Baseball Haiku: The Best Haiku Ever Written about the Game - Nanae Tamura 2007-04-17

Presenting more than two hundred of the greatest haiku ever written about the game. There are moments in every baseball game that make fans catch their breath: the pause while a pitcher looks in for the sign, the moment a cocksure rookie gets picked off first, or the instant a batter lashes a game-winning homer into the night sky, just before the sell-out crowd explodes onto its feet. Haiku captures these moments like no other poetic form, and Baseball Haiku captures the sights, the sounds, the smells, and the emotions of the game like no previous collection. Some of the most important haiku poets of both America and Japan are featured in this anthology;

including Jack Kerouac, a longtime baseball fan who pioneered English-language haiku; Alan Pizzarelli, one of the top American haiku and senryu poets of the last thirty years; and Masaoka Shiki, one of the four great pillars of Japanese haiku—a towering figure—who was instrumental in popularizing baseball in Japan during the 1890s. With over two hundred poems spanning more than a century of ball playing, *Baseball Haiku* reveals the intricate ways in which this enduring and indelible sport—which is played on a field, under an open sky—has always been linked to nature and the seasons. And just as a haiku happens in a timeless now, so too does *Baseball Haiku* evoke those unforgettable images that capture the actions and atmospheres of the national pastime: each poem resonates like the lonely sound of cleats echoing in the tunnel as a grizzled veteran leaves his final game. The largest collection of haiku and senryu on baseball ever assembled, *Baseball*

Haiku is an extraordinary treasure for any true baseball fan.

Millionaire by Thirty -

Douglas R. Andrew 2008-04-30
Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey

educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in Millionaire by Thirty, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

well as bold or whimsical visible repairs Darn your handmade or expensive gloves, sweaters and socks to make them look great again The joy to be found in working with your hands and the personal artistry you discover within yourself lie at the heart of this book. While nothing lasts forever, there's pleasure, as well as purpose, in appreciating age and imperfection. Joyful Mending allows you to surround yourself with the things that truly give you joy, whether they were given to you by a loved one, picked up in your travels or simply have a special place in your heart.

The Book of L - G. Rozenberg
2012-12-06

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of

interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and o (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could

not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The Commonwealth - Patricia M. Larby 1993-01-01
The modern British Commonwealth, linking fifty countries around the world in voluntary association, cooperation, and consultation, is a unique body in world history. The area of its member countries covers a third of the globe and collectively their peoples represent a quarter of the world's total population. Though essentially different from the British Empire from which it originated, the Commonwealth shares many common historical ties with Britain. Patricia M. Larby and Harry Hannam have assembled an unrivaled body of literature to illustrate the growth of the Empire into the Commonwealth. This extensive bibliography identifies, lists,

and annotates the most important publications on the development and growth of the Commonwealth; its present status and functions; and its role in education, literature, sport, and the arts and sciences. It includes its historical origins: its cooperation in economics, politics, and international issues such as the environment; and its many spheres of professional activity including medicine, law, and architecture. Strong emphasis is placed on the role of the English language in the Commonwealth and as a medium for creative literature in many disparate cultures worldwide. "The Commonwealth "appears at a time when this unique organization is on the threshold of a new era in its history. The proposals emerging from the 1991 Commonwealth Heads of Government meeting include statements on democracy and human rights; environmental affairs; and global concerns such as international crime,

drug abuse, and AIDS. No previous comprehensive bibliography of the Commonwealth exists, and this volume fills a long-standing gap in the bibliographical coverage. It will be an essential reference source for libraries and scholars involved in Commonwealth studies and will be of particular interest to historians, political scientists, economists, and educators.

The Fourfold Path - Magdalena Lovejoy

How Do We Become Free and Enter into the Mystery of Life? The Fourfold Path takes us on a healing journey inspired by the philosopher Plato and his teachings on how to know yourself by transcending all limitations within the human space. The model of transcendence leaves behind

the metaphors we live by to pioneer humankind into the deepest and most powerful gnosis ever attained through the love of wisdom. Through transcendence, you can discover how to free yourself from the suffering that obstructs the complete vision of the soul. You can heal from the unconscious processes and go beyond the limitations of the ego. Once you have learned the Path, you can attain enlightenment and become like God, and attain the characteristics of divinity, immortality, and bliss.

Transcendence is basic to all human cultures who move through the limitless possibilities given to humankind to evolve using the wisdom of the mind and the wisdom of the heart. This wisdom invites us to go deeper and move from self-realization to knowledge of God. Life itself inspires this change through the experiences of love, birth, death, miracles, blessings, and family. True enlightenment occurs when we process these life experiences as lessons on a

soul journey that initiate a spiritual awakening. It is as simple as arguing that there are two identities: a true self and a false self. Philosophy is the means to know the difference between the two, while transcendence is the path that can lead humankind to know the truth. When humankind comes to know their true selves, they will be set free from suffering. This is the ascent toward what Plato called The Good, which many believe is also called God. The Fourfold Path shows us how to leave behind the limitations of the human space to discover a sacred place in communication and communion with Spirit, so you can become one with God and find true happiness.

Masséna at Bay 1811 - Tim Saunders 2021-11-30

The 1810 French invasion of Portugal, commanded by the veteran marshal André Masséna, who was known to Napoleon as the "Spoilt Child of Victory" has been well covered by historians. Conversely, the shock revelation of the presence of the Lines of Torres Vedras baring the French Army of Portugal's way to their objective of Lisbon, and numerous combats through to the Battle of Funes de Oñoro, has been frequently and unjustifiably glossed over. This book, starting with the occupation of the Lines of Torres Vedras, which were at the heart of Wellington's Peninsular strategy from October 1809-1812, is the story of Wellington's pursuit of Masséna back to Spain. This was a time when the Peninsular Army was still being forged and Wellington was refining his own art of war. In addition, 1810-1811 was a period when the outcome of the struggle in Iberia was still

far from certain, and Wellington could not manoeuvre with the same confidence in the outcome as he could in future years. The series of combats fought at Pombal, Redhina, Foz da Arounce and Sabugal while Masséna was at bay, though not categorised as "general actions", were of the same scale and significance as those of 1808; Roliça and Vimiero. The general action at Funes de Oñoro was one of the most significant of Wellington's victories, but he confessed that "If Bony had been here we would have been beat".

re-tell this well-known story from a different perspective. The narrative begins with warnings of ice, including one sent from the S.S. Californian, the closest ship to the Titanic, just hours before the fatal collision. It follows Jack Phillips, the senior operator on board the R.M.S. Titanic, as he begins sending the 'CQD' Marconi distress signals late on the night of April 14th. We see how these urgent calls were received by nearby ships and how news was passed rapidly across the Atlantic, in a desperate attempt to save the lives of the passengers and crew. The story ends with messages from the few lucky survivors safely on their way to New York. The directness and brevity of the messages gives the narrative a compelling impact and immediacy. Titanic Calling brings to life the voices of the individuals in this drama, retelling this legendary story as it was first heard.

Radar Instruction Manual -

United States. Maritime Administration 2005
Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective

methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J.

Slave Stealers - Timothy Ballard
2018-09-04

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of

her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman-- The "Conductor"; Abraham
