - books are designed to be read cover to cover - Structured enquiries - that explore the core content and issues of each period - 'Insight' panels between enquiries provide context, overview, and extension - Full colour illustrations throughout Web-based support includes - lesson planning tools and activities for teachers - Dynamic eBooks for whole class teaching or individual student reading - Exam advice for each specification The French Revolution This title covers the turbulent history of France from 1774 to 1802 and the revolutionary events and larger than life individuals whose ideas and actions sent shock waves around Europe. Each enquiry tackles a discrete topic which together build a rounded and balanced picture of the causes, the course, the consequences, and the historiography of the revolution. As William Doyle puts it: 'There are few periods in history when so many benevolent intentions led to such unintended chaos and destruction, ...'How and why did this happen? What can we learn from it? What has the French Revolution got to say to us today? Web-based support includes - lesson planning tools and guidance for teachers available from the SHP website <http://www.schoolshistoryproject.org.uk/Publishing/BooksSHP- eBooks>

2012 GCSE English results - Great Britain: Parliament: House of Commons: Education Committee 2013-06-11

The 2012 GCSE English results prompted significant controversy, which ultimately resulted in an application for judicial review. This report sets out the background to these events and identifies lessons to be learned. The problems with GCSE English can be traced back to the 2007-09 development phase of the qualification- in particular the turbulence which resulted from the shift away from a mostly linear to a modular system, combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time, but these were not acted upon by the regulator (the then-interim Ofqual). Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening, with consequences for grade awarding. The current status of Ofqual, as an independent regulator accountable to Parliament, is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels, to a tight timetable and at the same time. Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland, without careful reflection on what might be lost, or consensus that this is the right thing to do.

International Practices to Promote Budget Literacy - Harika Masud 2017-06-28

Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with

government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

Knowing History in Schools - Arthur Chapman 2021-01-07

The 'knowledge turn' in curriculum studies has drawn attention to the central role that knowledge of the disciplines plays in education, and to the need for new thinking about how we understand knowledge and knowledge-building. Knowing History in Schools explores these issues in the context of teaching and learning history through a dialogue between the eminent sociologist of curriculum Michael Young, and leading figures in history education research and practice from a range of traditions and contexts. With a focus on Young's 'powerful knowledge' theorisation of the curriculum, and on his more recent articulations of the 'powers' of knowledge, this dialogue explores the many complexities posed for history education by the challenge of building children's historical

knowledge and understanding. The book builds towards a clarification of how we can best conceptualise knowledge-building in history education. Crucially, it aims to help history education students, history teachers, teacher educators and history curriculum designers navigate the challenges that knowledge-building processes pose for learning history in schools.

Land of Strangers - Ash Amin 2013-04-24

The impersonality of social relationships in the society of strangers is making majorities increasingly nostalgic for a time of closer personal ties and strong community moorings. The constitutive pluralism and hybridity of modern living in the West is being rejected in an age of heightened anxiety over the future and drummed up aversion towards the stranger. Minorities, migrants and dissidents are expected to stay away, or to

conform and integrate, as they come to be framed in an optic of the social as interpersonal or communitarian. Judging these developments as dangerous, this book offers a counter-argument by looking to relations that are not reducible to local or social ties in order to offer new suggestions for living in diversity and for forging a different politics of the stranger. The book explains the balance between positive and negative public feelings as the synthesis of habits of interaction in varied spaces of collective being, from the workplace and urban space, to intimate publics and tropes of imagined community. The book proposes a series of interventions that make for public being as both unconscious habit and cultivated craft of negotiating difference, radiating civilities of situated attachment and indifference towards the strangeness of others. It is in the labour of cultivating the commons in a variety of ways that Amin finds the elements for a new politics of diversity appropriate for our times, one that takes the stranger as there, unavoidable, an equal claimant on ground that is not pre-allocated.

Evaluating Equity and Widening Participation in Higher Education - Penny Jane Burke 2018-05-15

Evaluation is a contested field. This collection considers the relationship between evaluation and research, and the ethical and moral dilemmas raised when evaluating equity and widening participation in higher education. The growing demands for "evidence of impact" frame expectations that we can justify government funding of particular university-led equity initiatives and understand "what works" well enough to ensure that resources are being allocated and used appropriately. Drawing on the international seminar series they designed and facilitated over 2014-16, the editors have created a framework of praxis around contested understandings of "access," "equity" and "widening participation" in HE. They and their authors have produced an

invaluable resource for developing equity in research, evaluation and practice in higher education.

Advanced Problems in Mathematics: Preparing for University - Stephen Siklos 2016-01-25

This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is

recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.

Global Transformations - David Held 1999

In this book, the authors set forth a new model of globalization that lays claims to supersede existing models, and then use this model to assess the way the processes of globalization have operated in different historic periods in respect to political organization, military globalization, trade, finance, corporate productivity, migration, culture, and the environment. Each of these topics is covered in a chapter which contrasts the contemporary nature of globalization with that of earlier epochs. In mapping the shape and political consequences of globalization, the authors concentrate on six states in advanced capitalist societies (SIACS): the United States, the United Kingdom, Sweden, France, Germany, and Japan. For comparative purposes, other states—particularly those with developing economies—are referred to and discussed where relevant. The book concludes by systematically describing and assessing contemporary globalization, and appraising the implications of globalization for the sovereignty and autonomy of SIACS. It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation.
