Alone - Cyn Balog 2017-11-07
This must-read for lovers of Stephen King's The Shining will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Disrupting Class, Expanded Edition: How Disruptive Innovation Will Change the Way the World Learns - Clayton Christensen 2010-09-17
Clay Christensen's groundbreaking bestselling work in education now updated and expanded, including a new chapter on Christensen's seminal "Jobs to Be Done" theory applied to education. "Provocatively titled, Disrupting Class is just what America's K-12 education system needs--a well thought-through proposal for using technology to better serve students and bring our schools into the 21st Century. Unlike so many education 'reforms,' this is not small-bore stuff. For that reason alone, it's likely to be resisted by defenders of the status quo, even though it's necessary and right for our kids. We owe it to them to make sure this book isn't merely a terrific read; it must become a blueprint for educational transformation." —Joel Klein, Chancellor of the New York City Department of Education "A brilliant teacher, Christensen brings clarity to a muddled and chaotic world of education." —Jim Collins, bestselling author of Good to Great "Just as iTunes revolutionized the music industry, technology has the potential to transform education in America so that every one of the nation's 50 million students receives a high quality education. Disrupting Class is a must-read, as it shows us how we can blaze that trail toward transformation." —Jeb Bush, former Governor of Florida According to recent studies in neuroscience, the way we learn doesn't always match up with the way we are taught. If we hope to stay competitive-academically, economically, and technologically-we need to rethink our understanding of intelligence, reevaluate our educational system, and reinvigorate our commitment to learning. In other words, we need "disruptive innovation." Now, in his long-awaited new book, Clayton M. Christensen and coauthors Michael B. Horn and Curtis W. Johnson take one of the most important issues of our time-education-and apply Christensen's now-famous theories of "disruptive" change using a wide range of real-life examples. Whether you're a school administrator, government official, business leader, parent, teacher, or entrepreneur, you'll discover surprising new ideas, outside-the-box strategies, and straight-A success stories. You'll learn how: Customized learning will help many more students succeed in school Student-centric classrooms will increase the demand for new technology Computers must be disruptively deployed to every student Disruptive innovation can circumvent roadblocks that have prevented other attempts at school reform We can compete in the global classroom-and get ahead in the global market Filled with fascinating case studies, scientific findings, and unprecedented insights on how innovation must be managed, Disrupting Class will open your eyes to new possibilities, unlock hidden potential, and get you to think differently. Professor Christensen and his coauthors provide a bold new lesson in innovation that will help you make the grade for years to come. The future is now. Class is in session.

Odyssey - Homer 1895

The Honest Truth About Dishonesty - Dr. Dan Ariely 2013-06-18
The New York Times bestselling author of Predictably Irrational and The Upside of Irrationality returns with thought-provoking work to challenge our preconceptions about dishonesty and urge us to take an honest look at ourselves. Does the chance of getting caught affect how likely we are to cheat? How do companies pave the way for dishonesty? Does collaboration make us more honest or less so? Does religion improve our honesty? Most of us think of ourselves as honest, but, in fact, we all cheat. From Washington to Wall Street, the classroom to the workplace, unethical behavior is everywhere. None of us is immune, whether it's the white lie to head off trouble or padding our expense reports. In The (Honest) Truth About Dishonesty, award-winning, bestselling author Dan Ariely turns his unique insight and innovative research to the question of dishonesty. Generally, we assume that cheating, like most other decisions, is based on a rational cost-benefit analysis. But Ariely argues, and then demonstrates, that it's actually the irrational forces that we don't take into account that often determine whether we behave ethically or not. For every Enron or political bribe, there are countless puffed résumés, hidden commissions, and knockoff purses. In The (Honest) Truth About Dishonesty, Ariely shows why some things are easier to lie about; how getting caught matters less than we think; and how business practices pave the way for unethical behavior, both intentionally and unintentionally. Ariely explores how unethical behavior works in the personal, professional, and political worlds, and how it affects all of us, even as we think of ourselves as having high moral standards. But all is not lost. Ariely also identifies what keeps us honest, pointing the way for achieving higher ethics in our everyday lives. With compelling personal and academic findings, The (Honest) Truth About Dishonesty will change the way we see ourselves, our actions, and others.

College Admissions - Stuart White 2017-11-29
Packed with resources to help parents make sense of the college application process, conduct a college search, and help guide their child's completion of their college application. The author has included a variety of tools to compare one school to another, keep track of important application deadlines, and track possible scholarship aid. Readers from around the world have praised its value to parents who want to make sense of the college gauntlet without hovering and taking control away from their children. One reviewer has written: Stuart White's new book takes a unique focus on the role of the parent of one of the hundreds of thousands of overachieving high schoolers. Whereas most books are written for parents that micro manage and compel their children into the high achiever stereotype, Prof. White's book centers on a rather beautiful love story between him and his daughter as she went through the college admission process.Another reader has written: Thank you for sharing your helpful guide to the college application process. I have read many articles and listened to many podcasts regarding the process, yet still learned more from your book¿ I appreciated your openness and candidness regarding helicopter parenting. I think it's important to include that advice in this book, as most people reading a book like this will lean toward the helicopter side of parenting. The author's side by side journey with his daughter ended with her

admission to Yale University.

