The Art of Being Human - Michael Wesch 2018-08-07

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for

this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Cultural Anthropology & Human Experience - Katherine A. Dettwyler 2011-03-31

Katherine A. Dettwyler, author of the Margaret Mead Award-winning *Dancing Skeletons*, has written a compelling and original introductory text. *Cultural Anthropology & Human Experience* is suitable for use in Cultural and Social Anthropology courses, and its twelve chapters easily fit into quarter or semester terms, while leaving room for additional readings, discussions, or other projects. All the standard topics are covered, but with less emphasis on method and theory and more coverage of a variety of industrial and postindustrial societies. Auxiliary materials bells and whistles have been kept to a minimum to reduce distractions and maintain a reasonable price to students. The author has chosen all the photographs with

great care to illustrate or amplify important points. The Instructors Manual includes summaries of each chapter, student exercises, and a test bank. Dettwylers upbeat tone inspires students to: develop the ability to think logically, objectively, and critically about different cultural beliefs, practices, and social structures; understand that humans are primates with culture, with a complex overlay of environmental and cultural influences; appreciate how powerful cultural beliefs and practices can be in shaping human perceptions of the world; realize that culture is not the same thing as social constructions of race, ethnic identity, or place of geographic origin; understand why/how cultural practices make sense within the cultures that practice them; articulate how an anthropological perspective helps discern everyday situations and interactions at the local, national, and international levels; understand that anthropology is not just an academic discipline it is a way of looking at and understanding the world; appreciate the ways cultural beliefs and practices, social structures, and human lifestyles contribute to a meaningful life.

Writing Anthropology - Carole McGranahan 2020-04-24

In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors. Where are You Going, where Have You Been? - Joyce Carol Oates 1993

Joyce Carol Oates's prize-winning story "Where Are You Going, Where Have You Been?" takes up troubling subjects that continue to occupy her in her fiction: the romantic longings and limited options of adolescent women; the tensions between mothers and daughters; the sexual victimization of women; and the American obsession with violence. Inspired by a magazine story about a serial killer, its remarkable portrait of the dreamy teenager Connie has made it a feminist classic. Connie's life anticipates the emergence of American society from the social innocence of the fifties into the harsher contemporary realities of war, random violence, and crime. The story was the basis for the movie *Smooth Talk*, which became the subject of much feminist debate. This casebook includes an introduction by the editor, a chronology of Oates's life, and authoritative text of "Where Are You Going, Where Have You Been?" an essay by Oates on *Smooth Talk*, the original *Life* article about the serial killer, ten critical essays (including two about the film), and a bibliography. The contributors are Brenda O. Daly, Christina Marsden Gillis, Don Moser, Tom Quirk, B. Ruby Rich, R.J.R. Rockwood, Larry Rubin, Gretchen Schultz, Marie Mitchell Oleson Urbanski, Joyce M. Wegs, and Joan D. Winslow. Elaine Showalter is Avalon Foundation Professor of Humanities at Princeton University. She is the author and editor of many books on women's writing, including *Sister's Choice: Tradition and Change in American Women's Writing*. A volume in the *Women Writers: Texts and Contexts Series*.

In this major work, Bruce Knauff takes stock of important recent initiatives in cultural and critical theory. By combining critical reviews and ethnographic engagements with fresh readings of major figures and approaches, the work develops a larger vantage point for considering the dispersing influence of practice theories, postmodernism, cultural studies, postcolonial studies, modern/post-positive feminism, and multicultural criticisms.

Questions of Anthropology - Rita Astuti 2007-07-01

Anthropology today seems to shy away from the big, comparative questions that ordinary people in many societies find compelling. Questions of Anthropology brings these issues back to the centre of anthropological concerns. Individual essays explore birth, death and sexuality, puzzles about the relationship between science and religion, questions about the nature of ritual, work, political leadership and genocide, and our personal fears and desires, from the quest to control the future and to find one's 'true' identity to the fear of being alone. Each essay starts with a question posed by individual ethnographic experience and then goes on to frame this question in a broader, comparative context. Written in an engaging and accessible style, Questions of Anthropology presents an exciting introduction to the purpose and value of Anthropology today.

