The Consumer's Guide to Effective Environmental Choices - Michael Brower 2009-11-04

From one of the most prestigious nonprofit organizations devoted to environmental issues comes a clear, practical, and rational overview of the relationship between consumers and the environment. Paper or plastic? Bus or car? Old house or new? Cloth diapers or disposables? Some choices have a huge impact on the environment; others are of negligible importance. To those of us who care about our quality of life and what is happening to the earth, this is a vastly important issue. In these pages, the Union of Concerned Scientists help inform consumers about everyday decisions that significantly affect the environment. For example, a few major decisions--such as the choice of a house or vehicle--have such a disproportionately large affect on the environment that minor environmental infractions shrink by comparison. This book identifies the 4 Most Significant Consumer-Related Environmental Problems, the 7 Most Damaging Spending Categories, 11 Priority Actions, and 7 Rules for Responsible Consumption. Learn what you can do to have a truly significant impact on our world from the people who

are at the forefront of scientific research.

Mr. Gadget (R) Consumer Tech Guide - Volume One: Electronics, Gadgetry & Technology: The One and Only Mr. Gadget Reveals What to Buy and Why to Buy - Steve Kruschen 2012-05-01

Are you confused about consumer electronics, gadgetry and technology? Steve Kruschen, the one and only Mr. Gadget, reveals what to buy and why to buy it in "The Mr. Gadget(r) Consumer Tech Guide." Before you buy a computer, phone, printer, radio, television, vacuum cleaner, kitchen knives or dozens of other gadgets, save time and money by checking out the recommendations in this handy guide from America's foremost consumer technology commentator - Steve Kruschen, the guy who tries it before you buy it! For more than three decades, Steve has been testing, demonstrating and reporting on consumer electronics, gadgets and new technology. He checks out products in a real-world, hands-on environment - just the way the average consumer would. As Mr. Gadget, Steve helps consumers make intelligent buying decisions by providing radio, TV and Internet audiences with his trusted evaluations of the latest and greatest. Thanks to his numerous radio and TV appearances, including "Fox & Friends" (FOX), "The Early Show" (CBS), "Early Today" (NBC), "Power Lunch" (CNBC), plus appearances on CNN, The Weather Channel and dozens of news shows in major cities, consumers rely upon the expert advice of Mr. Gadget. When he is not appearing on television, Steve is speaking to corporate and trade association audiences on how to improve productivity with personal technology. Steve lives in Southern California with his wife, The Long Suffering Mrs. Gadget (and their three children - when they visit).

TV China - Ying Zhu 2009

If radio and film were the emblematic media of the Maoist era, television has rapidly established itself as the medium of the "marketized" China and in the diaspora. In less than two decades, television has become the dominant medium across the Chinese cultural world. *TV China* is the first anthology in English on this phenomenon. Covering the People's Republic, Hong Kong, Taiwan, and the Chinese diaspora, these 12 original essays introduce and analyze the Chinese television industry, its programming, the policies shaping it, and its audiences.

The New Green Consumer Guide - Julia Hailes 2007

Green consumerism is on the rise, but many of us are confused by an avalanche of information - much of it conflicting. We want to do the right thing to help save energy and resources, but where can we start as everyday consumers? Can we do anything to make a difference? Julia Hailes, environmental expert and co-author of the original Green Consumer Guide (Gollancz, 1988), is adamant that we can. The New Green Consumer Guide is accessible and reader-friendly, addressing all the questions the general consumer is asking, giving authoritative advice on a wide range of issues, explaining which products, brands and companies are getting it right - and which ones are getting it wrong. With clearly presented sections on home and garden, food and drink, electrical goods and the office, plus travel, transport, fashion and cosmetics, it is written with today's lifestyles in mind. With full-colour pages and illustrations throughout, and with scores of tips, checklists

and ideas, The New Green Consumer Guide offers real, affordable solutions to the world's most-talked-about challenge. It will be the only guide to greener living that busy consumers will need.

