The Political Economy of Financial Development in Malaysia - Lena Rethel

2020-12-21

Current inquiries into the political economy of financial policymaking in Malaysia tend to focus on the high-level drama of crisis politics or simply point to the limited impact of post-crisis financial reforms, given that politico-business relations have remained close. In so doing, pundits ignore a number of intriguing questions: what is the relationship between financial development and financialisation and how has it played out in the Malaysian context? And more generally: how can a country like Malaysia become significantly more financially developed, yet fail to emancipate the financial system from political control; a core element of the financial development discourse? To unravel the complexities of this puzzle, this book subjects the history and contemporary practices of financial policymaking in Malaysia to scrutiny. It argues that to

understand financial development in Malaysia, its progress and reversals, it is important to conceptualise it as a political, rather than a merely technical process. In so doing, the book echoes a more profound concern in the political economy literature, namely the evolving relationship between states and markets, and the supposed retreat or reassertion of the state at a time of increasing (financial) globalisation. The book can generate further insights into the evolving role of the state with regard to broader processes of development and marketisation, as they relate specifically to finance.

Handbook of Research Methods and Applications in Economic Geography - Charlie Karlsson 2015-02-27

The main purpose of this Handbook is to provide overviews and assessments of the state-of-the-art regarding research methods, approaches and applications central to economic geography. The chapters are written by

The Dynamics of Entrepreneurship - Maria Minniti 2013-02-14

As governments across the world look to entrepreneurship as a way to increase the wealth and well-being of their countries, this volume brings together leading scholars to provide a comprehensive overview of entrepreneurial activity based on empirical data.

Delivering Sustainable Growth in Africa - Takahiro Fukunishi 2013-12-17

The purpose of this book is to fill the lack of micro evidences on a structural change of African producers. By collecting studies on single industries, we attempt to demonstrate firms' and farmers' responses to the recent economic trend such as growth of demand, emergence of FDI and improvement in infrastructure.

Raw Materials for Future Energy Supply - Friedrich-W. Wellmer 2018-06-25

This is the first book that

analyses the future raw materials supply from the demand side of a society that chiefly relies on renewable energies, which is of great significance for us all. It addresses primary and secondary resources and substitution, not only from technical but also socioeconomic and ethical points of view. The "Energiewende" (Energy Transition) will change our consumption of natural resources significantly. When in future our energy requirements will be covered mostly by wind, solar power and biomass, we will need less coal, oil and natural gas. However, the consumption of minerals, especially metallic resources, will increase to build wind generators, solar panels or energy storage facilities. Besides e.g. copper, nickel or cobalt, rare earth elements and other high-tech elements will be increasingly used. With regard to primary metals, Germany is 100 % import dependent; only secondary material is produced

within Germany. Though sufficient geological primary resources exist worldwide, their availability on the market is crucial. The future supply of the market is dependent on the development of prices, the transparency of the market and the question of social and ethical standards in the raw materials industry, as well as the social license to operate, which especially applies to mining. The book offers a valuable resource for everyone interested in the future raw material supply of our way of life, which will involve more and more renewable energies.

Retirement in Japan and South Korea - Masa Higo

2015-04-10

This book analyses reforms to retirement policies in Japan and South Korea, especially in the context of rapid population ageing. A defining feature of the labour markets and workplaces in these two nations, and the lives of workers and families, is involuntary retirement at relatively young ages. The book explains past developments

and recent reforms of retirement policies both in the two countries, as well as in a cross-national comparative manner. At the core of the book is an examination of the social, economic and political conflicts around retirement, such as between younger and older workers, between employers and governments, and between employers and workers. The policy recommendations offered apply not only to Japan and South Korea, but also to other nations such as China. The volume is of value particularly for those interested in labour markets and workplaces, population ageing and contemporary East Asia, in addition to those studying retirement and pensions. Policymakers, business leaders, worker organizations, researchers and students will benefit from the insights about the past, present and future of retirement.

