Touching the World - Paul John Eakin
1992-04-15

Paul John Eakin's earlier work Fictions in
Autobiography is a key text in autobiography

studies. In it he proposed that the self that finds expression in autobiography is in fundamental ways a kind of fictive construct, a fiction articulated in a fiction. In this new book Eakin turns his attention to what he sees as the defining assumption of autobiography: that the story of the self does refer to a world of biographical and historical fact. Here he shows that people write autobiography not in some private realm of the autonomous self but rather in strenuous engagement with the pressures that life in culture entails. In so demonstrating, he offers fresh readings of autobiographies by Roland Barthes, Nathalie Sarraute, William Maxwell, Henry James, Ronald Fraser, Richard Rodriguez, Henry Adams, Patricia Hampl, John Updike, James McConkey, and Lillian Hellman. In the introduction Eakin makes a case for reopening the file on reference in autobiography, and in the first chapter he establishes the complexity of the referential aesthetic of the genre, the intricate interplay of

fact and fiction in such texts. In subsequent chapters he explores some of the major contexts of reference in autobiography: the biographical, the social and cultural, the historical, and finally, underlying all the rest, the somatic and temporal dimensions of the lived experience of identity. In his discussion of contemporary theories of the self, Eakin draws especially on cultural anthropology and developmental psychology.

Venture Inward - Hugh Lynn Cayce 1964

This classic volume about psychic development, written by the late Hugh Lynn Cayce, is once again available for those who desire a safe pathway into their spiritual inner life. A "must" read for seekers, whether new or experienced.

Poetry at Work - Glynn Young 2013-11

There is value in taking poetry to work, and finding the poetry that's already there.

Publications like "Harvard Business Review" and "FastCompany" are starting to write about the power of poetry-noting poetry's effectiveness in building creative thinkers and problem solvers.

Yet there is no single source to guide those who are *at work* every day, with little direction for how to explore the power of poetry in the workplace. Glynn Young's "Poetry at Work" is that guide. From discussions about how poetry is built into the very fabric of work, to practical suggestions on how to be a poet at work, this is a book that meets a very real need. Altogether-a landmark book that moves beyond David Whyte's seminal book on poetry and the corporate world. More than just philosophy, this book brings the hope of practice and surprising discovery, the benefits of stress relief and increased accomplishment. *** The Masters in Fine Living Series is designed to help people live a whole life through the power of reading, writing, and just plain living. Look for titles with the tabs "read, write, live, play, learn, " or "grow"-and join a culture of individuals interested in living deeply, richly.

In The Company Of Owners - Joseph Blasi
2003-01-02

The string of business scandals that recently engulfed America painted a picture of corporate chieftains lining their pockets by cutting corners, cooking the books, and duping gullible investors. In doing so, greedy CEOs have hijacked what could be one of the most important business innovations in decades: stock options for all employees. Joseph Blasi, Douglas Kruse, and Aaron Bernstein-all leading experts on employee ownership-show how American companies would perform much better if they followed the lead of many high-tech firms and granted options to their entire workforce, rather than to just a tiny corporate elite. Using SEC data in a way never done before, they document the vast wealth executives have accumulated for themselves. It shows how the abuse of options has taken place not just at scandal-ridden companies such as Enron and WorldCom, but across the entire reach of corporate America. In the Company of Owners argues that there's a better way. Broad-employee ownership through

stock options offers a new model for U.S. corporations and American capitalism. The authors explain how employees and shareholders alike would benefit if most large companies adopted what they call the partnership capitalism approach—using options to encourage employees to think and act like owners. A searing critique of business as usual in America's executive suites, this book offers a comprehensive vision for how stock options can enrich companies, employees, investors, and the U.S. economy as a whole. With its remarkable new evidence and astute synthesis, *In the Company of Owners* will change the way America thinks about stock options. Joseph R. Blasi, a sociologist, and Douglas L. Kruse, an economist, are professors at Rutgers University's School of Management and Labor Relations. Aaron Bernstein is a senior writer at *Business Week* magazine.

