New Empirical Perspectives on Translation and Interpreting - Lore Vandevoorde

2019-12-06

Drawing on work from both eminent and emerging scholars in translation and interpreting studies, this collection offers a

critical reflection on current methodological practices in these fields toward strengthening the theoretical and empirical ties between them. Methodological and technological advances have pushed these respective areas of study forward in the last few decades, but advanced tools, such

as eye tracking and keystroke logging, and insights from their use have often remained in isolation and not shared across disciplines. This volume explores empirical and theoretical challenges across these areas and the subsequent methodologies implemented to address them and how they might be mutually applied across translation and interpreting studies but also brought together toward a coherent empirical theory of translation and interpreting studies. Organized around three key themes—target-text orientedness, source-text orientedness, and translator/interpreter-orientedness—the book takes stock of both studies of translation and interpreting corpora and processes in an effort to answer such key questions, including: how do written translation and interpreting relate to each other? How do technological advances in these fields shape process and product? What would an empirical theory of translation and interpreting studies look like? Taken together, the collection

showcases the possibilities of further dialogue around methodological practices in translation and interpreting studies and will be of interest to students and scholars in these fields.

Psychosocial Resilience and Risk in the Perinatal Period - Gill Thomson 2017-07-14

Bringing together experts in the field, this important book considers the underlying risk factors that create situations of psychosocial vulnerability and marginalisation for mothers, from their baby's conception up to a year after birth. Adopting a strengths-based approach, the book looks not only at the incidence and impact of disadvantageous circumstances on women but also explores protective factors at an individual, family, community and service level. It identifies promising evidence-based interventions and sources of resilience. With a distinctive focus on social and cultural diversity, *Psychosocial Resilience and Risk in the Perinatal Period* considers a wide range of personal circumstances and social groups, including

women's experiences of traumatic birth, domestic and family violence, drug and alcohol use and mothering by indigenous, same-sex and disabled women. Throughout, case studies and service user experiences are used to illuminate the issues and illustrate exemplary care practice. International in scope, this book is particularly strong on the implications for care practices and health service delivery within Western models of maternity care. Its applied focus and evidence base makes it eminently suitable for study purposes and professional reference. Of relevance to midwives, health visitors and other health and social care practitioners, *Psychosocial Resilience and Risk in the Perinatal Period's* final chapters focus on developing resilience amongst professionals and multiprofessional and interagency working.

[Advances in Service-Oriented and Cloud Computing](#) - Carlos Canal 2013-12-13

This book contains the proceedings of the five high-quality workshops organized at the Second

European Conference on Service-Oriented and Cloud Computing, ESOC 2013, held in Malaga, Spain, in September 2013. The workshops are: Cloud for IoT (CLIoT 2013), CLOUD Storage Optimization (CLOUSO 2013), 12th International Workshop on Foundations of Coordination Languages and Self-Adaptive Systems (FOCLASA 2013), First Workshop on Mobile Cloud and Social Perspectives (MoCSOP 2013), and the 3rd International Workshop on Adaptive Services for the Future Internet (WAS4FI 2013). The 29 papers presented were carefully reviewed and selected from 51 submissions. They focus on specific topics in service-oriented and cloud computing domains: cloud environments, smart connectivity, context-aware computation, cloud for IoT, storage clouds, coordination languages, formal approaches to modeling and reasoning, self-systems, services for mobile devices, wireless sensor networks. *Tradition and Modernity. Changing the Images of Women in Selected Fiction* by Manju Kapur

and Anita Nair - Sasikala Alagiri 2017-12

Along with a range of socio-cultural, political and economic concerns, the focus on 'self' has been an inevitable assertion of writers during the last quarter of the twentieth century.

