Winter 8000 - Bernadette McDonald 2020-08-12

2020 Banff Mountain Book Competition Finalist in Mountain Literature Recounts some of the most dangerous feats in mountaineering history Insights into the human attraction to danger and suffering Award-winning author While you wouldn't expect climbing an 8000-meter peak in winter to be a popular activity, there have been 178 expeditions (as of 2019) to the Himalaya and Karakoram during the cruelest season to do just that. Polish alpinist, Voytek Kurtyka, termed the practice the "art of suffering." The stories here range from the French climber Elisabeth Revol's solo winter attempt of Makalu, to American Cory Richards and his dramatic effort on Gasherbrum II with famed Italian alpinist Simone Moro and Kazakh hard man Denis Urubko. Award-winning author Bernadette McDonald traveled extensively to interview many of the climbers featured in this book--including Revol, the climbing partner of Tomek Mackiewicz, and Anna Mackiewicz, his widow, meeting them just a few months after Mackiewicz's death on Nanga Parbat. McDonald's many personal relationships with profiled climbers and her ability to tap into emotions and family histories lend Winter 8000 an intimacy too often lacking in mountaineering histories. These accounts prove the point: Nature is not subservient to man.

Spending Time - Daniel S. Hamermesh 2019-02-01

Time is the ultimate scarce resource and thus quintessentially a topic for economics, which studies scarcity. Starting with the observation that time is increasingly valuable given competing demands as we have more things we can buy and do, Spending Time provides engaging insights into how people use their time and what determines their decisions about spending their time. That our time is limited by the number of hours in a day, days in a year, and years in our lives means that we face constraints and thus choices that involve trade-offs. We sleep, eat, have fun, watch TV, and not least we work. How much we dedicate to each, and why we do so, is intriguing and no one is better placed to shed light on similarities and differences than Daniel S. Hamermesh, the leading authority on time-use. Here he explores how people use their time, including across countries, regions, cultures, class, and gender.

Americans now work more than people in other rich countries, but as recently as the late 1970s they worked no more than others; and they also work longer into older age. Men and women do different things at different times of the day, which affects how well-off they feel. Both the arrival of children and retirement create major shocks to existing time uses, with differences between the sexes. Higher incomes and higher wage rates lead people to hurry more, both on and off the job, and higher wage rates lead people to cut back on activities that take time away from work. Being stressed for time is central to modern life, and Hamermesh shows who is rushed, and why. With Americans working more than people in France, Germany, the U.K., Japan and other rich countries, the book offers a simple but radical proposal for changing Americans' lives and reducing the stress about time.

Stitches - David Small 2012-07-17

A Publishers Weekly Top Ten Best Book of the Year An Amazon.com Top Ten Best Book of 2009 A Washington Post Book World's Ten Best Book of the Year A California Literary Review Best Book of 2009 An L.A. Times Top 25 Non-Fiction Book of 2009 An NPR Best Book of the Year, Best Memoir With this stunning graphic memoir, David Small takes readers on an unforgettable journey into the dark heart of his tumultuous childhood in 1950s Detroit, in a coming-of-age tale like no other. At the age of fourteen, David awoke from a supposedly harmless operation to

discover his throat had been slashed and one of his vocal chords removed, leaving him a virtual mute. No one had told him that he had cancer and was expected to die. The resulting silence was in keeping with the atmosphere of secrecy and repressed frustration that pervaded the Small household and revealed itself in the slamming of cupboard doors, the thumping of a punching bag, the beating of a drum. Believing that they were doing their best, David's parents did just the reverse. David's mother held the family emotionally hostage with her furious withdrawals, even as she kept her emotions hidden — including from herself. His father, rarely present, was a radiologist, and although David grew up looking at X-rays and drawing on X-ray paper, it would be years before he discovered the shocking consequences of his father's faith in science. A work of great bravery and humanity, Stitches is a gripping and ultimately redemptive story of a man's struggle to understand the past and reclaim his voice.

