Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-11-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family"which includes

all primary caregivers are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a

rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the

wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Operational Design: Distilling Clarity from Complexity for Decisive Action - Air University
Air University Press
2019-07-21

This analysis takes a didactic approach. It attempts to demystify the aura surrounding operational design by presenting a theoretical framework for comprehending its fundamental precepts. The goals of this analysis are threefold: provide a methodological example for understanding and applying design, show how design enhances decision making and risk analysis, and investigate the major differences between design in major combat operations and design in counterinsurgency (COIN). The contents of this study should not be construed as either

prescriptive or mechanistic. Warfare is a multifaceted entity conducted in evolving operational environments and against complex, adaptive adversaries. Design is not a sequential methodology or a simplistic checklist. It is a foundational part of operational art that provides the crucial element of structure. This heuristic examination of design simply searches for a way to explain design's intricate structural relationships and highlight the intrinsic potential for deliberately crafting decision analysis. When commanders and staffs approach operational design from this perspective, we move one step closer to the natural masters of the art of war.

Promoting the Educational Success of Children and Youth Learning English - National Academies of Sciences, Engineering, and Medicine 2017-08-25
Educating dual language learners (DLLs) and English

learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs—who account for more than 9 percent of enrollment in grades K-12 in U.S. schools—are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

The Current State of Social Studies - 1982

This volume, one in a series resulting from Project SPAN (Social Studies/Social Science Education: Priorities, Practices, and Needs), reviews and analyzes the current state of K-12 social studies. A major purpose of the review and analysis was to form a basis for recommendations for future

directions that might be taken to improve social studies. The report contains six sections. The first section provides a broad and integrative analysis of the interrelated topics of rationales, definitions, approaches, goals, and objectives of social studies. The second section, "Curriculum Organization in Social Studies," describes the typical pattern of social studies programs from kindergarten through grade 12, stating that despite numerous variations that have occurred, the dominant pattern throughout the nation is one that was established more than 60 years ago. "Social Studies Curriculum Materials," the third section of the volume, describes the great extent to which students, teachers, administrators, and the public accept and rely on curriculum materials as essential aids to teaching, learning, and classroom management. Foremost among curriculum materials being used are textbooks. The topic of the fourth section is "Social Studies Teachers." There is

general agreement that the teacher is "the central figure," the "key," or "the magic ingredient" in the learning process. The fifth section, "Instructional Practices in Social Studies," presents a detailed report on what teachers do. The last section, "Barriers to Change in Social Studies," focusing on the fact that the new social studies had relatively little impact on the schools, explores reasons for lack of change in schools.

Congressional Government: A Study in American Politics - Woodrow Wilson 2018-06-05
The object of this book is to point out the most characteristic practical features of the federal system. Taking Congress as the central and predominant power of the system, its object is to illustrate everything Congressional. Everybody has seen, and critics without

number have said, that our form of national government is singular, possessing a character altogether its own; but there is abundant evidence that very few have seen just wherein it differs most essentially from the other governments of the world. There have been and are other federal systems quite similar, and scarcely any legislative or administrative principle of our Constitution was young even when that Constitution was framed. Clinical Assessment and Diagnosis in Social Work Practice - Jacqueline Corcoran
2010-03-01

This revolutionary, user-friendly textbook not only guides social workers in developing competence in the DSM system of diagnosis, it

also assists them in staying attuned during client assessment to social work values and principles: a focus on client strengths, concern for the worth and dignity of individuals, appreciation of environmental influences on behavior, and commitment to evidence-informed practice. The authors, seasoned practitioner-scholars, provide an in-depth exploration of fourteen major mental disorders that social workers commonly see in practice, including anxiety disorders, depression, bipolar disorder, and schizophrenia. They skillfully integrate several perspectives in order to help practitioners meet the challenges they will face in client assessment. A risk and resilience framework helps social workers understand environmental influences on the emergence of mental disorders and the strengths that clients already possess. Social workers will also learn to apply critical thinking to the DSM when it is inconsistent with social work values and

principles. Finally, the authors catalog the latest evidence-based assessment instruments and treatments for each disorder so that social workers can intervene efficiently and effectively, using the best resources available. Students and practitioners alike will appreciate the wealth of case examples, evidence-based assessment instruments, treatment plans, and new social diversity sections that make this an essential guide to the assessment and diagnostic processes in social work practice.