Limits of the Numerical -

Christopher Newfield

2022-06-24

This collection examines the uses of quantification in

climate science, higher education, and health. Numbers may seem fragile--they are, after all, frequent objects of obfuscation or outright denial--but they have also never been more influential in our society, figuring into everything from college rankings to vaccine efficacy rates. This timely collection by a diverse group of humanists and social scientists challenges undue reverence or skepticism toward quantification and shows how it can be a force for good despite its many abuses. Limits of the Numerical focuses on quantification in several contexts: the role of numerical estimates and targets in explaining and planning for climate change; the quantification of outcomes in teaching and research; and numbers representing health, the effectiveness of medical interventions, and well-being more broadly. The authors complicate our understanding of these numbers, uncovering, for example, epistemic problems with some core

numbers in climate science. But their theme is less the problems revealed by case studies than the methodological issues common to them all. This volume shows the many ways that qualitative and quantitative approaches can productively interact--how the limits of the numerical can be overcome through equitable partnerships with historical, institutional, and philosophical analysis.

Methodology of Islamic

Economics - Necmettin

Kizilkaya 2019-12-03

In its pursuit to equip the reader with a basic knowledge of Islamic economics, this book divulges the micro-foundations of the discipline, and highlights the predominant schools of thought that exist in the field. It explains, in simple terms, what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran, the Sunnah and the Islamic intellectual tradition based on these two sources. The book familiarizes the reader with knowledge of the basic maxims of the discipline.

It then establishes the arguments that are presented by the proponents of religion-based economics, specifically Islam, and appraises readers about the aforementioned schools as they exist. A number of chapters consider the dimension of the dilemmas the discipline is facing, and the chronological progress of the field is reviewed, hence providing a comprehensive overview of the topic. The book deals with the issues about the origins of Islamic economics, the basic methodological questions, the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions, despite the differing schools of thought, not unlike the development of conventional Economics where radical differences between Keynesian, Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how

Islamic economics may progress as a discipline. This guide will provide both students and researchers in Comparative Economic Studies, Islamic Economics and Islamic Finance with an essential overview of the field. Positive Psychology in the Middle East/North Africa - Louise Lambert 2019-03-30 This volume looks at positive psychology from a culturally-responsive, empirically-driven perspective to avoid a descent into pseudoscience. Through evidence-based, regionally relevant topics in the field of well-being, this volume shows how increasing levels of excellence in the GCC region enhance upon business, education, research, and social innovations. Grounded in the empirical research literature, each chapter applies psychological concepts to locally relevant considerations, such as culture, religion, and socio-political contexts, making this book an essential tool for understanding positive psychology and well-being in the GCC nations and beyond.

Economic Development
Implications of the Venezuelan
Migrant Crisis - Roger Hosein
2022

This book analyzes the ways in which the Venezuelan immigrant community is making an impact on the social and economic dynamic of small economies. This publication addresses some of the main economic development conversations on trade, labor, and fiscal implications of immigration. This book attempts to collate and unpack some of the relevant theoretical frameworks which provide a basis for policymakers and other key decision-makers. In this regard, the links between immigration and economic development is discussed with a focus on Trinidad and Tobago as a representative case within the Caribbean community. Roger Hosein is a Senior Lecturer in the Department of Economics at the University of the West Indies, St. Augustine, Trinidad and Tobago. He is also the coordinator of the Trade and Economic Development

Unit (TEDU) a research cluster within the Department of Economics. Anthony Gonzales is the former Director of the Institute of International Relations at the University of the West Indies, St. Augustine, Trinidad and Tobago.

Bhoendradatt Tewarie is the former Vice Chancellor of the University of the West Indies, St. Augustine, Trinidad and Tobago. Rebecca Gookool-Bosland is a Lecturer in the Department of Economics at the University of the West Indies, St. Augustine, Trinidad and Tobago.

