*Celebrating 100 Years of Female Fellowship of the Geological Society:*

*Discovering Forgotten Histories* - C.V. Burek 2021-03-18

The Geological Society of London was founded in 1807. At the time, membership was restricted to men, many of whom became well-known names in the history of the geological sciences. On the 21 May 1919, the first female Fellows were elected to the Society, 112 years after its formation. This Special Publication celebrates the centenary of that important event. In doing so it presents the often untold stories of pioneering women geoscientists from across the world who navigated male-dominated academia and learned societies, experienced the harsh realities of Siberian field-exploration, or responded to the strategic necessity of the 'petroleum girls' in early American oil exploration and production. It uncovers important female role models in the history of science, and investigates why not all of these women received due recognition from their contemporaries and peers. The work has identified a number of common issues that sometimes led to original work and personal achievements being lost or unacknowledged, and as a consequence, to histories being unwritten.

**Experiments in Plant-hybridisation** - Gregor Mendel 1925

*New Scientist* - 1989-09

Trails in Academic and Administrative Leadership in Kenya - Michieka,

Ratemo Waya 2017-05-03

Scholars, especially those interested in understanding how leadership has inhibited academic freedom and hindered effectiveness of institutions of higher learning have for long been engaged by the very important manner in which governance and leadership of higher education institutions in Africa is constituted and managed. The fact that there has been a dearth of work based on the experiences of those who have served as university leaders has created a major gap. Questions remain on how leaders of higher education institutions are identified, how they are prepared, the personal predispositions that individuals bring to the exercise of such positions and their personal experiences regarding what energizes or inhibits the performance of their work. Until recently, presidents in most African countries served as chancellors of public universities, identification of those who served as university leaders was largely a political process. But much has changed, with most countries establishing oversight bodies and the overall governance of higher education institutions divorced from the day-to-day political

processes. Trails in Academic and Administrative Leadership in Kenya provides a personal account of the experiences in higher education leadership from an individual whose tenure in leadership straddled the two eras. In this book, Prof. Michieka provides an account of how his early education prepared him for roles in academic and institutional leadership in Kenya. The author shares his experiences on the trails he had to navigate as an academic, a vice-chancellor and a chairperson of university council at a time when universities in Kenya were transiting from extreme government administrative control to a greater degree of operational autonomy. Readers will find in this work thought-provoking insights on how leaders of higher education institutions in Kenya have had to balance between demands of the political system and the need to safeguard academic traditions in the everyday management of the institutions.

Botany for Degree Students - Semester III [BSc Programme] - BP Pandey

This textbook has been designed to meet the needs of B.Sc. Third Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints students with the tissue system, anatomy of stems, roots & leaves and secondary growth. It explains adaptive & protective systems and structural organization of a flower. Besides, the book also covers pollination, fertilization, development of endosperm and embryo, apomixis and polyembryony. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.

**Chemical News and Journal of Industrial Science** - 1775

Botany for Degree Students Bryophyta - Anupama Krishna 2011

For the students of undergraduate and postgraduate students. All the diagrams have been made of several colours making these more attractive. As per the new format of question papers, three types of questions -Essay type, Short answer type and Objective type Questions have been added.

*Interview Questions and Answers* - Richard McMunn 2013-05

**History of Soybeans and Soyfoods in Wisconsin (1883-2021)** -

William Shurtleff; Akiko Aoyagi 2021-09-28

The world's most comprehensive, well documented, and well illustrated book on this subject. With extensive subject and geographic index. 188 photographs and illustrations - mostly color. Free of charge in digital PDF format.

**Botany for BSc Students - Sem I [NEP-KA]** - Pandey B.P.

This textbook has been designed to meet the needs of B.Sc. Third Semester students of Botany as per Common Minimum Syllabus prescribed for all Uttar Pradesh State Universities and Colleges under the recommended National Education Policy 2020. Maintaining the traditional approach to the subject, the book provides strong conceptual understanding and also helps in developing scientific outlook of the students. It comprehensively covers two papers namely, Flowering Plants Identification & Aesthetic Characteristics and Plant Identification

Technology. The book acquaints the students with various approaches to plant taxonomy and classification of Angiosperms. It also covers diverse taxonomic resources, reference materials, herbarium collections and publications. Practical part, covering Plant Identification Technology, has been presented systematically to help students learn taxonomically diverse array of native plants.

**A Lab of One's Own** - Patricia Fara 2018

Female scientists, doctors, and engineers experienced independence and responsibility during the First World War. Suffragists including Virginia Woolf's sister, Ray Strachey, aligned themselves with scientific and technological progress, and mobilized women to enter conventionally male domains such as engineering and medicine. Profiles include mental health pioneer Isabel Emslie, chemist and co-inventor of tear gas Martha Whiteley, Scottish army doctor Mona Geddes, and botanist Helen Gwynne Vaughan. Though suffragist Millicent Fawcett declared triumphantly that "the war revolutionized the industrial position of women. It found them serfs, and left them free," the truth was very different. Although women had helped the country to victory and won the vote for those over thirty, they had lost the battle for equality. Men returning from the Front reclaimed their jobs, and conventional hierarchies were re-established. Fara examines how these pioneers, temporarily allowed into an exclusive world before the door slammed shut again, paved the way for today's women scientists.--

*Botany for Degree Students - Year I* - BP Pandey 2007

The present book is for B.Sc(I) yr, strictly based on UGC Model syllabus for all Indian Universities. Each unit or chapter as the case may be is followed by various types of questions, such as very short, short, long answer questions, digrammatic questions and multiple choice questions, asked repeatedly questions have been included.