Ageing and COVID-19 - Maria Łuszczynska 2021-11-29

The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This volume presents a range of research approaches to the exploration of ageing during a pandemic situation. One of the first collections of its kind, it offers an array of studies employing research methodologies that lend themselves to replication in similar contexts by those seeking to understand the effects of epidemics on older people. Thematically organised, it shows how to reconcile qualitative and quantitative approaches, thus rendering them complementary, bringing together studies from around the world to offer an international perspective on ageing as it relates to an unprecedented epidemiological phenomenon. As such, it will appeal to researchers in the field of gerontology, as well as sociologists of medicine and clinicians seeking to understand the disruptive effects of the recent coronavirus outbreak on later life.

Minecraft: The Mountain - Max Brooks 2021-03-02

In the thrilling sequel to the New York Times bestselling novel *Minecraft: The Island*, a stranded hero stumbles upon another castaway—and discovers that teamwork might just be the secret to survival. Wandering a vast, icy tundra, the explorer has never felt more alone. Is there anything out here? Did I do the right thing by leaving the safety of my island? Should I give up and go back? So many questions, and no time to ponder—not when dark is falling and dangerous mobs are on the horizon. Gurgling zombies and snarling wolves lurk in the night, and they're closing in. With nowhere to hide, the lone traveler flees up a mountain, trapped and out of options . . . until a mysterious figure arrives, fighting off the horde singlehandedly. The unexpected savior is Summer, a fellow castaway and master of survival in these frozen wastes. Excited to find another person in this strange, blocky world, the explorer teams up with Summer, whose impressive mountain fortress as a safe haven . . . for now. But teamwork is a new skill for two people used to working alone. If they want to make it home, they will have to learn to work together—or risk losing everything.

The Finest Hours (Young Readers Edition) - Michael J. Tougas 2014-01-14

On the night of February 18, 1952, during one of the worst winter storms that New England has ever seen, two oil tankers just off the shore of Cape Cod were torn in half by the force of the storm. This middle-grade adaptation of an adult nonfiction book tells the story of the shipwreck and a harrowing Coast Guard rescue when four men in a tiny lifeboat overcame insurmountable odds and saved more than 30 stranded sailors. This is a fast-paced, uplifting story that puts young readers in the middle of the action. It's a gripping story of heroism and survival with the same intensity as the bestselling book and movie *The Perfect Storm*. A Christy Ottaviano Book

Orthographies in Early Modern Europe - Susan Baddeley 2012-07-30

This volume provides, for the first time, a pan-European view of the

development of written languages at a key time in their history: that of the 16th century. The major cultural and intellectual upheavals that affected Europe at the time - Humanism, the Reformation and the emergence of modern nation-states - were not isolated phenomena, and the evolution of the orthographical systems of European languages shows a large number of convergences, due to the mobility of scholars, ideas and technological innovations throughout the period.

Definiteness in a Language without Articles - A Study on Polish - Adrian Czardybon 2017-06-13

The aim of this book is to investigate how definiteness is expressed in Polish, a language which is claimed to have no definite and in-definite articles. The central question is how the difference in definiteness is indicated between 'a woman' and 'the woman' in Polish. In English, the definite article 'the' and the indefinite article 'a' express the category of definiteness explicitly. Since definiteness is also relevant in articleless languages, there are other means to indicate that a nominal phrase is definite or indefinite. This study is delimited to four means for expressing definiteness in Polish, which are demonstratives, aspect, case alternation, and information structure. Each strategy is investigated independently from the others, although they interact in a complex way, which is shown at the end of this book resulting in a decision tree. Polish is not investigated in isolation, however, the study is complemented by comparisons with other Slavic languages and also with a Polish dialect called 'Upper Silesian', which differs from Polish. The analysis in this book is based on Leĳobner's theory of 'Concept Types and Determination' (CTD). Leĳobner's distinction of the four concept types (sortal, relational, functional, individual) is crucial since definiteness phenomena under discussion can be explained. Therefore, the interaction of the four concept types with the four definiteness strategies plays a central role in this book. This series explores issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is grounded in the idea explored in the Collaborative Research Center 'The structure of representations in language, cognition and science' (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.

