Values, Political Action, and Change in the Middle East and the Arab Spring -

Mansoor Moaddel 2017

Although many have tried, the spontaneity of the Arab Spring uprisings and the unpredictability of its diverse geographical outcomes have resisted explanation. For social scientists, part of the challenge has been how to effectively measure and analyze the

empirical data, while another obstacle has been a lack of attention to the worldviews, value orientations, and long-term concerns from the people of the Middle East and North Africa. In order to meet these challenges head-on, Mansoor Moaddel and Michele J. Gelfand have assembled an international team of experts to explore and employ a new and diverse set of frameworks in

order to explain the dynamics of cross-national variation, values, political engagement, morality, and development in these regions. To this end, the authors address a wide range of questions, such as: To what extent do recent events reflect changes in values among the Middle Eastern publics? Are youth uniformly more supportive of change than the rest of the population? To what extent are changes in values connected to changes in identities? How do we explain the process of change in the long term? As Moaddel and Gelfand remark in their book's introduction, "Our hope is that this collective effort will not only contribute to the development of the social sciences in the Middle East and North Africa, but also to practical political actions and public policies that serve social tolerance and harmony, peace, and economic prosperity for the people of the region."

Europe's Last Chance - Guy Verhofstadt 2017-01-03

In the heart of Europe's current crisis, one of the

continent's foremost statesmen issues a clarion call to radically remake the European Union in the mold of the United States' own federal government

Europe is caught in its greatest crisis since the Second World War. The catalog of ills seems endless: an economic crisis spread through most of Europe's Mediterranean tier that has crippled Greece and driven a wedge between northern and southern Europe; terrorist attacks in Paris, Cologne, Brussels, and Nice; growing aggression from Russia in Ukraine and the Baltic states; and refugees escaping war-torn neighbors.

The European Union's inability to handle any of these disasters was a driving factor in Great Britain voting to leave, and others may soon follow. The result won't just be a continent in turmoil, but also a serious threat to American and British security-the Atlantic, let alone the Channel, simply isn't big enough to keep European troubles in Europe. For everyone's sake, Europe must survive. The question is how. In

Europe's Last Chance, Guy Verhofstadt-former prime minister of Belgium and current leader of the liberal faction in the European Parliament-provides the essential framework for understanding Europe today, laying bare the absurdity of a system in which each member state can veto legislation, opt in or out of the Euro, or close borders on a whim. But Verhofstadt does not just indict the European Union, he also offers a powerful vision for how the continent can change for the better. The key, argues Verhofstadt, is to reform the European Union along the lines of America's federal government: a United States of Europe strong enough to stand with the United States of America in making a better, safer world. A visionary book from one of today's luminaries of European leadership, Europe's Last Chance is a clarion call to save the European Union, one of the world's greatest chances for peace and prosperity.

Politics and Change in the Middle East - Roy Andersen
2009

This long-time best-seller uses a thematic, rather than country-by-country, approach to the region in an analysis that is at once comprehensive and, at the same time, does not underestimate the intelligence of the college audience. The authors wrote this book because there were no introductory texts taking a holistic perspective on the region. This book employs a multidisciplinary approach (political science, economics, history, anthropology) to explain the current political dynamics of the region. It avoids a country-by-country approach in favor of a thematic approach that integrates regional experiences into a whole. Major themes include political development, economic development, international relations, Islam - mainstream and jihadist, colonialism and post-colonialism; and recent political changes, with particular emphasis on the U.S.

Last Chance Mustang -

Mitchell Bornstein 2015-06-23

Last Chance Mustang is the story of Samson, a formerly free-roaming, still wild-at-heart American mustang that was plucked from his mountainous Nevada home and thrown into the domestic horse world where he was brutalized and victimized. After years of abuse, Samson had evolved into a hateful and hated, maladjusted beast until the day he found his way to a rural Illinois farm, an ill-equipped owner, and one last chance. Mitch Bornstein's task was to tame the violent beast whose best defense had become offense. He had twenty years of experience fixing unfixable horses, but Samson would be his greatest challenge.

