Designing an Anthropology Career - Sherylyn H. Briller
2020-11-19

Sherylyn Briller and Amy Goldmacher's *Designing an Anthropology Career: Professional Development Exercises*, Second Edition provides undergraduates, graduate students and career changers with the tools they need to identify their professional goals and follow

through on them. Part I establishes a framework for how to design -- or update -- a career in anthropology or related fields. The authors discuss how social science is needed now more than ever and offer ideas for how to find employment in many different realms. Part II contains a series of professional development exercises to help workbook users articulate their personal and professional histories, special abilities and career goals. Each exercise includes an example from an anthropology student or professional anthropologist as a model for completion. Doing these customizable exercises will help people turn their love of anthropology and existing knowledge and skills into meaningful and lasting careers.

Doing Qualitative Research Online - Janet E. Salmons

Lecturers, request your electronic inspection copy
Qualitative researchers can now connect with participants online to collect deep, rich data and generate new

understandings of contemporary research phenomena. Doing Qualitative Research Online gives students and researchers the practical and scholarly foundations needed to gain digital research literacies essential for designing and conducting studies based on qualitative data collected online. The book will take a broad view of methodologies, methods and ethics, covering: Ethical issues in research design and ethical relationships with participants Designing online qualitative studies Collecting qualitative data online through interviews, observations, participatory and arts-based research and a wide range of posts and documents. Analyzing data and reporting findings Written by a scholar-practitioner in e-learning and online academia with 15 years' experience, this book will help all those new to online research by providing a range of examples and illustrations from published research. The text and accompanying materials will offer discussion and assignment ideas for ease

of adoption.

Guidebook for Social Work Literature Reviews and Research Questions -

Rebecca L. Mauldin 2020

Book Description: This open educational resource is currently in development. Please be aware that there might be updates throughout the semester as we continue adding and editing content, testing for accessibility, and incorporating feedback from pilot semester(s). If you need an accessibility accommodation or have questions about the use of this text, please contact OER services at pressbooks@uta.edu. As an introductory textbook for social work students studying research methods, this book guides students through the process of writing a literature review and determining research questions for a research project. Students will learn how to discover a researchable topic that is interesting to them, examine scholarly literature, and write a literature review. This text is currently in the pilot stage Fall

2019 with an anticipated publication date of January 2020. We recommend that you use the Chrome web browser at this time. Please be aware that there might be some cosmetic tweaks throughout the semester as we continue testing for browser support, accessibility, and export types.

Lawyers at Work - Herbert M. Kritzer 2015-03-11

This collection of articles and essays by Herbert Kritzer draws on his extensive research related to lawyers and legal practice conducted over the last 35 years. That research has applied existing theoretical frameworks and developed innovative ways of thinking about how to understand what it is that lawyers do. The chapters reflect the wide range of both qualitative and quantitative research methods he has employed, and draw on his work on the Civil Litigation Research Project, a massive study funded by the U.S. Department of Justice under the Carter administration, and continues through subsequent studies of lawyer-client

relationships in Canada, contingency fee legal practice, and insurance defense practice. This book is for scholars and practitioners interested in understanding the work of lawyers in day-to-day litigation-like settings—and those concerned about what the future might hold for the structure of the legal profession and the nature of legal practice. “Lawyers at Work is a masterful collection, by one of the leading and award winning empirical researchers on legal institutions and the legal profession today, on the ‘black box’ of law practice. Spanning decades of research, Professor Kritzer presents data and findings on how lawyers bill, develop relationships with clients and opponents, manage scientific expertise, negotiate, and conduct their everyday work in a wide variety of case types. He explores and exposes the differences in both theories and data about the legal profession from virtually every major study there is on what lawyers actually do. If anyone

wants to know about the real practices of lawyers in the past and present, and with important projections about the future, this is a must read. We can speculate about what lawyers really do, but Kritzer has the actual ‘facts.’” — Carrie Menkel-Meadow, Chancellor’s Professor of Law and Political Science, University of California, Irvine, and A.B. Chettle Professor of Law, Dispute Resolution and Civil Procedure, Georgetown University Law Center

“Through wide-ranging field research over 35 years Kritzer has done more than anyone to document the craft of lawyers at work. This extraordinary compilation finds the whole in a professional lifetime of research, cementing Kritzer’s reputation as pioneer and master of empirical legal research.” — Tom Baker, William Maul Measey Professor of Law and Health Sciences, University of Pennsylvania Law School “Bert Kritzer has long been recognized as one of the most astute scholarly commentators on the U.S. legal

profession. This collection of papers allows readers to see his body of work as a whole, and to appreciate the unique combination of quantitative and qualitative skills on which it rests. It is essential reading for anyone who wants to cut through the myths that pervade debates about policy and practice in civil justice.” — Robert Dingwall, Nottingham Trent University, UK