Competitiveness in the European Economy - Stefan Collignon 2014-02-05

This book deals with the relationship between the competitiveness of countries in Europe and the analysis of macroeconomic imbalances. It focuses mainly on a European analysis, along with special studies of the German economy, which is rarely considered to be a cause for the current crisis. The book also compares Germany with Italy, providing a comparative

perspective on structural reforms. The first part of this book analyses macroeconomic imbalances based on a new framework from the analysis of the flow of funds rather than balance of payments, and presents an alternative measure of unit labour cost comparisons to investigate the relationship between imbalances and competitiveness. The second part is dedicated to the analysis of the trade performance of Germany and Italy and the sustainability of the German model in the EMU. The third part describes the reform policies implemented by Germany and their effect on imbalances; this includes wage moderation, the labour market reforms and weak labour demand. The final part explores the regional inequalities within Germany and Italy, providing useful lessons regarding fiscal federalism and regional banking developments. In conclusion, a big part of the problems within the Euro Area are generated by the use of a

wrong framework of analysis, where the EMU is considered as a fixed exchange rate regime and not a single country. This book provides an alternative view which holds at the core the relationship between sectors. It is stressed throughout the book that the German behaviour has contributed to the rise of imbalances between countries due to its growth model, not suitable for a big developed country in a currency union. This book also finds that stressing banking integration within countries helps to reduce regional inequalities, which has important implications for the management of Europe's future banking union and macroeconomic imbalances.

The Inequality Paradox -

Douglas McWilliams

2018-10-09

In his illuminating new book, Douglas McWilliams argues that inequality is largely driven not by a conspiracy of the rich, as Thomas Piketty suggests, but by technology and globalization that have led to the

paradox of rising inequality even as worldwide poverty drops. But what are the implications of this seeming contradiction, and what ultimately drives the global distribution of wealth? What can societies do to reshape capitalism for the 21st century? Drawing on the latest research, McWilliams investigates how wealth is concentrated and why it persistently remains in the hands of very few. In accessible and thought-provoking prose, McWilliams poses a comprehensive theory on why capitalism has not met its match in the form of increasingly disparate income distribution, but warns of the coming wave of technological development—the fourth industrial revolution—that threatens to create a scarcity of unskilled jobs that will lead to even greater inequality and explains what governments can do to prepare for this. From the inquisitive layperson to the professional economist or policymaker, *The Inequality Paradox* is essential reading for understanding the global

economy in its present state. McWilliams is a fresh, authoritative voice entering the global discussion, making this book indispensable in preparing for the imminent economic challenges of our changing world.

Managing Globalization in the Asian Century - Hal Hill
2016-11-17

The global centre of gravity continues to shift to the Asia-Pacific, the most dynamic region in the world. These economies have generally grown faster for longer periods of time than any other major region in world history. Their embrace of globalization has been a central feature, and driver, of their dynamism. The management of Asia-Pacific economic integration and globalization is crucial not only for the countries themselves but also for the state of the global economy, including importantly latecomer developing economies who look to the region for analytical and development policy lessons. Twenty-eight leading international authorities in the

field, drawn from nine countries, provide a comprehensive examination of the causes, consequences and challenges of globalization, in a volume that celebrates the distinguished career of Professor Prema-Chandra Athukorala. Among the major issues examined are the region's distinctive approach to trade liberalization, the effects of economic growth on poverty reduction and the labour market, the special challenges of by-passed regions, the role of ideas in influencing policy making, the modalities of connecting to global production networks, and the importance of remittances in economic development. Several country case studies provide in-depth analyses of development processes and outcomes. These include episodes in economic development, the challenges faced by transition economies, the macroeconomics of adjusting to slower growth and rising debt in advanced economies, and the so-called middle-income trap

phenomenon.

Economic Diversification Policies in Natural Resource Rich Economies - Sami

Mahroum 2016-08-05

Economic diversification remains at the top of the agenda for hundreds of regions around the world. From the single commodity economies of African countries and the Caribbean, to the many single industry regions of Europe and North America, as well as the oil and gas rich but volatile hydrocarbon economies.

