International Practices to Promote Budget Literacy - Harika Masud 2017-06-28

Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the

problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

Routledge Handbook of Seascapes - Gloria Pungetti 2022-07-31

Seascape studies have developed in response to questions arising from composite correlations such as coastal, island and marine research, social requirements, landscape design and planning, marine ecology, and environment and resource management. This global volume is the first comprehensive overview to provide a solid foundation on the concept of seascape, with the latest research findings from leading experts across a variety of fields, offering a holistic approach to seascape linking nature with culture, and theory with practice. Divided into six parts, it includes over 30 chapters from contributors around the world. Pioneering methods with illustrated case studies from the Mediterranean, Scandinavia, North Sea, North America and Asia serve as examples for future seascape development, conservation and governance. An important and extremely timely

resource, the Routledge Handbook of Seascapes provides academics, practitioners, NGOs, consultants and government officials with a broad overview of current research and practice for future application and advance worldwide.

Training Teachers of Chinese in Australia - Chen Shen 2021-10-29

Chinese language, the first language spoken and used by the largest population in the world, has witnessed a significant global increase. Chinese as a Second Language (CSL) has thus received unprecedented attention, and teaching and learning of CSL have transcended the national boundary. This book reports a case study of training teachers of CSL in Australia with a significant implication to the western English-speaking countries such as Canada, New Zealand, the UK and the USA. The book is unique in several ways. On a theoretical level, the book analyses knowledge-based and competence-based teacher education, provides an in-depth examination of post-method pedagogy and deconstructs traditional aspects of second language teacher education, making a case for the new concept of "three dimensions". On a practical level, the Australian-based case study employs qualitative methods to gather the feedback from teacher educators, teacher trainees and students who are undergoing CSL training, and further reports on studies on CSL teaching practicum in local schools and abroad. *Training Teachers of Chinese in Australia* is a book for established scholars, researchers, educators, and research higher degree students who are interested in teacher education, second and foreign language education and Chinese as a second language (CSL).

STOP, THAT and One Hundred Other Sleep Scales - Azmeh Shahid 2012-01-06

There are at least four reasons why a sleep clinician should be familiar with rating scales that evaluate different facets of sleep. First, the use of scales facilitates a quick and accurate assessment of a complex clinical problem. In three or four minutes (the time to review ten standard scales), a clinician can come to a broad understanding of the patient in question. For example, a selection of scales might indicate

that an individual is sleepy but not fatigued; lacking alertness with no insomnia; presenting with no symptoms of narcolepsy or restless legs but showing clear features of apnea; exhibiting depression and a history of significant alcohol problems. This information can be used to direct the consultation to those issues perceived as most relevant, and can even provide a springboard for explaining the benefits of certain treatment approaches or the potential corollaries of allowing the status quo to continue. Second, rating scales can provide a clinician with an enhanced vocabulary or language, improving his or her understanding of each patient. In the case of the sleep specialist, a scale can help him to distinguish fatigue from sleepiness in a patient, or elucidate the differences between sleepiness and alertness (which is not merely the inverse of the former). Sleep scales are developed by researchers and clinicians who have spent years in their field, carefully honing their preferred methods for assessing certain brain states or characteristic features of a condition. Thus, scales provide clinicians with a repertoire of questions, allowing them to draw upon the extensive experience of their colleagues when attempting to tease apart nuanced problems. Third, some scales are helpful for tracking a patient's progress. A particular patient may not remember how alert he felt on a series of different stimulant medications. Scale assessments administered periodically over the course of treatment provide an objective record of the intervention, allowing the clinician to examine and possibly reassess her approach to the patient. Finally, for individuals conducting a double-blind crossover trial or a straightforward clinical practice audit, those who are interested in research will find that their own clinics become a source of great discovery. Scales provide standardized measures that allow colleagues across cities and countries to coordinate their practices. They enable the replication of previous studies and facilitate the organization and dissemination of new research in a way that is accessible and rapid. As the emphasis placed on evidence-based care grows, a clinician's ability to assess his or her own practice and its relation to the wider medical community becomes invaluable. Scales make

this kind of standardization possible, just as they enable the research efforts that help to formulate those standards. The majority of Rating Scales in Sleep and Sleep Disorders:100 Scales for Clinical Practice is devoted to briefly discussing individual scales. When possible, an example of the scale is provided so that readers may gain a sense of the instrument's content. Groundbreaking and the first of its kind to conceptualize and organize the essential scales used in sleep medicine, Rating Scales in Sleep and Sleep Disorders:100 Scales for Clinical Practice is an invaluable resource for all clinicians and researchers interested in sleep disorders.