Individualistic in tone, the contemporary women novelists are trying to portray realistically the predicament of modern women torn between the forces of tradition and modernity, their sense of frustration and alienation, the emotional and psychological turmoil and complexities of man-women relationships and subtleties of feminine consciousness against the persistent patriarchal social set-up. Cognizant of the evils originating from patriarchy, a positive sense of feminine identity has been recognized by them and the result is the emergence of a new woman in Indian society and its concept in the Indian English novel which has assumed a strident posture in the contemporary writings by women. The shift from submission to assertion, acquiescence to resistance and obedience to

rebellion, however, has not been abrupt and effortless. Women are still in the process of negotiation with different limiting factors and thresholds of patriarchy to claim their due space and affirm their identity. The present study is an attempt to critically investigate the negotiations with cultural norms by the women characters in the selected novels by the contemporary novelists, namely Manju Kapur and Anita Nair. Almost all the women characters, major and minor, from the selected novels have been considered and positioned as per their ideological leanings and convictions under two thematic chapters namely "Women in the Clutches of Traditional Norms," and "Tradition to Modernity." The major issues around which the novels move - education, marriage, gendered space and mother-daughter relationships - are taken up to put them within the contemporary social conditions in which women characters live. The present book is divided into five chapters to make a critical and

analytical study of the select novels of these contemporary Indian women writers in English. The present work is focused on five selected novels: Manju Kapur's "Difficult Daughters", "Home" and "Custody" and Anita Nair's "Ladies Coupé" and "Mistress".

Routledge Handbook of Human Rights in Asia -
Fernand de Varennes 2018-12-12

The Routledge Handbook of Human Rights in Asia provides a rich study of human rights challenges facing some of the most vulnerable people in Asia. While formal accession to core international human rights instruments is commonplace across the region, the realisation of human rights for many remains elusive as development pressure, violent conflict, limited political will and discrimination maintain human rights volatility. This Handbook explores the underlying causes of human rights abuse in a range of contexts, considers lessons learnt from global, regional and domestic initiatives and provides recommendations and justifications for

reform. Comprising 23 chapters, it examines the strengths and weaknesses of human rights institutions in Asia and covers issues such as: Participation, marginalisation, detention and exclusion Private sector responsibility and security Conflict and post-conflict rehabilitation Trafficking, displacement and citizenship Ageing populations, identity and sexuality. Drawing together a remarkable collection of leading and emerging scholars, advisers and practitioners, this Handbook is essential reading for students, scholars, policy makers and advocates of human rights in Asia and the world.

South Australia: State of Transformation - John Spoehr 2018-11-14

South Australia - and the world - is entering a time of transformational change: social, economic, industrial and environmental. As a

new government takes the reins, it has the power to shape the future of our state and its citizens at a crucial moment. The automotive industry has closed, but maritime shipbuilding projects are booming. Automation and artificial intelligence technologies are on the rise - and with them, both fears of jobs lost and the promise of increased productivity and wellbeing. Which way will we go? In this insightful collection of essays, some of South Australia's leading policy thinkers consider our future in the context of jobs, our economy and its drivers, industrial relations, law and order, the environment, education, health (including ageing and aged care) and more.

Global Health Watch 4 - Bloomsbury Publishing 2014-11-13

Global Health Watch, now in its fourth edition, is widely perceived as the definitive voice for an alternative discourse on health and healthcare. It covers a range of issues that currently impact on health, including the present political and economic architecture in a fast-changing and globalized world; a political assessment of the drive towards Universal Health Coverage; broader determinants of health, such as gender-based violence and access to water; stories of struggles, actions and change; and a scrutiny of a range of global institutions and processes. It integrates rigorous analysis, alternative proposals and stories of struggle and change to present a compelling case for a radical

transformation of the way we approach actions and policies on health.

An Introduction to Crime and Criminology - Hennessey Hayes 2014-10-01

An Introduction to Crime & Criminology 4e, continues to bring together some of Australia's most widely respected authorities on criminology. The text explores popular knowledge and understanding about crime, contrasting it with what we know about crime from official sources as well as from crime victims. The authors present and analyse the various ways that crime is defined and measured, the many and varied dimensions of crime, the broad range of theories offered to explain crime as well as some of the main ways governments and other agencies respond to and attempt to prevent crime.