Economic diversification policies have been around for almost a century with varying degrees of success and failure. Economic Diversification Policies in Natural Resource Rich Economies takes a special interest in the policy experiences of a set of different countries that have extractive industries representing significant drivers of their economies and subsequently are significant contributors to government revenues. It explores twelve cases including upper-middle to high income economies such as Canada,

Australia, Iceland and Norway, emerging economies such as Latin America, the GCC (Saudi and UAE), Kazakhstan, Malaysia and Russia, as well as the developing economy of Uganda. Each chapter provides a review of economic diversification experiences including policy environment, diversification strategies, desired outcomes, the role of government, and a critical evaluation of achievements. This book is suitable for those who study environmental economics, development economics and resource management.

Central Bank Regulation and the Financial Crisis - Miao Han
2015-10-20

The respective legal frameworks that control central banks are shaped by whether they are market oriented or government controlled. However such stark distinction between these two categories has been challenged in view of the varying styles of crisis management demonstrated by different central banks during the crisis.

This book uses comparative analysis to investigate how the global financial crisis challenged the role played by central banks in maintaining financial stability. Focusing on four central banks including the US Federal Reserve System, the Bank of England, the Bank of Japan and the People's Bank of China, it illustrates the similarities between the banks prior to the crisis, and their similar policy responses in the wake of the crisis. It demonstrates how each operated with varying levels of independence while performing very differently and facing different tasks. The book identifies some central explanatory variables for this behavior, addressing the mismatch of similar risk management solutions and varying outcomes. Central Bank Regulation and The Financial Crisis: A Comparative Analysis explores the legal challenges within central bank regulation presented by the global financial crisis. It emphasizes the importance of, and the limitations involved in,

legal order and argue that in spite of integration and globalization, significant differences exist in central banks' approaches to risk management and financial stability.

Globalization in Africa - Usman A. Tar 2016-10-28

This book critically examines the impact of globalization on development, security, and the environment in Africa. It assesses multiple fronts of crises unleashed by globalization: development and governance, peace and security, and environment and sustainability. This edited volume also identifies and discusses the challenges and opportunities that globalization poses to African states and societies.

Globalisation Impacts - Amitendu Palit 2022

The book reviews globalisation by identifying causes behind the discontent it has produced in recent years. It variously engages in economics, political economy, development and policy discourses to study experiences of countries and

institutions in managing and adjusting to globalisation. Extending the analysis to latest global developments, including the remarkable advance of technology and digitalisation, and political and economic upheavals caused by COVID19, the book collects varied academic perspectives and reflects on the present as well as future. Comprising chapters written by distinguished academics and policy experts, the book is a rare collection of cross-disciplinary objective evaluations of globalisation.

Wealthier, Fairer Scotland - Michael Keating 2017-03-08

The ambition of the Scottish Government is to create a wealthier and fairer nation. Following the devolution acts of 1998, 2012 and 2016, it has extensive powers and resources to fulfill its ambition. This interdisciplinary collection of essays asks how it can be achieved, given the range of powers available, economic constraints, institutions and public support. Looking at economic policy, taxation and welfare, it provides a realistic

analysis of the opportunities and constraints facing a small, devolved nation. After years of debate on what powers Scotland should have, this book examines how they might be used to shape the country's future.

Education in Thailand - Gerald W. Fry 2018-11-01

This interdisciplinary book offers a critical analysis of Thai education and its evolution, providing diverse perspectives and theoretical frameworks. In the past five decades Thailand has seen impressive economic success and it is now a middle-income country that provides development assistance to poorer countries. However, educational and social development have lagged considerably behind its globally recognized economic success. This comprehensive book covers each level of education, such as higher and vocational/technical education, and such topics as internationalization, inequalities and disparities, alternative education, non-formal and informal education,

multilingual education, educational policy and planning, and educational assessment. The 25 Thai and 8 international contributors to the volume include well-known academics and practitioners. Thai education involves numerous paradoxes, which are identified and explained. While Thailand has impressively expanded its educational system quantitatively with much massification, quality problems persist at all levels. As such, the final policy-oriented summary chapter suggests strategies to enable Thailand to escape "the middle income trap" and enhance the quality of its education to ensure its long-term developmental success.