Challenges in Language Testing Around the World - Betty Lanteigne 2021-02-17

This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

The Routledge Handbook of English Language Education in Bangladesh - Shaila Sultana 2020-12-18

This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

Differential and Integral Calculus - Richard Courant 2011-08-15

The classic introduction to the fundamentals of calculus Richard Courant's classic text Differential and Integral Calculus is an essential text for those preparing for a career in physics or applied math. Volume 1 introduces the foundational concepts of "function" and "limit", and offers detailed explanations that illustrate the "why" as well as the "how". Comprehensive coverage of the basics of integrals and differentials includes their applications as well as clearly-defined techniques and essential theorems. Multiple appendices provide supplementary explanation and author notes, as

well as solutions and hints for all in-text problems.

Developing Writers Across the Primary and Secondary Years - Honglin Chen 2020-03-09
Writing development and pedagogy is a high priority area, particularly with standardised testing showing declines in writing across time and through the years of schooling. However, to date there are relatively few texts for teachers and teacher educators which detail how best to enable the children to become confident, autonomous and agentic writers of the future. *Developing Writers Across the Primary and Secondary Years* provides cumulative insights into how writing develops and how it can be taught across years of compulsory schooling. This edited collection is a timely and original contribution, addressing a significant literacy need for teachers of writing across three key stages of writing development, covering early (4-7 years old), primary (7-12 years old) and secondary years (12-16 years old) in Anglophone countries. Each section addresses two broader themes — becoming a writer with a child-oriented focus and writing pedagogy with a teacher-oriented focus. Together, the book brings to bear rigorous research and deep professional understanding of the writing classroom. It offers a novel approach conceiving of writing development as a dynamic and

multidimensional concept. Such an integrated interdisciplinary understanding enables pedagogical thinking and development to address more holistically the complex act of writing.

Biomedical English - Isabel Verdaguer
2013-06-15

The corpus-based studies in this volume explore biomedical research writing in English from a variety of perspectives. The articles in this collection delve into the lexicographic issues involved in building an electronic database of collocations and lexical bundles, offer insight on the teaching and learning of prototypical multiword units of meaning in biomedical discourse, and view written scientific English through the lens of such diverse fields as phraseology, metaphor, gender and discourse analysis. The research presented in this book forms the theoretical and methodological foundation of SciE-Lex, a lexical database of collocations and prefabricated expressions designed to help scientists write scientific papers in English accurately. The concluding chapter on FrameNet addresses frame semantics, whose application to the cross-linguistic study of scientific language will open new and promising avenues of research in the study of specialized languages.

The Psychic Life of Power - Judith Butler 1997
Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books.

Jamaica Debt Exchange - Mr. David A. Grigorian 2012-10-11

The sovereign debt restructuring operation in Jamaica undertaken in early-2010 was a unique experiment that perhaps offered less by way of upside, if compared to the conventional sovereign debt exchanges, but provided credible assurances against further downfall and financial sector distress. A case study of a highly indebted country with domestically held debt, the paper discusses the conditions leading to the exchange, the rationale behind it, as well as its operational aspects. Achievements of the exchange, too, are discussed in detail. The paper also outlines the risks stemming from the high levels of debt—which continue to remain high—requiring prompt and coordinated action by policymakers if the legacy of the debt exchange is to be preserved.

Peter Skrzynecki is a poet and fiction writer of Polish-Ukrainian descent. His poems are largely poems of reflection and observation, but in the course of their 'meditations' on experience they touch on the special pathos of immigrant families as they come to terms with a new and very foreign country.

