Orphans of the Sky - Robert Anson Heinlein 2001

Ancient myths told of a place called Earth, but the modern world knew it was nonsense. Science knew the Ship was all the Universe, and as long as the sacred Converter was fed, lights would glow and air would flow through the miles of metal corridors. Hugh never questioned these truths until a despised mutie showed him the Control Room and he learned the true nature of the Ship and its mission.

The tale "Chrysalis" explores not just an alien milieu but the nature of man himself when another ancient starship lands and investigates an icy unknown planet inhabited by humans millions of years earlier.

interplanetary gathering place, collected for the first time in one volume. When a tremendous spacecraft took orbit around the Earth's moon and began sending smaller landers down toward the North Pole, the newly arrived visitors quickly set up a permanent spaceport at Mount Forel in Siberia. One of these men, Rick Schumann established a tavern catering to all of various species of visiting aliens, a place he named the Draco Tavern. "Table Manners: A Folk Tale": Rick Schumann is invited to hunt with five folk aliens, but he's not quite sure what their hunt entails, or if he will be the hunted. **Disturbing the Universe** - Roberta S. Trites 1998-04-01  
The Young Adult novel is ordinarily characterized as a coming-of-age story, in which the narrative revolves around the individual growth and maturation of a character, but

Roberta Trites expands this notion by chronicling the dynamics of power and repression that weave their way through YA books. Characters in these novels must learn to negotiate the levels of power that exist in the myriad social institutions within which they function, including family, church, government, and school. Trites argues that the development of the genre over the past thirty years is an outgrowth of postmodernism, since YA novels are, by definition, texts that interrogate the social construction of individuals. Drawing on such nineteenth-century precursors as *Little Women* and *Adventures of Huckleberry Finn*, *Disturbing the Universe* demonstrates how important it is to employ poststructuralist methodologies in analyzing adolescent literature, both in critical studies and in the classroom. Among the twentieth-century authors discussed are Blume, Hamilton, Hinton, Le Guin, L'Engle, and Zindel. Trites' work has applications for a

broad range of readers, including scholars of children's literature and theorists of post-modernity as well as librarians and secondary-school teachers. *Disturbing the Universe: Power and Repression in Adolescent Literature* by Roberta Seelinger Trites is the winner of the 2002 Children's Literature Association's Book Award. The award is given annually in order to promote and recognize outstanding contributions to children's literature, history, scholarship, and criticism; it is one of the highest academic honors that can accrue to an author of children's literary criticism.

### **The Dragons of Marrow -**

Robert Reed 2019-03-03

An immortal boy leads his gang of aliens and mortal humans into the strangest new world. This is Marrow, a secret realm hidden at the heart of a giant star-faring vessel called the Great Ship. Marrow is a violent world built from iron and fire, populated with insects and desperate children as well as ancient entities called dragons. These dragons are gods, any one of them capable of unimaginable destruction. And they need this terrible power. They have the best reasons. Every dragon is defending Marrow against its many enemies. For long eons they have done nothing else, and the system has grown quite stable, even comfortable -- in a bloody fashion -- right up until a new dragon arrives without warning. THE DRAGONS OF MARROW is the story of Diamond, a mysterious boy full of secrets. It is the direct sequel to THE MEMORY OF SKY, a trilogy published by Prime Books. And the novel is a sequel to earlier novels and shorter works, including

MARROW and THE WELL OF STARS, published by Tor Books. Set in Robert Reed's universe of the Great Ship, the immortal captains are waiting: Washen; Pamir, Aasleen, and Miocene. Plus Mere, the relentless explorer, and Till, the ruler behind the bizarre people called the Waywards. "The man wore a wide muscled body and wide brown eyes, bright black hair stolen from his mother, and a narrow face that was all his own. That was a memorable face that always rode the narrow borders between handsome and pretty, and average and plain. Standing on the Great Round, he sang to his enduring people and his AIs. He sang about heroes and sacrifice and the endless struggle to preserve everything everywhere and for all of Time. The most powerful creature on Marrow had the stamina to fill every day with soaring lyrics about commitment and pure objectives. Except nothing good came from overbearing stagecraft. No matter how right and compelling any truth

