America Rewind - 2016

Traveling across the United States, the French photographer Emmanuel Georges went in search of the American dream. Using a large-format camera and a documentary-style approach, he captured the reality of America encountered during his journey. At the same time, his photographs reveal a finely tuned understanding of the poetry unique to these places. The result is a kind of photographic road trip of more than twenty thousand kilometers: from the former capital of the automobile industry, Detroit, to Butte, Montana, once a mining city and now half-deserted; through the Rust Belt from Pennsylvania to Arkansas, formerly flourishing cities tell the story of the disappearance of an economic boom long gone. Georges's recurring motifs--decaying façades of industrial buildings, garages, motels, movie theaters--become iconic images of American urban landscapes. Profoundly permeated by an omnipresent sense of melancholy, the empty streets, old cars, and abandoned gas stations are testimony to the end of the American dream.

Adventures among Ants - Mark W. Moffett 2010-05-05

Intrepid international explorer, biologist, and photographer Mark W. Moffett, "the Indiana Jones of entomology," takes us around the globe on a strange and colorful journey in search of the hidden world of ants. In tales from Nigeria, Indonesia, the Amazon, Australia, California, and elsewhere, Moffett recounts his entomological exploits and provides fascinating details on how ants live and how they dominate their ecosystems through strikingly human behaviors, yet at a different scale and a faster tempo. Moffett's spectacular close-up photographs shrink us down to size, so that we can observe ants in familiar roles; warriors, builders, big-game hunters, and slave owners. We find them creating marketplaces and assembly lines and dealing with issues we think of as uniquely human—including hygiene, recycling, and warfare. *Adventures among Ants* introduces some of the world's most awe-inspiring species and offers a startling new perspective on the limits of our own perception. • Ants are world-class road builders, handling traffic problems on thoroughfares that dwarf our highway systems in their complexity • Ants with the largest societies often deploy complicated military tactics • Some ants have evolved from hunter-gatherers into farmers, domesticating other insects and growing crops for food

[Vygotsky's Notebooks](#) - Ekaterina Zavershneva 2018-01-24

This book consists of previously unpublished manuscripts by Vygotsky found in the first systematic study of Vygotsky's family archive. The notebooks and scientific diaries gathered in this volume represent all periods of Vygotsky's scientific life, beginning with the earliest manuscript, entitled *The tragicomedy of strivings* (1912), and ending with his last note, entitled *Pro domo sua* (1934), written shortly before his death. The notes reveal unknown aspects of the eminent psychologist's personality, show his aspirations and interests, and allow us to gain insights into the development of his thinking and its internal dynamics. Several texts reflect the plans that Vygotsky was unable to realize during his lifetime, such as the creation of a theory of emotions and a theory of consciousness, others reveal Vygotsky's involvement in activities that were previously unknown, and still others provide outlines of papers and lectures. The notes are presented in chronological order, preceded by brief introductions and accompanied by an extensive set of notes. The result is a book that allows us to obtain a much deeper understanding of Vygotsky's innovative ideas.