Learning First, Technology Second - Liz Kolb 2017
Learning with technology doesn't happen because a specific tool "revolutionizes" education. It happens when proven teaching strategies intersect with technology tools, and yet it's not uncommon for teachers to use a tool because it's "fun" or because the developer promises it will help students learn. Learning First, Technology Second offers teachers the professional learning they need to move from arbitrary uses of technology in their classrooms to thoughtful ways of adding value to student learning. This book includes: An introduction to the Triple E Framework that helps teachers engage students in time-on-task learning, enhance learning experiences beyond traditional means and extend learning opportunities to bridge classroom learning with students' everyday lives. Effective strategies for using technology to create authentic learning experiences for their students. Case studies to guide appropriate tech integration. A lesson planning template to show teachers how to effectively frame technology choices and apply them in instruction.

Gilgamesh - Stephen Mitchell 2014-02-27
Vivid, enjoyable and comprehensible, the poet and pre-eminent translator Stephen Mitchell makes the oldest epic poem in the world accessible for the first time. Gilgamesh is a born leader, but in an attempt to control his growing arrogance, the Gods create Enkidu, a wild man, his equal in strength and courage. Enkidu is trapped by a temple prostitute, civilised through sexual experience and brought to Gilgamesh. They become best friends and battle evil together. After Enkidu's death the distraught Gilgamesh sets out on a journey to find Utnapishtim, the survivor of the Great Flood, made immortal by the Gods to ask him the secret of life and death. Gilgamesh is the first and remains one of the most important works of world literature. Written in ancient Mesopotamia in the second millennium B.C., it predates the Iliad by roughly 1,000 years. Gilgamesh is extraordinarily modern in its emotional power but also provides an insight into the values of an ancient culture and civilisation.

Teachers as Learners - Ora Kwo 2010-08-09
In the worldwide movements of educational reform, educators are forging new roles, identities and relationships. Leadership is vital, but must be rooted in the capacity for learning. This volume responds to the tensions and paradoxes brought by educational reforms, presenting a critical discourse on teachers as learners. The contributions bring an array of cultural settings and methodological orientations, and reveal contextual burdens that teachers should not carry in isolation. Teachers' learning demands collective engagement to turn challenges into opportunities in a sustainable quest for higher goals. The discourse concludes with a vision for a new relationship among educational workers as a joint force of learners in a cross-boundary endeavor for moral commitment to education.

The Charisma Machine - Morgan G. Ames 2019-11-19
A fascinating examination of technological utopianism and its complicated consequences. In The Charisma Machine, Morgan Ames chronicles the life and legacy of the One Laptop per Child project and explains why—despite its failures—the same utopian visions that inspired OLPC still motivate other projects trying to use technology to "disrupt" education and development. Announced in 2005 by MIT Media Lab cofounder Nicholas Negroponte, One Laptop per Child promised to transform the lives of children across the Global South with a small, sturdy, and cheap laptop computer, powered by a hand crank. In reality, the project fell short in many ways—starting with the hand crank, which never materialized. Yet the project remained charismatic to many who were captivated by its claims of access to educational opportunities previously out of reach. Behind its promises, OLPC, like many technology projects that make similarly grand claims, had a fundamentally flawed vision of who the computer was made for and what role technology should play in learning. Drawing on fifty years of history and a seven-month study of a model OLPC project in Paraguay, Ames reveals that the laptops were not only frustrating to use, easy to break, and hard to repair, they were designed for "technically precocious boys"—idealized younger versions of the developers themselves—rather than the children who were actually using them. The Charisma Machine offers a cautionary tale about the allure of technology hype and the problems that result when utopian dreams drive technology development.

The Theory and Practice of Online Learning - Terry Anderson 2008
"Neither an academic tome nor a prescriptive 'how to' guide, The Theory and Practice of Online Learning is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations."--BOOK JACKET.

Sugar Changed the World a Story of Magic Spice Slavery Freedom and Science - Perfection Learning Corporation 2021-02
When this award-winning husband-and-wife team discovered that they each had sugar in their family history, they were inspired to trace the globe-spanning story of the sweet substance and to seek out the voices of those who led bitter sugar lives. The trail ran like a bright band from religious ceremonies in India to Europe's Middle Ages, then on to Columbus, who brought the first cane cuttings to the Americas. Sugar was the substance that drove the bloody slave trade and caused the loss of countless lives, but it also planted the seeds of revolution that led to freedom in the American colonies, Haiti, and France. With songs, oral histories, maps, and more than eighty archival illustrations, here is the story of bow one product moved the grand currents of world history. Book jacket.

