On Extinction - Melanie Challenger 2012-12-01

Realizing the link between her own estrangement from nature and the cultural shifts that led to a dramatic rise in extinctions, award-winning writer Melanie Challenger travels in search of the stories behind these losses. From an exploration of an abandoned mine in England to an

Antarctic sea voyage to South Georgia's old whaling stations, from a sojourn in South America to a stay among an Inuit community in Canada, she uncovers species, cultures, and industries touched by extinction. Accompanying her on this journey are the thoughts of anthropologists, biologists, and philosophers who have come before her. Drawing on their words as well as firsthand witness and ancestral memory, *Challenger* traces the mindset that led to our destructiveness and proposes a path of redemption rooted in our emotional responses. This sobering yet illuminating book looks beyond natural devastation to examine "why" and "what's next."

Challenger 2 - Robert Griffin 2017-10-30

For much of the Cold War, the British Army's main battle tanks (MBT) were first the Centurion and then the Chieftain. The question of the latter's replacement became urgent when in 1980 MBT80 was canceled. While the Royal Ordnance Challenger (originally the Shir 2) was acquired as a stop gap its design and capability limitations quickly became apparent. Vickers then took over the Royal Ordnance tank building facility and against stiff foreign competition developed the Challenger 2. This superbly researched and illustrated book tells the story of the evolution and subsequent successful career of Challenger 2 which has seen distinguished service in war and peace since 1990 and has proved itself one of the world's most formidable fighting vehicles. The authors do not shy away from technical detail and make comparisons with competitors. The result is an objective and authoritative work which will delight military equipment buffs, modelers and wargamers.

Anyone interested in science, sibling relationships, and friendships will enjoy reading *We Dream of Space*."—Time for Kids Newbery Medalist and New York Times–bestselling author Erin Entrada Kelly transports readers to 1986 and introduces them to the unforgettable Cash, Fitch, and Bird Nelson Thomas in this pitch-perfect middle grade novel about family, friendship, science, and exploration. This acclaimed Newbery Honor Book is a great choice for readers of Kate DiCamillo, Rita Williams-Garcia, and Rebecca Stead. Cash, Fitch, and Bird Nelson Thomas are three siblings in seventh grade together in Park, Delaware. In 1986, as the country waits expectantly for the launch of the space shuttle Challenger, they each struggle with their own personal anxieties. Cash, who loves basketball but has a newly broken wrist, is in danger of failing seventh grade for the second time. Fitch spends every afternoon playing Major Havoc at the arcade on Main and wrestles with an explosive temper that he doesn't understand. And Bird, his twelve-year-old twin, dreams of being NASA's first female shuttle commander, but feels like she's disappearing. The Nelson Thomas children exist in their own orbits, circling a tense and unpredictable household, with little in common except an enthusiastic science teacher named Ms. Salonga. As the launch of the Challenger approaches, Ms. Salonga gives her students a project—they are separated into spacecraft crews and must create and complete a mission. When the fated day finally arrives, it changes all of their lives and brings them together in unexpected ways. Told in three alternating points of view, *We Dream of Space* is an unforgettable and thematically rich novel for middle grade readers. *We Dream of Space* is illustrated throughout by the author.

The Burning Blue - Kevin Cook 2021-06-08

The untold story of a national trauma—NASA’s Challenger explosion—and what really happened to America’s Teacher in Space, illuminating the tragic cost of humanity setting its sight on the stars. You’ve seen the pictures. You know what happened. Or do you? On January 28, 1986, NASA’s space shuttle Challenger exploded after blasting off from Cape Canaveral. Christa McAuliffe, America’s “Teacher in Space,” was instantly killed, along with the other six members of the mission. At least that’s what most of us remember. Kevin Cook tells us what really happened on that ill-fated, unforgettable day. He traces the pressures—leading from NASA to the White House—that triggered the fatal order to launch on an ice-cold Florida morning. Cook takes readers inside the shuttle for the agonizing minutes after the explosion, which the astronauts did indeed survive. He uncovers the errors and corner-cutting that led an overconfident space agency to launch a crew that had no chance to escape. But this is more than a corrective to a now-dimming memory. Centering on McAuliffe, a charmingly down-to-earth civilian on the cusp of history, *The Burning Blue* animates a colorful cast of characters: a pair of red-hot flyers at the shuttle’s controls, the second female and first Jewish astronaut, the second Black astronaut, and the first Asian American and Buddhist in space. Drawing vivid portraits of Christa and the astronauts, Cook makes readers forget the fate they’re hurtling toward. With drama, immediacy, and shocking surprises, he reveals the human price the Challenger crew and America paid for politics, capital-P Progress, and the national dream of “reaching for the stars.”

The Challenger Customer - Brent Adamson 2015-09-08

Four years ago, the bestselling authors of *The Challenger Sale* overturned decades of conventional wisdom with a bold new approach to sales. Now their latest research reveals something even more surprising: Being a Challenger seller isn’t enough. Your success or failure also depends on who you challenge. Picture your ideal customer: friendly, eager to meet, ready to coach you through the sale and champion your products and services across the organization. It turns out that’s the last person you need. Most marketing and sales teams go after low-hanging

fruit: buyers who are eager and have clearly articulated needs. That's simply human nature; it's much easier to build a relationship with someone who always makes time for you, engages with your content, and listens attentively. But according to brand-new CEB research—based on data from thousands of B2B marketers, sellers, and buyers around the world—the highest-performing teams focus their time on potential customers who are far more skeptical, far less interested in meeting, and ultimately agnostic as to who wins the deal. How could this be? The authors of *The Challenger Customer* reveal that high-performing B2B teams grasp something that their average-performing peers don't: Now that big, complex deals increasingly require consensus among a wide range of players across the organization, the limiting factor is rarely the salesperson's inability to get an individual stakeholder to agree to a solution. More often it's that the stakeholders inside the company can't even agree with one another about what the problem is. It turns out only a very specific type of customer stakeholder has the credibility, persuasive skill, and will to effectively challenge his or her colleagues to pursue anything more ambitious than the status quo. These customers get deals to the finish line far more often than friendlier stakeholders who seem so receptive at first. In other words, Challenger sellers do best when they target Challenger customers. *The Challenger Customer* unveils research-based tools that will help you distinguish the "Talkers" from the "Mobilizers" in any organization. It also provides a blueprint for finding them, engaging them with disruptive insight, and equipping them to effectively challenge their own organization.

Rhyming text leads the reader to find objects hidden in the photographs.

The Poison Belt - Arthur Conan Doyle 1913

The Poison Belt was the second story, a novella, that Sir Arthur Conan Doyle wrote about Professor Challenger. Written in 1913, roughly a year before the outbreak of World War I, much of it takes place--rather oddly, given that it follows *The Lost World*, a story set in the jungle--in a room in Challenger's house. This would be the last story written about Challenger until the 1920s, by which time Doyle's spiritualist beliefs had

begun to affect his writing.

Adventures of a Curious Character - Richard P. Feynman 2011-02-14

The New York Times best-selling sequel to "Surely You're Joking, Mr. Feynman!" Among its many tales—some funny, others intensely moving—we meet Feynman's first wife, Arlene, who taught him of love's irreducible mystery as she lay dying in a hospital bed while he worked nearby on the atomic bomb at Los Alamos. We are also given a fascinating narrative of the investigation of the space shuttle Challenger's explosion in 1986, and we relive the moment when Feynman revealed the disaster's cause by an elegant experiment: dropping a ring of rubber into a glass of cold water and pulling it out, misshapen.
