Salt of the Earth, Conscience of the Court - John M. Ferren 2006-03-08
The Kentucky-born son of a Baptist preacher, with an early tendency toward racial prejudice, Supreme Court Justice Wiley Rutledge (1894-1949) became one of the

Court's leading liberal activists and an early supporter of racial equality, free speech, and church-state separation. Drawing on more than 160 interviews, John M. Ferren provides a valuable analysis of Rutledge's life and judicial decisionmaking and offers the most comprehensive explanation to date for the Supreme Court nominations of

Rutledge, Felix Frankfurter, and William O. Douglas. Rutledge was known for his compassion and fairness. He opposed discrimination based on gender and poverty and pressed for expanded rights to counsel, due process, and federal review of state criminal convictions. During his brief tenure on the Court (he died following a stroke at age fifty-five), he contributed significantly to enhancing civil liberties and the rights of naturalized citizens and criminal defendants, became the Court's most coherent expositor of the commerce clause, and dissented powerfully from military commission convictions of Japanese generals after World War II. Through an examination of Rutledge's life, Ferren highlights the development of American common law and legal education, the growth of the legal profession and related institutions, and the evolution of the American court system, including the politics of judicial selection.

Guantánamo Bay - Carol Rosenberg 2016-08-09
Dispatches from the award-winning journalist who has been reporting on the US's controversial military prison on Cuba for more than fifteen years. In January 2002, an editor at the Miami Herald dispatched correspondent Carol Rosenberg to report on an emerging US military mission at Guantánamo Bay in Cuba. The Pentagon was setting up a war on terror prison at Camp X-Ray. Rosenberg called it "The Alcatraz of the Caribbean." She

saw US Marines walk the first twenty prisoners off a US Air Force cargo plane from Afghanistan looking like a poor man's Hannibal Lecter—in orange jumpsuits and shackles and surgical masks and blackout goggles. Hundreds more would follow. Hundreds were set free or transferred to other countries. Nine would die. And still, Rosenberg's assignment is not over. In Rosenberg's more than fifteen years reporting about the US Navy base called Gitmo, it has become "The Most Expensive Prison on Earth," costing \$5.6 million a year per prisoner by White House estimates. The Miami Herald calls the indefinite detainees "forever prisoners," captives of a global war against an enemy with no leader to surrender. This Herald Books edition offers a unique perspective on the people, policy, and place that strike Rosenberg as the first no-exit-strategy, US military enterprise since the Vietnam War. Her dispatches are inside. *Global Pro Bono* - Scott L. Cummings 2022-04-07

Profit and Punishment - Tony Messenger 2021-12-07

In Profit and Punishment, a Pulitzer Prize-winning journalist exposes the tragedy of modern-day debtors prisons, and how they destroy the lives of poor Americans swept up in a system designed to penalize the most impoverished. “Intimate, raw, and utterly scathing” — Heather Ann Thompson, Pulitzer Prize-winning author of Blood in the Water “Crucial evidence that the justice system is broken and has to be fixed. Please read this book.” —James Patterson, #1 New York Times bestselling author As a columnist for the St. Louis Post-Dispatch, Tony Messenger has spent years in county and municipal courthouses documenting how

poor Americans are convicted of minor crimes and then saddled with exorbitant fines and fees. If they are unable to pay, they are often sent to prison, where they are then charged a pay-to-stay bill, in a cycle that soon creates a mountain of debt that can take years to pay off. These insidious penalties are used to raise money for broken local and state budgets, often overseen by for-profit companies, and it is one of the central issues of the criminal justice reform movement. In the tradition of *Evicted* and *The New Jim Crow*, Messenger has written a call to arms, shining a light on a two-tiered system invisible to most Americans. He introduces readers to three single mothers caught up in this system: living in poverty in Missouri, Oklahoma, and South Carolina, whose lives are upended when minor offenses become monumental financial and personal catastrophes. As these women struggle to clear their debt and move on with their lives, readers meet the dogged

civil rights advocates and lawmakers fighting by their side to create a more equitable and fair court of justice. In this remarkable feat of reporting, Tony Messenger exposes injustice that is agonizing and infuriating in its mundane cruelty, as he champions the rights and dignity of some of the most vulnerable Americans.