Split the Pie - Barry Nalebuff 2022-03-08
From a leading Yale expert and serial entrepreneur, a radical, principled, and field-tested approach that identifies what's really at stake in any negotiation and ensures you get your half—so you can focus on growing the pie. Negotiations are incredibly stressful and can bring out the worst in people. Wouldn't it be better if there were a principled way to negotiate? Wouldn't it be even better if there were a way to treat people fairly and get treated fairly in a negotiation? Split the Pie offers a new approach that does both—a field-tested method that reframes how negotiations play out. Barry Nalebuff, a professor at Yale School of

Management, helps identify what's really at stake in a negotiation: the "pie." The negotiation pie is the additional value created through an agreement to work together. Seeing the relevant pie will change how you think about fairness and power in negotiation. You'll learn how to get half the value you create, no matter your size. Filled with examples and in-depth case studies, Split the Pie is a practical and theory-based approach to negotiation. You'll see how it helped reframe a high-stakes negotiation when Coca-Cola purchased Honest Tea, a company Barry cofounded with his former student Seth Goldman. The pie framework also works for everyday negotiations. You'll learn how to deploy logic to determine truly equitable solutions and employ empathy to expand the pie and sell your solution. Split the Pie allows both sides to focus their energy on making the biggest possible pie—to have your pie and eat it too.

The End of College - Kevin Carey 2015-03-03
From a renowned education writer comes a paradigm-shifting examination of the rapidly changing world of college that every parent, student, educator, and investor needs to understand. Over the span of just nine months in 2011 and 2012, the world's most famous universities and high-powered technology entrepreneurs began a race to revolutionize higher education. College courses that had been kept for centuries from all but an elite few were released to millions of students throughout the world—for free. Exploding college prices and a flagging global economy, combined with the derring-do of a few intrepid innovators, have created a dynamic climate for a total rethinking of an industry that has remained virtually unchanged for a hundred years. In The End of College, Kevin Carey, an education researcher and writer, draws on years of in-depth reporting and cutting-edge research to paint a vivid and surprising portrait of the future of education. Carey explains how two trends—the skyrocketing cost of college and the revolution in information technology—are converging in ways that will radically alter the college experience, upend the traditional meritocracy, and emancipate hundreds of millions of people around the world. Insightful, innovative, and accessible, The End of College is a must-read, and an important contribution to the developing conversation about education in this country.

Building Foundations of Scientific Understanding - Bernard J. Nebel 2014-09-24
Building Foundations of Scientific Understanding (BFSU) - BFSU is for teachers, homeschoolers, and other educators to deliver a first-rate science education to K-8 students and older beginning-science learners. Vol. I (here) is for grades K-2 and older beginning-science learners. Volumes II and III are for grades 3-5, and 6-8, and older progressing science learners. BFSU provides both teaching methodologies and detailed lesson plans embracing and integrating all the major areas of science. BFSU lessons follow structured learning progressions that build knowledge and develop understanding in systematic incremental steps. BFSU lessons all center around hands-on experience and real-world observations. In turn, they draw students to exercise their minds in thinking and drawing rational conclusions from what they observe/experience. Therefore, in following BFSU, students will be guided toward conceptual understanding of crosscutting concepts and ideas of science, as well as factual knowledge, and they will develop mind skills of scientific thinking and logical reasoning in the process. Implementing BFSU requires no particular background in either science or teaching. Teachers/parents can learn along with their children and be excellent role models in doing so. Already widely used and acclaimed in its 1st edition form, this second edition of BFSU contains added elements that will make it more useful in bringing students to master the Next Generation Science Standards (NGSS).

Super Thinking - Gabriel Weinberg 2019-06-18
A WALL STREET JOURNAL BESTSELLER! "You can't really know anything if you just remember isolated facts. If the facts don't hang together on a latticework of theory, you don't have them in a usable form. You've got to have models in your head." - Charlie Munger, investor, vice chairman of Berkshire Hathaway The world's greatest problem-solvers, forecasters, and decision-makers all rely on a set of frameworks and shortcuts that help them cut through complexity and separate good ideas from bad ones. They're called mental models, and you can find them in dense textbooks on psychology, physics, economics, and more. Or, you can just read Super Thinking, a fun, illustrated guide to every mental model you could possibly need. How can mental models help you? Well, here are just a few examples... • If you've ever been overwhelmed by a to-do list that's grown too long, maybe you need the Eisenhower Decision Matrix to help you prioritize. • Use the 5 Whys model to better understand people's motivations or get to the root cause of a problem. • Before concluding that your colleague who messes up your projects is out to sabotage you, consider Hanlon's Razor for an alternative explanation. • Ever sat through a bad movie just because you paid a lot for the ticket? You might be falling prey to Sunk Cost Fallacy. • Set up Forcing Functions, like standing meeting or deadlines, to help grease the wheels for changes you want to occur. So, the next time you find yourself faced with a difficult decision or just trying to understand a complex situation, let Super Thinking upgrade your brain with mental models.

