My Family and Other Animals - Gerald Durrell

2016-10-11

The inspiration for *The Durrells in Corfu*, a Masterpiece production on public television: A naturalist's account of his childhood on the exotic Greek island. When the Durrells could no longer endure the gray English climate, they did what any sensible family would do: sold their house and relocated to the sun-soaked island of Corfu. As they settled into their new home,

hilarious mishaps ensued as a ten-year-old Gerald Durrell pursued his interest in natural history and explored the island's fauna. Soon, toads and tortoises, bats and butterflies—as well as scorpions, geckos, ladybugs, praying mantises, octopuses, pigeons, and gulls—became a common sight in the Durrell villa. Uproarious tales of the island's animals and Durrell's fond reflections on his family bring this delightful memoir to life. Capturing the joyous chaos of growing up in an unconventional household, *My Family and Other Animals* will transport you to a place you won't want to leave. This ebook features an illustrated biography of Gerald Durrell including rare photos from the author's estate.

A New Zealand Book of Beasts - Annie Potts

2014-03-01

Touching on indigenous Maori relationships with the now-extinct, flightless moa; the attitudes of Pakeha, or European, settlers toward sheep; the iconography of whales and dolphins; the problems of pest-control; and the pleasures of pet-keeping, this modern-day bestiary is a fascinating study of human-animal relations. In the book's four parts, the authors unravel the contradictory ways New Zealanders nurture and eradicate, glorify and demonize, cherish and devour, and describe and imagine animals. The study brings together insights from New Zealand's arts and literature, popular culture, historiography, media, and everyday life to describe and analyze their interactions with nga kararehe and nga manu, the beasts and birds of the land. In doing so, it illuminates fundamental aspects of New Zealand society: how New Zealanders understand their own identities and those of others; how they regard, inhabit and

make use of the natural world; and how they think about what they buy, eat, wear, watch, and read. Rich, multifaceted, and engaging, A New Zealand Book of Beasts satisfyingly explores how culture both shapes and is shaped by the "beasts" of Aotearoa.

Beyond Words - Carl Safina 2015-07-14

In a world where we usually measure animals by human standards, prize-winning author and MacArthur Fellow Carl Safina takes us inside their lives and minds, witnessing their profound capacity for perception, thought and emotion, showing why the word "it" is often inappropriate as we discover who they really are. Weaving decades of observations of actual families of free-living creatures with new discoveries about brain functioning, Carl Safina's narrative breaches many commonly held boundaries between humans and other animals. In *Beyond Words*, readers travel the wilds of Africa to visit some of the last great elephant gatherings, then follow wolves of Yellowstone National Park sort out the aftermath of their personal tragedy, then plunge into the astonishingly peaceful society of killer whales living in waters of the Pacific

Northwest. We spend quality time, too, with dogs and falcons and ravens; and consider how the human mind originated. In his wise and passionate new book, Safina delivers a graceful examination of how animals truly think and feel, which calls to question what really does—and what should—make us human.

sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth's magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile's scaly face is as sensitive as a lover's fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called "the only true voyage . . .

not to visit strange lands, but to possess other eyes." FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE ANDREW CARNEGIE MEDAL
