Youthwalk - Walk Thru the Bible, 2011-05-24

Navigating today's world is hard—not only as a teenager, but as a Christian. Youthwalk tackles topics like insecurity, intolerance, peer pressure, racism, and depression, connecting biblical truth to real-life issues. And with six months of devotions and supplemental information on each subject, you can explore God's truth on the issues you face and put that knowledge to work in your life and the world around you. Every day, we face issues that are hard to deal with—from feeling insecure due to recent school shootings, encountering prejudice in our community, dealing with depression or loneliness, and more. It's easy to feel overwhelmed or even powerless. But there is a way forward. In this edition of Youthwalk, twenty-six issues are explored and broken down. Each topic begins with an introductory page, followed by five devotional readings—one for each weekday—that breaks down the subject in different ways. And each devotion includes: an opening reading to help you think about the topic a Bible reference that points to what the Bible says about it a breakdown of what that passage means today and an application to your life. Each day's reading is short and easy to work into your routine, helping you find answers to your most-pressing questions and problems. Youthwalk: can be used as a traditional devotional or used as an encouraging reference on certain topics when you need guidance and comfort is great for teens 13 to 18 has informational pages—such as little-known facts, real-life stories, and attributes of God—that work alongside each weeks' topic to provide more detail and application to the individual readings

Universal Usability - Jonathan Lazar 2007-06-05

Universal Usability is the concept of designing computer interfaces that are easy for all users to utilize. It is a concept which many decry as elusive, impossible, or impractical, but this book, which addresses usability issues for a number of diverse user groups, proves that there is no problem in interface design that cannot be solved, or at least improved upon. Individuals with cognitive, motor, and perceptual impairments, as well as older, younger, and economically disadvantaged users, face a variety of complex challenges when interacting with computers. However, with user involvement, good design practice, and thorough testing, computer interfaces can be successfully developed for any user population. This book, featuring key chapters by Human-Computer Interaction luminaries such as Jonathan Lazar, Ron Baecker, Allison Druin, Ben Shneiderman, Brad Myers and Jenny Preece, examines innovative and groundbreaking research and practice, and provides a practical overview of a number of successful projects which have addressed a need for these specific user populations. Chapters in this book address topics including age diversity, economic diversity, language diversity, visual impairment, and spinal cord injuries. Several of these trailblazing projects in the book are amongst the first to examine usability issues for users with Down Syndrome, users with Amnesia, users with Autism Spectrum Disorders, and users with Alzheimer's Disease, and coverage extends to projects where multiple categories of needs are addressed. These chapters represent real-world projects, being carried out on different continents. The authors of the chapters also represent diversity—interface researchers and software developers in university, industrial, and government settings. In the practical spirit of the book, chapter authors provide guidelines and suggestions for those attempting similar projects, as well as implications for different stakeholders such as policymakers, researchers, and designers. Ideal for students of HCI and User Interface Design, and essential reading for usability practitioners, this fascinating collection of real-world projects demonstrates that computer interfaces can truly be designed to meet the needs of any category of user.

Claiming Disability - Simi Linton 1998-01-01

From public transportation and education to adequate access to buildings, the social impact of disability has been felt everywhere since the passage of the Americans with Disabilities Act in 1990. And a remarkable groundswell of activism and critical literature has followed in this wake. Claiming Disability is the first comprehensive examination of Disability Studies as a field of inquiry. Disability Studies is not simply about the variations that exist in human behavior, appearance, functioning, sensory acuity, and cognitive processing but the meaning we make of those variations. With vivid imagery and numerous examples, Simi Linton explores the divisions society creates—the normal versus the pathological, the competent citizen versus the ward of the state. Map and manifesto, Claiming Disability overturns medicalized versions of disability and establishes disabled people and their allies as the rightful claimants to this territory.

Stark - Ben Elton 2008-12-26

Stark is a secret consortium with more money than God, and the social conscience of a dog on a croquet lawn. What's more, it knows the Earth is dying. Deep in Western Australia where the Aboriginals used to milk the trees, a planet-sized plot is taking shape. Some green freaks pick up the scent: a pommie poseur; a brain-fried Vietnam vet; Aboriginals who have lost their land...not much against a conspiracy that controls society. But EcoAction isn't in society: it just lives in the same place, along with the cockroaches. If you're facing the richest and most disgusting scheme in history, you have to do more than stick up two fingers and say 'peace'.

Emmanuel's Book - Pat Rodegast 2011-03-23

Here is the revealing underground classic, a work that stands beside the "Seth" books as a delightful and invaluable guide to our inner spirit and our outer world. Emmanuel speaks to us through Pat Rodegast and shares his wisdom and insights on all aspects of life. Beautifully written and illustrated, *Emmanuel's Book I* is to be treasured, enjoyed and passed on to a friend. Emmanuel says: "The gifts I wish to give you are my deepest love, the safety of truth, the wisdom of the universe and the reality of God The issue of whether there is a Greater Reality or not, for me at least, has been settled. I know that there is. So I will speak to you from the knowing that I possess." Ram Dass, in the introduction, says: "Being with Emmanuel one comes to appreciate the vast evolutionary context in which our lives are being lived And at each moment we are at just the right place in the journey. As Emmanuel points out, 'Who you are is a necessary step to being who you will be.'"

