Principi e Pratica Di Tecnologia Veterinaria - Paul. W. Prat 2001-05-05

Questo testo straordinariamente completo insegna allo studente e all'assistente veterinario, sicuramente tutto quello che c'è da sapere. Esso fornisce una panoramica a tutto tondo delle scienze di base e di clinica. Ricco di contenuti, in particolare, nei settori della farmacologia, l'anestesia e le procedure di emergenza. Diversi Capitoli sono dedicati alla Anatomia e Fisiologia, Odontoiatria e Geriatria. Numerose schede riepilogative sono dedicate alla valutazione diagnostica con importanti parametri di monitoraggio dei segni e sintomi. Il ruolo del tecnico è seguito Step-by-step nello svolgimento delle sue funzioni. Quadri di apprendimento, parole chiave e più' di 500 domande di ripasso aiutano lo studente a valutare il livello di Apprendimento.

Men and Bears - AA.VV. 2020-01-23

The time of Carnival represents a "wild" time at the end of winter and pointing to the beginning of a new season. It is characterized by the irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the animal that, more than all the others, gets as

close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

Manuale di ostetricia e neonatologia del cane e del gatto - Giovanni Majolino
2015-10-01T00:00:00+02:00

Questo manuale nasce dall'esperienza personale degli autori che quotidianamente si trovano ad affrontare i problemi, gli imprevisti e i sempre numerosi interrogativi che sorgono prima, durante e dopo la nascita di un cucciolo e di un gattino. L'attenzione è stata focalizzata su protocolli terapeutici aggiornati, attuali e applicabili nella comune pratica quotidiana, evitando argomenti complessi e specialistici. Il libro è rivolto a tutti i veterinari e contiene indicazioni pratiche sul "che cosa fare sia in situazioni di routine sia in situazioni di emergenza.

Canine and Feline Endocrinology and Reproduction - Edward C. Feldman 2004-01-01

This book provides complete, current information on pathophysiology, diagnosis, and treatment of endocrine, metabolic, and reproductive diseases in dogs and cats. It also discusses the importance of testing procedures in endocrine and reproductive diseases, as well as cost-effective and expedient diagnostic protocols. A complete review of reproduction is presented with the endocrine material, making

this text the most inclusive resource overall on the topic. Expansive sections on Canine Male and Female Reproduction. The book is divided into nine sections for an organized and accessible approach to information. Discussions of testing procedures in endocrine and reproductive diseases. Explains cost-effective and expedient diagnostic protocols. Logical, step-by-step guidelines aid in accurate decision-making and diagnosis. A new chapter in the Adrenal Gland section (Section 3) addresses feline hyperadrenocorticism. The chapter on diabetes mellitus in the canine and feline has been divided into two chapters in order to explore the specific aspects of the disease in each species. All material has been extensively revised and brought up to date for this edition. Additional tables and algorithms throughout the book summarize and clarify information.

Cani (Cura, comportamento, salute, razze) - aa. vv. 2020-04-20

Un libro per avvicinare il lettore ai cani, offrendo tutte le nozioni basilari e i suggerimenti necessari per scegliere nel variegato mondo delle razze, tutte descritte e illustrate con immagini.

L'allevatore rivista mensile illustrata di agricoltura, zootecnia, allevamento, caccia, acclimatazione, ecc - 1895

Illustrated Veterinary Anatomical Nomenclature - Oskar Schaller 2007

Depicts and defines more than 6500 structures named in the "Nomina Anatomica Veterinaria" (NAV), aiding the user in understanding anatomy and in clarifying its concepts. This book focuses on the gross anatomical structures of the cat, dog, pig, ox, sheep, goat, and horse.

Rabbit Medicine and Surgery - Emma Keeble 2016-04-05

In both the UK and US rabbits are the third most popular mammalian pet after cats and dogs. This has led both to the expectation of high quality veterinary care and great improvements in the medical and surgical management of rabbits. Rabbit Medicine and Surgery: Self-Assessment Color Review covers a wide range of topics from basic biology and husbandry.

Chi è il cane - 2014-12-23

Prendere il primo cane è una decisione carica di aspettative e responsabilità. Purtroppo cercare nel web non basta per chiarirsi le idee. Le informazioni sono dispersive, inconcludenti e spesso si finisce per avere tanta confusione. Per questo motivo ho deciso di raccogliere le nozioni fondamentali in un e-book. Questo è una guida che serve sia da introduzione che da approfondimento. Sarà per te un punto di riferimento a cui accedere ogni volta che ne avrai bisogno. Quali sono le esigenze del cane? Cosa gli darò da mangiare? Come farò a farmi capire e capire lui a mia volta? Sarò in grado di renderlo sereno? Quali sono i diritti del cane e i doveri del padrone? Tutte queste risposte le avrai grazie a questa piccola guida. Inoltre ho pensato di introdurti nel mondo cinofilo, di spiegarti cosa sia la selezione, il pedigree, le razze canine. Insomma tutto ciò che ti servirà a capire chi sia questo cane, cosa vorrà da te e da dove viene. *** Attenzione: la richiesta di un conto o di una carta di credito fa parte della prassi di Google Play e una volta compilata la richiesta, il download dell'ebook non richiederà alcun pagamento.

