NAEP 1996 Trends in Writing - Nada Ballator
1999

Supplementary to "NAEP 1996 Trends in

Academic Progress," this report describes two
aspects of writing for which change has been
measured since 1984: writing fluency as
determined by holistic scoring; and mastery of
the conventions of written English as
determined by mechanics scoring. The
introduction discusses the layout and means of
evaluation: measuring fluency of writing,
mechanics of writing, and expressing the
differences in performance. Chapter 1 compares
holistic scores in 1984 and 1996 regarding
student writing fluency in informative,
persuasive, and narrative writing. Chapter 2
compares mechanics scores in 1984 and 1996 to
look at overall characteristics of the papers, use
of sentence types, control of sentence structure,
and control of word-level and punctuation
conventions. A summary includes discussion of
fluency in writing, grammar, spelling, and
punctuation, and observations made from the
research. Appendixes present an overview of
scoring procedures, scoring guides, and tables

with standard errors. (SC)

Matkasimovs 2016-10-25

The author believes that teaching American culture, especially in the 21st century, is of high importance. The chosen research method was a case study in a Riga School. Interviews, questionnaire, students' portfolios and feedback were chosen as data collection methods. The data reflect that the use of the teaching techniques enhanced students' intercultural skills. American culture contributed to Grade 11 students' ability to draw connections among ideas, justify a stand or decision as well

as produce a new original work or point of view. Even though the research showed beneficial results, the author suggests carrying out further research to gather more data on the topic in other age groups.
