It's 1958 in rural North Carolina, where Ivy lives with her grandmother and sister on a tobacco farm. As tenant farmers, Ivy and her

But life on the farm takes a turn when Ivy's teenage sister gives birth—all the while maintaining her silence about the baby's father. Soon Ivy finds herself navigating the space between adolescence and adulthood as she tries to unravel a dark web of family

Move the Stars - Jessica Hawkins 2017-10-08

The highly anticipated conclusion to the *Something in the Way* series, a forbidden love saga. Lake It was a hot summer day when I met him on the construction site next to my parents' house. If I'd known then what I do now, would I have kept on walking? Manning was older, darker, experienced-and I'd trusted him when he said the story

would only ever be about us. I'd held those words close and challenged fate, but I had lost. A part of me is still that sixteen-year-old girl squinting up at Manning, but no matter how far I fall or high I soar, I'll always be a bird without her bear and nothing without him. Manning When I close my eyes, I can no longer see her. The decisions I made were to push Lake in the right direction-away from me. But now that she's gone, would I have made those same choices? I'd walked away like I was supposed to. I'd kept my distance. I'd bent over backward to keep Lake pure, but she's no longer that girl, and I don't know if I can stay away anymore. I only know I don't want to. She's still everything I want and nothing I should ever have, but if anyone can move the stars, it's her great bear in the sky.

The Varieties of Psychedelic Experience - Robert Masters
2000-04-01

One of the most important books written on the effects of LSD on the human psyche. • Its authoritative research has great relevance to the current debate on drug legalization. • Prolific authors Robert Masters and Jean Houston are pioneer figures in the field of transpersonal psychology and founders of the Human Potentials Movement. The Varieties of Psychedelic Experience was published in 1966, just as the first legal restrictions on the use of psychedelic substances were being enacted. Unfortunately, the authors' pioneering work on the effects of LSD on the human psyche, which was viewed by its participants as possibly heralding a revolution in the study of the mind, was

among the casualties of this interdiction. As a result, the promising results to which their studies attested were never fully explored. Nevertheless, their 15 years of research represents a sober and authoritative appraisal of what remains one of the most controversial developments in the study of the human psyche. Avoiding the wild excesses taken by both sides on this issue, this book is unique for the light it sheds on the possibilities and the limitations of psychedelic drugs, as well as on the techniques for working with them. With drug legalization an increasingly important issue, The Varieties of Psychedelic Experience provides a welcome and much needed contrast to the current hysteria that surrounds this topic.

All the Wonder that Would Be -

Stephen Webb 2017-05-03

It has been argued that science fiction (SF) gives a kind of weather forecast - not the telling of a fortune but rather the rough feeling of what the future might be like. The intention in this book is to consider some of these bygone forecasts made by SF and to use this as a prism through which to view current developments in science and technology. In each of the ten main chapters - dealing in turn with antigravity, space travel, aliens, time travel, the nature of reality, invisibility, robots, means of transportation, augmentation of the human body, and, last but not least, mad scientists - common assumptions once made by the SF community about how the future would turn out are compared with our modern understanding of various scientific phenomena and, in some cases, with the industrial scaling of computational and technological breakthroughs. A further intention is to explain how the predictions and expectations of SF were rooted

in the scientific orthodoxy of their day, and use this to explore how our scientific understanding of various topics has developed over time, as well as to demonstrate how the ideas popularized in SF subsequently influenced working scientists. Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester, Stephen Webb has worked in a variety of universities in the UK. He is a regular contributor to the Yearbook of Astronomy series and has published an undergraduate textbook on distance determination in astronomy and cosmology as well as several popular science books.