The Atlas of California - Richard A. Walker
2016-05-04

California is at a crossroads. For decades a global leader, inspiring the hopes and dreams of millions, the state has recently faced double-digit unemployment, multi-billion dollar budget deficits and the loss of trillions in home values. This atlas brings together the latest research and statistics in a graphic form that gives shape and meaning to these numbers. It shows a new California in the making, as it maps the economic, social, and political trends of a state struggling to maintain its leadership and to continue to offer its citizens the promise of prosperity. Among the world's largest economies, California is the nation's agricultural powerhouse, high tech crucible and leader in renewable energy. The state is the most populous and most diverse state in the continental U.S. Yet its infrastructure is coming under increasing pressure. Water supply systems are strained, the legendary highways are over capacity, and the celebrated system of public schooling is unable to offer affordable

quality education at all levels. Health and welfare services, particularly for the poor, needy, disabled, and seniors, are at great risk. This indispensable resource gives readers the tools they need to understand the transformation as California attempts to forge a new identity in the midst of unprecedented challenges.

Wheels, Life and Other Mathematical Amusements - Martin Gardner 2020-10-06

Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This is the original 1983

edition and contains columns published from 1970-1972. It includes three columns on the game of Life.

California Exposures: Envisioning Myth and History - Richard White 2020-03-17

A brilliant California history, in word and image, from an award-winning historian and a documentary photographer. "This is the West, sir. When the legend becomes fact, print the legend." This indelible quote from The Man Who Shot Liberty Valance applies especially well to California, where legend has so thoroughly become fact that it is visible in everyday landscapes. Our foremost historian of the West, Richard White, never content to "print the legend," collaborates here with his son, a talented photographer, in excavating the layers of legend built into California's landscapes. Together they expose the bedrock of the past, and the history they uncover is astonishing. Jesse White's evocative photographs illustrate the sites of Richard's historical investigations. A

vista of Drakes Estero conjures the darkly amusing story of the Drake Navigators Guild and its dubious efforts to establish an Anglo-Saxon heritage for California. The restored Spanish missions of Los Angeles frame another origin story in which California's native inhabitants, civilized through contact with friars, gift their territories to white settlers. But the history is not so placid. A quiet riverside park in the Tulare Lake Basin belies scenes of horror from when settlers in the 1850s transformed native homelands into American property. Near the lake bed stands a small marker commemorating the Mussel Slough massacre, the culmination of a violent struggle over land titles between local farmers and the Southern Pacific Railroad in the 1870s. Tulare is today a fertile agricultural county, but its population is poor and unhealthy. The California Dream lives elsewhere. The lake itself disappeared when tributary rivers were rerouted to deliver government-subsidized water to big agriculture and cities. But climate change

ensures that it will be back—the only question is when.

Ecodocumentaries - Rayson K. Alex 2016-11-15
This book features ten critical essays on ecodocumentaries written by eminent scholars from India, USA, Ireland, Finland and Turkey in the area of ecocinema studies. Situating social documentaries with explicit ecological form and content, the volume takes relational positions on political, cultural and conservational aspects of natures and cultures in various cultural contexts. Documentaries themed around issues such as electronic waste, animal rights, land ethics, pollution of river, land grabbing, development and exotic plants are some of the topics ecocritiqued in this volume.

Goode's World Atlas - Howard Veregin 2006-11
First published in 1923, the Rand McNally Goode's World Atlas is the number-one college reference atlas used in the United States. Using the latest in geographic information technology, Goode's World Atlas offers carefully researched

and well-designed maps on a variety of topics. The 21st edition reflects the changing world with a host of new maps and information.