The Need for Humility in Policymaking - Stefanie Haeffle 2019-08-22

This volume intends to cultivate an appreciation for the complexity of human decision making and the incentives that drive human behavior. By examining specific policy changes, it will delve

into the effects of and lessons learned from regulations in financial markets, computer and internet governance, and health care innovation and delivery.

The Regional Economics of Technological Transformations

- Roberta Capello 2021-08-31

The Regional Economics of Technological Transformations provides a comprehensive overview of 4.0 technological transformations in Europe and their socio-economic impact, with a particular emphasis on the regional dimension of the phenomena. The authors employ extensive original data and robust quantitative methods to analyse technological change in all regions of the 27 EU countries plus the UK and shed light on this trend for Europe and beyond. Structured in four parts, the book first looks at conceptual definitions, empirical measurements and expected impacts on both the economic performance (GDP and productivity growth) and the labour market, and then moves on to analyse where 4.0

technological transformation actually takes place in Europe and the reasons for this. Next, it offers original empirical evidence on the impacts of the different transformations, and of their intertwined effects, on both the economy and the society. Finally, the book explores the policy implications of this technological transformation. This book will be valuable reading for advanced students, researchers and policymakers working across regional economics, industrial economics and innovation policy. It will be of primary interest to regional scientists interested in the field, who may enjoy the conceptual and empirical solutions to the study of a very complex, timely and still largely unexplored theme. Sociologists, engineers and political economists can benefit from the book's analysis, noting the urgency of the development of new ethical rules governing the new digital and labour markets. Finally, the book may appeal to policymakers interested in

opportunities to increase regional competitiveness and sustainability goals through the advent of 4.0 technologies.

Crisis and Migration - Anna Lindley 2014-07-11

Crisis and migration have a long association, in popular and policy discourse as well as in social scientific analysis. Despite the emergence of more nuanced and even celebratory accounts of mobility in recent years, there remains a persistent emphasis on migration being either a symptom or a cause of crisis. Moreover, in the context of a recent series of headline-hitting and politically controversial situations, terms like 'migration crisis' and 'crisis migration' are acquiring increasing currency among policy-makers and academics. Crisis and Migration provides fresh perspectives on this routine association, critically examining a series of politically controversial situations around the world. Drawing on first-hand research into the Arab uprisings, conflict and famine in the Horn of Africa, cartel

violence in Latin America, the global economic crisis, and immigration 'crises' from East Asia to Southern Africa to Europe, the book's contributors situate a set of contemporary crises within longer histories of social change and human mobility, showing the importance of treating crisis and migration as contextualised processes, rather than isolated events. By exploring how migration and crisis articulate as lived experiences and political constructs, the book brings migration from the margins to the centre of discussions of social transformation and crisis; illuminates the acute politicisation and diverse spatialisations of crisis-migration relationships; and urges a nuanced, cautious and critical approach to associations of crisis and migration.

The Challenges for Russia's Politicized Economic System - Susanne Oxenstierna 2015-04-10

During the early 2000s the market liberalization reforms

to the Russian economy, begun in the 1990s, were consolidated. But since the mid 2000s economic policy has moved into a new phase, characterized by more state intervention with less efficiency and more structural problems. Corruption, weak competitiveness, heavy dependency on energy exports, an unbalanced labour market, and unequal regional development are trends that have arisen and which, this book argues, will worsen unless the government changes direction. The book provides an in-depth analysis of the current Russian economic system, highlighting especially structural and institutional defects, and areas where political considerations are causing distortions, and puts forward proposals on how the present situation could be remedied.

The Politics of Welfare State Transformation in Germany - Christof Schiller 2016-04-20
How can we best analyse contemporary welfare state change? And how can we

explain and understand the politics of it? This book contributes to these questions both empirically and theoretically by concentrating on one of the least likely cases for welfare state transformation in Europe. It analyzes in detail how and why institutional change has taken Germany's welfare state from a conservative towards a new work-first regime. Christof Schiller introduces a novel analytical framework to make sense of the politics of welfare state transformation by providing the missing link: the capacity of the core executive over time. Examining the policy making process in labour market policy in the period between 1980 and 2010, he identifies three different policy making episodes and analyses their interaction with developments and changes in such policy areas as pension policy, family policy, labour law, tax policy and social assistance. The book advances existing efforts aimed at conceptualizing and measuring welfare state change by

proposing a clear-cut conceptualization of social policy regime change and introduces a comprehensive analysis of the transformation of the welfare-work nexus between 1980 and 2010 in Germany. This book will be of interest to students and scholars of social policy, comparative welfare state reform, welfare politics, government, governance, public policy, German politics, European politics, political economy, sociology and history.