A Teacher's Guide to Online Learning - Lindy Hockenbary 2021-06
Are you a K-12 educator who is teaching students over the internet with no face-to-face interaction? Online learning presents new challenges. Author Lindy Hockenbary does not sugarcoat the fact that online learning is different than face-to-face learning. She tackles the most common questions of new online instructors, including:?How do you engage learners in a virtual environment??How do you develop relationships with students whom you never see in person? ?What does classroom management even look like in an online class??How do you assess students when there is no way to know if they are looking up all the answers??How do you ensure clear communication since you cannot stand over a learner's shoulder and ensure a task is accomplished??How do you communicate with and support the families of online

learners??How do you ensure equity when students are never in the same physical space?This book addresses each of these questions head-on by presenting key takeaways to guide online learning design. Lindy brings her experience as a classroom teacher and instructional technologist to create a clear picture of online learning strategies. Other classroom teachers, school leaders, and instructional technologists have contributed to the book to provide a well-rounded perspective on the topic of online learning. This book was designed with K-12 teachers in mind, but the majority of information can be applied to higher education/postsecondary learning environments as well.

The Health of Lesbian, Gay, Bisexual, and Transgender People - Institute of Medicine 2011-06-24

At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.

Teaching Machines - Audrey Watters 2021-08-03

How ed tech was born: Twentieth-century teaching machines--from Sidney Pressey's mechanized test-giver to B. F. Skinner's behaviorist bell-ringing box. Contrary to popular belief, ed tech did not begin with videos on the internet. The idea of technology that would allow students to "go at their own pace" did not originate in Silicon Valley. In Teaching Machines, education writer Audrey Watters offers a lively history of predigital educational technology, from Sidney Pressey's mechanized positive-reinforcement provider to B. F. Skinner's behaviorist bell-ringing box. Watters shows that these machines and the pedagogy that accompanied them sprang from ideas--bite-sized content, individualized instruction--that had legs and were later picked up by textbook publishers and early advocates for computerized learning. Watters pays particular attention to the role of the media--newspapers, magazines, television, and film--in shaping people's perceptions of teaching machines as well as the psychological theories underpinning them. She considers these machines in the context of education reform, the political reverberations of Sputnik, and the rise of the testing and textbook industries. She chronicles Skinner's attempts to bring his teaching machines to market, culminating in the famous behaviorist's efforts to launch Didak 101, the "pre-verbal" machine that taught spelling. (Alternate names proposed by Skinner include "Autodidak," "Instructomat,"

and "Autostructor.") Telling these somewhat cautionary tales, Watters challenges what she calls "the teleology of ed tech"--the idea that not only is computerized education inevitable, but technological progress is the sole driver of events.

This new book shares the results of this research and offers • Examples of thriving Schools in the Cloud in unlikely places • Mitra's predictions on the future of learning • How to design assessments for self-organizing learning • How to build your own School in the Cloud • Clips from the documentary, The School in the Cloud

School Commercialism - Alex Molnar 2013-09-13

Pizza Hut's Book It! program rewards students with pizza for meeting their reading goals. Toys R Us paid a Kansas school five dollars for each student who took its toy survey. Cisco Systems donated internet access to a California elementary school, asking in return for the school choir to sing the company's praises while wearing Cisco t-shirts. Kids today face a barrage of corporate messages in the classroom. In School Commercialism, education expert Alex Molnar traces marketing in American schools over the last twenty-five years, raising serious questions about the role of private corporations in public education. Since the 1990s, Molnar argues, commercial activities have shaped the structure of the school day, influenced the curriculum, and determined whether children have access to computers and other technologies. He argues convincingly against advertisers' assertion that their contributions are a win-win proposition for cash-strapped schools and image-conscious companies. From the marketing of unhealthy foods to privatizing reforms such as the Edison Schools and Knowledge Universe, School Commercialism tracks trends that are more pervasive than many parents realize and shows how we might recapture schools to better serve the public interest.

Mood Mapping - Liz Miller 2010-03-05

Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates: * The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods * The Miller Mood Map: learn to visually map your mood to increase self-awareness * Practical ways to implement change to alleviate low mood Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you. 'A gloriously accessible read from a truly unique voice' Mary O'Hara, Guardian 'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping' Dr Phil Hammond 'Can help you find calm and take the edge off your anxieties' Evening Standard 'MoodMapping is a fantastic tool for managing your mental health and taking control of your life' Jonathan Naess, Founder of Stand to Reason