Perfect - Rachel Joyce 2014-01-14

A spellbinding novel that will resonate with readers of Mark Haddon, Louise Erdrich, and John Irving, *Perfect* tells the story of a young boy who is thrown into the murky, difficult realities of the adult world with far-reaching consequences. Byron Hemmings wakes to a morning that looks like any other: his school uniform draped over his wooden desk chair, his sister arguing over the breakfast cereal, the click of his mother's heels as she crosses the kitchen. But when the three of them leave home, driving into a dense summer fog, the morning takes an unmistakable turn. In one terrible moment, something happens, something completely unexpected and at odds with life as

Byron understands it. While his mother seems not to have noticed, eleven-year-old Byron understands that from now on nothing can be the same. What happened and who is to blame? Over the days and weeks that follow, Byron's perfect world is shattered. Unable to trust his parents, he confides in his best friend, James, and together they concoct a plan. . . . As she did in her debut, *The Unlikely Pilgrimage of Harold Fry*, Rachel Joyce has imagined bewitching characters who find their ordinary lives unexpectedly thrown into chaos, who learn that there are times when children must become parents to their parents, and who discover that in confronting the hard truths about their pasts, they will forge unexpected relationships that have profound and surprising impacts. Brimming with love, forgiveness, and redemption, *Perfect* will cement Rachel Joyce's reputation as one of fiction's brightest talents. Praise for *Perfect* "Touching, eccentric . . . Joyce does an inviting job of setting up these mysterious

circumstances, and of drawing Byron's magical closeness with Diana."—Janet Maslin, *The New York Times* "Haunting . . . compelling."—*Minneapolis Star Tribune* "[Joyce] triumphantly returns with *Perfect*. . . . As Joyce probes the souls of Diana, Byron and Jim, she reveals—slowly and deliberately, as if peeling back a delicate onion skin—the connection between the two stories, creating a poignant, searching tale."—*O: The Oprah Magazine* "Perfect touches on class, mental illness, and the ways a psyche is formed or broken. It has the tenor of a horror film, and yet at the end, in some kind of contortionist trick, the narrative unfolds into an unexpected burst of redemption. [Verdict:] Buy It."—*New York* "Joyce's dark, quiet follow-up to her successful debut, *The Unlikely Pilgrimage of Harold Fry*, could easily become a book club favorite. . . . *Perfect* is the kind of book that blossoms under thoughtful examination, its slow tendencies redeemed by moments of loveliness and insight. However sad,

Joyce's messages—about the limitations of time and control, the failures of adults and the fears of children, and our responsibility for our own imprisonment and freedom—have a gentle ring of truth to them."—*The Washington Post* "There is a poignancy to Joyce's narrative that makes for her most memorable writing."—*NPR's All Things Considered*

The Heritage Crusade and the Spoils of History - David Lowenthal 1998-05-13

Heritage has burgeoned over the past quarter of a century from a small elite preoccupation into a major popular crusade. Everything from Disneyland to the Holocaust Museum, from the Balkan wars to the Northern Irish Troubles, from Elvis memorabilia to the Elgin Marbles bears the marks of the cult of heritage. In this acclaimed book David Lowenthal explains the rise of this new obsession with the past and examines its power for both good and evil. 'Timely and provocative...brilliant and stimulating pyrotechnic...everything from the Pilgrim

Fathers to the Inuits, from Homer's Greece to the rainforests of Brazil.' Roy Strong, The Sunday Times'...entertaining and enthralling...' Ben Pimlott, The Guardian

Empire Under the Microscope - Emilie Taylor-Pirie 2021

This open access book considers science and empire, and the stories we tell ourselves about them. Using British Nobel laureate Ronald Ross (1857-1932) and his colleagues as access points to a wider professional culture, *Empire Under the Microscope* explores the cultural history of parasitology and its relationships with the literary and historical imagination between 1885 and 1935. Emilie Taylor-Pirie examines a wealth of archival material including medical lectures, scientific publications, popular biography, and personal and professional correspondence, alongside novels, poems, newspaper articles, and political speeches, to excavate the shared vocabularies of literature and medicine. She demonstrates how forms such as poetry and

biography; genres such as imperial romance and detective fiction; and modes such as adventure and the Gothic, together informed how tropical diseases, their parasites, and their vectors, were understood in relation to race, gender, and nation. From Ancient Greece, to King Arthurs Knights, to the detective work of Sherlock Holmes, parasitologists manipulated literary and historical forms of knowledge in their professional self-fashioning to create a modern mythology that has a visible legacy in relationships between science and society today. Emilie Taylor-Pirie is a Leverhulme Early Career Fellow at the University of Birmingham, UK. She has a BSc in Biology and higher degrees in the humanities.