Through the pair's many struggles and countless battles, Samson would teach Mitch about the true power of hope, friendship, redemption and the inspiring mettle of the forever wild and free American mustang. Last Chance Mustang explains Samson's violent and antisocial behavior while addressing the remedial techniques employed to remedy these issues. The art of working with damaged horses is demystified. Though his story is sad, the reader is asked to respect Samson—not pity him. He has good and bad days, and he has a dark side. Like all of us, Samson is far from perfect. And his saga will move the reader to both tears and laughter. Part history lesson, part training manual, and part animal narrative, Samson's is a story that all readers will be able to relate to: a story of survival, of trust, and ultimately, finding love.

Life as Politics - Asef Bayat
2013-05-01

Prior to 2011, popular imagination perceived the Muslim Middle East as unchanging and unchangeable, frozen in its own traditions and

history. In *Life as Politics*, Asef Bayat argues that such presumptions fail to recognize the routine, yet important, ways in which ordinary people make meaningful change through everyday actions. First published just months before the Arab Spring swept across the region, this timely and prophetic book sheds light on the ongoing acts of protest, practice, and direct daily action. The second edition includes three new chapters on the Arab Spring and Iran's Green Movement and is fully updated to reflect recent events. At heart, the book remains a study of agency in times of constraint. In addition to ongoing protests, millions of people across the Middle East are effecting transformation through the discovery and creation of new social spaces within which to make their claims heard. This eye-opening book makes an important contribution to global debates over the meaning of social movements and the dynamics of social change.

**The Making the Modern
Middle East** - T. G. Fraser
2014-07-15

A century ago, as World War I
got underway, the Middle East
was dominated, as it had been
for centuries, by the Ottoman
Empire. But by 1923, its
political shape had changed
beyond recognition, as the
collapse of the Ottoman Empire
and the insistent claims of Arab
and Turkish nationalism and
Zionism led to a redrawing of
borders and shuffling of

alliances—a transformation
whose consequences are still
felt today. This fully revised
and updated second edition of
Making the Modern Middle
East traces those changes and
the ensuing history of the
region through the rest of the
twentieth century and on to the
present. Focusing in particular
on three leaders—Emir Feisal,
Mustafa Kemal, and Chaim
Weizmann—the book offers a
clear, authoritative account of
the region seen from a
transnational perspective, one
that enables readers to
understand its complex history
and the way it affects present-
day events.

Congressional Record - United States. Congress 1958

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, the *Register of Debates in Congress (1824-1837)*, and the *Congressional Globe (1833-1873)*

The Vital Triangle - Jon B. Alterman 2008

The United States has been deeply involved in the Middle East for more than a half century and seized with China's role in the world for a similar period of time. Up to now, the two issues have remained distinct. Increasingly, China's growing thirst for energy has brought it to the Middle East, where governments are curious how the growing superpower might fit into their own strategic

understanding of the world. China's increasing role in the Middle East comes at a time when the United States is itself deeply enmeshed in the region, setting up the possibility of competition or even conflict between the two great powers. This volume explores the complex interrelationships among China, the United States, and the Middle East—what the authors call the “vital triangle.” There is surely much to be gained from continuing the conventional two-dimensional analysis—China and the United States, the United States and the Middle East, and China and the Middle East. Such scholarship has a long history and no doubt a long future. But it is the three-dimensional equation—which seeks to understand the effects of the China-Middle East relationship on the United States, the U.S.-Middle East relationship on China, and the Sino-American relationship on the Middle East—that draws the authors' attention. This approach captures the true

dynamics of change in world affairs and the spiraling up and down of national interests. Central to this analysis is a belief that if any one of the three sides of this triangular relationship is unhappy, it has the power to make the other two unhappy as well. The stakes and the intimacy of the interrelationship highlight not only the importance of reaching accommodation, but also the potential payoff of agreement on common purpose.

