Silver Arrows - Andrew Noakes 2022-03-21

Lewis Hamilton's record-breaking achievements in F1 are the latest successes in a glorious motor sport record for Mercedes and Benz that stretches back to the very first races in the 1890s. For the first time, this book tells the story of Mercedes in motor sport from the very beginning, with those pioneers of the 19th century, right through to today's hybrid F1 cars. It covers the triumphs and disasters, from the early Grand Prix machines and the extraordinarily advanced and massively powerful racers of the 1930s to the highs of F1, Le Mans and Mille Miglia glory and the sorrow of the 1955 Le Mans disaster. The story is brought right up to date, tracing Mercedes victories in sports car racing, Indycar, F1 and Formula E - and this book celebrates the achievements of some of the world's greatest drivers, from Caracciola, Fangio and Moss to Hakkinen, Unser and Hamilton.

White Racers from Zuffenhausen - Karl Ludvigsen 2008-12-15

It was no small leap for Porsche from its giant-killing Spyders to the powerful Type 917 that swept all before it. The gap was bridged by its 900-series sports-racing cars, here depicted in rare original photography

from the Ludvigsen Library. Karl Ludvigsen has personally selected both dramatic action images and intimate technical details of the 904, 906, 907, 908 and 910, which with their air-cooled flat-six and flat-eight engines brought Porsche to the fore in both international sports-car racing and the European Hillclimb Championship, which Porsche won in 1966 and 1968. These were the years of spare-no-expense building of fresh cars for every race, funded secretly by Volkswagen, with exotic titanium and beryllium components. Led technically by the thrusting Ferdinand Piëch, Porsche built the ultra-light 908/03 expressly to win both the Targa Florio and Nürburgring — which it did. Porsche expert Karl Ludvigsen introduces this must-have pictorial panorama for all fans of the white racers from Zuffenhausen.

The Water Engine - José Antonio Alías García 2019-09-30

The "water engine" is an invention unfortunately invented many times. Hydrogen from water is very abundant, renewable and can be used in both energy poor and rich countries. Crude oil and natural gas are limited energy resources. But there are many people who think that certain promising technologies have been suppressed by various political or economic powers, usually with the purpose of protecting their investments and interests and, at the already more absurd extremes of the conspiracy illogical, for sinister motivations of much greater scope. In this new work, the versatile composer and writer Van Jaag, accompanies us on an exciting journey through the history of this unknown invention and its invented inventors.

The American Meadow Garden - John Greenlee 2009-09-01

If there's one lesson every homeowner must learn, it's this: The traditional lawn is a huge, time consuming, synthetic-chemical sucking mistake. The time has come to look for new ways to create friendly,

livable spaces around our homes. In *The American Meadow Garden*, ornamental grass expert John Greenlee creates a new model for homeowners and gardeners. For Greenlee, a meadow isn't a random assortment of messy, anonymous grasses. Rather, it is a shimmering mini-ecosystem, in which regionally appropriate grasses combine with colorful perennials to form a rich tapestry that is friendly to all life — with minimal input of water, time, and other scarce resources. Kids and pets can play in complete safety, and birds and butterflies flock there. A prairie style planting is a place you want to be. With decades of experience as a nurseryman and designer, John Greenlee is the perfect guide. He details all the practicalities of site preparation, plant selection, and maintenance; particularly valuable are his explanations of how ornamental grasses perform in different climates and areas. Gorgeous photography by Saxon Holt visually illustrates the message with stunning examples of meadow gardens from across the country. We've reached a stage where we can no longer follow past practices unthinkingly, particularly when those practices are wasteful and harmful to the environment. It's time to get rid of the old-fashioned lawn and embrace a sane and healthy future: the American meadow garden.

WHO Guidelines for Indoor Air Quality - World Health Organization 2010

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

Chrysler Slant Six Engines - Doug Dutra 2019-02-22

Now 60 years old, your Slant Six could probably use some freshening up. Slant Six engine expert Doug Dutra has produced this volume to walk you through every aspect of disassembly, evaluation, rebuild, and reassembly in an easy-to-read, step-by-step format. The book also covers modifications, showing how to squeeze the most out of your engine. The

year 1960 was an important one in auto manufacturing; it was the year all of the Big Three unveiled entrants in a new class of car called the compact. Chrysler's offering, the Plymouth Valiant, was paired with its redesigned 6-cylinder engine entrant, the Slant Six, known by its nickname the "leaning tower of power." This engine powered the Valiants when they swept the top seven positions in the newly christened compact race that precluded the Daytona 500. With its legacy intact, Chrysler's Slant Six powered Mopar automobiles for decades to come in three displacement offerings (170, 198, 225). With millions of Slant Six engines built over the 30-plus years that the engine was produced, it's always a good idea to have this book handy, as you never know when the next "leaning tower of power" will find its way into your garage! p.p1

Lola T70 Owner's Workshop Manual - Chas Parker 2019-07-30

The Lola T70 was developed in 1965 for sports car racing - Lola built the chassis, which were typically powered by large American V8 engines, predominantly Chevrolets and Fords. The T70 was prolific throughout the mid- to late-1960s, and over 100 examples were built in three versions - both open-topped and coupé models. The first successes for the T70 were in the US, and in 1966, the T70 dominated the Can-Am championship, winning five of the six races in the series - with John Surtees becoming champion in a Chevrolet-powered example. In 1968, T70s finished 1 - 2 in the Daytona 24 Hours, and the T70 was highly successful in the domestic UK and European championships, winning regularly. Today, Lola T70s are regular competitors on the historic

racing scene, and examples are highly sought after by collectors. This Lola T70 Owner's Workshop Manual looks at the design, evolution, anatomy and operation of the T70.