The Supreme Moment - C. G. Garcia

2014-01-06

A New Adult Urban Science-Fantasy novel in the spirit of a darker Beauty and the Beast. What would you do when there are no good choices? The moment a bunch of men with guns kicked in the doors of her house, Avery Morgan knew her estranged father's gambling addiction had finally caught up to her family in the worst way. On the brink of doing something unspeakable to save her little sister from being taken, she is interrupted by the sudden arrival of Darrien Stathos, a business mogul whose true persona is rumored to be the lord of the criminal underworld known as Kairos. Darrien announces that he is also there to collect on a contract with Avery's father-for Avery. As she struggles to find some normalcy within her life while living with an alleged crime lord and dealing with the constant harassment of two FBI agents, several disturbing observations about Darrien's eyes and the frightening, inexplicable ways he stops a couple of would-be assassins make Avery rethink

her initial dismissal of some of the more outlandish gossip that questioned his humanity. Avery thought she wanted answers, but the truth of Darrien's identity will not only shatter the foundation of her understanding of reality but also reveal a disturbing and dangerous truth about herself.

[The Location and Character of \(youth\) Hostels in California](#) - Courtney Jane Route 2008

[The Design of Design: Essays from a Computer Scientist](#) - Brooks Frederick P. 2010

[A Brief History of Islam in Europe](#) - Maurits Berger 2014

This book presents an overall presentation and discussion of developments ever since Islam appeared on the European stage thirteen centuries ago. The events and stories presented increase the understanding of present debates on, and notions of, Islam and Muslims in Europe. This book shows that in the course of thirteen

centuries the Muslim as well as Islam have undergone many metamorphoses. The Muslim has entered the European stage as a conqueror, antichrist, scholar, benign ruler, corsair, tradesman and fellow citizen. The image of Islam has meandered accordingly, as a religion that was feared as an enemy or embraced as a partner against heretical Christians, despised as an abomination or admired as a civilization, and studied for missionary, academic, colonial or security purpose.

Sacred Sites - Susan Suntree 2020-06

A history that is equal parts science and mythology, Sacred Sites offers a rare and poetic vision of a world composed of dynamic natural forces and mythic characters. The result is a singular and memorable account of the evolution of the Southern California landscape, reflecting the riches of both Native knowledge and

Western scientific thought. Beginning with Western science, poet Susan Suntree carries readers from the Big Bang to the present as she describes the origins of the universe, the shifting of tectonic plates, and an evolving array of plants and animals that give Southern California its unique features today. She tells of the migration of humans into the region, where they settled, and how they lived. Complementing this narrative and reflecting Native peoples' view of their own history and way of life, Suntree recounts the creation myths and songs that tell the story of the First People and of unforgettable shamans and heroes. Featuring contemporary photographs of rarely seen landmarks along with meticulous research, Sacred Sites provides unusual insight into how natural history and mythology and scientific and intuitive thinking combine to create an ever-deepening sense of a place and its people.

The Complete Master Key System - William Gladstone 2014-09-04

The Complete Master Key System builds on the classic work of Charles Haanel to teach contemporary audiences how to tap into their personal potential and manifest harmony, abundance, and fulfillment. Published in 1912, The Master Key System went on to influence Ernest Holmes, Napoleon Hill, and many others who sought to use mental power as a means of attaining success. In The Complete Master Key System, William Gladstone, Richard Greninger, and John Selby hark back to Charles Haanel's original text, and develop exercises that heighten readers' ability to implement Haanel's core principles. Their Daily Manifestation Sessions incorporate the most effective focusing methods used today and integrate ancient meditative techniques with new insights in cognitive psychology. The Complete Master Key System is packaged with Haanel's original Master Key System in the appendix and includes a foreword by Mark Victor Hansen and an afterword by Jack Canfield.

