This history and reference guide will help students and other interested readers to understand the history of this action and its reinterpretation in recent years, but it will also help readers to understand the Japanese American wartime experience through the words of those who were interned. Why did the U.S. government take this extraordinary action? How was the evacuation and resettlement handled? How did Japanese Americans feel on being asked to leave their homes and live in what amounted to concentration camps? How did they respond, and did they resist? What developments have taken place in the last twenty years that have reevaluated this wartime action? A variety of materials is provided to assist readers in understanding the internment experience. Six interpretive essays examine key aspects of the event and provide new interpretations based on the most recent scholarship. Essays include: - A short narrative history of the Japanese in America before World War II -

Computer Safety, Reliability and Security - Udo Voges 2003-06-30

This year we celebrated another anniversary: after 20 years of SAFECOMP in 1999, this was the 20 SAFECOMP since its inauguration in 1979. This series of events focuses on critical computer applications. It is intended to be a platform for knowledge transfer between academia, industry, and research institutions. Papers are solicited on all aspects of computer systems in which safety, reliability, and security (applied to safety in terms of integrity and availability) are of importance. The 20th SAFECOMP tried to cover new grounds, both thematically and geographically. The previous 19 SAFECOMPs were held in Austria (1989, 1996), France (1987, 1999), Germany (1979, 1988, 1998), Great Britain (1983, 1986, 1990, 1997), Italy (1985, 1995),

Norway (1991), Poland (1993), Switzerland (1992), The th Netherlands (2000), and in the USA (1981, 1992), whereas the 20 was held in Hungary. Authors from 13 countries responded to the Call for Papers, and 10 countries were represented in the final program. The proceedings include 20 papers plus 3 invited papers, covering the areas Reliability Assessment and Security, Safety Case and Safety Analysis, Testing, Formal Methods, Control Systems, and this year covering new grounds with a special emphasis on Human Machine Interface, Components off the Shelf, and Medical Systems.
