Legislative History of Public Law 101-336, the Americans with Disabilities Act - 1991

Unorthodox Lawmaking - Barbara Sinclair
2016-06-22

Most major measures wind their way through the contemporary Congress in what Barbara Sinclair has dubbed “unorthodox lawmaking.” In this much-anticipated Fifth Edition of *Unorthodox Lawmaking*, Sinclair explores the full range of special procedures and processes that make up Congress’s work, as well as the reasons these unconventional routes evolved. The author introduces students to the intricacies of Congress and provides the tools to assess the relative successes and limitations of the institution. This dramatically updated revision incorporates a wealth of new cases and examples to illustrate the changes occurring in congressional process. Two entirely new case study chapters—on the 2013 government shutdown and the 2015 reauthorization of the Patriot Act—highlight Sinclair’s fresh analysis and the book is now introduced by a new foreword from noted scholar and teacher, Bruce I. Oppenheimer, reflecting on this book and Barbara Sinclair’s significant mark on the study of Congress.

Ensuring Compliance With Multilateral Environmental Agreements - Ulrich Beyerlin 2006

In this publication, a number of recognized practitioners and scholars undertake to explore the realities and the conceptual underpinnings of environmental compliance mechanisms. In a relatively short period of time, such mechanisms were introduced in a wide range of new and existing environmental regimes. Yet, little is known about their function in practice and their implications. This is puzzling when considering, that the new mechanisms considerably depart from traditional patterns of counteraction and dispute settlement. Instead they build on partnership and cooperation and include a wide range of possible reactions, which range from those having coercive power to supportive measures. Quite a number of those mechanisms and their functioning are explained in the publication in order to lay ground for some cross-cutting analysis, which covers inter alia reporting, inspection and monitoring, supportive financial incentives and the interrelationship between compliance mechanisms and the principle of state responsibility and dispute settlement. Finally the role of non-governmental organizations is addressed. Practitioners and scholars in international environmental affairs and international law more generally will benefit significantly from the inside views and thorough reflection as provided for in this book.

Losing Earth - Nathaniel Rich 2020-03-05

By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the *New York Times Magazine* that has earned favorable comparisons to Rachel Carson's *Silent Spring* and John Hersey's *Hiroshima*. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation. In the book *Losing Earth*, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.