Unhappy Union - John Peet 2014-06-24

The euro was supposed to create an unbreakable bond between the nations and people of Europe. But when the debt crisis struck, the flaws of the half-built currency brought the European Union close to breaking point after decades of post-war integration. Deep fault-lines have opened up between European institutions and the nation-states—and often between the rulers and the ruled—raising profound questions about

Europe's democratic deficit. Belief in European institutions and national governments alike is waning, while radicals on both the left and the right are gaining power and influence. Europe's leaders have so far proved the doomsayers wrong and prevented the currency from breaking up. "If the euro fails, Europe fails," says Angela Merkel. Yet the euro, and the European project as a whole, is far from safe. If it is to survive and thrive, leaders will finally have to confront difficult decisions. How much national sovereignty are they willing to give up to create a more lasting and credible currency? How much of the debt burden and banking risk will they share? Is Britain prepared to walk away from the EU? And will other countries follow? In *Unhappy Union*, The Economist's Europe editor and Brussels correspondent provide an astute analysis of the crisis. They describe America's behind-the-scenes lobbying to salvage the euro, economists' bitter debates over austerity, the unseen maneuvers of the European Central Bank

and the tortuous negotiations over banking union. In the final chapter, they set out the stark choices confronting Europe's leaders and citizens.

Violence in African Elections - Mimmi Söderberg Kovacs 2018-04-15

Multiparty elections have become the bellwether by which all democracies are judged, and the spread of these systems across Africa has been widely hailed as a sign of the continent's progress towards stability and prosperity. But such elections bring their own challenges, particularly the often intense internecine violence following disputed results. While the consequences of such violence can be profound, undermining the legitimacy of the democratic process and in some cases plunging countries into civil war or renewed dictatorship, little is known about the causes. By mapping, analysing and comparing instances of election violence in different localities across Africa - including Kenya, Ivory Coast and Uganda - this collection

of detailed case studies sheds light on the underlying dynamics and sub-national causes behind electoral conflicts, revealing them to be the result of a complex interplay between democratisation and the older, patronage-based system of 'Big Man' politics. Essential for scholars and policymakers across the social sciences and humanities interested in democratization, peace-keeping and peace studies, *Violence in African Elections* provides important insights into why some communities prove more prone to electoral violence than others, offering practical suggestions for preventing violence through improved electoral monitoring, voter education, and international assistance.

The Criminalisation of People Smuggling in Indonesia and Australia - Antje Missbach 2022-04-22

This book offers an ethnographically informed critique of the hyper-politicised debate on the facilitation of irregularised migration for people

seeking asylum between Indonesia and Australia. While state authorities decry such facilitation as “people smuggling” and push for its criminalisation, the book’s focal points are the need for unsanctioned passages for people seeking asylum and the detrimental consequences of the criminalisation of “people smuggling” for both the facilitators and the people seeking asylum. Drawing on court verdicts and interviews with convicted facilitators and law enforcement officials in Indonesia, this book provides a unique and holistic picture of the causes, conditions, procedures and intricacies surrounding the facilitation of irregularised maritime journeys between Indonesia and Australia covering almost four decades. It scrutinises the micro-level operational and place-specific characteristics of people smuggling and the consequences of anti-people-smuggling policies in Indonesia and relates those consequences to changes in the macroenvironment, which include

relevant legal, political, social and economic factors that determine the overarching conditions of irregularised mobility. Compared to other states in the Global North, Australia has claimed to be more “successful” with its comprehensive approach to eliminate unsanctioned migration at sea by combining punitive, communicative-reventive and interceptive measures. This book challenges key achievements and objectives in regard to criminalising the facilitation of irregularised migration by foregrounding the many negative side effects that have emanated from “stopping the boats”. The book will be of interest to researchers in the fields of anthropology and sociology, law and criminology, Asia-Pacific Studies, Southeast Asian Studies and international migration.

