1001 Winning Chess Sacrifices
and Combinations - Fred

Reinfeld 2014-06-03

Enhance Your Tactical
Weapons! 1001 Winning Chess
Sacrifices and Combination is
the companion volume to
Reinfeld's 1001 Brilliant Ways
to Checkmate. Of course each
book can be taken on its own,
but together they make a
wonderful collection, and cover
the full range of tactical chess.
And they are now both
available in 21st-century
editions, using modern
algebraic notation. Reinfeld
has arranged his quiz positions
so that they fall into orderly
chapters, each with a common
theme. Still, the degree of
difficulty varies widely. Easiest
are one move shots, suitable
for players starting out. Most
difficult are the examples that
run seven moves and more;
some of these may even stump

an ordinary master. Most of all,
this a book of combinative
ideas, all designed to enhance
your arsenal of weapons. The
first step toward mastery is to
become familiar with the
different types of tactical
motifs. The second step is to
study a great many examples of
these tactical themes. So, the
object of this book is to add to
your knowledge, to make you a
strong chessplayer, and (last
but not least) to delight you
with some of the most beautiful
moves ever played on the
chessboard.

started working with Fabiano when he was only five’, remembers legendary New York City chess trainer Bruce Pandolfini. ‘It was obvious that he had a rare intuition, was brave in attack and was one of the most talented players of his age that I had seen.’ Pandolfini had seen right. At 14 years, 11 months and 20 days, Fabiano Caruana became the youngest Grandmaster in the history of the United States and embarked on a glorious career. Among his countless tournament victories Caruana’s legendary win in St Louis in 2014 stands out, making him the third-highest ranked chess player in history. In 2016 he became US Champion and led the golden US team at the Chess Olympiad. His victory at the 2018 Candidates Tournament in Berlin earned Caruana the right to challenge World Champion Magnus Carlsen in a match for the highest title. Alexander Kalinin chronicles the amazing story of the first American Challenger since Bobby Fischer and follows his development from a

pure attacker to a universal, all-round star. This selection of Caruana’s best and most instructive games, arranged in thematic chapters, is a perfect guide for amateur chess players, as there is plenty to be learned about all the skills that really matter.

Queen Sacrifice - Tony Riches

"10th Century Wales is a country divided, with the kingdom of the south becoming Saxon and the north violently defending the old ways. The inevitable civil war is brutal and savage in this tale of divided loyalty and revenge, treachery and love. The bishops of Wales struggle to keep the faith while knights

and war lords turn events to advantage and the lives of ordinary people are changed forever by the conflict. Queen Sacrifice is a tale of love and sacrifice, soldiers and spies, heroes and assassins, who meet in the war to end all wars. The tale is perfect for fans of George R R Martin. Computer Chess Compendium -
D. LEVY 2013-06-29

For many years I have been interested in computer chess and have collected almost every learned paper and article on the subject that I could find. My files are now quite large, and a considerable amount of time, effort and expense has been required to build up this collection. I have often thought how difficult it must be for many computer chess enthusiasts to acquire copies of articles that they see referenced in some other work. Unless one has access to a good reference library, the task is almost impossible. I therefore decided to try to make available, in one volume, as many as possible of the most interesting and important articles and papers ever written on the subject. Such a selection is naturally somewhat subjective, and I hope that I will not offend authors whose works have been excluded. In particular I have decided to

exclude any material which has appeared in the Journal of the International Computer Chess Association (ICCA), or in its precursor, the ICCA Newsletter. The reason is simply that the ICCA itself is in the process of compiling a compendium containing the most important material published in those sources. For further information on ICCA membership and publications the reader is invited to contact: Professor H. 1. van den Herik, or Dr Jonathan Schaeffer University of Limburg, Computing Science Department, Department of Computer Science University of Alberta, 6200 MD Maastricht Edmonton Netherlands Alberta, Canada T6G 2H1.

Grandmaster Chess Strategy - Jurgen Kaufeld 2015-01-10
What Amateurs Can Learn from Ulf Andersson's Positional Masterpieces One of the most effective ways to improve your chess is to take a world class-player as your example. By collecting his games, studying his choices and examining his

style, you will understand what made him rise to the very top. This is what Guido Kern and Jurgen Kaufeld have done with Swedish chess legend Ulf Andersson, a positional genius with a crystal-clear style, who rose to the number 4 spot of the FIDE world rankings. Kaufeld and Kern have selected 80 of Andersson's games and grouped them into 15 thematic strategy lessons, pinpointing exactly how the Swede made the difference in each case. Their instructive verbal explanations will improve your strategic skills and your positional feeling. Every chess player knows how difficult it can be to convert an advantage into a win. Positional technique is what you need and Grandmaster Chess Strategy teaches you exactly that. Throughout the book the authors have selected dozens of test positions at particularly instructive stages of the games.

