Housing Fit For Purpose - Fionn Stevenson 2019-09-02

Housing Fit for Purpose sets out a research-focused approach to looking at the challenges facing the built environment in approaching the design, construction and management of housing. This book uses original research by the author on housing performance evaluation and distils it for built environment professionals, arguing that learning from feedback should be taking place at every stage of the housing project lifecycle, improving outcomes for end users. Drawing on active research, this book shows why and how the design, construction and management of housing can be linked to feedback and actual evidence of how people choose, and learn, to use their homes. It examines the key concepts which underlie participatory design, occupancy feedback and learning, and includes a practical primer on how to undertake housing occupancy feedback.

Domestic and Commercial Oil Burners - Charles Henry Burkhardt 1969

Stirling Cycle Engines - Allan J. Organ 2013-11-15

Some 200 years after the original invention, internal design of a Stirling engine has come to be considered a specialist task, calling for extensive experience and for access to sophisticated computer modelling. The low parts-count of the type is negated by the complexity of the gas processes by which heat is converted to work. Design is perceived as problematic largely because those interactions are neither intuitively evident, nor capable of being made visible by laboratory experiment. There can be little doubt that the situation stands in the way of wider application of this elegant concept. Stirling Cycle Engines re-visits the design challenge, doing so in three stages. Firstly, unrealistic expectations are dispelled: chasing the Carnot efficiency is a guarantee of disappointment, since the Stirling engine has no such pretensions. Secondly, no matter how complex the gas processes, they embody a degree of intrinsic similarity from engine to engine. Suitably exploited, this means that a single computation serves for an infinite number of design conditions. Thirdly, guidelines resulting from the new approach are condensed to high-resolution design charts - nomograms. Appropriately designed, the Stirling engine promises high thermal efficiency, quiet operation and the ability to operate from a wide range of heat sources. Stirling Cycle Engines offers tools for

expediting feasibility studies and for easing the task of designing for a novel application. Key features: Expectations are re-set to realistic goals. The formulation throughout highlights what the thermodynamic processes of different engines have in common rather than what distinguishes them. Design by scaling is extended, corroborated, reduced to the use of charts and fully illustrated. Results of extensive computer modelling are condensed down to high-resolution Nomograms. Worked examples feature throughout. Prime movers (and coolers) operating on the Stirling cycle are of increasing interest to industry, the military (stealth submarines) and space agencies. Stirling Cycle Engines fills a gap in the technical literature and is a comprehensive manual for researchers and practitioners. In particular, it will support effort world-wide to exploit potential for such applications as small-scale CHP (combined heat and power), solar energy conversion and utilization of low-grade heat.

Spark Joy - Marie Kondo 2020-08-20

Marie Kondo's first book, *The Life-Changing Magic of Tidying*, transformed the homes and lives of millions of people around the world. Spark Joy is her in-depth tidying masterclass, a line-illustrated, room-by-room guide to decluttering and organising your home. It covers every room in the house - from the bedroom and kitchen to the bathroom and living room - as well as all the items that occupy their spaces. Charming line drawings explain how to organise your house and apply Marie Kondo's unique folding method to all your clothes, including shirts, trousers, jackets, skirts, socks and bras. The secret to Marie Kondo's unique and simple KonMari tidying method is to tidy by category and to focus on what you want to keep, not what you want to get rid of. Ask yourself if something 'sparks joy' and suddenly it becomes so much easier to understand if you really need it in your home and your life. Except tidying up is not just about transforming your home: when you surround yourself with things you love, you will find that your whole life begins to change.

The SLL Lighting Handbook - 2009

The Lost Art of Steam Heating - Dan Holohan 1992

This was my first book and a true labor of love. I spent decades studying steam and the work of Dead Men, in both old buildings and on library shelves. I traveled the country, haunting used-book stores, looking for engineering books that held the answers to questions that nagged at me. I was obsessed with this topic, and when I finally sat to write, I poured all that I had learned into this book, and as I wrote, I tried my best to make the words sound good to you - like we were together and having a conversation. I wanted you to know what I know and I wanted you to be able to do what I can do when it comes to old steam systems. This book arrived in 1992 and has since gone through dozens of printings. We've sold it in every state as well as in foreign countries. Steam heat is everywhere there are old buildings, so why shouldn't you be the one with the answers? Dan Holohan

Blueprint for Black Power - Amos N. Wilson 1998

African life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever African people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of African Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

Declutter - Debora Robertson 2019-04-02
