Guardians of Finance - James R. Barth 2012-02-10

How the unaccountable, unmonitorable, and unchecked actions of regulators precipitated the global financial crisis; and how to reform the system. The recent financial crisis was an accident, a “perfect storm”

fueled by an unforeseeable confluence of events that unfortunately combined to bring down the global financial systems. Or at least this is the story told and retold by a chorus of luminaries that includes Timothy Geithner, Henry Paulson, Robert Rubin, Ben Bernanke, and Alan Greenspan. In *Guardians of Finance*, economists James Barth, Gerard Caprio, and Ross Levine argue that the financial meltdown of 2007 to 2009 was no accident; it was negligent homicide. They show that senior regulatory officials around the world knew or should have known that their policies were destabilizing the global financial system and yet chose not to act until the crisis had fully emerged. Barth, Caprio, and Levine propose a reform to counter this systemic failure: the establishment of a “Sentinel” to provide an informed, expert, and independent assessment of financial regulation. Its sole power would be to demand information and to evaluate it from the perspective of the public—rather than that of the financial industry, the regulators, or politicians.

The Legal Protection of Databases - Mark J. Davison 2003-06-26
Mark Davison examines several legal models designed to protect databases, considering in particular the EU Directive, the history of its adoption and its transposition into national laws. He compares the Directive with a range of American legislative proposals, as well as the principles of misappropriation that underpin them. In addition, the book also contains a commentary on the appropriateness of the various models

in the context of moves for an international agreement on the topic. This book will be of interest to academics and practitioners, including those involved with databases and other forms of new media.

The Global Negotiator - Jeswald W. Salacuse 2015-01-13

In today's global business environment, an executive must have the skills and knowledge to navigate all stages of an international deal, from negotiations to managing the deal after it is signed. The aim of *The Global Negotiator* is to equip business executives with that exact knowledge. Whereas most books on negotiation end when the deal is made, Jeswald W. Salacuse will guide the reader from the first handshake with a potential foreign partner to the intricacies of making the international joint venture succeed and prosper, or should things go poorly, how to deal with getting out of a deal gone wrong. Salacuse illustrates the many ways in which an international deal may falter and the methods parties can use to save it, provides the necessary technical knowledge to structure specific business transactions, and explores the transformations to the international business landscape over the last decade.

The Obligations of the Carrier Regarding the Cargo - Ilian Djadjev 2017-08-22

This book addresses the legal and contractual obligations of sea carriers regarding due care for the cargo under a contract of carriage. While the general framework employed is the leading international liability regime, the Hague-Visby Rules, the discussions in each chapter also account for the possible future adoption of a new regime, the Rotterdam Rules. The subject matter concerns the standard for the duty of care for goods as codified in the Hague-Visby Rules, but the work also touches upon a wide range of related topics found both in law and in practice, providing

valuable commercial, technical and historical links as well as various solutions that have been found at the national and international level to address challenges arising in this specialised area of law. The book is divided into six chapters, which gradually reveal the complexity of the topic. Chapter 1 provides a thorough introduction to the two main transport documents in use, and to the basic logic behind shipping, sea-going trade and related national and international legislation. In turn, Chapter 2 presents an overview of the relevant provisions of the Hague-Visby Rules. Chapters 3, 4 and 5 examine the problems arising out of the

insertion of a FIOS(T) clause in the contract of carriage; the carriage of goods on deck; and the carriage of goods in containers, respectively. Lastly, Chapter 6 provides an overall conclusion on the legal status quo and current practice, as well as future prospects. The book was written with a number of potential readers in mind and is intended to open up the topic to a broader audience. It is suitable both for readers who wish to advance their learning (e.g. professionals, practitioners and postgraduates) and for readers with little or no prior knowledge of the topic (e.g. students and researchers).