Oxford Textbook of Palliative Nursing - Betty R. Ferrell 2014-12-01

This landmark text is the key resource for nurses working in the field of palliative care. Edited by renowned nursing experts, and written by a dynamic team of internationally known authorities in nursing and palliative medicine, the Oxford Textbook of Palliative Nursing covers the gamut of principles of care from the time of initial diagnosis of a terminal disease to the end

of a patient's life and beyond. The text is distinctively developed to highlight the nurse's vital role as part of an integrated palliative care team. Various care settings are discussed including the hospital, ICU, home care, and hospice. Chapters focus on the practical aspects of nursing care, including symptom assessment, patient teaching, family support, psychosocial aspects of palliation, and spiritual care. New to the fourth edition are chapters on the National Consensus Project for Quality Palliative Care Guidelines, palliative care of veterans, palliative care in rural settings, disaster situations, palliative care in Eastern Europe, and palliative care in the Philippines.

Up-Country Girl - Phebean Ajibla Ogundipe
2012-05

Up-Country Girl is the story of an African girl from a rural farming community, and the notable achievements and developments in her life, which coincided with many national events. Nigeria moved from being a British colony to independence, and the new democracy was disrupted by a series of coups d'etat bringing decades of military rule, before a return to civilian rule in 1999. Interwoven into her story are the author's personal views from experience, on old and new polygamy, corruption, sex education, the upbringing of children, business partnerships, the problems of a pluralistic society, work ethics, and other issues. Up-Country Girl also affords the reader a truthful and accurate portrayal of African culture. As a creative writer, the author wrote *Nothing So Sweet* which won First Prize in a British Council competition; several short stories which were broadcast by the B.B.C; *Folktales and Fables* published by Penguin Books, and short stories included in two recent anthologies. As an educationist, she is best known as the co-author of secondary school textbooks: *New Practical English* by Ogundipe and Tregidgo, and *Brighter Grammar*. She lives in Charlotte, North Carolina.

Charting an Asian Trajectory for Literacy Education - Su Li Chong 2021-03-15

Weaving outwards from a centripetal force of biographical stances, this book presents the collective perspectives of literacy researchers from Brunei, China, Hong Kong, Malaysia, Singapore, the Philippines and Taiwan. It represents the first all-Asian initiative to showcase the region's post-colonial, multilingual and multicultural narratives of literacy education. This book provides a much-needed platform that initiates important conversations about literacy as a sociocultural practice in a region that is both challenged and shaped by sociocultural influence unique to Asia's historical and geopolitical trajectory. Driven by the authors' lived experiences of becoming literate as well as their empirical research work in later years, each chapter brings decades of biographical narratives and collective empirical research findings to bear. Within the book are negotiations about literacy across and within home and school contexts; transactions of literature, text and reader; and considerations of the literacy policy-practice nexus. These trajectories, while divergent in their issues, come together as shared lived experience located in local contexts considered through global perspectives. As Asia looks set to become the 21st century's new economic and labour force, the need to understand the sociocultural milieu of this region cannot be understated. This book on literacy education in Asia contributes to the larger narrative.

Handbook of Human and Social Conditions in Assessment - Gavin T. L. Brown 2016-06-23
The Handbook of Human and Social Conditions in Assessment is the first book to explore assessment issues and opportunities occurring due to the real world of human, cultural, historical, and societal influences upon assessment practices, policies, and statistical modeling. With chapters written by experts in the field, this book engages with numerous forms of assessment: from classroom-level formative assessment practices to national accountability and international comparative testing practices all of which are significantly influenced by social and cultural conditions. A unique and timely contribution to the field of Educational Psychology, the Handbook of Human and Social Conditions in Assessment is written for researchers, educators, and policy

makers interested in how social and human complexity affect assessment at all levels of learning. Organized into four sections, this volume examines assessment in relation to teachers, students, classroom conditions, and cultural factors. Each section is comprised of a series of chapters, followed by a discussion chapter that synthesizes key ideas and offers directions for future research. Taken together, the chapters in this volume demonstrate that teachers, test creators, and policy makers must account for the human and social conditions that shape assessment if they are to implement successful assessment practices which accomplish their intended outcomes.

Knowledge-building - Karl Maton 2015-10-08

Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society.

Comprising original papers by an international and multidisciplinary group of scholars, *Knowledge-building* offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about

knowledge-building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.