Forever Burn - Trinity Lemm 2020-05-10

Tatum Everley is a freshman at Western Michigan University. Due to an emotionally and psychologically abusive past relationship, Tate struggles from Complex-Post Traumatic Stress Disorder. She has been working on controlling her symptoms and flashbacks, but when she meets Axel Burne at a fraternity party, who is notorious for sleeping around and getting into fights, she tries her best to dodge the bullet. Axel starts to become intrigued by Tate, but she's better off choosing Lucas- the sweet guy who has been trying to take her out since orientation. But even though Lucas is the better option, Axel keeps reappearing. Tate continues to try to stay away from him, but it starts becoming harder to, and as she gets closer to him, things start to get way out of hand. If Tate wants her happy ending and her sanity intact, then she has to push through the hardships and maintain control over her disorder.

Assistive Technology for the Hearing-impaired, Deaf and Deafblind - Marion A. Hersh 2006-04-28

Affirmative legislative action in many countries now requires that public spaces and services be made accessible to disabled people. Although this is often interpreted as access for people with mobility impairments, such legislation also covers those who are hearing or vision impaired. In these cases, it is often the provision of advanced technological devices and aids which enables people with sensory impairments to enjoy the theatre, cinema or a public meeting to the full. *Assistive Technology for the Hearing-impaired, Deaf and Deafblind* shows the student of rehabilitation technology how this growing technical provision can be used to support those with varying reductions in auditory ability and the deafblind in

modern society. Features: instruction in the physiology of the ear together with methods of measurement of hearing levels and loss; the principles of electrical engineering used in assistive technology for the hearing impaired; description and demonstration of electrical engineering used in hearing aids and other communications enhancement technologies; explanation of many devices designed for every-day living in terms of generic electrical engineering; sections of practical projects and investigations which will give the reader ideas for student work and for self teaching. The contributors are internationally recognised experts from the fields of audiology, electrical engineering, signal processing, telephony and assistive technology. Their combined expertise makes *Assistive Technology for the Hearing-impaired, Deaf and Deafblind* an excellent text for advanced students in assistive and rehabilitation technology and to professional engineers and medics working in assistive technology who wish to maintain an up-to-date knowledge of current engineering advances.

The Winning Way - Brian Tracy 2014-04-15

By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival have the element of success in common. To ascend to a winning position, you need a goal, a desire to achieve it, and the qualities of discipline, perseverance and action to attain it. Having your goal and setting yourself up to achieve your goal is the first step in the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. That is why the knowledge shared by the *CelebrityExperts(r)* in this book will be of importance to you. The advice and suggestions of these *CelebrityExperts(r)* are based on their experiences - both their accomplishments and their shipwrecks. The knowledge they share will allow you to make plans that can propel you in the right direction. That is the function of a mentor - to guide you where you are going and to advise what to avoid. If you wish to develop *The Winning Way* to your goals, read on... You will never win if you never begin. Helen Row

Assistive Technology - C. Sik-Lányi 2015-08-27

Assistive Technology (AT) is the term used to describe products or technology-based services which support those with disabilities or other limitations to their daily activities, enabling them to enjoy a better quality of life. This book presents the proceedings of the 13th European Conference on the Advancement of Assistive Technology (AAATE 2015), held in Budapest, Hungary in September 2015. This biennial conference has established itself as a leading forum in the transdisciplinary area of Assistive Technology, providing a unique platform for the gathering of experts from around the world to review progress and challenges in the interdisciplinary fields which contribute to AT, such as research, development, manufacturing, supply, provision and policy. The theme of the 2015 conference is 'Attracting new areas and building bridges', and this book contains 138 reviewed papers and 28 poster presentations delivered at the conference, covering AT themes as diverse as aging, blindness, mobility, assisted living and accessibility for people with dementia and cognitive impairment. Offering a current overview of many aspects of AT, this book will be of interest to all those - from researchers and manufacturers to healthcare professionals and end-users - whose work or daily life involves the relationship between technology and disability.

The Shag Incident - Stephanie Johnson 2012-06-01

Darkly satirical and wickedly funny, this prize-winning novel takes a tilt at a wide range of contemporary matters. What happened that connects a diverse group of characters, along with an ex-All Black and an elephant? The people who committed the act of revenge in 1985 thought it was perfectly executed. Twenty years on, the truth is revealed, the truth about the deception that started it all. From sexual stereotyping to militant feminism, the machismo of the All Blacks to new age beliefs, psychiatry to womb burial and naming ceremonies, nothing is safe from the razor-sharp wit of this superb writer. This novel won the Deutz Medal for Fiction in the Montana New Zealand Book Awards.