The economics of teff: Exploring Ethiopia's biggest cash crop - Minten, Bart

2018-07-19

Considerable poverty and food insecurity in Ethiopia, combined with the overwhelming majority of Ethiopians who depend on agriculture for their livelihoods, make agricultural transformation a crucial development goal for the country. One promising improvement is to increase production of teff, the calorie- and nutrient-rich but low-

yielding staple. The Economics of Teff: Exploring Ethiopia's Biggest Cash Crop examines key aspects of teff production, marketing, and consumption, with a focus on opportunities for and challenges to further growth. The authors identify ways to realize teff's potential, including improving productivity and resilience, selecting and scaling up new technologies, establishing distribution systems adapted to different areas' needs, managing labor demand and postharvest operations, and increasing access to larger and more diverse markets. The book's analysis and policy conclusions should be useful to policy makers, researchers, and others concerned with Ethiopia's economic development.

Taxing Ourselves, fifth edition - Joel Slemrod 2017-06-02

The new edition of a popular guide to the key issues in tax reform, presented in a clear, nontechnical, and unbiased way. To follow the debate over tax reform, the interested citizen is often forced to choose

between misleading sound bites and academic treatises. *Taxing Ourselves* bridges the gap between the oversimplified and the arcane, presenting the key issues clearly and without a political agenda. Tax policy experts Joel Slemrod and Jon Bakija lay out in accessible language what is known and not known about how taxes affect the economy and offer guidelines for evaluating tax systems—both the current tax system and proposals to reform it. This fifth edition has been extensively revised to incorporate the latest data, empirical evidence, and tax law. It offers new material on recent tax reform proposals, expanded coverage of international tax issues, and the latest enforcement initiatives. Offering historical perspectives, outlining the basic criteria by which tax policy should be judged (fairness, economic impact, enforceability), examining proposals for both radical change (replacement of the income tax with a flat tax or consumption tax) and

incremental changes to the current system, and concluding with a voter's guide, the book provides readers with enough background to make informed judgments about how we should tax ourselves. Praise for earlier editions “An excellent book.” —Jeff Medrick, *New York Times* “A fair-minded exposition of a politically loaded subject.” —Kirkus Reviews

Capitalism without Capital -

Jonathan Haskel 2018-10-16

Early in the twenty-first century, a quiet revolution occurred. For the first time, the major developed economies began to invest more in intangible assets, like design, branding, and software, than in tangible assets, like machinery, buildings, and computers. For all sorts of businesses, the ability to deploy assets that one can neither see nor touch is increasingly the main source of long-term success. But this is not just a familiar story of the so-called new economy. *Capitalism without Capital* shows that the growing importance of intangible assets

has also played a role in some of the larger economic changes of the past decade, including the growth in economic inequality and the stagnation of productivity. Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles. Capitalism without Capital concludes by outlining how managers, investors, and policymakers can exploit the characteristics of an intangible age to grow their businesses, portfolios, and economies.

Policy-Making in the GCC - Neil Quilliam 2017-09-11

The GCC is a major player in the post-2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states - especially Kuwait, Qatar, Saudi Arabia and the United Arab Emirates - and the growth of the GCC as a collective entity, surprisingly little attention has been paid to the actual mechanics of policy-making in the region. This book

analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf, and the era of low oil prices. Both developments, along with dramatic demographic change, have compelled state and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy. The book shows how academic, social and economic institutions are responding to the increasingly complex process of decision-making, where citizens demand better services and further empowerment, and states are obliged to seek wider counsel, although wanting to retain ultimate authority. With

contributions from both academics and practitioners, this book will be highly relevant for researchers and policymakers alike.