The present volume is the result of his studies and research on medieval western and Islamic maps of the region south of the Caucasus. During the first decade of the twenty first century the European Union began implementing a program entitled "European Neighbourhood Policy". Through this program the EU has been trying to create a "Ring of Friends", who could be reliable and friendly neighbours at all times. This book is aiming to inform the western reader about the history and geography of three countries lying south of the Caucasus, which may soon become part of these neighbours. The book is a study of maps made

during the years 350 to 1350, thus providing an important window looking into the geopolitics of this area. The maps depicted and discussed in the book come from the medieval western religious and non-religious sources, Islamic, as well as rare Syriac and Armenian medieval manuscripts. The originals of these maps are kept in various well-known libraries and museums and occupy important places in our cartographic heritage. The very existence of all these images collected and displayed in a single volume represents a rare and enjoyable sight

Regional Geography of the United States and Canada - Daniel R. Montello 2021-03-29

The fifth and thoroughly revised edition of *Regional Geography of the United States and Canada* provides a rich and comprehensive overview of both the physical and human geography of these two countries, and in the true spirit of geography, the interactions and interrelations of the physical and human. Following long traditions of the discipline of

geography, this text incorporates words, maps, drawings, photographs, and numerical data to present its information in an engaging way. After covering beneficial precursor topics—such as the basics of physical and human geography—the text explores fifteen regions of the US and Canada. The authors observe and describe our planet’s geography in thorough and accessible detail, while laying out the spatial basics of the location, shape, and size of the different regions, and summarizes their most distinctive thematic qualities. Physical topics covered include the region’s topography and landforms, soils, climate, hydrography, vegetation, and wildlife. The human topics include the region’s population; the ethnicities and settlement history of its people; economic activities, including agriculture, forestry, mining, fishing, manufacturing, and service industries; cities; and transportation. In-depth essays expand on specific topics of interest and importance, while outlook sections prognosticate

about the near future of the regions. Each chapter concludes with a bibliography of books, articles, and reports that provide further sources for the interested reader.

California Comeback - Narda Zacchino

2016-08-16

An in-depth look at California's remarkable 21st century turnaround, focusing on the role played by the state government under Jerry Brown. In the most economically important state in the country—and the 7th largest economy in the world—a political revolution of historic importance has occurred which has not been sufficiently covered by the media. In the state where the Reagan Revolution was born, there has recently occurred a remarkable progressive revolution under the leadership of another governor, four-term Democrat Jerry Brown. Over the past several decades, as it has evolved from a red state to solid blue, California has boldly reinvigorated the notion that government is not a dirty word but rather an instrument for uniting

people and improving their lives. From raising taxes on those with annual incomes over \$250,000, to shifting money toward the schools in low-income communities, from seeking environmental alliances with other countries to limit climate change, to the rejection of militaristic solutions to illegal immigration, California has been a laboratory of innovation. Californians have rejected the "race to the bottom" right-wing philosophy that catapulted conservative politics in recent years. That model of endorsing privatization, deregulation, reductions in government spending, and a tax system that disproportionately favors the wealthy, is exemplified by conservative governors and rejected by the pragmatic liberal Jerry Brown. In California Comeback, award-winning journalist Narda Zacchino, who has covered California politics for over three decades, clearly lays out the history of California's initial experiments with progressivism under Brown, its swing to the

right under Reagan, near financial collapse under Schwarzenegger, and recent return to stability—bulwarked but the progressive policies made possible by the second coming of Jerry Brown. This progressive mindset, forged in the crucible of the tumultuous last half century, is California's true contribution not only to the country, but to the world.

