How We Got to Now - Steven Johnson 2014-09-30

From the New York Times–bestselling author of *Where Good Ideas Come From* and *Extra Life*, a new look at the power and legacy of great ideas. In this illustrated history, Steven Johnson explores the history of innovation over centuries, tracing facets of modern life (refrigeration, clocks, and eyeglass lenses, to name a few) from their creation by hobbyists, amateurs, and entrepreneurs to their unintended historical consequences. Filled with surprising stories of accidental genius and brilliant mistakes—from the French publisher who invented the phonograph before Edison but forgot to include playback, to the Hollywood movie star who helped invent the technology behind Wi-Fi and Bluetooth—*How We Got to Now* investigates the secret history behind the everyday objects of contemporary life. In his trademark style, Johnson examines unexpected connections between seemingly unrelated fields: how the invention of air-conditioning enabled the largest migration of human beings in the history of the species—to cities such as Dubai or Phoenix, which would otherwise be virtually uninhabitable; how pendulum clocks helped trigger the industrial revolution; and how clean water made it possible to manufacture computer chips.

Accompanied by a major six-part television series on PBS, *How We Got to Now* is the story of collaborative networks building the modern world, written in the provocative, informative, and engaging style that has earned Johnson fans around the globe.

"Interesting...Bowlin's calmly rational approach to the subject of conspiracy theories shows the importance of logic and evidence."—Booklist "A page-turning book to give to someone who believes in pizza pedophilia or that the Illuminati rule the world."—Kirkus Reviews The co-hosts of the hit podcast Stuff They Don't Want You to Know, Ben Bowlin, Matthew Frederick, & Noel Brown, discern conspiracy fact from fiction in this sharp, humorous, compulsively readable, and gorgeously illustrated book. In times of chaos and uncertainty, when trust is low and economic disparity is high, when political institutions are crumbling and cultural animosities are building, conspiracy theories find fertile ground. Many are wild, most are untrue, a few are hard to ignore, but all of them share one vital trait: there's a seed of truth at their center. That seed carries the sordid, conspiracy-riddled history of our institutions and corporations woven into its DNA. Ben Bowlin, Matt Frederick, and Noel Brown host the popular iHeart Media podcast, Stuff They Don't Want You

To Know. They are experts at exploring, explaining, and interrogating today's emergent conspiracies—from chem trails and biological testing to the secrets of lobbying and the indisputable evidence of UFOs. Written in a smart, witty, and conversational style, elevated with amazing illustrations, Stuff They Don't Want You to Know is a vital book in understanding the nature of conspiracy and using truth as a powerful weapon against ignorance, misinformation, and lies.