Women's Indian Captivity Narratives - Various
1998-11-01

Enthralling generations of readers, the narrative of capture by Native Americans is arguably the first American literary form dominated by the experiences of women. The ten selections in this anthology span the early history of this country (1682-1892) and range in literary style from fact-based narrations to largely fictional,

spellbinding adventure stories. The women are variously victimized, triumphant, or, in the case of Mary Jemison, permanently transculturated. This collection includes well known pieces such as Mary Rowlandson's "A True History" (1682), Cotton Mather's version of Hannah Dunstan's infamous captivity and escape (after scalping her captors!), and the "Panther Captivity", as well as lesser known texts. As Derounian-Stodola demonstrates in the introduction, the stories also raise questions about the motives of their (often male) narrators and promoters, who in many cases embellish melodrama to heighten anti-British and anti-Indian propaganda, shape the tales for ecclesiastical purposes, or romanticize them to exploit the growing popularity of sentimental fiction in order to boost sales. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin

Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators. *Beyond the Case* - Corey M. Abramson 2020-01-22
The social sciences have seen a substantial increase in comparative and multi-sited ethnographic projects over the last three decades. Yet, at present, researchers seeking to design comparative field projects have few scholarly works detailing how comparison is conducted in divergent ethnographic approaches. In *Beyond the Case*, Corey M. Abramson and Neil Gong have gathered together several experts in field research to address these issues by showing how practitioners employing contemporary iterations of ethnographic traditions such as phenomenology, grounded

theory, positivism, and interpretivism, use comparison in their works. The contributors connect the long history of comparative (and anti-comparative) ethnographic approaches to their contemporary uses. By honing in on how ethnographers render sites, groups, or cases analytically commensurable and comparable, *Beyond the Case* offers a new lens for examining the assumptions, payoffs, and potential drawbacks of different forms of comparative ethnography. [Grey Matters](#) - Nancy Marlett 2010

Many aging adults are motivated to undertake research projects in later life or even return to university after retirement. *Grey Matters* is the result of a pilot project developed to study the effectiveness of collaborative research involving seniors and marks a major step in making collaboration between seniors, academic researchers, and community researchers a reality. Due to the success of the project, the authors were

encouraged to make their model available both to seniors interested in undertaking their own research and to those hoping to involve seniors in collaborative research. This guide provides a helpful framework for making the most of research projects by and with seniors, including sections on such techniques as narrative interviews, focus groups, and surveys.

[Constructing Social Problems](#) - Malcolm Spector 2017-07-05

There is no adequate definition of social problems within sociology, and there is not and never has been a sociology of social problems. That observation is the point of departure of this book. The authors aim to provide such a definition and to prepare the ground for the empirical study of social problems. They are aware that their objective will strike many fellow sociologists as ambitious, perhaps even arrogant. Their work challenges sociologists who have, over a period of fifty years, written treatises on social problems, produced

textbooks cataloguing the nature, distribution, and causes of these problems, and taught many sociology courses. It is only natural that the authors' work will be viewed as controversial in light of the large literature which has established a "sociology of" a wide range of social problems—the sociology of race relations, prostitution, poverty, crime, mental illness, and so forth. In the 1970s when the authors were preparing for a seminar on the sociology of social problems, their review of the "literature" revealed the absence of any systematic, coherent statement of theory or method in the study of social problems. For many years the subject was listed and offered by university departments of sociology as a "service course" to present undergraduates with what they should know about the various "social pathologies" that exist in their society. This conception of social problems for several decades has been reflected in the substance and quality of the literature dominated by textbooks. In

'Constructing Social Problems', the authors propose that social problems be conceived as the claims-making activities of individuals or groups regarding social conditions they consider unjust, immoral, or harmful and that should be addressed. This perspective, as the authors have formulated it, conceives of social problems as a process of interaction that produces social problems as social facts in society. The authors further propose that this process and the social facts it produces are the data to be researched for the sociology of social problems. This volume will be of interest to those concerned with the discipline of sociology, especially its current theoretical development and growth.

Encyclopedia of Social Problems - Vincent N. Parrillo
2008-05-22

From terrorism to social inequality and from health care to environmental issues, social problems affect us all. The Encyclopedia will offer an interdisciplinary perspective

into these and many other social problems that are a continuing concern in our lives, whether we confront them on a personal, local, regional, national, or global level.

