Securing Reasonable Caseloads - Norman Lefstein 2011

For the criminal justice system to work, adequate resources must be available for police, prosecutors and public defense. This timely, incisive and important book by Professor Norman Lefstein looks carefully at one leg of the justice system's "three-legged stool" public defense and the chronic overload of cases faced by public defenders and other lawyers who represent the indigent. Fortunately, the publication does far more than bemoan the current lack of adequate funding, staffing and other difficulties faced by public defense systems in the U.S. and offers concrete suggestions for dealing with these serious issues.

The Calling of Law - Fiona Westwood 2016-04-01
As one of the 'learned'

professions requiring advanced learning and high principles, law enjoys a special standing in society. In return for its status and rank, the legal profession is expected to exhibit the highest levels of honesty, trust and morality, the very values which underpin the legal system itself. This, in turn, entrusts to legal education a particular problem of addressing, not only the substantive elements of the body of law, but a means through which the characteristics of the 'calling' of law are imparted and instilled. At a time when the very essence of the legal profession is under threat, this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry; character over eloquence; and calling over skill. Chapters are grouped around the core content and key themes of Curiosity, Calling, Character and Conscientiousness, Contract, and Culture. The volume includes contributions from

leading experts, drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues, providing insight, and provoking debate. *International Who's who of Authors and Writers* - 2008

Corporate Lawyers and Corporate Governance - Joan Loughrey 2011-06-02

This assessment of the corporate governance role of corporate lawyers in the UK analyses the extent to which lawyers can and should act as gatekeepers, counsellors and reputational intermediaries. Focusing on external and in-house lawyers' roles in both dispersed share-ownership and owner-managed companies, Joan Loughrey highlights the conflicts of interest that are endemic in corporate representation and examines how lawyers should respond when corporate agents provide instructions contrary to the company client's interests. She also considers the legitimacy of 'creative compliance', the ethical arguments for and against lawyers prioritising the public interest over their clients' interests, and their exposure to liability if they fail to perform a corporate governance role. Finally, she

considers whether the reforms to the legal profession will promote the lawyer's corporate governance role and advances suggestions for reform.

Women, Business and the Law - Bloomsbury Publishing 2013-11-07

Women perform 66% of the world's work, produce 50% of the food, but earn 10% of the income and own 1% of the property. To shed light on why this grim statistic still holds

true, Women, Business and the Law aims to examine legal differentiations on the basis of gender in 143 of the world's economies. Women, Business and the Law tracks governments' actions to expand economic opportunities for women across six key areas: accessing institutions, using property, getting a job, providing incentives to work, building credit and going to court. The report uncovers legal differentiations for women and married versus unmarried women such as being able to register a business, open a bank account and work at night. These issues are of fundamental importance. When, because of tradition, social taboos or simple prejudice, half of the world's population is prevented from making its contribution to the life of a nation, the economy will suffer. The empirical evidence does suggest that, slowly but surely, governments are making progress in expanding opportunities for women. It is our hope that data presented in Women, Business

and the Law will both facilitate research on linkages between legal differentiation and outcomes for women, and promote better informed policy choices on what governments can do to expand opportunities for women.

Lawyering Skills and the Legal Process - Caroline Maughan 2005

Lawyering Skills and the Legal Process bridges the gap between academic and practical law for students undertaking skills-based and clinical legal education courses at university. It develops oral and written communication, group working, problem solving and conflict resolution skills in a range of legal contexts: client interviewing, drafting, managing cases, legal negotiation and advocacy. The book is designed specifically to help students to practise and develop skills that will be essential in a range of occupations; develop a deeper

understanding of the English legal process and the lawyer's role in that process; enhance their understanding of the relationship between legal skills and ethics; and understand how they learn and how they can make their learning more effective. This book provides a stimulating, accessible and challenging approach to understanding the problems and uncertainties of practising law that goes beyond the standard approaches to lawyers' skills.