I'm Glad My Mom Died - Jennette McCurdy

2022-08-09

#1 NEW YORK TIMES BESTSELLER #1
INTERNATIONAL BESTSELLER A

heartbreaking and hilarious memoir by iCarly and Sam & Cat star Jennette McCurdy about her struggles as a former child actor—including eating disorders, addiction, and a complicated relationship with her overbearing mother—and how she retook control of her life. Jennette McCurdy was six years old when she had her first acting audition. Her mother’s dream was for her only daughter to become a star, and Jennette would do anything to make her mother happy. So she went along with what Mom called “calorie restriction,” eating little and weighing herself five times a day. She endured extensive at-home makeovers while Mom chided, “Your eyelashes are invisible, okay? You think Dakota Fanning doesn’t tint hers?” She was even showered by Mom until age sixteen while sharing her diaries, email, and all her income. In *I’m Glad My Mom Died*, Jennette recounts all this in unflinching detail—just as she chronicles what happens when the dream finally comes true. Cast in a new Nickelodeon series called

iCarly, she is thrust into fame. Though Mom is ecstatic, emailing fan club moderators and getting on a first-name basis with the paparazzi (“Hi Gale!”), Jennette is riddled with anxiety, shame, and self-loathing, which manifest into eating disorders, addiction, and a series of unhealthy relationships. These issues only get worse when, soon after taking the lead in the iCarly spinoff *Sam & Cat* alongside Ariana Grande, her mother dies of cancer. Finally, after discovering therapy and quitting acting, Jennette embarks on recovery and decides for the first time in her life what she really wants. Told with refreshing candor and dark humor, *I’m Glad My Mom Died* is an inspiring story of resilience, independence, and the joy of shampooing your own hair.

A Difficult Transition - Mandira Sharma

2016-10-25

The Sexual Violence and Impunity in South Asia research project (coordinated by Zubaan and

supported by the International Development Research Centre) brings together, for the first time in the region, a vast body of research on this important – yet silenced – subject. Six country volumes (one each on Bangladesh, Nepal, Pakistan, Sri Lanka, and two on India, as well as two standalone volumes) comprising over fifty research papers and two book-length studies, detail the histories of sexual violence and look at the systemic, institutional, societal, individual and community structures that work together to perpetuate impunity for perpetrators. The essays in this volume focus on Nepal, which though not directly colonized, has not remained immune from the influence of colonialism in its neighbourhood. In addition to home-grown feudal patriarchal structures, the writers in this volume clearly demonstrate that it is the larger colonial and post-colonial context of the subcontinent that has enabled the structuring of inequalities and power relations in ways that today allow for widespread sexual

violence and impunity in the country - through legal systems, medical regimes and social institutions. The period after the 1990 democratic movement, the subsequent political transformation in the aftermath of the Maoist insurgency and the writing of the new constitution, has seen an increase in public discussion about sexual violence. The State has brought in a slew of legislation and action plans to address this problem. And yet, impunity for perpetrators remains intact and justice elusive. What are the structures that enable such impunity? What can be done to radically transform these? How must States understand the search for justice for victims and survivors of sexual violence? This volume addresses these and related issues. Published by Zubaan.

Developing Property Sustainably - Sara J. Wilkinson 2015-06-05

Developing Property Sustainably introduces readers to the key issues surrounding sustainable property development in the global marketplace. Pulling together received wisdom and original research, the authors provide a clear and practical overview of the sustainable property development process as well as a critical appraisal of the problems faced by global built environment stakeholders. Throughout, the authors demonstrate how the property development industry could and should respond better to debate on sustainable practices in the built environment by adopting more rigorous measurement techniques and sustainable

approaches. Starting by exploring key definitions and stakeholders, the book goes on to explore finance, planning, construction, procurement, occupation, retrofit and lifecycle sustainability in order to provide the reader with a detailed understanding of all the issues involved in the delivery of sustainable property development from inception to occupation and beyond. Throughout the book, international case studies are used to demonstrate how sustainable property development is applied in practice around the world. With a logical chapter structure and accessible writing style, *Developing Property Sustainably* would be perfect for use on undergraduate and postgraduate modules and courses in real estate development, property and urban development and other built environment programmes.