[Remembering Childhood in the Middle East](#) - Elizabeth

Warnock Fernea 2010-01-01

Growing up is a universal experience, but the particularities of homeland, culture, ethnicity, religion, family, and so on make every childhood unique. To give Western readers insight into what growing up in the Middle East was like in the twentieth century, this book gathers thirty-six original memoirs written by Middle Eastern men and women about their own childhoods. Elizabeth Warnock Fernea, a well-known writer of books and documentary films about women and the family in the Middle East, has collected stories of childhoods spent in

Egypt, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Morocco, Palestine, Saudi Arabia, Sudan, Syria, Tunisia, and Turkey. The accounts span the entire twentieth century, a full range of ethnicities and religions, and the social spectrum from aristocracy to peasantry. They are grouped by eras, for which Fernea provides a concise historical sketch, and include a brief biography of each contributor. The introduction by anthropologist Robert A. Fernea sets the memoirs in the larger context of Middle Eastern life and culture. As a collection, the memoirs offer an unprecedented opportunity to look at the same period in history in the same region of the world from a variety of very different remembered experiences. At times dramatic, humorous, or tragic, and always deeply felt, the memoirs document the diversity and richness of people's lives in the modern Middle East.

Obama and the Middle East -

Fawaz A. Gerges 2012-05-22

A hard-hitting assessment of

Obama's current foreign policy and a sweeping look at the future of the Middle East The 2011 Arab Spring upended the status quo in the Middle East and poses new challenges for the United States. Here, Fawaz Gerges, one of the world's top Middle East scholars, delivers a full picture of US relations with the region. He reaches back to the post-World War II era to explain the issues that have challenged the Obama administration and examines the president's responses, from his negotiations with Israel and Palestine to his drawdown from Afghanistan and withdrawal from Iraq. Evaluating the president's engagement with the Arab Spring, his decision to order the death of Osama bin Laden, his intervention in Libya, his relations with Iran, and other key policy matters, Gerges highlights what must change in order to improve US outcomes in the region. Gerges' conclusion is sobering: the United States is near the end of its moment in the Middle East. The cynically realist policy it has employed

since World War II-continued by the Obama administration-- is at the root of current bitterness and mistrust, and it is time to remake American foreign policy.

Islam and Democracy in the Middle East - Larry Diamond
2003-08-07

Thirty articles reprinted from issues of the Journal of Democracy investigate why the Middle East is the only region of the world to have been largely untouched by the third wave of global democratizations since 1974. Political scientists, most from or working in western countries, look at such aspects as the decline of pluralism in Mubarak's Egypt, Iran's remarkable election, and the sources of enlightened Muslim thought. Khalifa Al-Yousef 2017-02-27
Since the oil boom of the 1970s, the Gulf Cooperation Council States have attempted to achieve economic stability and realise their development goals. Such efforts have so far been in vain, however, as these states' autocratic governments have closed off their political systems with the support of international allies, especially the United States. In this timely and exhaustive analysis of the political economies of the GCC since the 1970s to the present, Yousef Khalifa Al-Yousef examines the factors responsible for the failure of the states to achieve lasting change in development and security. Focusing on institutional structures where oil wealth has been confined to the few, and the consequences of failed legitimacy at home that has led to dependence on foreign powers, Al-Yousef charts the consistent disparities between governance and the needs of the local population, to the detriment of genuine development. Al-Yousef

concludes that the only way to ensure stability and growth in the region is to dismantle the alliance of autocracy, oil and foreign powers. Instead, democracy and reform are key to ensuring stability in the region.

Last Chance - David Gardner
2009-03-30

As Barack Obama seeks to chart a new course in American foreign policy, David Gardner addresses the controversial but urgent question: why is the Middle East so dysfunctional? whilst they decline elsewhere. The supposed 'Middle East exception' is in fact, he argues, a product of the West's own making. By supporting tyrants, fuelling the Israeli-Palestinian conflict and demonizing democratically elected Islamist parties, the West has incubated a region inherently resistant to economic and political reform, and suppurating with resentment. Timely and insightful, Gardner makes the case for a foreign policy revolution for nothing less than a total reappraisal of what realpolitik means.

The Vanishing - Janine di Giovanni 2021-10

The Vanishing reveals the plight and possible extinction of Christian communities across Syria, Egypt, Iraq, Lebanon and Palestine after 2,000 years in their historical homeland. Some of the countries that first nurtured and characterized Christianity - along the North African Coast, on the Euphrates and across the Middle East and Arabia - are the ones in which it is likely to first go extinct. Christians

are already vanishing. We are past the tipping point, now tilted toward the end of Christianity in its historical homeland. Christians have fled the lands where their prophets wandered, where Jesus Christ preached, where the great Doctors and hierarchs of the early church established the doctrinal norms that would last millennia. From Syria to Egypt, the cities of northern Iraq to the Gaza Strip, ancient communities, the birthplaces of prophets and saints, are losing any living connection to the religion that once was such a characteristic feature of their social and cultural lives. In The Vanishing, Janine di Giovanni has combined astonishing journalistic work to discover the last traces of small, hardy communities where ancient rituals are quietly preserved amid 360 degree threats. Full of faith and hope, di Giovanni's riveting personal stories make a unique act of pre-archaeology- the last chance to visit the living religion before all that will be left are the stones of the past.