Rethinking Dwelling - Jeff Malpas 2021-07-15

Over the last twenty years, Jeff Malpas' research has involved his engagement with architects and other academics around the issues of place, architecture and landscape and particularly the way these practitioners have used the work of Martin Heidegger. In *Rethinking Dwelling*, Malpas' primary focus is to rethink of these issues in a way that is directly informed by an understanding of place and the human relation it. With essays on a range of architectural and design concerns, as well as engaging with other thinkers on topics including textuality in architecture, contemporary high-rise construction, the significance of the line, the relation between building and memory and the idea of authenticity in architecture, this book departs from the traditional phenomenological

focus and provides students and scholars with a new ontological assessment of landscape and architecture. As such, it may also be used on other 'spatial' or 'topographic' disciplines including geography, sociology, anthropology, and art in which the 'spatial turn' has been so important.

The Political Economy of Microfinance - Philip Mader 2016-01-12

According to the author, rather than alleviating poverty, microfinance financialises poverty. By indebting poor people in the Global South, it drives financial expansion and opens new lands of opportunity for the crisis-ridden global capital markets. This book raises fundamental concerns about this widely-celebrated tool for social development.

Human Rights and Universal Child Primary Education - Fait Muedini 2015-06-16

This book focuses on all issues related to the human right of child primary education. It addresses issues of access to education, the benefits of

schooling, primary education and human rights law, the role of states and NGOs towards improving enrolment rates, as well as policy recommendations.

Climate Change, Security Risks and Conflict

Reduction in Africa -

Charlène Cabot 2016-11-04
Millions of people are already affected by weather-related shocks every year in West Africa and climate change is highly likely to increase these threats. In the wake of climate change, rising temperatures, increasingly irregular rainfall

and more frequent natural hazards will endanger the ways of life of vulnerable population groups in this region and destabilize their human security. A surge in violence and conflicts could take place. One of the conflict constellations could be between farmers and herders. A surge in violence and conflicts could take place. One of the conflict constellations could be between farmers and herders. These groups are highly vulnerable to climate change due to their dependence on

natural resources for their subsistence. Furthermore, they are historically prone to enter into conflict over issues of access to natural resources. However, social, economic and political circumstances fundamentally influence environmental conflicts. There might thus be opportunities to face the societal challenges of climate change in a peaceful way and the political and institutional framework could play an important role in reducing conflict and violence. In order to explore such a path, this study analyses the potential of political factors (policies and institutions) for the reduction of climate-change-induced or aggravated conflicts between farmers and herders. What the Luck? - Gary Smith
2016-10-04

In Israel, pilot trainees who were praised for doing well subsequently performed worse, while trainees who were yelled at for doing poorly performed better. It is an empirical fact that highly intelligent women tend to marry men who are less intelligent. Students who get the highest scores in third grade generally get lower

scores in fourth grade. And yet, it's wrong to conclude that screaming is not more effective in pilot training, women choose men whose intelligence does not intimidate them, or schools are failing third graders. In fact, there's one reason for each of these empirical facts: Statistics. Specifically, a statistical concept called Regression to the Mean. Regression to the mean seeks to explain, with statistics, the role of luck in our day to day lives. An insufficient appreciation of luck and chance can wreak all kinds of mischief in sports, education, medicine, business, politics, and more. It can lead us to see illness when we are not sick and to see cures when treatments are worthless. Perfectly natural random variation can lead us to attach meaning to the meaningless. Freakonomics showed how economic calculations can explain seemingly counterintuitive decision-making. Thinking, Fast and Slow, helped readers identify a host of small

cognitive errors that can lead to miscalculations and irrational thought. In What the Luck?, statistician and author Gary Smith sets himself a similar goal, and explains—in clear, understandable, and witty prose—how a statistical understanding of luck can change the way we see just about every aspect of our lives...and can help us learn to rely less on random chance, and more on truth.

[International Migration in a Shifting World](#) - OECD
2016-12-12

Perspectives on Global Development 2017 presents an overview of the shifting of economic activity to developing countries and examines whether this shift has led to an increase in international migration towards developing countries.

