Letters on a Sissy
Auctioned - Cara Dee
2018-06-25

Gray Nolan's biggest problem in life was the torch he carried for his closeted coach. He was just another happy-go-lucky dude, a college student and hockey player, when his ordinary existence was interrupted, and he became a human trafficking statistic. He and seven other young men were taken aboard a luxurious yacht where they were to be auctioned off to the highest bidder. Gray was beaten, shattered, and almost defeated by the time his buyer stepped out of the shadows in a swirl of his own cigarette smoke. He was Gray's new owner. Darius Quinn had vowed never again to find himself in a situation like this. His days as a private military contractor were over. No more missions, no more risks, no more personal attachments. Yet, here he was, after weeks of searching, face-to-face with his broken prize. It was time to get the knucklehead back to his family. Quick and easy was Darius's

plan. Then everything went sideways.

A Mother's Guide To Diapered Teens - Shelley Carter
2021-07-31

"When my six year old son came to me and asked if he could wear diapers again I smiled, said no and life went on. When my ten year old son once again asked if he could wear diapers despite the fact he hadn't wet his bed since he was 4, I again said no and moved on, thinking nothing about it. When I found wet diapers in my thirteen-year-old son's bedroom, I realised there

was a problem to deal with. My first decision was to panic. My second was to seek a therapist. When that was useless, I decided to seek real information - and I found it. This book is part our journey and part guidebook for other mothers (and fathers) who may be facing a similar situation. I hope it helps."

Handbook of Veterinary Neurology - E-Book - Michael D. Lorenz 2010-12-14

Handbook of Veterinary Neurology provides quick access to vital information on neurologic conditions in a wide range of species, including

canine, feline, bovine, caprine, equine, ovine, and porcine. A problem-oriented approach makes it easy to diagnose and treat neurologic problems in small and large animals. The coverage of disorders by problem, not by established disease diagnosis, emulates how animals present to the veterinary hospital and simplifies the formulation of a correct diagnosis. Within each chapter, discussions of neurologic disease include a review of the localization criteria and the diseases that can cause that problem, plus treatment and surgical techniques. Lead author Michael D. Lorenz brings decades of experience to neurologic assessment, using a diagnostic approach that requires minimal knowledge of neuroanatomy. A problem-based approach is organized by presenting sign rather than by condition, guiding you to logical conclusions regarding diagnosis and treatment. plans. Coverage of current diagnostic techniques includes the use of diagnostic tools, such as radiology, spinal fluid analysis, electrodiagnosis, and MR imaging. Case histories in each chapter present a problem and the results of the neurologic examination, then ask you to solve the problem by localizing the lesion, listing probable causes, and making a diagnostic plan. Answers are provided at the back of the book. A consistent format for each case history includes signalment, history, physical examination findings, and neurologic examination. A comprehensive appendix describes species and breeds that have a congenital predisposition for particular neurologic diseases. Extensive references make it easy to pursue in-depth research of more advanced topics. A companion website includes 20 narrated video clips with accompanying PowerPoint slides that correlate to the case histories in the book, covering neurologic assessment and clinical problems such as

paresis of one limb, tetraparesis, stupor, seizures, ataxia of the head and limbs, and cranial nerve disorders. Two new co-authors, Jean Coates and Marc Kent, board-certified in neurology, enhance the credibility of this edition. A full-color design and numerous illustrations include enhanced images of neuroanatomy and pathology.