The Mind-Brain Relationship - Regina Pally 2020-11-24

The recent explosion of knowledge in neuroscience has enormous implications for the practice of psychoanalysis, and The Mind-Brain Relationship offers an indispensable introduction to the seemingly unfamiliar, intimidating, and yet exciting and essential field of neuropsychology.

Psychoanalysis and Neuroscience - Mauro Mancia 2007-04-29

Recent scientific studies have brought significant advances in the understanding of basic mental functions such as memory, dreams, identification, repression, which constitute the basis of the psychoanalytical theory. This book focuses on the possibility of interactions between psychoanalysis and neuroscience: emotions and the right hemisphere, serotonin

and depression. It is a unique tool for professionals and students in these fields, and for operators of allied disciplines, such as psychology and psychotherapy.

BSAVA Manual of Canine and Feline Reproduction and Neonatology - Gary

England 2011-02-07

Following the success of the first edition, this Manual has been completely updated and reorganized to be even more practical and user-friendly. It follows reproductive medicine from mating, through conception and birth, looking at problems such as infertility and dystocia along the way. Care of the neonate plus conditions that may affect new puppies and kittens are also included. New developments in drugs and in biotechnology are discussed. Full colour photographs and illustrations support the text, which has been prepared by international contributors.

Semiotics of Animals in Culture - Gianfranco Marrone 2018-02-28

To place animals within the realm of nature, means inserting them among the articulations of culture and the social. Semiotics has never avoided this chiasmus, choosing to deal from the outset with the problem of the languages of animals following the old admonition of Montaigne: it is not that animals do not talk, it is us who do not understand them. Recent research in the field of the anthropology of nature and sociology of sciences and techniques allow to think about the Zoosemiotic issue in a different way. Instead of transplanting the language structures - gestures, LIS, etc. - for a semiotic study of the forms of the human and social meaning, it seems more apt to look at their discourse, and as such, the actual interactions, communicative and scientific as well as practical and functional, between humans and non-humans. This book aims to investigate precisely this hypothesis, known here as Zoosemiotics 2.0, working on several fronts and levels: · Anthropology · Languages of the image and visual representations, from art

history to cinema · Old and new media. From literature to comics, from cartoons to TV documentaries but also advertising, music, Web and social networks. All those cultural products that talk about the role of human and non-human in society implicitly proposing (and in some way imposing) a form of articulation of such a relationship. · Food and feeding rites · Animalist, vegetarian and vegan movements · Philosophy: metaphysics, ethics, aesthetics

Gatti (Cura, comportamento, salute, razze) - aa. vv. 2020-04-22

Un libro per avvicinare il lettore ai gatti, offrendo tutte le nozioni basilari e i suggerimenti necessari per scegliere nel variegato mondo delle razze, tutte descritte e illustrate con immagini.

Topsy - Marie Bonaparte 1994-01-01

Topsy is a psychoanalytic tale of the effects of a dog on its owner; the analyst is the great Marie Bonaparte. Only after being told that her dog had cancer did she realize the attachment she developed to Topsy. She describes the emotions she experienced during the time of Topsy's illness and subsequent healing. Written in France and Greece at the onset of World War II, the story of Topsy's cancer clearly is intended to convey the ills of Europe at that time.

Bonaparte's relationship with her dog reveals her own fears about aging, dying, being alone, as well as the uncertainty of the political situation. As she tells her story, Bonaparte is reminded of the experience of her father, who also suffered from cancer. Topsy, while not written as a scientific study, provides insight into the psychoanalytical effects of relationships between humans and animals. It tells us much about one of psychotherapy's founding personages as well as the members of her professional circle in a critical period of European history. In the new introduction, Gary Genosko reflects on Sigmund Freud's own affection for, and use of, dogs in his analyses. He goes on to describe the relationship between Freud and Bonaparte and how dogs played a significant part in that companionship. Topsy will be of interest to psychologists, psychiatrists, and those who love, and have been loved by dogs. Marie Bonaparte (1882-1962) was a renowned French psychoanalyst whose best-known book was *A Psychoanalytic Study of Edgar*

Allen Poe. She also translated many of Freud's books into French. Gary Genosko is a researcher affiliated with the McLuhan Program in Culture and Technology at the University of Toronto in Canada, and the department of Sociology, Goldsmith's College, University of London, England.

Il cane in ambulatorio - Ermando Bruno 1965

Laughter - Henri Bergson 1914

Semiotics and the Philosophy of Language - Umberto Eco 1986

"Eco wittily and enchantingly develops themes often touched on in his previous works, but he delves deeper into their complex nature... this collection can be read with pleasure by those unversed in semiotic theory." —Times Literary Supplement