Shifting Sands - 2014-02-18

Joel S. Migdal revisits the approach U.S. officials have adopted toward the Middle East since World War II, which paid scant attention to tectonic shifts in the region. After the war, the United States did not restrict its strategic model to the Middle East. Beginning with Harry S. Truman, American presidents applied a uniform strategy rooted in the country's Cold War experience in Europe to regions across the globe, designed to project America into nearly every corner of the world while limiting costs and overreach. The approach was simple: find a local power that could play Great Britain's role in Europe after the war, sharing the burden of exercising power, and establish a security alliance along the lines of NATO. Yet regional changes following the creation of Israel, the Free Officers Coup in Egypt, the rise of Arab nationalism from 1948 to 1952, and, later, the Iranian Revolution and the Egypt-Israel peace treaty in 1979

complicated this project. Migdal shows how insufficient attention to these key transformations led to a series of missteps and misconceptions in the twentieth century. With the Arab uprisings of 2009 through 2011 prompting another major shift, Migdal sees an opportunity for the United States to deploy a new, more workable strategy, and he concludes with a plan for gaining a stable foothold in the region.

Last Chance - David Gardner 2011-12-18

As Barack Obama seeks to chart a new course in American foreign policy, one of the

English language media's most respected authorities on the Arab world, David Gardner, addresses the controversial but urgent question: why is the Middle East so dysfunctional? And what can be done about it? Clear-sighted, never flinching from unpalatable truths, Gardner draws on his acute grasp of history and decades of experience covering the region to look at why conflict, despotism and sectarianism continue to flourish in the Arab world whilst as they decline everywhere else. The 'Middle East exception' is, he argues, a product of the West's own making. By supporting tyrants, fuelling the Israeli-Palestinian conflict and demonizing democratically elected Islamist parties, the West in general but specifically America has incubated a region inherently resistant to economic and political reform, and suppurating with resentment. As the Obama administration plans its Middle East policy, Gardner argues for nothing less than a total reappraisal of what realpolitik means. The

traditional shibboleths: support Israel, mollify the Saudis, suppress Islamism, simply will not do in the 21st century, he argues. Both an introduction to the modern Middle East and an impassioned polemic, "Last Chance" is essential reading for anyone concerned with the future of the region.

Climate Change in the Mediterranean and Middle Eastern Region - Walter Leal Filho 2022-01-01

This book serves the purpose of showcasing some of the works in respect of applied research, field projects, and best practice to foster climate change adaptation across the region. Climate change is having a much greater impact in the Mediterranean than the global average. In the Paris Climate Agreement, the UN member states pledged to stop global warming at well below two degrees, if possible at 1.5 degrees. This mark, which is expected elsewhere only for 2030 to 2050, has already been reached in the region. The situation could worsen in the coming years if the global

community does not limit its emissions. The above state of affairs illustrates the need for a better and more holistic understanding of how climate change affects countries in the Mediterranean region on the one hand, but also on the many problems it faces on the other, which prevent adaptation efforts. There is also a perceived need to showcase successful examples of how to duly address and manage the many social, economic, and political problems posed by climate change in the region, in order to replicate and even upscale the successful approaches used. It is against this background that the book "Climate Change in the Mediterranean and Middle Eastern Region" has been produced. It contains papers prepared by scholars, practitioners, and members of governmental agencies, undertaking research and/or executing climate change projects, and working across the region.

