The New York Media Book - Carole Marsh 1991-09

Cars & Parts - 1990

Russian Motor Vehicles - Maurice A. Kelly 2011-04-15

A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

The Car Hacker's Handbook - Craig Smith
2016-03-01

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

The Young Person's Guide to Wisdom - Jeff Claiborne 2010-02

Colleges and Universities do not offer courses or degrees in wisdom and Governments do not have departments of wisdom to guide the actions and decisions of presidents and government officials. Due to a lack of wisdom, Federal, State and Local governments have pushed many nations to the brink of moral and financial bankruptcy. A heavy dependence upon academia is not sufficient for them to make wise decisions. In our society many marriages fail and families suffer because they lack wisdom. Unwise financial decisions in our government and among individual citizens negatively affect many in our society. There are many pitfalls in society and living life is like walking through a minefield of life changing and difficult decisions. The Young Person's Guide to wisdom fills the void of wisdom that exists in academia, our families and our government. Wisdom is presented in the context of knowing God's will, being successful, being proactive in your education, finances, relationships, redemption and our understanding of God and his Word. It is an excellent resource for new Christians and Christian Parents and their children to build a wise foundation in Christ. It is a straight forward Biblical Guide to understanding the God of the Bible and God's instructions to us concerning Wisdom. Jeff Claiborne is a Christian author who has twenty years of experience in law enforcement. Jeff began writing about scripture after thirty five years of intensely studying the Bible. Jeff has dedicated his life to studying the scriptures and teaching others and has been married to his wife Marie for 26 years and is a grandparent having successfully raised three children.

The Official Price Guide to Collector Cars -

Robert H. Balderson 1996-09

America's love affair with cars is on the fast track. Here is the current market value for every model from every major manufacturer in the United States and abroad through the mid-1970s, including Ford, Buick, Cadillac, Chevrolet, Chrysler, Rolls-Royce, and Mercedes-Benz. Clearly organized from A to Z, each listing is broken down by date, engine specifications, model types, and body styles -- with three condition categories from fair to excellent. Essential references include a list of classic car museums around the country, a directory of car collector clubs, and a glossary that contains all the terms you need to know to negotiate the deal. In addition, there are handy hints from the professionals about buying at auction and for investment, theft prevention, and selling classic cars. Plus special sections on trucks and motorcycles cover a wide range of vehicles from Humpbacks and Pickups to Flatheads and Knuckleheads. Dozens of photographs help you identify special models.

Plastic Toy Cars of the 1950s and 1960s -

Andrew Ralston 2007

The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brimtoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.
