Nothing But Net provides the knowledge and insights you need to understand what's really hot, to know what's not, and to outperform other investors consistently and decisively. Famous for his smart, savvy and unique approach to Tech stock investing, Mark Mahaney provides his 10 proven rules for succeeding as a long-term Tech stock investor—explaining everything he's learned during almost 25 years of analyzing internet stocks, including: Why revenue growth and customer metrics—not earnings—are what matter most to Tech investors How to invest—not trade—in the great growth opportunities that lie ahead How

to determine when high valuations are a warning sign and when they signal an opportunity "I've watched the rise of some of the leading companies of today—Facebook, Amazon, Netflix, Google—and the fall of some of the leading companies of yesterday—Yahoo!, eBay, and AOL..." Mahaney writes. "[F]iguring out which companies really are going to be dominant franchises is an extremely hard thing to do. But those who accomplished this were arguably able to generate some of the best portfolio returns in the stock market over the past generation." Investing for Growth - Terry Smith 2020-10-27

Buy good companies. Don't overpay. Do nothing. Some people love to make successful investing seem more complicated than it really is. In this anthology of essays and letters written between 2010–20, leading fund manager Terry Smith delights in debunking the many myths of investing – and making the case for simply buying the best companies in the world. These are businesses that generate serious amounts of cash and know what to do with it. The result is a powerful compounding of returns that is almost impossible to beat. Even better, they aren't going anywhere. Most have survived the Great Depression and two world wars. With his trademark razor-sharp wit, Smith not only reveals what these high-quality companies really look like and where to find them (as well as how to discover impostors), but also: - why you should avoid companies that abuse the English language - how most share buybacks actually destroy value - what investors can learn from the Tour de France - why ETFs are much riskier than most realise - how ESG investors often end up with investments that are far from green or ethical - his ten golden rules for investment - and much, much more. Backed up by the analytical rigour that made his name with the cult classic, Accounting for Growth (1992), the result is a hugely enjoyable and eye-opening tour through some of the most important topics in the world of investing – as well as a treasure trove of practical insights on how to make your money work for you. No investor's bookshelf is complete without it.

The Art of Execution - Lee Freeman-Shor 2015-09-14

Over seven years, 45 of the world's top investors were given between \$25 and \$150m to invest by fund manager Lee Freeman-Shor. His instructions were simple. There was only one rule. They could only invest in their ten best ideas to make money. It seemed like a foolproof plan to make a lot of money. What could possibly go wrong? These were some of the greatest minds at work in the markets today - from top European hedge fund managers to Wall Street legends. But most of the investors' great ideas actually lost money. Shockingly, a toss of a coin would have been a better method of choosing whether or not to invest in a stock. Nevertheless, despite being wrong most of the time, many of these investors still ended up making a lot of money. How could they be wrong most of the time and still be profitable? The answer lay in their hidden habits of execution, which until now have only been guessed at from the outside world. This book lays bare those secret habits for the first time, explaining them with real-life data, case studies and stories taken from Freeman-Shor's unique position of managing these investors on a day-to-day basis. A riveting read for investors of every level, this book shows you exactly what to do and what not to do when your big idea is losing or winning - and demonstrates conclusively why the most important thing about investing is always the art of execution.