The Digital Consumer Technology Handbook - Amit Dhir 2004-04-30

The consumer electronics market has never been as awash with new consumer products as it has over the last couple of years. The devices that have emerged on the scene have led to major changes in the way consumers listen to music, access the Internet, communicate, watch videos, play games, take photos, operate their automobiles—even live. Digital electronics has led to these leaps in product development, enabling easier exchange of media, cheaper and more reliable products, and convenient services. This handbook is a much-needed, comprehensive engineering guide to the dynamic world of today's digital consumer electronics. It provides complete details on key enabling technologies, standards, delivery and reception systems, products, appliances and networking systems. Each chapter follows a logical progression from a general overview of each device, to market dynamics, to the core technologies and components that make up that particular product. The book thoroughly covers all of the key digital consumer product categories: digital TV, digital audio, mobile communications devices, gaming consoles, DVD players, PCs and peripherals, display devices, digital imaging devices, web terminals and pads, PDAs and other handhelds, screenphones/videophones, telematics devices, eBooks and readers, and many other current and future products. To receive a FREE daily newsletter on displays and consumer electronics, go to: <http://www.displaydaily.com/> · Surveys crucial engineering information for every digital consumer product category, including cell phones, digital TVs, digital cameras, PDAs and many more—the only reference available to do so · Has extremely broad market appeal to embedded systems professionals, including engineers, programmers, engineering managers, marketing and sales personnel—1,000,000+ potential readers · Helps engineers and managers make the correct design decisions based on real-world data

Ad Nauseam - Carrie McLaren 2009-06-23

With the style and irreverence of Vice magazine and the critique of the corporatocracy that made Naomi Klein's No Logo a global hit, the cult magazine Stay Free!—long considered the Adbusters of the United States—is finally offering a compendium of new and previously published material on the impact of consumer culture on our lives. The book questions, in the broadest sense, what happens to human beings when their brains are constantly assaulted by advertising and corporate messages. Most people assert that advertising is easily ignored and doesn't have any effect on them or their decision making, but Ad Nauseam shows that consumer pop culture does take its toll. In an engaging, accessible, and graphically appealing style, Carrie McLaren and Jason Torchinsky (as well as contributors such as David Cross, The Onion's Joe Garden, The New York Times's Julie Scelfo, and others) discuss everything from why the TV program CSI affects jury selection, to the methods by which market researchers stalk shoppers, to how advertising strategy is like dog training. The result is an entertaining and eye-opening account of the many ways consumer culture continues to pervade and transform American life.

Consumer Reports - Kevin P. Manion 2006

Consumers Union, the publisher of Consumer Reports, has been an influential and defining force in American society since 1936. The organization's mission has remained essentially unchanged: to work for a fair, just, and safe marketplace for all consumers. The Consumers Union National Testing and Research Center in Yonkers, New York, is the largest nonprofit educational and consumer product testing center in the world. In addition to its testing facility in Yonkers and a state-of-the-art auto test center in Connecticut, the organization maintains advocacy offices in San Francisco, Austin, and Washington, D.C., where staff members work on national campaigns to inform and protect consumers. In addition to its flagship publication, Consumer Reports, Consumers Union also maintains several Web sites, including www.ConsumerReports.org and www.ConsumersUnion.org, and publishes two newsletters--Consumer Reports on Health and Consumer Reports Money Adviser--as well as many special publications.

Consumer's Guide to a Brave New World - Wesley J. Smith 2004-01-01

" Scare headlines about the first human clones appear in our newspapers. Biotech companies brag about manufacturing human embryos as "products" for use in medical treatments. Events are moving so fast—and biotechnology seems so complicated—that many of us worry we can't keep up. But now, Wesley J. Smith provides us with a guide to the brave new world that is no longer a figment of our imagination, but a reality just around the corner of our lives. Smith unravels the mystery of stem cells and shows what's at stake in the controversy over using them for research. He describes the emerging science of human cloning—the most radical technology in history—and shows how it moves forward inexorably against the moral consensus of the world. But at the core of this highly readable and carefully researched book is a report on the gargantuan "Big Biotech" industry and its supporters in the universities and the science and bioethics establishments. Smith reveals how the lure of huge riches, mixed with the ideology of "scientism," threatens to impose on society a "new eugenics" that would dismantle ethical norms and call into question the uniqueness and importance of all human life. "At stake," he warns, "is whether science will continue to serve society, or instead dominate it." In Consumer's Guide to a Brave New World, Smith presents a clear-eyed vision of two potential futures. In one, we will use biotechnology as a powerful tool to treat disease and improve the quality of our lives. But in another, darker scenario, we will be steered onto the antihuman path that Aldous Huxley and other prophetic writers warned against half a century ago. "