Guns and the Law - Andrew J. McClurg 2016-08-10

McClurg (a gun-regulation supporter) and Denning (a gun-rights supporter) apply their decades of experience studying firearms policy and gun violence in this balanced, reader-friendly casebook addressing the contentious issues of guns in America.

Through cases, problems, and provocative notes and questions, the book explores current federal and state gun laws, major constitutional cases, post-Heller Second Amendment litigation, modern self-defense rules such as Stand Your Ground laws, civil liability, gun laws in other

countries, legal solutions to gun violence, and issues of guns and race, alienage, culture, and gender.

Media, Markets, and Democracy - C. Edwin Baker 2001-11-05

Government interventions in media markets are often criticized for preventing audiences from getting the media products they want. A free press is often asserted to be essential for democracy. The first point is incorrect and the second is inadequate as a policy guide. Part I of this book shows that unique aspects of media products prevent markets from providing for audience desires. Part II shows that four prominent, but different, theories of democracy lead to different conceptions of good journalistic practice, media policy, and proper constitutional principles. Part II makes clear that the choice among democratic theories is crucial for understanding what should be meant by free press. Part III explores international free trade in media products.

Contrary to the dominant American position, it shows that Parts I and II's economic and democratic theory justify deviations from free trade in media products.

Crimson Letters: Voices from Death Row - Tessie

Castillo 2020-03-12

Through thirty compelling essays written in the prisoners' own words, *Crimson Letters: Voices from Death Row* offers stories of brutal beatings inside juvenile hall, botched suicide attempts, the terror of the first night on Death Row, the pain of goodbye as a friend is led to execution, and the small acts of humanity that keep hope alive for men living in the shadow of death. Each carefully crafted personal essay illuminates the complex stew of choice and circumstance that brought four men to Death Row and the cycle of dehumanization and brutality that continues inside prison. At times the men write with humor, at times with despair, at times with deep sensitivity, but always with keen insight and understanding of the common human

experience that binds us.

Who Controls the Internet? -

Jack Goldsmith 2006-03-17

Is the Internet erasing national borders? Will the future of the Net be set by Internet engineers, rogue programmers, the United Nations, or powerful countries? Who's really in control of what's happening on the Net? In this provocative new book, Jack Goldsmith and Tim Wu tell the fascinating story of the Internet's challenge to governmental rule in the 1990s, and the ensuing battles with governments around the world. It's a book about the

fate of one idea--that the Internet might liberate us forever from government, borders, and even our physical selves. We learn of Google's struggles with the French government and Yahoo's capitulation to the Chinese regime; of how the European Union sets privacy standards on the Net for the entire world; and of eBay's struggles with fraud and how it slowly learned to trust the FBI. In a decade of events the original vision is uprooted, as governments time and time again assert their power to direct the future of the Internet. The destiny of the Internet over the next decades, argue Goldsmith and Wu, will reflect the interests of powerful nations and the conflicts within and between them. While acknowledging the many attractions of the earliest visions of the Internet, the authors describe the new order, and speaking to both its surprising virtues and unavoidable vices. Far from destroying the Internet, the experience of the last decade has led to a quiet rediscovery

of some of the oldest functions and justifications for territorial government. While territorial governments have unavoidable problems, it has proven hard to replace what legitimacy governments have, and harder yet to replace the system of rule of law that controls the unchecked evils of anarchy. While the Net will change some of the ways that territorial states govern, it will not diminish the oldest and most fundamental roles of government and challenges of governance. Well written and filled with fascinating examples, including colorful portraits of many key players in Internet history, this is a work that is bound to stir heated debate in the cyberspace community.