Industrial Motion Control - Dr. Hakan Gurocak
2016-03-14

Motion control is widely used in all types of industries including packaging, assembly,

textile, paper, printing, food processing, wood products, machinery, electronics and semiconductor manufacturing. Industrial motion control applications use specialized equipment and require system design and integration. To design such systems, engineers need to be familiar with industrial motion control products; be able to bring together control theory, kinematics, dynamics, electronics, simulation, programming and machine design; apply interdisciplinary knowledge; and deal with practical application issues. The book is intended to be an introduction to the topic for senior level undergraduate mechanical and electrical engineering students. It should also be resource for system design engineers, mechanical engineers, electrical engineers, project managers, industrial engineers, manufacturing engineers, product managers, field engineers, and programmers in industry.

Financial Crises Explanations, Types, and Implications - Mr.Stijn Claessens 2013-01-30
This paper reviews the literature on financial crises focusing on three specific aspects. First, what are the main factors explaining financial crises? Since many theories on the sources of financial crises highlight the importance of

sharp fluctuations in asset and credit markets, the paper briefly reviews theoretical and empirical studies on developments in these markets around financial crises. Second, what are the major types of financial crises? The paper focuses on the main theoretical and empirical explanations of four types of financial crises—currency crises, sudden stops, debt crises, and banking crises—and presents a survey of the literature that attempts to identify these episodes. Third, what are the real and financial sector implications of crises? The paper briefly reviews the short- and medium-run implications of crises for the real economy and financial sector. It concludes with a summary of the main lessons from the literature and future research directions.

The short guide to environmental policy - Snell, Carolyn 2014-04-16

Some have argued that the rate and scale of human-induced global environmental change is so significant that it now constitutes a new

geological epoch in the Earth's history called the Anthropocene (Zalasiewicz et al, 2011; Steffen et al, 2011). More than ever, there is a need to have appropriate and effective environmental policies that address the challenges of climate change, biodiversity, food, water and energy insecurity, environmental pollution, poverty alleviation and environmental equity. The short guide to environmental policy provides a concise introduction to post-war environmental policies, bringing together perspectives from a range of fields including economics, sociology, politics and social policy. It covers a broad range of issues, including causes and effects of contemporary environmental issues, policy approaches to addressing environmental problems, challenges to implementing environmental policies and future environmental challenges. This book is an essential introduction to all those interested in how policies can address environmental problems.

The Death of Money - James Rickards

2017-04-04

The next financial collapse will resemble nothing in history. . . . Deciding upon the best course to follow will require comprehending a minefield of risks, while poised at a crossroads, pondering the death of the dollar. The U.S. dollar has been the global reserve currency since the end of World War II. If the dollar fails, the entire international monetary system will fail with it. But optimists have always said, in essence, that confidence in the dollar will never truly be shaken, no matter how high our national debt or how dysfunctional our government. In the last few years, however, the risks have become too big to ignore. While Washington is gridlocked, our biggest rivals—China, Russia, and the oil-producing nations of the Middle East—are doing everything possible to end U.S. monetary hegemony. The potential results: Financial warfare. Deflation. Hyperinflation. Market collapse. Chaos. James Rickards, the acclaimed author of *Currency Wars*, shows why money

itself is now at risk and what we can all do to protect ourselves. He explains the power of converting unreliable investments into real wealth: gold, land, fine art, and other long-term stores of value.