ANTHROPOLOGY SOLVED PAPERS: CIVIL SERVICES MAINS (2010-2019) (ANTHROPOLOGY PAPERS Book 2019) - Subhash Chandra Gahlawat 2020-01-01

In last few years the information we are supposed to provide in our answers to score high marks in anthropology has gone beyond the information given in the conventional study materials. So, in the interest of students with Anthropology as an optional we have worked hard to give information in a manner which can help you in writing answers in that manner. This book gives you answer to each question asked since 2010 to 2019 by using previous year question papers of anthropology. I sincerely believe that this approach will add to your preparation on anthropology and it will supplement your available study materials through the dynamic content of our answers. The language used in the book is simple and tries to build anthropological approach in the views and answer writing of students; helping students with non-anthropological background to develop anthropological views. I thank Team ARSu for improving the quality and reach of the book significantly. Special Features: Detailed answers for Civil Services (Main) Examination (ANTHROPOLOGY 2010-2019). Special focus on Anthropological Thoughts, Diagrams, and Latest works done by Foreign and Indian Anthropologists

Critical Junctions - Don Kalb 2005

"A book about theory and method in the humanities and social sciences. It reacts to what has become known as the "cultural turn," a shift toward semiotics, discourse, and representations and away from other sorts of determinations that started in the early 1980s and that has dominated social thinking for a long string of years. The book is based in a reconsideration of the meeting of two disciplines that helped to launch the cultural turn: anthropology and history. Specifically, it criticizes the ideas of hermeneutics and "thick description" (Clifford Geertz) that have come to play a key role in the encounter of anthropology and history and then in the cultural turn. It led to the renewed cherishing of what Gupta and Ferguson have called paradigms of "peoples and places," saturated pictures of universes, both small and large, of meaning in a more or less frozen standstill—an intellectual precursor to the cultural xenophobia of our times. Against this, the present book embraces praxis and "critical junctions": the connections in space (in and out of a relations of power and dependency, and what Eric Wolf has called the "interstitial relations" between apparently separate institutional domains. In this way the book adds to the current revival of institutionally based "global ethnography," which studies "up and outward" (the journal of Ethnography is a good example)."—Preface

Doing Health Anthropology - Christie W. Kiefer, PhD 2006-11-20

What is the relationship between health, human nature, and human needs? The impact of social change on communities? The processes by which communities confront and overcome their health problems? How do we study these health questions in new communities and become advocates for change? These are critical questions in confronting the social causes of ill health, yet many health students do not have the appropriate training in the anthropological methods and techniques that help answer them. Christie Kiefer has written *Doing Health Anthropology* to prompt students to enter the community already prepared in these methods so that they can accurately ask and solve these important questions themselves. Using this book as a guide, students learn to integrate cultural anthropology with health science and come to their own conclusions based on field research. The book includes common pitfalls to avoid when conducting interviews and observations, and ways to formulate and answer research questions, maintain field notes and other records, and correctly analyze qualitative data. With the help of this text, practitioners and students alike will be able to integrate cultural anthropology methods of research into their health science

investigations and community health initiatives. For news and to learn more about how you can implement a community approach to building global health and social justice, visit *Encyclopedia of Medical Anthropology* - Carol R. Ember 2003-12-31
Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice. The more we know how health and disease are managed in different cultures, the more we can recognize what is "culture bound" in our own medical belief and practice. The *Encyclopedia of Medical Anthropology* is unique because it is the first reference work to describe the cultural practices relevant to health in the world's cultures and to provide an overview of important topics in medical anthropology. No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world. More than 100 experts - anthropologists and other social scientists - have contributed their firsthand experience of medical cultures from around the world.

The Trashing of Margaret Mead - Paul Shankman 2009-12-03

In 1928 Margaret Mead published *Coming of Age in Samoa*, a fascinating study of the lives of adolescent girls that transformed Mead herself into an academic celebrity. In 1983 anthropologist Derek Freeman published a scathing critique of Mead's Samoan research, badly damaging her reputation. Resonating beyond academic circles, his case against Mead tapped into important public concerns of the 1980s, including sexual permissiveness, cultural relativism, and the nature/nurture debate. In venues from the *New York Times* to the TV show *Donahue*, Freeman argued that Mead had been "hoaxed" by Samoans whose innocent lies she took at face value. In *The Trashing of Margaret Mead*, Paul Shankman explores the many dimensions of the Mead-Freeman controversy as it developed publicly and as it played out privately, including the personal relationships, professional rivalries, and larger-than-life personalities that drove it. Providing a critical perspective on Freeman's arguments, Shankman reviews key questions about Samoan sexuality, the alleged hoaxing of Mead, and the meaning of the controversy. Why were Freeman's arguments so readily accepted by pundits outside the field of anthropology? What did Samoans themselves think? Can Mead's reputation be salvaged from the quicksand of controversy? Written in an engaging, clear style and based on a careful review of the evidence, *The Trashing of Margaret Mead* illuminates questions of enduring significance to the academy and beyond. 2010 Distinguished Lecturer in Anthropology at the American Museum of Natural History "The Trashing of Margaret Mead reminds readers of the pitfalls of academia. It urges scholars to avoid personal attacks and to engage in healthy debate. The book redeems Mead while also redeeming the field of anthropology. By showing the uniqueness of the Mead-Freeman case, Shankman places his continued confidence in academia, scholars, and the field of anthropology."—H-Net Reviews