A Wrinkle in Time - Madeleine L'Engle 2019-07-18

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Adrian Tchaikovsky's award-winning novel Children of Time, is the epic story of humanity's battle for survival on a terraformed planet. Who will inherit this new Earth? The last remnants of the human race left a dying Earth, desperate to find a new home among the stars. Following in the footsteps of their ancestors, they discover the greatest treasure of the past age - a world terraformed and prepared for human life. But all is not right in this new Eden. In the long years since the planet was abandoned, the work of its architects has borne disastrous fruit. The planet is not waiting for them, pristine and unoccupied. New masters have turned it from a refuge into mankind's worst nightmare. Now two civilizations are

on a collision course, both testing the boundaries of what they will do to survive. As the fate of humanity hangs in the balance, who are the true heirs of this new Earth?

Theremin - Albert Glinsky 2000

LEON THEREMIN led a life of flamboyant musical invention laced with daring electronic stealth. A creative genius and prolific inventor, Theremin launched the field of electronic music virtually singlehandedly in 1920 with the musical instrument that bears his name. The theremin -- the only instrument that is played without being touched -- created a sensation worldwide and paved the way for the modern synthesizer. Its otherworldly sound became familiar in sci-fi films and even in rock music. This magical instrument that charmed millions, however, is only the beginning of the story. As a Soviet scientist, Theremin surrendered his life and work to the service of State espionage. On assignment in Depression-era America, he became the toast of New York society and worked the engines of capitalist commerce while passing data on U.S. industrial technology to the Soviet apparatus. Following his sudden disappearance from New York in 1938, Theremin was exiled to a Siberian labor camp. He subsequently vanished into the top-secret Soviet intelligence machine and was presumed dead for nearly thirty years. Using the same technology that lay behind the theremin, he designed bugging devices that eavesdropped on U.S. diplomatic offices and stood at the center of a pivotal cold war confrontation. Throughout his life, Theremin developed many other electronic wonders, including one of the earliest televisions and multimedia devices that anticipated performance art and virtual reality by decades. In this first full biography of Leon Theremin, Albert Glinsky depicts the inventor's nearly one-hundred-year life span as a microcosm of the twentieth century. Theremin is seen at the epicenter of most of the major events of the century: the Russian Revolution, two world wars, America's Great Depression, Stalin's purges, the cold war, and perestroika. His life emerges as no less than a metaphor for the divergence of communism and capitalism. Theremin blends the whimsical and the treacherous into a chronicle that takes in everything from the KGB to Macy's store windows, Alcatraz to the Beach Boys, Hollywood thrillers to the United Nations, Joseph Stalin to Shirley Temple. Theremin's world of espionage and invention is an amazing drama of hidden loyalties, mixed motivations, and an irrepressibly creative spirit.

The Palace Complex - Michał Murawski 2019-03-22

The Palace of Culture and Science is a massive Stalinist skyscraper that was "gifted" to Warsaw by the Soviet Union in 1955. Framing the Palace's visual, symbolic, and functional prominence in the everyday life of the Polish capital as a sort of obsession, locals joke that their city suffers from a "Palace of Culture complex." Despite attempts to privatize it, the Palace remains municipally owned, and continues to play host to a variety of public institutions and services. The Parade Square, which surrounds the building, has resisted attempts to convert it into a money-making commercial center. Author Michał Murawski traces the skyscraper's powerful impact on 21st century Warsaw; on its architectural and urban landscape; on its political, ideological, and cultural lives; and on the bodies and minds of its inhabitants. The Palace Complex explores the many factors that allow Warsaw's Palace to endure as a still-socialist building in a post-socialist city.
