Witchcraft, Demonology and Magic - Marina Montesano 2020-05-20

Witchcraft and magic are topics of enduring interest for many reasons.

The main one lies in their extraordinary interdisciplinarity:

anthropologists, folklorists, historians, and more have contributed to

build a body of work of extreme variety and consistence. Of course, this also means that the subjects themselves are not easy to assess. In a very general way, we can define witchcraft as a supernatural means to cause harm, death, or misfortune, while magic also belongs to the field of supernatural, or at least esoteric knowledge, but can be used to less dangerous effects (e.g., divination and astrology). In Western civilization, however, the witch hunt has set a very peculiar perspective in which diabolical witchcraft, the invention of the Sabbat, the persecution of many thousands of (mostly) female and (sometimes) male presumed witches gave way to a phenomenon that is fundamentally different from traditional witchcraft. This Special Issue of Religions dedicated to Witchcraft, Demonology, and Magic features nine articles that deal with four different regions of Europe (England, Germany, Hungary, and Italy) between Late Medieval and Modern times in different contexts and social milieus. Far from pretending to offer a complete picture, they focus on some topics that are central to the research in those fields and fit well in the current "cumulative concept of Western witchcraft" that rules out all mono-causality theories, investigating a plurality of causes.

Thebes - Gareth Jandrell 2014-02-10

I mean, what is Thebes? A theocracy? No. A meritocracy? Certainly not. A monarchy? Kind of. A patriarchy? Less and less so. Thebes is many things, and to revolutionise that? Well, how? From Oedipus to Antigone, the story of Thebes remains a fascinating exploration of fate, morality and chaos, two and a half thousand years after the saga was originally written. The first domino falls as Oedipus realises he has unwittingly fulfilled a cruel and unusual prophecy. As control of Thebes is handed to Creon, his sons fight each other for the kingdom and his daughter Antigone is determined to serve the honour of her family to the bitter end. This version weaves together Sophocles and Aeschylus to present the full, visceral and bloody account of the Oedipus dynasty.

BMW Boxer Twins - Peter Henshaw 2017-05-15

There are lots of books about the classic BMW Boxers; their history, performance, lineage, and the minutiae of its specification. But none of them concentrate entirely on telling you what to look for when buying one secondhand. That's what this book is about - it is a straightforward, practical guide to buying a used Boxer twin. It doesn't list all the correct colour combinations for each year or analyse the bike's design philosophy - there are excellent books listed at the end of this one that do all of that - but it will help you avoid buying a dud. Point by point, it takes the reader through everything that needs looking at when buying a Boxer, plus spares prices, which is the best model to buy for your needs, and a look at auctions, restorations and paperwork The last of the 'classic' air-cooled Boxer twins, these bikes are now collector's items, and many have been saved, restored and continue to be ridden - this book tells the reader how to be part of the Boxer's ongoing story.

The Sharing Economy in Europe - Vida Česnuitytė 2022-01-21

This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also

looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable innovation in the context of degrowth and growing inequalities within and between societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity, and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.
