The Covenant Retreat - Steven McGlaun 2005-08

The Covenant Retreat affirms that each of us is called into a covenant with God. Through this retreat experience, high school seniors begin to identify their unique relationship with God, as an individual and as part of the larger Church. The leader's guide includes material to help teachers and leaders bring the experience into the classroom for weeks before and after the retreat. Leaders will find detailed directions for implementing the retreat; lesson plans, prayers, and handouts; material to help use the student component, Answering God's Call to Covenant, after the retreat; and suggested models for liturgical celebrations to bring the retreat to a close. It also includes suggestions on how to celebrate the retreat with the entire school through graduation and other activities. Answering God's Call to Covenant helps older adolescents consider where they want to go in life before they encounter the crossroads of young adulthood. Students address seven key questions and write their own covenant statements, which will help guide them through life's many challenges. The student text also helps seniors reflect, pray, and discern on their own after graduation.

Crisis Standards of Care - Institute of Medicine 2013-10-27

Disasters and public health emergencies can stress health care systems to the breaking point and disrupt delivery of vital medical services. During such crises, hospitals and long-term care facilities may be without power; trained staff, ambulances, medical supplies and beds could be in short supply; and alternate care facilities may need to be used. Planning for these situations is necessary to provide the best possible health care during a crisis and, if needed, equitably allocate scarce resources. *Crisis Standards of Care: A Toolkit for Indicators and Triggers* examines indicators and triggers that guide the implementation of crisis standards of care and provides a discussion toolkit to help stakeholders establish indicators and triggers for their own communities. Together, indicators

and triggers help guide operational decision making about providing care during public health and medical emergencies and disasters. Indicators and triggers represent the information and actions taken at specific thresholds that guide incident recognition, response, and recovery. This report discusses indicators and triggers for both a slow onset scenario, such as pandemic influenza, and a no-notice scenario, such as an earthquake. *Crisis Standards of Care* features discussion toolkits customized to help various stakeholders develop indicators and triggers for their own organizations, agencies, and jurisdictions. The toolkit contains scenarios, key questions, and examples of indicators, triggers, and tactics to help promote discussion. In addition to common elements designed to facilitate integrated planning, the toolkit contains chapters specifically customized for emergency management, public health, emergency medical services, hospital and acute care, and out-of-hospital care.
