IBM Cognos Business Intelligence V10.1:
Intelligence Unleashed - Dean Browne
2010-10-25

Organizations are pressured constantly to understand and react quickly to information. In addition, the complexity and volumes of data for all aspects of the environments in which organizations operate is increasing. Markets,

regulatory environments, customer and supplier data, competitive information, and internal operational information all impact how data is viewed and interpreted. With a capable and efficient business intelligence (BI) solution, all levels of an organization can receive information how, when, and where they need it to make faster and better aligned decisions. Every user

can have access to all the capabilities of the BI solution, and often organizations can determine a user's business need to access information using typical characteristics that are defined by that user's role. Many organizations often satisfy this complexity and these diverse demands with a number of point solutions. With IBM® Cognos® Business Intelligence (BI), you can satisfy needs throughout the user community and ensure that everyone can work and collaborate from a consistent set of data. In addition, IT is simplified with fewer components to deploy, manage, and maintain. Organizations need to make the most of a workforce that is increasingly driven to multi-task, network, and collaborate. IBM Cognos BI delivers analytics that everyone in the organization can use to answer key business questions. This IBM Redguide™ publication highlights features of IBM Cognos BI version 10.1.

Stepping up to the Second Year at

University - Clare Milsom 2014-11-20

Programmes in higher education tend to focus attention on the student's first year (because of concerns about student transition and retention)

and on their final year (because of student exiting for their future careers). The middle year(s) of programmes receive relatively little attention which can often lead to a slump in student development at a crucial point in their studies. Stepping up to the Second Year at University provides practical advice that can be implemented by staff throughout higher education institutions. Rather than providing a set of prescriptions to be slavishly implemented, it prompts practitioners to think constructively about curriculum design and delivery, and about maximising student potential within the context of their particular institution. Amongst the questions asked in this book are: In what way do students' perceptions of their experience shift as they progress through the first two years of study? How do psychological factors bear on student engagement and performance in the second year? What in the second-year curriculum might need greater attention? How can the analysis of institutional data help? This

book, builds on critiques existing international research on the mid-years experience and also features evidence from a significant new research project from Liverpool John Moores University, provides a number of starting points for institutions' enhancement activities as they seek to make the experience of their students as rewarding as possible. It is a must read for institutional managers of higher academic programmes, higher education practitioners and anyone interested in the development of teaching at higher education level.

Sap Bw All-in-One Reporting Solutions - Robert Duprey Ph. D. 2011-10

SAP BW Certification - Catherine M. Roze
2003-01-21

Provides an overview to the exam's topics, including a "Need to Know" list that identifies areas that must be understood in-depth. Includes exercises that can be performed, usually with a smallest BW server. Contains practice test questions that assess the reader's knowledge of the current exam topics. Serves as a complement to the classroom training provided by SAP.