Handbook - Raymond J. Dowd
2007

Administrative Law -

Christopher F. Edley
1992-07-29

This seminal book presents a fundamental reconsideration of modern American

administrative law. According to Christopher Edley, the guiding principle in this field is that courts should apply legal doctrines to control the discretion of unelected bureaucrats. In practice, however, these doctrines simply give unelected judges largely unconstrained--and inescapable--discretion. Assessed on its own terms, says Edley, administrative law is largely a failure. He discussed why and how this is so and argues that law should abandon its obsession with bureaucratic discretion and pursue instead the direct promotion of sound governance. Edley demonstrates that legal analyses of separation of powers and of judicial oversight of agencies implicitly use three decision-making paradigms: politics, scientific expertise, and adjudicatory fairness. Conventional wisdom maintains, for example, that judges should hesitate to question the political choices of legislators and the expertise of administrators, but need not be

so deferential in addressing questions of law. Such judicial efforts to police governance have largely failed because, as Edley shows in several contexts, they attempt to appraise decision-making paradigms as though they were separable when in fact the important decisions of both judges and political officials combine elements of politics, science, and fairness. According to Edley, unsustainable boundaries among these paradigms cannot be a satisfactory basis for deciding when a court should interfere. Law must stop focusing on separation of powers and instead direct attention to such issues as bureaucratic incompetence, systemic agency delay, and political bias. Public Health Law and Ethics - Lawrence O. Gostin 2010-06-02 Now revised and expanded to cover today's most pressing health threats, Public Health Law and Ethics probes the legal and ethical issues at the heart of public health through an incisive selection of

government reports, scholarly articles, and relevant court cases. Companion to the internationally acclaimed text *Public Health Law: Power, Duty, Restraint*, this reader can also be used as a stand-alone resource for students, practitioners, scholars, and teachers. It encompasses global issues that have changed the shape of public health in recent years including anthrax, SARS, pandemic flu, biosecurity, emergency preparedness, and the transition from infectious to chronic diseases caused by lifestyle changes in eating and physical activity. In addition to covering these new arenas, it includes discussion of classic legal and ethical tensions inherent to public health practice, such as how best to balance the police power of the state with individual autonomy.

The Confirmation Mess -

Stephen L. Carter 1994-05-12
Stephen L. Carter tells what's wrong with our confirmation process, explains how it got that way, and suggests what we can do to fix it. Using the

most recent confirmation battles as examples, Carter argues that our confirmation process will continue to be bloody until we develop a more balanced attitude toward public service and the Supreme Court by coming to recognize that human beings have flaws, commit sins, and can be redeemed.

Privacy at the Margins -

Scott Skinner-Thompson
2020-10-31

Limited legal protections for privacy leave minority communities vulnerable to concrete injuries and violence when their information is exposed. In *Privacy at the Margins*, Scott Skinner-Thompson highlights why privacy is of acute importance for marginalized groups. He explains how privacy can serve as a form of expressive resistance to government and corporate surveillance regimes - furthering equality goals - and demonstrates why efforts undertaken by vulnerable groups (queer folks, women, and racial and religious minorities) to protect their

privacy should be entitled to constitutional protection under the First Amendment and related equality provisions. By examining the ways even limited privacy can enrich and enhance our lives at the margins in material ways, this work shows how privacy can be transformed from a liberal affectation to a legal tool of liberation from oppression.

Examines lawyers and the legal profession, including regulation and discipline. Provides a detailed discussion of the client-lawyer

relationship. Judges and the quality of justice are also addressed. Provides systematic examination of the issues covered in the 1969 Code of Professional Responsibility and the 1983 Model Rules of Professional Conduct.

Rethinking Self-Defence - T Markus Funk 2021-01-14
Self-defence - the 'ancient right' - has never been more relevant than in the present era of widespread calls for criminal justice reform. The book substantially advances the patinaed discussion by introducing for the first time a comprehensive value-centric approach to thinking about the defence's deeper rationale. It tackles core issues such as the relative importance of the State's claimed monopoly on force, procedural justice and the need to shore up the justice system's legitimacy and creditworthiness, everyone's presumptive 'right to life,' and the importance of ensuring equal standing between citizens. And, in so doing, the book breaks ground by addressing public perceptions

of 'just' and 'right' outcomes, as well as the emphasis legal systems place (and should place) on State power.

