World Wildlife Crime Report 2020 - United Nations Publications 2021-03-31

The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

The City at Eye Level - Meredith Glaser 2012

Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city. These "plinths" are the ground floors that negotiate between inside and outside, the public and private spheres. *The City at Eye Level* qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the concerns of urban communities. The editors have put together a comprehensive guide for anyone concerned with improving or building plinths, including planners, building owners, property and shop managers, designers, and architects. *Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation* - Christopher B. Field 2012-05-28

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Funds of Knowledge - Norma Gonzalez 2006-04-21

The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. *Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms* is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

East European Accessions List - 1954

Conservation Design for Subdivisions - Randall G. Arendt 2012-09-26
In most communities, land use regulations are based on a limited model that allows for only one end result: the production of more and more suburbia, composed of endless subdivisions and shopping centers, that ultimately covers every bit of countryside with "improvements." Fortunately, sensible alternatives to this approach do exist, and methods of developing land while at the same time conserving natural areas are available. In *Conservation Design for Subdivisions*, Randall G. Arendt explores better ways of designing new residential developments than we have typically seen in our communities. He presents a practical handbook for residential developers, site designers, local officials, and landowners that explains how to implement new ideas about land-use planning and environmental protection. Abundantly illustrated with site plans (many of them in color), floor plans, photographs, and renditions of houses and landscapes, it describes a series of simple and straightforward techniques that allows for land-conserving development. The author proposes a step-by-step approach to conserving natural areas by rearranging density on each development parcel as it is being planned so that only half (or less) of the buildable land is turned into houselots and streets. Homes are built in a less land-consumptive manner that allows the balance of property to be permanently protected and added to an interconnected network of green spaces and green corridors. Included in the volume are model zoning and subdivision ordinance provisions that can help citizens and local officials implement these innovative design ideas.

European Global Navigation Satellite System and Copernicus -

United Nations Publications 2019-10-18

This report investigates how European Union space technologies support the fulfilment of the SDGs. It has been jointly prepared by the United Nations Office for Outer Space Affairs (UNOOSA)--in charge of promoting international cooperation in the peaceful use and exploration of space, and in the utilization of space science and technology for sustainable economic and social development--and the European GNSS Agency (GSA), which is the European Union agency operating EGNOS and Galileo and is in charge of ensuring the maximization of socioeconomic benefits from the use of the European Union satellite navigation systems. The analysis shows that all the SDGs are positively impacted by the benefits stemming from the use of European Global Navigation Satellite Systems (EGNSS) and Copernicus applications and, out of the 169 indicators associated, 65 (almost 40 per cent) directly benefit from using the EGNSS and Copernicus services, either helping monitor the status of achievement of a given SDG or actively contributing to its fulfilment.

World Public Sector Report - United Nations. Department of Economic and Social Affairs 2001

The World Public Sector Report will be published every two years with the intention of reviewing major trends and issues concerning public administration and governance. This inaugural issue of the report considers the process of globalisation and the challenges and opportunities it offers for the role of the public sector in countries around the world. It is increasingly being acknowledged that the State is a key actor in the development process and has a major role to play in making globalisation work for all, for example in alleviating poverty and income inequality, advancing human rights, promoting sustainable development and combating international crime. Issues discussed in the report include: the many facets of globalisation; its impact on the State; reinforcing state institutions and social policies; defining and measuring the size of the State.

Climate Change and Cities - Cynthia Rosenzweig 2018-03-29

The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.

When Father Comes Home - Sarah Jung 2020-11-10

From stunning debut talent Sarah Jung comes a heartwarming and beautifully told story about family, planting roots, and standing tall in the face of your fears. June's father is like a goose -- he flies away for long periods of time, which means that June doesn't get to see him very often. So he is happy when Father comes home from his journeys, and happier still when the family plants a tangerine tree together and Father tells June, "Next time I am here, this tree will be bigger, and so will you." Caring for a growing sapling is a great responsibility and June takes it very seriously. When an accident happens and the tree topples over, June worries his family will change forever. But things that have fallen can be replanted, and sometimes facing our biggest fears reveals our greatest strengths.

Newer Methods of Nutritional Biochemistry V5 - Anthony Albanese 2012-12-02

Newer Methods of Nutritional Biochemistry: With Applications and Interpretations, Volume V, presents discussions and reviews of procedures that may have a significant impact on the future progress of the science of nutrition. Comprised of seven chapters, this book discusses the nutritional and metabolic aspects of circadian rhythms; the relationship of amino acid requirements in terms of amino acid composition and availability from various food sources; and the characteristics of protein-calorie malnutrition. It also describes methods, biochemical mechanisms, and dietary factors that influence the metabolic conversion of dietary carbohydrates into lipid moieties. The book examines the influence of nutritional factors on ribosomal dynamics and discusses the isolation, physical, and biochemical characteristics of proteinase inhibitors found in soy and lima beans and other edible vegetable seeds. A novel method for determining the biological value of protein foodstuffs is also included. This book will be a valuable resource for graduate students and investigators in nutrition and other life sciences.

The Forest Sector - 1991

Since 1978, when the World Bank published its policy paper on forestry, the world's understanding of and concern about the forest sector of the developing world has increased substantially. It has become clear that forests and woodlands play an even more important economic and ecological role than had earlier been recognized. In particular, the importance of tropical moist forests in protecting biological diversity has become more fully appreciated, as has their role in the carbon cycle and in global climatic change. The nature of the challenge; Deforestation and forest degradation; The growing demand for forests and trees for basic needs; Strategies for forest development; The role of the world bank; Challenges for the forest sector; Strategies for forest development; The role of the world bank.

Soil pollution: a hidden reality - Food and Agriculture Organization of the United Nations 2018-04-30

This document presents key messages and the state-of-the-art of soil pollution, its implications on food safety and human health. It aims to set the basis for further discussion during the forthcoming Global Symposium on Soil Pollution (GSOP18), to be held at FAO HQ from May 2nd to 4th 2018. The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO2 and N2O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.