Lebanon after the Syrian Withdrawal - Ohannes Geukjian

2016-11-10

Lebanon experienced serious instability and ethno-national conflict following the Syrian withdrawal in 2005, compounded by the Arab Spring, which led to regional instability and civil war in Iraq and Syria. Why did consociational democracy fail? Was failure inevitable? What impact could external powers play in creating an environment where consociationalism might be successfully implemented? This book addresses these key questions and provides a comprehensive analysis of how internal and external elite relations influence the chances of a successful regulation of ethno-national conflict through power-sharing. Exploring the roles played by Syria, Qatar, Iran, Saudi Arabia, the United States and France, it argues that external actors in the Lebanese conflict largely determined whether power-sharing was successfully established and shows that the consociational democratic model cannot provide long-

term conflict regulation in their absence. The author argues that relationships between internal and external actors determine the prospects for successful conflict regulation and pinpoints the crucial role of the external forces in the creation of power-sharing agreements in Lebanon concluding that future success is dependent on the maintenance of positive, exogenous pressures. This book will be of key interest to students and scholars studying politics, international relations, and Middle East studies.

War and Conflict in the Middle East and North Africa - Ariel I.

Ahram 2020-09-29

For much of the last half century, the Middle East and North Africa (MENA) has seemed the outlier in global peace. Today Iraq, Libya, Israel/Palestine, Yemen, and Syria are not just countries, but synonyms for prolonged and brutal wars. But why is MENA so exceptionally violent? More importantly, can it change? Exploring the causes and consequences of wars and

conflicts in this troubled region, Ariel Ahram helps readers answer these questions. In Part I, Ahram shows how MENA's conflicts evolved with the formation of its states. Violence varied from civil wars and insurgencies to traditional interstate conflicts and affected some countries more frequently than others. The strategies rulers employed to stay in power constrained how they recruited, trained, and equipped their armies. Part II explores dynamics that trap the region in conflict—oil dependence, geopolitical interference, and embedded identity cleavages. The catastrophic wars of the 2010s reflect the confounding effects of these traps, culminating in state collapse and intervention from the US and Russia, as well as regional powers like Iran, Saudi Arabia, and the UAE. Finally, Ahram considers the possibilities of peace, highlighting the disjuncture between local peacebuilding and national and internationally-backed mediation. War and Conflict in

the Middle East and North Africa will be an essential resource for students of peace and security studies and MENA politics, and anyone wanting to move beyond headlines and soundbites to understand the historical and social roots of MENA's conflicts.

Losing the Long Game -

Philip H. Gordon 2020-10-06
Foreign Affairs Best of Books of 2021 "Book of the Week" on Fared Zakaria GPS Financial Times Best Books of 2020 The definitive account of how regime change in the Middle East has proven so tempting to American policymakers for decades—and why it always seems to go wrong. "It's a first-rate work, intelligently analyzing a complex issue, and learning the right lessons from history." —Fareed Zakaria Since the end of World War II, the United States has set out to oust governments in the Middle East on an average of once per decade—in places as diverse as Iran, Iraq, Afghanistan (twice), Egypt, Libya, and Syria. The reasons for these interventions have

also been extremely diverse, and the methods by which the United States pursued regime change have likewise been highly varied, ranging from diplomatic pressure alone to outright military invasion and occupation. What is common to all the operations, however, is that they failed to achieve their ultimate goals, produced a range of unintended and even catastrophic consequences, carried heavy financial and human costs, and in many cases left the countries in question worse off than they were before. Philip H. Gordon's *Losing the Long Game* is a thorough and riveting look at the U.S. experience with regime change over the past seventy years, and an insider's view on U.S. policymaking in the region at the highest levels. It is the story of repeated U.S. interventions in the region that always started out with high hopes and often the best of intentions, but never turned out well. No future discussion of U.S. policy in the Middle East will be complete without taking into account the lessons

of the past, especially at a time of intense domestic polarization and reckoning with America's standing in world.

Our Last Best Chance -
Abdullah II (King of Jordan)
2012-03

HRH King Abdullah was schooled in America and at Sandhurst and was heading for a life as a career soldier, when his father fell ill and he unexpectedly inherited the throne of Jordan. Fiercely loyal

to his country but possessing an outsider's perspective on the political difficulties of the region, King Abdullah has since spent every effort to better Jordan - improving their economy, education and rights for women - and find security for his people and their neighbours. In this seminal work, he puts forward what may be our best chance yet for the most important issue in the region - Israeli-Palestinian peace.