Social Welfare Policies and Programmes in South Asia - Channaveer R. M. 2019-09-18

This book examines the social welfare policies and programmes devised to address different societal issues and concerns across the South Asian countries. It focuses on the design and delivery of social welfare policies related to women, children, the elderly and groups living below poverty level. It brings a wide array of themes to the fore - empowerment of vulnerable populations, globalization and inclusive development, intervention in Northeast India, employment of elderly teachers in Sri Lanka, regulations in prisons, ageing South Asia and elderly care, social exclusion and urban poor, girl child education in India, child protection in Bangladesh and women panchayat leaders - to provide an evidence-based understanding of social policy formulation, implementation and monitoring in South Asia. Comprehensive and topical, this volume will be useful to scholars and researchers of political studies, sociology, development studies and public policy, and also to practitioners and those in the development sector, NGOs and think tanks.

Intermediation and Beyond - Louise Gullifer 2019-01-24

The global shift from the direct holding of securities by investors to the current intermediated holding system raises many important legal issues. These include the impact of the intermediated holding system on the rights of investors, and the enforcement of those rights against intermediaries and issuers. The cross-border nature of many holding patterns adds another layer of complexity to these issues, and reduces legal certainty. Against this, intermediation offers benefits for many investors, including the ability to hold a cross-border portfolio with one intermediary, a reduction in costs and the facilitation of the use of securities in the collateral, repo, and securities lending markets. This book covers a number of legal topics relating to intermediated securities including the history of intermediation, the benefits and problems in the current intermediated holding system, and how

future legal and technological developments could help to resolve these problems while retaining the benefits of intermediation. It also examines the possible impact of FinTech on this area, in particular the potential for Blockchain to be used in the issuing, holding and settlement of securities, the extent to which this will solve some of the difficulties that currently exist, and whether the use of Blockchain will create new difficulties that will need to be overcome. This book, which originated in a series of workshops organised by the Commercial Law Centre at Harris Manchester College, Oxford, will appeal to those interested in financial and corporate law, including academics, practitioners, policy makers and students.

The Law and Practice of Piracy at Sea - Panos Koutrakos 2014-12-01

This collection of essays provides a comprehensive assessment of the legal and policy approaches to maritime counter-piracy adopted by the EU and other international actors over the last few years. As the financial cost of Somali piracy for the maritime industry and the world economy as a whole was estimated to have reached \$18 billion by 2010, the phenomenon of piracy at sea has steadily grown in significance and has recently attracted the attention of international policy makers. Moreover, piracy is intrinsically linked to state failure and other pathologies bred by it, such as organised crime and terrorism. This book adopts a holistic approach to the topic, examining approaches to piracy as these emerge in different geographical areas, as well as tackling the central issues which counter-piracy raises in terms of the most topical aspects of international law (international humanitarian law and armed conflict, piracy and terrorism, use of force). It also focuses on the approach of the EU, placing counter-piracy in its broader legal context. Providing a detailed doctrinal exploration of the issues which counter-piracy raises, it emphasises and draws upon the insights of the practice of counter-piracy by bringing together academic

lawyers and the legal advisers of the main actors in the area (EU, US, NATO, UK). The book raises fundamental questions about the law and practice of international law: are the rules of the international law of the sea on piracy still relevant? To what extent has the shared interest of international actors in tackling piracy given rise to common practices? Do the interactions among the actors examined in the book suggest fragmentation or unity of the international legal order? Is it premature to view these interactions as signalling the gradual emergence of global law in the area? This common analytical frame of reference is underlined by the concluding part, which draws these threads together. The book will be of interest to legal scholars, political scientists and international relations theorists, as well as decision-makers and students of law, politics and international relations.

1Q84 - Haruki Murakami 2011-10-25

The long-awaited magnum opus from Haruki Murakami, in which this revered and bestselling author gives us his hypnotically addictive, mind-bending ode to George Orwell's 1984. The year is 1984. Aomame is riding in a taxi on the expressway, in a hurry to carry out an assignment. Her work is not the kind that can be discussed in public. When they get tied up in traffic, the taxi driver suggests a bizarre 'proposal' to her. Having no other choice she agrees, but as a result of her actions she starts to feel as though she is gradually becoming detached from the real world. She has been on a top secret mission, and her next job leads her to encounter the superhuman founder of a religious cult. Meanwhile, Tengo is leading a nondescript life but wishes to become a writer. He inadvertently becomes involved in a strange disturbance that develops over a literary prize. While Aomame and Tengo impact on each other in various ways, at times by accident and at times intentionally, they come closer and closer to meeting. Eventually the two of them notice that they are indispensable to each other. Is it possible for them to ever meet in the real world?