Love, Lucas - Chantele Sedgwick
2015-05-05
A 2015 Whitney Award Nominee! A powerful story of loss, second chances, and first

love, reminiscent of Sarah Dessen and John Green. When Oakley Nelson loses her older brother, Lucas, to cancer, she thinks she'll never recover. Between her parents' arguing and the battle she's fighting with depression, she feels nothing inside but a hollow emptiness. When Mom suggests they spend a few months in California with Aunt Jo, Oakley isn't sure a change of scenery will alter anything, but she's willing to give it a try. In California, Oakley discovers a sort of safety and freedom in Aunt Jo's beach house. Once they're settled, Mom hands her a notebook full of letters addressed to her—from Lucas. As Oakley reads one each day, she realizes how much he loved her, and each letter challenges her to be better and to continue to enjoy her life. He wants her to move on. If only it were that easy. But then a surfer named Carson comes into her life, and Oakley is blindsided. He makes her feel again. As she lets him in, she is surprised by how much she cares for him, and that's when

things get complicated. How can she fall in love and be happy when Lucas never got the chance to do those very same things? With her brother's dying words as guidance, Oakley knows she must learn to listen and trust again. But will she have to leave the past behind to find happiness in the future? Cloaked - Alex Flinn
2012-02-14

I'm not your average hero. I actually wasn't your average anything. Just a poor guy working an after-school job at a

South Beach shoe repair shop to help his mom make ends meet. But a little magic changed it all. It all started with the curse. And the frognapping. And one hot-looking princess, who asked me to lead a rescue mission. There wasn't a fairy godmother or any of that. And even though I fell in love along the way, what happened to me is unlike any fairy tale I've ever heard. Because before I knew it, I was spying with a flock of enchanted swans, talking (yes, talking!) to a fox named Todd, and nearly trampled by giants in the Keys. Don't believe me? I didn't believe it either. But you'll see. Because I knew it all was true, the second I got cloaked.

This book is a collection of essays written by the very scientists and engineers who have led, and continue to lead, the scientific quest known as SETI, the search for extraterrestrial intelligence. Divided into three parts, the first section, 'The Spirit of SETI Past', written by the surviving pioneers of this then emerging discipline, reviews the major projects undertaken during the first 50 years of SETI science and the results of that research. In the third and final section, 'The Spirit of SETI Future', the book looks ahead to the possible directions that SETI will take in the next 50 years, addressing such important topics as interstellar message construction, the risks and assumptions of interstellar communications, when we might make contact, what aliens might look like and what is likely to happen in the aftermath of such a contact.

"This is the best slow-burn

romance I have ever read."—New York Times bestselling author, Penelope Ward If I closed my eyes, I could still see them—all blonde sunshine, ocean-blue eyes, and long limbs. The glint of Lake's gold bracelet. Pink cotton candy on Tiffany's tongue. My scenery may have changed from heaven to hell, but some things never would: my struggle to do right by both sisters. To let Lake soar. To lift Tiffany up. The sacrifices I made for them, I made willingly. A better man would've walked away by now, but I never claimed to be any good. I only promised myself I'd keep enough distance. If I'd learned one thing from my past, it was that love came in different forms. You could love passionately, hurt deep, die young. Or you could provide the kind of firm, steady support someone else could lean on. Lake was everything I wanted, and nothing I could ever have. I was nobody before I knew her and a criminal after. The way to love her was to let her shine—even if it would be for

Harper Wilde is sitting on the beach, minding her own business when a huge, muscular Kindred warrior with black hair and blazing white eyes demands that she accompany him into the future. Harper has no choice--she is dragged against her will into a dystopian nightmare--the world as it might become if

something isn't changed. And that something that needs changing is Harper herself. As a ten'sora, she is of special interest to the Hive, an insectile race of beings bent on taking over the Earth. By using her, they can conquer both the Mother Ship and the human race. Unless Harper is altered so the Hive cannot make use of her, the grim future she finds herself in will become reality. Shad is a Shadow Twin--a Kindred male destined always to walk alone with very little chance of forming a bond with a female. Yet, he alone is able to make use of the looper--a time travel device which allows him to move back and forth between the past and the future to try and save Harper. Falling in love with her isn't part of the plan but the big Kindred can't help himself. But he knows he must put his feelings aside and do what is necessary to change the past...unless he wants the future to Vanish forever.
