## **Handbook of Research on Educational Communications and Technology** - J. Michael Spector 2013-07-03

The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions, providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition, with most chapters being completely rewritten, expanded, and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review, documenting and explaining the most recent, outstanding research, including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community.

## *International Law* - David Pataraia 2021-11-30

*International Law: Text, Cases and Materials* provides not only an essential introduction to the core concepts and foundational principles of international law, but also a detailed overview of each established area in which international law operates. Featuring cases, materials, and illustrative figures throughout to enhance the level of context and detail provided, the book covers everything a student of international law requires. Topics include the law of treaties, international organisations, the international protection of human rights, responsibility in international law, jurisdiction, diplomatic and consular law, territory in international law, the law of the sea, international air and space law, international economic law, international environmental law, and international humanitarian law. This comprehensive textbook will be essential reading not only for any course on international law, but also as a starting point for those wishing to grasp the context of a particular area of international law before exploring further.

## **Ethics and Law for School Psychologists** - Susan Jacob 2016-07-12

*Ethics and Law for School Psychologists* is the single best source of authoritative information on the ethical and legal issues school psychologists face every day. Designed specifically to meet the unique needs of psychologists in school settings, this book includes the most up-to-date standards and requirements while providing an introduction to ethical codes, ethical decision making, and the legal underpinnings that protect the rights of students and their parents. This new seventh edition has been extensively updated with the latest research and changes to the law, with an increased focus on ethical-legal considerations associated with the use of digital technologies. Coverage includes new case law on privacy rights, electronic record keeping, the 2014 Standards for Educational and Psychological Testing, digital assessment platforms, the latest interpretations of the Individuals with Disabilities Education Act, and more. Ethics texts for counseling and psychology are plentiful, and often excellent—but this book is the only reference that speaks directly to the concerns and issues specific to psychologists in school settings. Case vignettes, end-of-chapter questions, and discussion topics facilitate deeper insight and learning, while updated instructor's resources bring this key reference right into the classroom. Keeping up with the latest research and legal issues is a familiar part of a psychologist's duties, but a practice centered on children in an educational setting makes it both critical and more complex. *Ethics and Law for School Psychologists* provides a central resource for staying up to date and delivering ethically and legally sound services within a school setting.

*Geological Disposal of Carbon Dioxide and Radioactive Waste: A Comparative Assessment* - Ferenc L. Toth 2011-02-21

Fossil fuels will remain the backbone of the global energy economy for the foreseeable future. The contribution of nuclear energy to the global energy supply is also expected to increase. With the pressing need to mitigate climate change and reduce greenhouse gas emissions, the fossil energy industry is exploring the possibility of carbon dioxide disposal in geological media. Geological disposal has been studied for decades by the nuclear industry with a view to ensuring the safe containment of its wastes. Geological disposal of carbon dioxide and that of radioactive waste gives rise to many common concerns in domains ranging from geology to public acceptance. In this respect, comparative assessments reveal many similarities, ranging from the transformation of the geological environment and safety and monitoring concerns to regulatory, liability and public acceptance issues. However, there are profound differences on a broad range of issues as well, such as the quantities and hazardous features of the materials to be disposed of, the characteristics of the targeted geological media, the site engineering technologies involved and the timescales required for safe containment at the disposal location. There are ample opportunities to learn from comparisons and to derive insights that will assist policymakers responsible for national energy strategies and international climate policies.

**Multinational Enterprises and Emerging Challenges of the 21st Century** - John H. Dunning 2007

A cast of prestigious international business scholars explores here the emerging challenges and issues facing multinational enterprises. The book integrates the latest theories, thoughts and empirical evidence along with several case studies in international business in the 21st century. It is understood that countries view international business in different ways. The contributors reflect this by offering a wide variety of viewpoints and covering an array of issues, such as foreign direct investment, internationalization, trust and leadership, global education and knowledge transfer. Adding to its value are case studies ranging from American restaurant franchises on the world stage to the influence of the internet on Taiwanese SMEs. The book will be useful to scholars as a research resource, to practitioners as a modern guide and to students of international business as a comprehensive text.

*Cultural Influences on the Process of Strategic Management* - Andreas Michael Schühly 2022-01-01

This unique book is positioned at the crossroads of strategic management and international business. Based on an in-depth literature review, the author empirically assesses the widely shared, implicit assumption that strategic management processes can be globally applied in a standardized, i.e., culture-free, manner. So far, a variety of tools have also been recommended but without incorporating cultural differences. As many organizations observe that this ethnocentric view is more an illusion than reality, strategic management research has started to focus on the cultural sensitivity of its theories, tools, and processes to provide practitioners in a multicultural setting with adequate know-how and tools. To foster long-term decision-making despite uncertainty, scenario planning is frequently applied by practitioners. Up until today, scenario planning has however gained little attention from the academic community. Through this book, the author presents a newly developed framework for strategic management that combines the cultural value scale to test the cultural sensitivity of the long-term planning tool called "scenario planning." The different process steps of scenario planning have been individually examined for their sensitivity toward the cultural dimensions of uncertainty avoidance and long-term orientation. The investigation is based on a unique,

global set of management consultants working for a leading professional service firm. The results of this research show the cultural sensitivity of scenario planning, with different degrees of the process steps and the tested cultural dimensions.