The Sports Business in The Pacific Rim - Young Hoon Lee
2014-10-31

Following consistent and rapid general economic growth, Pacific Rim countries have

grown as a major force in sports. Australia, China, Japan and Korea populated the top ten medals list at the 2012 London Olympics. Pacific Rim countries are major consumers of international sports and domestic professional sports have expanded continuously over time. Nippon Professional Baseball and the Korean Baseball Organization are the second and third largest baseball leagues measured by attendance and revenue following Major League Baseball in the U.S. This book also includes event studies of team ownership, assessment of human capital markets, analysis of the relationship between attendance and competitive balance, the components of fan demand in common the world over, and business decisions concerning attendance and pricing. There is already demand for comprehensive study of the sports business in the Pacific Rim as witnessed by this growth. This book will be of interest of researchers studying and/or teaching in the

fields of sports economics and sports management as well as a general audience interested in business governance around the world.

The China-Pakistan Economic Corridor of the Belt and Road Initiative -

Siegfried O. Wolf 2019-06-20

This book focuses on the implementation of the China-Pakistan Economic Corridor (CPEC), a multi-billion-dollar infrastructure development project intended to connect Asia with Europe, the Middle East and Africa. By introducing a new analytical approach to the study of economic corridors, it gauges the anticipated economic and geopolitical impacts on the region and discusses whether the CPEC will serve as a pioneer project for future regional cooperation between and integration of sub-national regions such as Balochistan, Khyber Pakhtunkhwa, the Federally Administered Tribal Areas, and Gilgit-Baltistan. Further, it explores the interests, expectations and policy approaches of both

Chinese and Pakistani local and central governments with regard to the CPEC's implementation. Given its scope, the book will appeal to regional and spatial sciences scholars, as well as social scientists interested in the regional impacts of economic corridors. It also offers valuable information for policymakers in countries participating in the Belt-and-Road Initiative or other Chinese-supported development projects.

ECEG2013- 13th European

Conference on eGovernment -

Walter Castelnovo 2013-06-13

These proceedings represent the work of authors at the 13th European Conference on e-Government (ECEG 2013). The Conference this year is hosted by the University of Insubria in Como, Italy. The Conference Chair is Professor Walter Castelnovo and the Programme Chair is Professor Elena Ferrari, both are from the Department of Theoretical and Applied Sciences at the University of Insubria. The opening keynote address is

given by Dr Gianluca Misuraca from the European Commission, Joint Research Centre, Institute for Prospective Technological Studies, Seville, Spain and Gianluca is addressing the topic "eGovernment: Past, Present & Future: A policy-research perspective for renewing governance in the digital age." The second day of the conference is opened by Dr Antonio Cordella from the London School of Economics, London, UK, who will talk about "Public value creation: the new challenge for e-government policies." ECEG brings together, researchers, Government officials and practitioners in the area of e-Government from around the world. Participants are able to share their research findings and explore the latest developments and trends in the field which can then be disseminated to the wider community. With an initial submission of 153 abstracts, after the double blind, peer review process there are papers published in these

Conference Proceedings from 40 countries including Australia, Austria, Belgium, Brazil, Canada, China, Costa Rica, Croatia, Denmark, Egypt, Germany, Greece, India, Iran, Iraq, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malaysia, Netherlands, New Zealand, Norway, Pakistan, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, UK and USA. This will ensure a very interesting two days.

Land Grabbing and Home Country Development - Ariane Goetz 2019-05-31

Since 2008, foreign land acquisitions have attracted

international attention under the term »land grabbing.« Illustrated by rich and nuanced empirical accounts of forty Chinese and British investment projects in Sub-Saharan Africa, Ariane Goetz explains the phenomenon of »land grabbing« from the perspective of two investor countries. She reflects on Chinese and British public policy, state-society relations, national developmental contexts, ideologies, and international relations and thereby gives insights into the political economies that enable these investments as well as the development ambitions and institutionalized paradigms of which they form a part.