Methodological Thinking - Donileen R. Loseke 2016-01-29 Focused on the underlying logic behind social research, *Methodological Thinking: Basic Principles of Social Research Design* by Donileen R. Loseke encourages readers to understand research methods as a way of thinking. The book provides a concise overview of the basic principles of social research, including the characteristics of research questions, the importance of literature reviews, variations in data generation techniques, and sampling. The Second Edition includes a revised chapter on research foundations, with focus on the philosophy of science and ethics; an emphasis on critical thinking; additional attention to evaluating research; and a new selection of briefer, multidisciplinary journal articles designed to be

accessible to a wide variety of readers.

Narrative Productions of Meanings - Donileen R.

Loseke 2019-04-15

In *Narrative Productions of Meanings: Exploring the Work of Stories in Social Life*, Donileen Loseke examines the importance of stories in an anti-science, anti-fact era where heterogeneity, rapid change, complexity, and moral fragmentation combine to create a multitude of personal, social, and political problems surrounding meaning. The book's basic argument is that, within such a world, narrative productions of meaning are particularly important because stories can appeal simultaneously to thinking and feeling and moral evaluation, and because they can do this in ways that have cultural, interactional, and personal dimensions. *Narrative Productions of Meaning* develops a framework for social science examinations of narrative; it outlines relationships between stories, storytelling, and culture, and it

explores the characteristics of several types of stories including self stories that create coherence from the chaos of personal experience, stories that persuade mass audiences that public resources are required to resolve intolerable conditions, and stories that justify the contents of public policy and the organization of social services. It concludes with issues about relationships between stories and the processes of democratic politics. *Narrative Productions of Meaning* demonstrates the ways in which stories create meaning and how this meaning shapes both subjective understandings and material realities. In multiple ways, this analysis crosses common divides: It draws from literature spanning multiple disciplines; it treats thinking, feeling, and moral evaluation as inseparable; it bridges cultural and social psychological perspectives; it demonstrates relationships between story structure and the work people do with

stories.

Affective Communities in World Politics - Emma Hutchison
2016-03-11

A systematic examination of emotions and world politics, showing how emotions underpin political agency and collective action after trauma. *Handbook of the Sociology of Emotions* - Jan Stets
2007-02-25

Since the 1970s, the study of emotions moved to the forefront of sociological analysis. This book brings the reader up to date on the theory and research that have proliferated in the analysis of human emotions. The first section of the book addresses the classification, the neurological underpinnings, and the effect of gender on emotions. The second reviews sociological theories of emotion. Section three covers theory and research on specific emotions: love, envy, empathy, anger, grief, etc. The final section shows how the study of emotions adds new insight into other subfields of sociology: the workplace, health, and

more.

Thinking About Social Problems - Donileen Loseke
2017-07-05

The new second edition of this distinctive and widely adopted textbook brings into the classroom an overview of how images of social problems can shape not only public policy and social services, but also the ways in which we make sense of ourselves and others. It introduces two primary changes. First, some attention is devoted to the "new social movements" that emphasize social change through identity transformation rather than through structural change. Second, the text now also looks more closely at the importance of emotions in constructing public consciousness of social problems. When the first edition was published, Teaching Sociology noted, "Loseke does a superb job explaining the relationship between sociology and social problems in a text that is very well researched and engaging, yet with tremendous attention to detail and accuracy... [W]ould provide a

solid base for any social problems class." Contemporary Sociology wrote that the book is "engagingly well written in a personal, unpretentious style, and well informed by the author's knowledge of the professional literature."

Social Problems - Donileen Loseke
2017-07-05

This collection of focused essays is directed at several levels of students of social problems. It is accessible to the uninitiated, who are not familiar with the constructionist literature, and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives. Some readings focus on the construction of problems by scientists and other professionals; others examine the work of social activists, mass media, and social service personnel. Among the topics included are studies of social inequalities and individual deviance; a comparison of the images of social problems in

the United States with those in other countries; and an examination of the importance of politics and power in constructing public images of social problems. Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems. Yet constructionists' impact on the teaching of social problems has been far less dramatic. Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives. Just as the first social problems textbooks did almost a century ago, textbooks continue to present a series of unrelated chapters, each devoted to a particular social problem. *Social Problems* is an effort at systematic analysis rather than random thought on the subject. *Social Problems* presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems. While these articles can be read alone, the editors

have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke's *Thinking about Social Problems*, an accessible introduction to constructionist approaches. At the same time, some instructors who use this edited collection might wish to provide th

Doing Human Service Ethnography - Jacobsson, Katarina 2021-07-22

This book shows researchers how ethnography can be carried out within human service settings, providing an invaluable guide on how to apply ethnographic creativeness and offering a more humanistic and context-sensitive approach to generating valid knowledge about today's service work.

