Today, traditional car dealerships are facing much the same threat. Innovative and convenient digital startups and services threaten to disrupt the traditional car-sale process, egged on by consumers who aren't happy with the existing sales process. If car dealerships don't adapt, they too will face an industry-wide extinction. Perfect Dealership offers help and hope for dealerships struggling to adapt to this digital-based paradigm shift. Consultant Max Zanan applies fifteen years of automotive-industry experience to the future of the car dealership. Arguing that dealerships must make significant changes if they are to survive the coming storm, Zanan takes a close look at every department within the business, including human resources,business development centers,information technology,parts and service, andfinance and insurance.By improving the role of each

department and transforming them from individual echelons into a cohesive whole, Zanana offers a road map for the creation of a perfect dealership-the only way to remain relevant and solvent in the digital age.