might be, the audience eventually became too familiar and comfortable, and too smug, and worst of all, lazy in the presence of pivotal matters. "The singer always knew when fatigue was stealing his audience. The drift in the eyes, the reflexive quickness of the passion. That's when the dragon delivered some new flourish -- a cutting insight or a jolt of humor that left the multitudes engaged. Charisma. That was a piece in how Till inspired a sprawling nation, and charisma was why he stood above all other dragons. Except this eternal man didn't carry much fondness for leadership and its trappings. Charm could win any day, but the days rarely mattered. Unity was an ally in defending a frail, aging universe. But perpetual unity was never the goal. That's why the daily performances only came at the cycle's beginning. Weave unity into the cultural center, then step away, giving that passion ample room. Outside eyes, looking down from some high ignorant place,

might consider the Waywards as being a half-coherent mob of fanatics. "Because we are," Till would sing, praising people and machines alike. Standing on the Great Round, watched by shameless proselytes, he cultivated the best kinds of mayhem. No leader could shape every mind. Who knew that better? And that's why every Wayward child was free to shape his beliefs and her beliefs, and more importantly, discover personal doubts and disbeliefs too."Robert Reed is the author of several hundreds published works of fiction. The Great Ship stories are his most popular, and THE DRAGONS OF MARROW moves the saga towards its ultimate ends. Reed lives in Lincoln, Nebraska.

### **Childhood Cancer and Functional Impacts Across the Care Continuum** -

National Academies of Sciences Engineering and Medicine 2021-09-09

Since the late 1960s, the survival rate in children and adolescents diagnosed with

cancer has steadily improved, with a corresponding decline in the cancer-specific death rate. Although the improvements in survival are encouraging, they have come at the cost of acute, chronic, and late adverse effects precipitated by the toxicities associated with the individual or combined use of different types of treatment (e.g., surgery, radiation, chemotherapy). In some cases, the impairments resulting from cancer and its treatment are severe enough to qualify a child for U.S. Social Security Administration disability benefits. At the request of Social Security Administration, Childhood Cancer and Functional Impacts Across the Care Continuum provides current information and findings and conclusions regarding the diagnosis, treatment, and prognosis of selected childhood cancers, including different types of malignant solid tumors, and the effect of those cancers on children's health and functional capacity, including the relative levels of functional

*The Greatship* - Robert Reed

But humans found the relic outside the Milky Way, and after taking possession, they named their prize the Great Ship and embarked on a bold voyage through the galaxy's civilized hearts. Larger than worlds, the Great Ship is laced with caverns and oceans, scenes of exalted beauty and corners where no creature has ever stood. Habitats can be created for every intelligent species, provided that the passengers can pay for the honor of a

berth, and the human captains make the rules and dispense the justice in what soon becomes thousands of alien species joined a wild, unpredictable journey. The first Great Ship story was "The Remoras", published in 1994 by THE MAGAZINE OF FANTASY AND SCIENCE FICTION. All but the most recent titles in the series have been included in this volume, arranged in a rough chronological order, each story partly rewritten to capture the author's growing expertise in the starship. New material has been added to bridge the centuries, hopefully enriching the resident confusion. Robert Reed is the author of a dozen science fiction novels, including two titles about the Great Ship: MARROW and THE WELL OF STARS, both from Tor Books. He has also published more than two hundred shorter works, winning a Hugo in 2007 for his novella, "A Billion Eves". Reed is a long-term resident of Lincoln, Nebraska.

Reed 1998-02-15

Jesse is the kind of callow, sly college man who has it all. he's editor of the student newspaper, enormously popular with the female students, breezing through with terrific grade. But he's oblivious to the fragile balance of life, until something unutterly strange strips way the surface clam of his existence and exposes a universe that proves uncontrollable and endlessly mutable. For Jesse has become the focus of conspiracy of creatures from beyond the end of time to re-create our

universe anew. Blinded by sex and greed, Jesse can't see the terrible flaw in their vast plan...until a wonderful woman names Sully comes into his life and turns everything right side up. The result is a wild, erotic joyride, a no-holds-barred tour de force, and, finally a novel of sublime grace and beauty, a testament to the transcendent power of love.

*Marrow* - Robert Reed 2000