In the Realm of Hungry Ghosts - Gabor Maté,
MD 2011-06-28

From bestselling author Gabor Maté, the essential resource for understanding the roots and behaviors of addiction—now with an added introduction by the author. Based on Gabor Maté's two decades of experience as a medical doctor and his groundbreaking work with the severely addicted on Vancouver's skid row, *In the Realm of Hungry Ghosts* radically reenvision this much misunderstood field by taking a holistic approach. Dr. Maté presents

addiction not as a discrete phenomenon confined to an unfortunate or weak-willed few, but as a continuum that runs throughout (and perhaps underpins) our society; not a medical "condition" distinct from the lives it affects, rather the result of a complex interplay among personal history, emotional, and neurological development, brain chemistry, and the drugs (and behaviors) of addiction. Simplifying a wide array of brain and addiction research findings from around the globe, the book avoids glib self-help remedies, instead promoting a thorough and compassionate self-understanding as the first key to healing and wellness. *In the Realm of Hungry Ghosts* argues persuasively against contemporary health, social, and criminal justice policies toward addiction and those impacted by it. The mix of personal stories—including the author's candid discussion of his own "high-status" addictive tendencies—and science with positive solutions makes the book equally useful for lay readers and professionals.

An Introduction to Statistical Problem

Solving in Geography - J. Chapman McGrew, Jr. 2009-04-22

Written for undergraduate geography majors and entry-level graduate students with limited backgrounds in statistical analysis and methods, McGrew and Monroe provide a comprehensive

and understandable introduction to statistical methods in a problem-solving framework. Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text. Without compromising statistical rigor or oversimplifying, the authors stress the importance of written narratives that explain each statistical technique. After introducing basic statistical concepts and terminology, the authors focus on nonspatial and spatial descriptive statistics. They transition to inferential problem solving, including probability, sampling, and estimation, before delving deeper into inferential statistics for geographic problem solving. The final chapters examine the related techniques of correlation and regression. A list of major goals and objectives is included at the end of each chapter, allowing students to monitor their own progress and mastery of geographic statistical materials. An epilogue, offering over 150 geographic

situations, gives students a chance to figure out which statistical technique should be used for a particular situation.

A History of Burn Care - Lars P Kamolz
2021-11-30

Burn injuries are still one of the most common and devastating injuries in human and the treatment of major burns remains a major challenge for physicians worldwide. Modern burn care involves many components from initial first aid, burn size and burn depth assessment, fluid resuscitation, wound care, excision and grafting/ coverage, infection control and nutritional support. Progress in each of these areas has contributed significantly to the overall enhanced survival of burn victims of the past decades. Most major advances in burn care occurred in the past 50 years, spurred on by wars and great fires. The use of systemic antibiotics and topical antiinfective agents greatly reduced sepsis related mortality. This along with the improvement of new surgical and

skin grafting techniques allowed the earlier excision and coverage of deep burns which resulted in greatly improved survival rates and better functional and aesthetic outcome. In this book we look back at how the treatment of burns has evolved over the past decades and hundreds of years. The advancement of burn care has been closely associated with our deeper understanding of its pathophysiology; we have now come to understand the impact that burn injuries have in the multiple fields of current medical science i.e. in metabolism and circulation, electrolyte balance and nutrition, immunology and infection, inflammation, pulmonary function and wound healing. Rediscovering the Golden State - William A. Selby 2018-09-19

Now in its fourth edition, Rediscovering the Golden State: California Geography examines this unique state's incredibly diverse landscapes, and how geography and geographic change influences everything from the state's natural

systems and cycles, to its agriculture and more advanced industries, to human migration, cultures, and urban planning. Exploring California through a geographic lens reveals how the field has evolved to cross traditional boundaries, connect local and global issues, and provide the insights that lead to practical solutions to problems new and old. Challenging the reader to look beyond stereotypes and assumptions, this book encourages active participation in planning the state's dynamic future. And this project makes teaching and learning about the geography of California more convenient, exciting, and rewarding for instructors and students. Going beyond a scientific analysis of natural features and environmental processes, this book illustrates how social, political, and economic divides can be bridged through the study of geography and the connections it brings to light. From geology, weather and climate, biogeography, and hydrology, we cover the state's physical

geography. And from demography and migration, to cultures and economies, to rural and urban geography, we monitor the state's human geography pulse and then make the vital connections. California continues to lead the nation in population, economics (5th largest in the world), agriculture, natural and cultural

diversity, and a host of other categories. This powerful state has earned this powerful publication. This timely and versatile book will prove useful to Californians in business, education, government, and to concerned citizens and curious readers seeking to learn more about the Golden State.
