Historical Linguistics 1999 -
Laurel J. Brinton 2001
This is a selection of papers from the 14th International Conference on Historical Linguistics held August 9-13, 1999, at the University of British Columbia. From the rich program and the many papers given during this conference, the present twenty-three papers were

carefully selected to display the state of current research in the field of historical linguistics.

Computing Algorithms with Applications in Engineering

- V. K. Giri 2020-03-02

This book collects high-quality research papers presented at the International Conference on Computing Applications in Electrical & Electronics Engineering, held at Rajkiya Engineering College, Sonbhadra, India, on August 30-31, 2019. It provides novel

contributions in computational intelligence, together with valuable reference material for future research. The topics covered include: big data analytics, IoT and smart infrastructures, machine learning, artificial intelligence and deep learning, crowd sourcing and social intelligence, natural language processing, business intelligence, high-performance computing, wireless, mobile and green communications, ad-hoc, sensor and mesh networks, SDN and network virtualization, cognitive systems, swarm intelligence, human-computer interaction, network and information security, intelligent control, soft computing, networked control systems, renewable energy sources and technologies, biomedical signal processing, pattern recognition and object tracking, and sensor devices and applications.

Interlingual and Intercultural Communication - Juliane House 1986

English for Academic Research: Writing Exercises

- Adrian Wallwork 2012-10-14
This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English (long sentences, redundancy, poor structure etc). It draws on English-related errors from around 5000 papers written by non-native authors, around 3000 emails, 500 abstracts by PhD students, and over 1000

hours of teaching researchers how to write and present research papers. The exercises are organized into ten chapters on: punctuation and spelling word order writing short sentences and paragraphs link words - connecting phrases and sentences together being concise and removing redundancy ambiguity and political correctness paraphrasing and avoiding plagiarism defining, comparing, evaluating and highlighting anticipating possible objections, indicating level of certainty, discussion limitations, hedging, future work writing each section of a paper Some exercises require no actual writing but simply choosing between various options, thus facilitating self-study, e-reading and rapid progress. In those exercises where extended writing is required, model answers are given. Exercise types are repeated for different contexts, for example the importance of being concise is tested for use in papers, referees' reports, and emails of various types.

Such repetition of similar types of exercises is designed to facilitate revision. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise books in the series and is cross-referenced to: English for Research: Usage, Style, and Grammar English for Writing Research Papers [The Changing Face of Corpus Linguistics](#) - Antoinette Renouf 2006-01

This volume is witness to a spirited and fruitful period in the evolution of corpus linguistics. In twenty-two articles written by established corpus linguists, members of the ICAME (International Computer Archive of Modern and Mediaeval English) association, this new volume brings the reader up to date with the cycle of activities which make up this field of study as it is today, dealing with corpus creation, language

varieties, diachronic corpus study from the past to present, present-day synchronic corpus study, the web as corpus, and corpus linguistics and grammatical theory. It thus serves as a valuable guide to the state of the art for linguistic researchers, teachers and language learners of all persuasions. After over twenty years of evolution, corpus linguistics has matured, incorporating nowadays not just small, medium and large primary corpus building but also specialised and multi-dimensional secondary corpus building; not just corpus analysis, but also corpus evaluation; not just an initial application of theory, but self-reflection and a new concern with theory in the light of experience. The volume also highlights the growing emphasis on language as a changing phenomenon, both in terms of established historical study and the newer short-range diachronic study of 20th century and current English; and the growing area of overlap between these two.

Another section of the volume illustrates the recent changes in the definition of 'corpus' which have come about due to the emergence of new technologies and in particular of the availability of texts on the world wide web. The volume culminates in the contributions by a group of corpus grammarians to a timely and novel discussion panel on the relationship between corpus linguistics and grammatical theory.

Making Sense of Education in Post-Handover Hong Kong - Thomas Kwan-Choi Tse
2016-11-10

Since 1997 when Hong Kong became a Special Administrative Region of the People's Republic of China, a string of education reforms have been introduced to improve the quality of education and maintain Hong Kong's economic

competitiveness in the age of globalization. This book provides a comprehensive and critical analysis of major issues and challenges faced by the education system, ranging from pre-school to higher education. It analyses the prospects for educational development in Hong Kong. It further addresses how the Hong Kong government has responded to the perceived challenges of the external environment and internal forces and explains the rationales for the actions taken. Not only does it review how the reform initiative challenges have been dealt with, it also reviews how effective these initiatives are and its implications on future directions.

2014 International Conference on Computer, Network - 2014-03-12

The objective of the 2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security

and Communication Engineering to share the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. They take this chance to get together, sharing their latest research

activities. The respective chapters cover a broad range of topics, including ubiquitous computing, networks and information systems, multimedia and visualization, middleware and operating systems, security and privacy, data mining and artificial intelligence, software engineering and web technology, as well as applications and problems related to technology convergence, which are reviewed and illustrated with the aid of case studies. Researchers in academia, industry, and at institutes focusing on information science and technology will gain a deeper understanding of

the current state of the art in information strategies and technologies for convergence security.
