HC 1189 - Budget 2014 - Great Britain: Parliament: House of Commons: Treasury Committee 2014-05-09

In this report the Treasury Committee makes recommendations on pensions, savings, HMRC debt recovery powers and housing. The greater flexibility and choice provided by the proposed pension reforms is welcomed. The 'guidance guarantee' is an important part of making sure that consumers benefit from increased choice. It should be measured against a set of recommended principles to ensure its effectiveness. The pensions reforms are also likely to lead to financial innovation. Following the financial crisis, and the mis-selling scandals, the reputation of the industry is under scrutiny. With regard to savings - double taxation has long been a deterrent to some forms of saving. With the enhanced flexibility for those saving there may now be scope in the long term for bringing the tax treatment of savings and pensions together to create a 'single savings' vehicle. The proposal to grant the power to HMRC to take money directly from people's bank accounts is extremely concerning. Exceptional powers such as this require prior independent oversight. With regard to housing, the Help to Buy scheme, at least in the short-to-medium term, could raise house prices. There is also the risk that withdrawal of Help to Buy may have a distorting effect on the housing market. The need to address these difficulties places a particular responsibility on the FPC, as well as the Government, for detecting and addressing the financial stability risks arising from the housing market. There are also reservations about any extension of retrospection in the tax system. Retrospection should be considered only in wholly exceptional circumstances

The Single-tier Pension - Great Britain: Department for Work and Pensions 2013-01-14

This paper outlines the Government's detailed proposition for state pension reform. It follows a consultation on the proposals set out in "A state pension of the 21st century" (2011, Cm. 8053, ISBN 9780101805322). There was consensus that the state pension system needed to be simplified and the aim is to merge the state second pension with the basic state pension, to create one flat-rate payment. The new flat-rate state pension will start in April 2017 at the earliest. The weekly payment will be £144, plus inflation rises between now and 2017. Chapters in this paper cover: the context for reform; the single-tier pension; managing the end of contracting-out; the transition to the single-tier pension; sustainability and assumptions; longer-term sustainability - state pension age. Annexes provide: a brief history of the state pension; faster flat rating - assessment against principles for reform; features of the single-tier pension and specific transitional arrangements; an example pension statement; proposed timetable for implementing the increase in state pension age to 67.

HM Treasury: Freedom and Choice in Pensions - Cm. 8835 - Great Britain: H.M. Treasury 2014-03-19

This consultation form a key part of a wider set of reforms announced at Budget 2014. The government is keen to ensure that individuals who want to save are supported in doing so. The nature of retirement is changing as people are living longer and their needs more varied. In this Government's view the State should not be imposing restrictions on individuals who have made tough choices to save for the future. So from next year there will be no restrictions on people's ability to draw down from their defined contribution pension pots after age 55. The tax rules will be drastically simplified to give flexible access to pension savings. Consumers will therefore also need to be well informed to make their choices and the Government will introduce a new duty on pension providers and schemes to deliver a 'guidance guarantee' by April 2015.

They will also make available a £20 million development fund to get the initiative up and running

OECD Reviews of Pension Systems: Peru - OECD 2019-09-09

This review assesses Peru's pension system in its entirety, looking at both public and private, pay-as-you-go (PAYG) financed and funded pension provisions. The review then provides policy options to help tackle old-age poverty; establish a solid framework for the contributory pension system to meet its objectives; improve the coverage and level of pensions; and optimise the design and improve the regulation of the funded private pension component. A further goal of these proposals is to improve the Peruvian population's trust that the country's pension system will be able to deliver secure retirement income in old age.

Complexity Theory and Law - Jamie Murray 2018-07-17

This collection of essays explores the different ways the insights from complexity theory can be applied to law. Complexity theory - a variant of systems theory - views law as an emergent, complex, self-organising system comprised of an interactive network of actors and systems that operate with no overall guiding hand, giving rise to complex, collective behaviour in law communications and actions. Addressing such issues as the unpredictability of legal systems, the ability of legal systems to adapt to changes in society, the importance of context, and the nature of law, the essays look to the implications of a complexity theory analysis for the study of public policy and administrative law, international law and human rights, regulatory practices in business and finance, and the practice of law and legal ethics. These are areas where law, which craves certainty, encounters unending, irresolvable complexity. This collection shows the many ways complexity theory thinking can reshape and clarify our understanding of the various problems relating to the theory and practice of law.