[Anthropological Research](#) - John J. Poggie 1992-01-01

The authors of this book share a common assumption about anthropology--that replicable and systematic procedures of data collection and analysis are essential requirements for building useful cultural theory.

They view cultural theory as both an aid to understanding sociocultural phenomena, and as an aid in changing existing social conditions. This book focuses on five specific themes representing a set of principles for conducting research: the importance of intra-cultural variation; the blending of qualitative and quantitative approaches; the search for micro/macro levels of generalization; the innovative matching of methodology to research problems; and the practical or applied merit of systematically generated and evaluated theory. It contributes to scientific anthropology and shows that the credibility and utility of anthropological research in policy matters is enhanced by scientific research methodology.

Doing Naturalistic Inquiry - David A. Erlandson 1993-07-07
Based on the theoretical work of Lincoln and Guba, this practical text is designed to help new researchers apply the constructivist paradigm. The authors show how these ideas shape the practice of

conducting alternative paradigm research. Covering the research process from design, through data-collection analysis and presentation, as well as important issues generally minimized in positivist research texts - ethics, trustworthiness and authenticity - cases from a wide variety of disciplines demonstrate the efficacy of the methods described.

Writing Your Doctoral Dissertation or Thesis

Faster - E. Alana James
2013-11-07

A doctoral dissertation is arguably the most important journey that students will embark upon in their professional careers, so smart travelers will want E. Alana James and Tracesea H. Slater's *Writing Your Doctoral Dissertation or Thesis Faster: A Proven Map to Success* at their fingertips. James and Slater identify the key places and challenges that create extra stress during the dissertation process, and offer effective strategies and tools to address those challenges and ensure academic success. Their map walks readers through each step of the process, including:

- determining the research

topic, • choosing appropriate methods, • turning a hypothesis into a study, • completing a literature review, • writing and defending a proposal, • collecting and analyzing data, • writing up the study, and • ultimately defending the dissertation.

Building on years of experience with doctoral students, the authors provide a comprehensive, yet easy-to-use tool that encourages student reflection; includes student stories, hints, and writing tips; and provides end-of-chapter checklists and ideas for incorporating social media. With the proven techniques and guidance of this indispensable and applied book, doctoral students will finish their thesis or dissertation—faster!

[First-Generation College Students](#) - Lee Ward
2012-07-10

FIRST-GENERATION COLLEGE STUDENTS "...a concise, manageable, lucid summary of the best scholarship, practices, and future-oriented thinking about

how to effectively recruit, educate, develop, retain, and ultimately graduate first-generation students." —from the foreword by JOHN N. GARDNER First-generation students are frequently marginalized on their campuses, treated with benign disregard, and placed at a competitive disadvantage because of their invisibility. While they include 51% of all undergraduates, or approximately 9.3 million students, they are less likely than their peers to earn degrees. Among students enrolled in two-year institutions, they are significantly less likely to persist into a second year. First-Generation College Students offers academic leaders and student affairs professionals a guide for understanding the special challenges and common barriers these students face and provides the necessary strategies for helping them transition through and graduate from their chosen institutions. Based in solid

research, the authors describe best practices and include suggestions and techniques that can help leaders design and implement effective curricula, out-of-class learning experiences, and student support services, as well as develop strategic plans that address issues sure to arise in the future. The authors offer an analysis of first-generation student expectations for college life and academics and examine the powerful role cultural capital plays in shaping their experiences and socialization. Providing a template for other campuses, the book highlights programmatic initiatives at colleges around the country that effectively serve first-generation students and create a powerful learning environment for their success. First-Generation College Students provides a much-needed portrait of the cognitive, developmental, and social factors that affect the college-going experiences and retention rates of this growing population of college students.

Constructing Grounded Theory - Kathy Charmaz 2006-01-13
`Grounded theory is a highly influential way of working with qualitative data and Kathy Charmaz is a major player, both innovative and fluent. This book is a model student text: lively, carefully argued and full of vivid illustrations. Beginning students and professional researchers will find it to be required reading' - David Silverman, Professor Emeritus,

Sociology Department,
Goldsmiths College and
Visiting Professor,
Management Department,
King's College, University of
London Kathy Charmaz is one
of the world's leading theorists
and exponents of grounded
theory. In this important and
essential new textbook, she
introduces the reader to the
craft of using grounded theory
in social research, and provides
a clear, step-by-step guide for
those new to the field. Using
worked examples throughout,
this book also maps out an
alternative vision of grounded
theory to that put forward by
its founding thinkers, Glaser
and Strauss. To Charmaz,
grounded theory must move on
from its positivist origins and
must incorporate many of the
methods and questions posed
by constructivists over the past
twenty years to become a more
nuanced and reflexive practice.
Essential reading for students,
new researchers and seasoned
social scientists alike, this book
is one of those rare things, a
textbook that is both accessible
to those new to the field but

also one that has important
things to say about the nature
of social enquiry itself.