Access to Justice in Magistrates' Courts - Lucy Welsh 2022-01-27

This book examines access to justice in summary criminal proceedings by considering the ability of defendants to play an active and effective role in the process. 'Access to justice' refers not just to the availability of legally aided representation, but also to the ability of defendants to understand and effectively participate in summary criminal proceedings more generally. It remains a vital principle of justice that justice

should not only be done, but should also be seen to be done by all participants in the process. The book is based on socio-legal research. The study is ethnographic, based on observation conducted in four magistrates' courts in South East England and interviews with both defence lawyers and Crown prosecutors. Setting out an argument that defendants have always been marginalised through particular features of magistrates' court proceedings (such as courtroom layout and patterns of behaviour among the professional workgroups in court), the political climate in relation to defendants and access to justice that has persisted since 2010 has further undermined the ability of defendants to play an active role in the process. Ultimately, this book argues that recent governments have demanded ever more efficiency and cost saving in criminal justice. In that context, principles that contribute to access to justice for defendants have been seriously undermined.

Essays in Conveyancing and Property Law in Honour of Professor Robert Rennie -

Frankie McCarthy 2015-05-11

Professor Robert Rennie has been one of the most influential voices in Scots private law over the past thirty years. Highly

respected as both an academic and a practitioner, his contribution to the development of property law and practice has been substantial and unique. This volume celebrates his retirement from the Chair of Conveyancing at the University of Glasgow in 2014 with a selection of essays written by his peers and colleagues from the judiciary, academia and legal practice. Each chapter covers a topic of particular interest to Professor Rennie during his career, from the historical development of property law rules through to the latest developments in conveyancing practice and the evolution of the rules of professional negligence. Although primarily Scottish in focus, the contributions will have much of interest to lawyers in any jurisdiction struggling with similar practical problems, particularly those with similar legal roots including the Netherlands and South Africa. As a whole, the collection is highly recommended to students,

practitioners and academics.

Lawyers and the Public Good - Alan Paterson 2011-09-15

For the 2010 Hamlyn Lectures, Alan Paterson explores different facets of three key institutions in a democracy: lawyers, access to justice and the judiciary. In the case of lawyers he asks whether professionalism is now in terminal decline. To examine access to justice, he discusses past and present crises in legal aid and potential endgames and in relation to judges he examines possible mechanisms for enhancing judicial accountability. In demonstrating that the benign paternalism of lawyers in determining the public good with respect to such issues is no longer unchallenged, he argues that the future roles of lawyers, access to justice and the judiciary will only emerge from dialogues with other stakeholders claiming to speak

for the public interest.

Ensuring Quality in Professional Education Volume II - Karen Trimmer 2019-01-11

This book examines quality teaching in professional education in the fields of engineering and international knowledge structures. The second of a two-volume series, the editors and contributors structure the book around case studies which highlight the elements constituting good practice within professional education. While there is no one specific route to prepare well-qualified professionals, this volume explores the decisions the academics responsible for delivering this

education make to ensure quality curricula. Ultimately, the key to effective preparations rests with the value employers place on the focus, emphasis and balance between the academic and practical in relation to their own expectations for skills that graduates must have. The second volume in this collection will appeal to students and scholars of professional pedagogy, and engineering pedagogy more specifically.

Tournament of Lawyers -

Marc Galanter 1994-01-15
Tournament of Lawyers traces in detail the rise of one hundred of the nation's top firms in order to diagnose the health of the business of American law. Galanter and Palay demonstrate that much

of the large firm's organizational success stems from its ability to blend the talents of experienced partners with those of energetic junior lawyers driven by a powerful incentive—the race to win "the promotion-to-partner tournament." This calmly reasoned study reveals, however, that the very causes of the spiraling growth of the large law firm may lead to its undoing. "Galanter and Palay pose questions and offer some answers which are certain to change the way big firm practice is regarded. To describe their work as challenging is something of an understatement: they at times delight, stimulate, frustrate and even depress the reader, but they never disappoint. Tournament of Lawyers is essential to the understanding of the business of the big law firms."—Jean and Colin Fergus, New York Law Journal