Gay Priori - Libby Adler
2018-04-27

Libby Adler offers a comprehensive critique of the mainstream LGBT legal agenda in the United States, showing how LGBT equal rights discourse drives legal advocates toward a narrow array of reform objectives that do little to help the lives of the most marginalized members of the LGBT community.

Pirates, Prisoners, and

Lepers - Paul H. Robinson

2015-07-15

It has long been held that humans need government to impose social order on a

chaotic, dangerous world. How, then, did early humans survive on the Serengeti Plain,

surrounded by faster, stronger, and bigger predators in a harsh and forbidding environment?

Pirates, Prisoners, and Lepers examines an array of natural experiments and accidents of human history to explore the fundamental nature of how human beings act when beyond the scope of the law. Pirates of the 1700s, the leper colony on

Molokai Island, prisoners of the Nazis, hippie communes of the 1970s, shipwreck and plane crash survivors, and many more diverse groups—they all existed in the absence of formal rules, punishments, and hierarchies. Paul and Sarah Robinson draw on these real-life stories to suggest that humans are predisposed to be cooperative, within limits. What these “communities” did and how they managed have dramatic implications for shaping our modern institutions. Should today’s criminal justice system build on people’s shared intuitions about justice? Or are we better off acknowledging this aspect of human nature but using law to temper it? Knowing the true nature of our human character and our innate ideas about justice offers a roadmap to a better society.

Gay Rights vs. Religious Liberty? - Andrew Koppelman
2020-05-01

Should religious people who conscientiously object to facilitating same-sex weddings, and who therefore decline to

provide cakes, photography, or other services, be exempted from antidiscrimination laws? This issue has taken on an importance far beyond the tiny number who have made such claims. Gay rights advocates fear that exempting even a few religious dissenters would unleash a devastating wave of discrimination. Conservative Christians fear that the law will treat them like racists and drive them to the margins of American society. Both sides are mistaken. The answer lies, not in abstract principles, but in legislative compromise. This book clearly and empathetically engages with both sides of the debate. Koppelman explains the basis of antidiscrimination law, including the complex idea of dignitary harm. He shows why even those who do not regard religion as important or valid nonetheless have good reasons to support religious liberty, and why even those who regard religion as a value of overriding importance should nonetheless reject the extravagant power over nonbelievers that the

Supreme Court has recently embraced. Koppelman also proposes a specific solution to the problem: that religious exemptions be granted only to the few businesses that are willing to announce their compunctions and bear the costs of doing so. His approach makes room for America's enormous variety of deeply held beliefs and ways of life. It can help reduce the toxic polarization of American politics.

The Power of Inclusion - Cecilia Loving 2021-05-05

We have spent a lot of energy in the last several decades focusing on diversity, but we have scarcely scratched the surface of inclusion. Our greater purpose in being more diverse is to be more inclusive: to welcome everyone with the tools and opportunities to succeed. A genuine welcome does not force anyone to assimilate into our norm of what we believe they should be but to welcome their individuality as part of a collective whole with the potential to offer more because of everyone's unique contribution. An inclusive mindset is important to the well-being of everyone. We all need to feel welcomed. When we give others an opportunity to succeed, we respond to our core purpose to serve something greater than ourselves. When we receive an opportunity to succeed, our well-being is also enhanced. Knowing our life's purpose is

important to achieving both a meaningful and healthier life. Not only do we have to take care of our emotional needs, physical health, occupational goals, intellectual endeavors, and networking opportunities, but also to determine our purpose in life. Determining our life's purpose is easier said than done because it is rarely revealed through an epiphany but is the result of a continuous process. Regardless of our individual goals and desires, at its core, our purpose is to develop universal compassion for others. In other words, our

calling or greater purpose is not merely to satisfy our egos but exists to serve "something larger than ourselves." We are here to contribute to the well-being of those around us, which is what inclusion is all about. Inclusion is not merely a lofty workplace goal but a mindset that will enhance our own well-being by welcoming the best in everyone. This book provides the framework for tapping the tools of inclusion in a manner that will not only help others and serve our greatest purpose in life but also promote our well-being.