Narrative as Topic and Method in Social Research - Donileen R. Loseke 2021-11-23

Narrative research is an increasingly popular qualitative method across the social sciences. **Narrative as Topic and Method in Social Research** has two purposes: firstly to show students and researchers how to do research on narrative topics, particularly on questions about narrative productions of meaning, and secondly to explain some fundamentals of research methods suitable for exploring these topics. In a final part of the book, author Donileen R. Loseke provides empirical examples of how such research is done. These chapters use small amounts of data to examine the analytic tasks of designing research questions, finding appropriate data, sampling decisions, contextualization, data categorization, and communicating study findings. **Research Methods** - Theresa L. White 2012-05-03 Now in its 9th Edition, **RESEARCH METHODS** provides psychology students with a scientific approach to understanding their field of

study and the world in general. The text's logical, step-by-step coverage is the result of decades of author experience. It includes all of the stages of the research process, from selecting the project and searching for literature, to choosing a protocol and getting published. Utilizing a wide variety of problems from psychological literature, **RESEARCH METHODS** also illustrates the many creative ways that psychology professionals design and conduct effective research. The Literature Review -

Diana Ridley 2012-07-31

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in

writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

Completing Your Qualitative Dissertation -

Linda Dale
Bloomberg 2015-11-05

Addressing one of the key challenges facing doctoral students, *Completing Your Qualitative Dissertation* by Linda Dale Bloomberg and Marie Volpe fills a gap in qualitative literature by offering comprehensive guidance and practical tools for navigating each step in the qualitative dissertation journey, including the planning, research, and writing phases. Blending the conceptual, theoretical, and practical, the book becomes a dissertation in action—a logical

and cohesive explanation and illustration of content and process. The Third Edition maintains key features that distinguish its unique approach and has been thoroughly updated and expanded throughout to reflect and address recent developments in the field.

Current Controversies on Family Violence - Donileen R. Loseke 2005

Now in its Second Edition, *Current Controversies on Family Violence* contains thoughtful--often heated--discussions that highlight the most current controversies, research, and policy directions in the family violence area. This volume includes chapters by academic and public policy researchers, therapists, lawyers, victim advocates and educators. Some of the controversies in the First Edition have been deleted while new ones have been added. Chapters in this Second Edition also are shorter and more accessible to readers who are not already experts in family violence.

The Cambridge Handbook of Social Problems: - A. Javier Treviño 2018-03-22

The introduction of the Affordable Care Act in the United States, the increasing

use of prescription drugs, and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty-first-century social problems. The Cambridge Handbook of Social Problems offers a wide-ranging roster of the social problems currently pressing for attention and amelioration. Unlike other works in this area, it also gives great consideration to theoretical and methodological discussions. This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems. It is suitable for classes in social problems, current events, and social theory. Featuring the most current research, the Handbook provides an especially useful resource for sociologists and graduate students conducting research. *New Narratives of Disability* - Sara E. Green 2019-11-25 This volume seeks to answer the call for richer, more diverse understandings of disability through questions about

narrative frameworks in disability research. Narrative is an omnipresent meaning-producing communication form in social life that is both cultural and personal.

Passionate Politics - Jeff Goodwin 2009-03-09

Emotions are back. Once at the center of the study of politics, emotions have receded into the shadows during the past three decades, with no place in the rationalistic, structural, and organizational models that dominate academic political analysis. With this new collection of essays, Jeff Goodwin, James M. Jasper, and Francesca Polletta reverse this trend, reincorporating emotions such as anger, indignation, fear, disgust, joy, and love into research on politics and social protest. The tools of cultural analysis are especially useful for probing the role of emotions in politics, the editors and contributors to *Passionate Politics* argue. Moral outrage, the shame of spoiled collective identities, or the joy of imagining a new and better society, are not

automatic responses to events. Rather, they are related to moral institutions, felt obligations and rights, and information about expected effects, all of which are culturally and historically variable. With its look at the history of emotions in social thought, examination of the internal dynamics of protest groups, and exploration of the emotional dynamics that arise from interactions and conflicts among political factions and individuals, *Passionate Politics* will lead the way toward an

overdue reconsideration of the role of emotions in social movements and politics generally.