Anthropological Theory - Robert Alan Manners

Anthropological theory has been much discussed in recent years, yet the crucial questions still remain—how can it be defined, how is it developed, how is it to be applied, and how can one confirm it? The editors of *Anthropological Theory* answer these questions by presenting essays relating to various aspects of anthropological theory. Their selections from widely scattered and often difficult-to-obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory. The development of field work in anthropology generated a tremendous emphasis on empirical data and research. The plethora of information awaiting collection and the enthusiasm with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole. Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline. Therefore, they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology. Essays by anthropologists and other social scientists deal with "explanation," evolution, ecology, ideology, structuralism, and a number of other issues reflecting throughout the editors' conviction that anthropology is a science, the goal of which is to produce generalizations about sociocultural phenomena. The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist. Robert A. Manners (1913-1996) received his Ph.D. from Columbia University and carried on field work in

the Caribbean, among American Indians in the Southwest, and in East Africa. He wrote numerous articles and reviews for anthropological journals as well as many books. He was professor of anthropology, Brandeis University where he started up the department. David Kaplan is professor emeritus of anthropology at Brandeis University. He has contributed articles and reviews to various journals. He has also done field work in Mexico and his areas of specialty include economic anthropology, method and theory, and peasant culture of Mesoamerica.

Anthropology and Development - Emma Crewe 2013

"In recent decades international development has grown into a world-shaping industry. But how do aid agencies work and what do they achieve? How does aid appear to those who receive it? And why has there been so little improvement in the position of the poor? Viewing aid and development from anthropological perspectives gives illuminating answers to questions such as these. This essential textbook reveals anthropologists' often surprising findings and details ethnographic case studies on the cultures of development. The authors use a fertile literature to examine the socio-political organisation of aid communities, agencies and networks as well as the judgements they make about each other. Exploring the spaces between policy and practice, success and failure, the future and the past, this book provides a rounded understanding of development work that suggests new moral and political possibilities for an increasingly globalised world"--

Handbook of Methods in Cultural Anthropology - H. Russell Bernard 2014-07-08

The *Handbook of Methods in Cultural Anthropology*, now in its second edition, maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. God & Culture - D. A. Carson 2020-07-30

This book examines a number of facets of contemporary culture and sets forth what thoughtful Christians have been and should be thinking about each one. Written in honor of Carl F.H. Henry on the occasion of his eightieth birthday, the essays in *God and Culture* are on these topics and by these contributors:

•hermeneutics Kevin J. Vanhoozer •pluralism D.A. Carson •eschatology Geoffrey W. Bromiley
•anthropology Robert J. Priest •psychology Warren J. Heard, Jr. •philosophy George I. Mavrodes •history Lewis W. Spitz •economics Ian Smith •law Phillip E. Johnson •politics Sir Fred Catherwood •literature Leland Ryken •art Edmund P. Clowney •media Larry W. Poland •science Charles B. Thaxton •environment Loren Wilkinson •bioethics Nigel M. de S. Cameron •human sexuality Armand M. Nicholi, Jr. •personal life-style and leisure J.I. Packer Each of these authors has demonstrated a profound interest in thinking "Christianly" about his subject. Some of the essays scan the ways previous Christians have tried to evaluate each cultural "slice"; all of them offer some guidance regarding what Christians need to bear in mind as our culture rushes on. Some contributors adopt the well-known grid of H. Richard Niebuhr in his classic *Christ and Culture*; others cut fresh paths. The aim throughout is to foster fidelity to Christ and his gospel while encouraging a comprehensive Christian outlook on our rapidly changing world.