Successful Pension Planning - Arthur J. Meuche 1953

Department for Work and Pensions: Public Consultation: Reshaping Workplace Pensions for Future Generations - Cm. 8710 - Great Britain: Department for Work and Pensions 2013-11-07

In Reinventing workplace pensions¹ published last November, the Government set out to explore whether there was scope for a new category of defined ambition (DA) pensions that would complement the defined benefit (DB) and defined contribution (DC) structures that currently dominate the market. Automatic enrolment and the single-tier State Pension will provide a firm foundation for saving for retirement. But if the current forms of DC pension saving become the default alternative to traditional DB, the pension income of future generations from workplace pensions will be more uncertain than for past generations. Over the last 12 months the DA project - a joint project between DWP and the pensions industry - has been exploring options in a middle ground. The Government proposes that the regulation of workplace pension schemes should not focus on the detail of benefit design but on what is important to the member: ensuring that any promise or guarantee, whether from the sponsoring employer or scheme, provider is delivered. This Government proposes to make it easier for employers to sponsor new pension schemes where benefits accrue on a specified basis (e.g. related to salary); and also to allow additional flexibilities for future accruals only within existing DB schemes, including the possibility of allowing a statutory override to facilitate these changes. The new flexibility will remove constraints from the existing legislative framework while still giving employees the certainty of a pension scheme where the benefits are defined (such as in relation to their salary) with the security of the promise being sponsored by their employer

The 100-Year Life - Lynda Gratton 2016-06-02

What will your 100-year life look like? Does the thought of working for 60 or 70 years fill you with dread? Or can you see the potential for a more stimulating future as a result of having so much extra time? Many of us have been raised on the traditional notion of a three-stage approach to our working lives: education, followed by work and then retirement. But this well-established pathway is already beginning to collapse - life expectancy is rising, final-salary pensions are vanishing, and increasing numbers of people are juggling multiple careers. Whether you are 18, 45 or 60, you will need to do things very differently from previous generations and learn to structure your life in completely new ways. The 100-Year Life is here to help. Drawing on the unique pairing of their experience in psychology and economics, Lynda Gratton and Andrew Scott offer a broad-ranging analysis as well as a raft of solutions, showing how to rethink your finances, your education, your career and your relationships and create a fulfilling 100-year life. • How can you fashion a career and life path that defines you and your values and creates a shifting balance between work and leisure? • What are the most effective ways of boosting your physical and mental health over a longer and more dynamic lifespan? • How can you make the most of your intangible assets - such as family and friends - as you build a productive, longer life? • In a multiple-stage life how can you learn to make the transitions that will be so crucial and experiment with new ways of living, working and learning? Shortlisted for the FT/McKinsey Business Book of the Year Award, The 100-Year Life is a wake-up call that describes what to expect and considers the choices and options that you will face. It is also fundamentally a call to action for individuals, politicians, firms and governments and offers the clearest demonstration that a 100-year life can be a wonderful and inspiring one.

DC Confidential - David Schoenbrod 2017-03-07

You think you know why our government in Washington is broken, but you really don't. You think it's broken because politicians curry favor with special interests and activists of the Left or Right. There's something to that and it helps explain why these politicians can't find common ground, but it misses the root cause. A half century ago, elected officials in Congress and the White House figured out a new system for enacting laws and spending programs--one that lets them take credit for promising good news while avoiding blame for government producing bad results. With five key tricks, politicians of both parties now avoid accounting to us for what government actually does to us. While you

understand that these politicians seem to pull rabbits out of hats, hardly anyone sees the sleight of hand by which they get away with their tricks. Otherwise, their tricks wouldn't work. DC Confidential exposes the sleights of hand. Once they are brought to light, we can stop the tricks, fix our broken government, and make Washington work for us once again. The book explains the necessary reform and lays out an action plan to put it in place. Stopping the tricks would be a constructive, inclusive response to the anger that Americans from across the political spectrum feel toward what should be our government.