Building the Hyperconnected Society- Internet of Things Research and Innovation Value Chains, Ecosystems and Markets -

Ovidiu Vermesan 2022-09-01

This book aims to provide a broad overview of various topics of Internet of Things (IoT), ranging from research, innovation and development priorities to enabling technologies, nanoelectronics, cyber-physical systems, architecture, interoperability and industrial applications. All this is happening in a global context, building towards intelligent,

interconnected decision making as an essential driver for new growth and co-competition across a wider set of markets. It is intended to be a standalone book in a series that covers the Internet of Things activities of the IERC - Internet of Things European Research Cluster from research to technological innovation, validation and deployment. The book builds on the ideas put forward by the European Research Cluster on the Internet of Things Strategic Research and Innovation Agenda, and presents global views and state of the art results on the challenges facing the research, innovation, development and deployment of IoT in future years. The concept of IoT could disrupt consumer and industrial product markets generating new revenues and serving as a growth driver for semiconductor, networking equipment, and service provider end-markets globally. This will create new application and product end-markets, change the value chain of companies that creates the IoT technology and

deploy it in various end sectors, while impacting the business models of semiconductor, software, device, communication and service provider stakeholders. The proliferation of intelligent devices at the edge of the network with the introduction of embedded software and app-driven hardware into manufactured devices, and the ability, through embedded software/hardware developments, to monetize those device functions and features by offering novel solutions, could generate completely new types of revenue streams. Intelligent and IoT devices leverage software, software licensing, entitlement management, and Internet connectivity in ways that address many of the societal challenges that we will face in the next decade.

The Tale of the Cat with the Crooked Tail -
Maureen Julie McGrath 2013-11

Maureen Julie McGrath proudly introduces her second children's book The Tale of the Cat with the Crooked Tail in an effort to stop bullying.

There once was a cat that was different from the other cats. The Tale of the Cat with the Crooked Tail tells of this unique cat that is different because his tail is crooked. The other cats make fun of him and laugh at his crooked tail. But his real friends accept him for who he is, because he is so loving and special! This insightful children's book story puts a spotlight on bullying and acceptance, showing that no matter how different we are, we will be loved for just being ourselves. The Tale of the Cat with the Crooked Tail makes for purr-fect reading!

Food Safety Management - Pablo A. Carrión
2013-11-01

Cats and dogs are popular pets throughout the world. The pet food industry utilizes the same ingredient streams as that of the human food supply and may encounter the same potential food safety hazards. There is a difference in the severity of health effects of these hazards. Pets are relatively resistant to acute infection by common food pathogens but may be very

sensitive to the toxicity of common mycotoxins and veterinary drugs. The most significant historical pet food safety incidents in terms of frequency of occurrence and severity are related to aflatoxins, veterinary drug contamination, Salmonella and, more recently, adulterated ingredients. With the exception of Salmonella contamination of pet foods, most other food safety hazards are ingredient or formulation based and have no effective control measure in the manufacturing process itself. Potential HACCP control strategies to address these food safety hazards are discussed.

Square Cat - Elizabeth Schoonmaker
2011-01-25

Eula is the only square cat in town—and she doesn't think there's anything hip about it. Everything that normal cats do is hard for her: She can't get her square paw into mouse holes, she can't wear her favorite circle skirt, and all of her friends are round! Eula is sad until her two best friends show her just how well a square cat

can fit into a round world. Debut author/illustrator Elizabeth Schoonmaker applies her dry wit to the topic of fitting in, and the spare text and appealing trim size of Square Cat make it ideal for repeated readings.

In the Shadow of Blackbirds - Cat Winters 2013-04-02

In 1918, the world seems on the verge of apocalypse. Americans roam the streets in gauze masks to ward off the deadly Spanish influenza, and the government ships young men to the front lines of a brutal war, creating an

atmosphere of fear and confusion. Sixteen-year-old Mary Shelley Black watches as desperate mourners flock to séances and spirit photographers for comfort, but she herself has never believed in ghosts. At her bleakest moment, however, she's forced to rethink her entire way of looking at life and death, for her first love—a boy who died in battle—returns in spirit form. But what does he want from her? Featuring haunting archival early-20th-century photographs, this is a tense, romantic story set in a past that is eerily like our own time.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of

forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the

risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
