The Automotive Industry and European Integration - A. J. Jacobs 2019-08-07

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Fiat - Giorgio Garuzzo 2014-03-28

This book is an authentic historical document, supported by extensive analytical information, in which former Fiat top manager Giorgio Garuzzo passionately recounts his experience within Fiat

between 1976 and 1996. It is a narrative from the inside that sheds new light on events that have remained cloaked in mystery: the arrival and departure of Carlo De Benedetti, the “march of the forty thousand”, the sacking of Vittorio Ghidella, the clashes between Umberto Agnelli and Cesare Romiti, the Group’s involvement in the “clean hands” scandal, the role of Gianni Agnelli and his relationships with his brother and Cesare Romiti and the intervention of Mediobanca. Garuzzo discusses the issues connected with the range of cars and marques, touching on major themes of national or international relevance that were unrelated to Fiat but nonetheless conditioned its activities: terrorism and the unmanageability of the factories, inflation, the devaluation of the lira, the role of the trade unions and the General Confederation of Italian Industry, Japanese competition and European integration. Sustainable Logistics - Wolf-Rüdiger Bretzke 2012-12-14

Currently the notion of "sustainability" is used in an inflationary manner. Therefore the authors start with a definition which is stable to serve as an anchor for further research as well as for discussions among scientists, managers and politicians, ideally across different disciplines. The character of this book is purely conceptual. The argumentation is based on comparison of new and demanding requisites with existing models (process and network architectures in the field of logistics). Formerly neglected impacts on the environment will be included. Main features of a new approach will be developed which are capable to avoid these impacts and to align logistics with the requirements of sustainability. In order to make logistics sustainable large parts will have to be reinvented. The focus needs to be on decoupling transportation activities from economic growth rates.

The Report: Mexico 2014 - Oxford Business Group 2014-06-06

The second-largest economy in Latin America, Mexico seems poised to enter a new growth phase as the government of Enrique Peña Nieto implements radical changes in a number of sectors across the economy. The reforms, aimed at raising the competitiveness of the Mexican economy, have the potential to establish Mexico's position as a regional powerhouse. Optimism surrounding the recent wave of reforms, coupled with a stable macroeconomic environment and an improved credit rating from international agencies, has placed Mexico centre-stage. Despite slower than anticipated

growth of 1.1% in 2013, a wave of reforms affecting a range of sectors is expected to bring a new dynamism to the economy and continue to attract increasing amounts of foreign investment. A highly anticipated energy reform approved by Congress in 2013 will for the first time in decades open the nationalised oil industry to foreign investment, while a new public-private partnership law is set to provide the climate of legal certainty needed to attract private investment in the myriad of sectors undergoing expansion. While challenges remain, in particular informality and deficient domestic supply chains, growth prospects remain positive for the second-largest economy in Latin America.

Black Brands - Fernando Olivares 2019-07-01
Who manufactures cereal for Kellogg's? Why are the Mercedes Smart and the Renault Twingo almost identical? Do Danone and Nestlé really manufacture everything they make us believe they manufacture? Is Zara an opaque or a transparent brand? Why do some companies claim "we do not manufacture for other brands" when yet they hide from us the fact that sometimes "other brands manufacture for them"? The number of companies outsourcing the whole of their production for their brands in an opaque manner is constantly increasing while they disregard the legitimate need for information and communication of the general public and consumers. Paradoxically, in this age of transparency opacity is ever growing among well-known brands in every industrial sector.

Black Brands (in the Age of Transparency) is an extraordinary piece of work on truths and lies, on transparency and opacity of leading companies and brands in our age. The book is full of relevant cases never discussed before in sectors such as consumer products, baby foods, fashion, vehicles and mobile phones. Insightful and incisive, Fernando Olivares has directed his team to produce this book that will educate us as citizens and consumers. Their goal is to promote honest transparency –the only way to attain corporate legitimacy and sustainability in our time.

Heart pounding, non-stop action pulls the reader around the globe from one crisis spot to the next as Western civilization faces its worst onslaught in history. Description—A Deadlier Breed “Maybe Homo sapiens isn’t the final step in human evolution.” The Chinese believe world domination is their destiny. To cripple the West, they’ve armed Islamic terrorists with tactical nuclear weapons. One already has been used to destroy the Los Alamos National Laboratory and the surrounding town. The terrorists have moved the remaining weapons to a point just across the border in Mexico and plan to smuggle them into major American cities within days. To avoid the widespread panic that public knowledge of the situation would cause, the president of the United States turns to a secretive paramilitary

group known as the Sleeping Dogs. Its members share a rare genetic attribute that makes them the world’s deadliest hunter-killer black ops team. They also are highly dysfunctional. Their leader, Brendan Whelan, has a marital crisis on his hands. Their handler, Cliff Levell, is being held incommunicado in jail for contempt of a grand jury. And a traitor within the administration is leaking vital security information to a treacherous entity supporting the terrorists. Compounding the threat, that entity has recruited a group of killers with the same rare genetic attribute as the members of the Sleeping Dogs. Their purpose is to eliminate the Dogs. Time is critical and Whelan and the Sleeping Dogs face their most dangerous challenge yet.

The Car Show - Nicolae Sfetcu 2014-04-27

This e-book details the most interesting and

important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.