Learn Chess the Right Way - Susan Polgar 2017-06-05

The Polgar Way to Better Chess! Learn Chess the Right Way is a five-volume chess puzzle book series aimed at the novice, beginner and intermediate level player, using the unique methods of the award-winning coach and former world champion Susan Polgar. It introduces the most important checkmate and material-winning tactics, as well as defensive techniques to the new chess player. Each of the five volumes will consist of over 500 puzzles. Volume 4 is all about exercises where you have to make a “sacrifice” for a material gain or even checkmate. In each of the first five chapters, a certain piece is being sacrificed to checkmate the enemy King (in chapter 1 -

The Queen, in chapter 2 - The Rook, and so on). In chapters 6-10, you will get no hint about which piece should be sacrificed. However, you will know what the target is, to win a Queen, or Rook etc. In chapter 11, there will be no hints whatsoever. The goal is simple: sacrifice one of your pieces to either checkmate or gain material. Many of the examples are built on skills (such as forks, discoveries or pins) learned in volumes 1 and 2 of this series. In most of the puzzles, you will need to think 2-3 pairs of moves ahead in order to find the correct solution. With over 40 years of experience as a world-class player and coach, international grandmaster Susan Polgar has developed the most effective way to help young players and beginners - Learn Chess the Right Way. Let her show you the way to understanding the most common and critical patterns and let her show you the way to becoming a better player. SUSAN POLGAR is a winner of four Women's World Championships and the top-

ranked woman chess player in the United States. She became the #1 woman player in the world at 15 and remained in the top 3 for over 20 years. In 2013, she received the U.S. Coach of the Year Award and the following year, she was named the Chess Trainer of the Year by the International Chess Federation (FIDE). She thus became the first person in history to be accorded both honors. Under her guidance, SPICE chess teams at both Texas Tech University and Webster University have won a combined six consecutive National Division I Collegiate Chess Championships.

Discourse Networks, 1800/1900 - Friedrich A. Kittler 1990

This is a highly original book about the connections between historical moment, social structure, technology, communication systems, and what is said and thought using these systems - notably literature. The author focuses on the differences between 'discourse networks' in 1800 and in 1900, in the process

developing a new analysis of the shift from romanticism to modernism. The work might be classified as a German equivalent to the New Historicism that is currently of great interest among American literary scholars, both in the intellectual influences to which Kittler responds and in his concern to ground literature in the most concrete details of historical reality. The artful structure of the book begins with Goethe's Faust and ends with Valéry's Faust. In the 1800 section, the author discusses how language was learned, the emergence of the modern university, the associated beginning of the interpretation of contemporary literature, and the canonization of literature. Among the writers and works Kittler analyzes in addition to Goethe's Faust are Schlegel, Hegel, E. T. A. Hoffman's 'The Golden Pot', and Goethe's Tasso. The 1900 section argues that the new discourse network in which literature is situated in the modern period is characterized by new technological media -

film, the photograph, and the typewritten page - and the crisis that these caused for literary production. Along the way, the author discusses the work of Nietzsche, Gertrude Stein, Mallarmé, Bram Stoker, the Surrealists, Rilke, Kafka, and Freud, among others.

Winning Chess Manoeuvres - Sarhan Guliev 2015-11-04
When a chess master finds a winning strategic idea it is seldom by accident. An amateur, staring at a position on the chess board is often fumbling in the dark, his head spinning with a multitude of general rules and vague notions. The master's approach is concrete. He knows how and where to look, because he has

studied the games of other masters. In this book, grandmaster Sarhan Guliev presents a wide range of strategic manoeuvres that have been repeatedly employed by great chess players. He shows how masters generate ideas from the games of other masters: -- positional sacrifices -- amazing counterplay concepts, -- unorthodox exchanges -- winning with g2 - g4 or h2-h4 -- overcoming a blockade -- the advantages of double pawns -- the e5 pawn wedge -- the uses of the queen-bishop battery -- and much more. Winning Chess Manoeuvres is brimming with interesting and instructive stories about the chess greats, and written in an accessible and entertaining style. After studying this book, ambitious chess players will find winning strategic manoeuvres quicker and more often. They will not find them by accident or by relying on general principles, but because they have built up a large stockpile of highly practical ideas.

Mastering Positional Sacrifices

- Merijn van Delft 2020-06-25
Most chess games of beginners and post-beginners are decided by fairly straightforward tactics. Anyone who wants to progress beyond this level and become a strong club player or a candidate master, needs to understand that somewhat mysterious-looking resource, the positional sacrifice.

International Master Merijn van Delft has studied and loved positional sacrifices for as long as he can remember. This non-forcing tool is not just a surprising and highly effective way of creating a decisive advantage during a game. Positional sacrifices are also instruments of superior beauty. Van Delft has created a unique thematic structure for all types of positional sacrifices. He shows the early historical examples, explains which long-term goals are typical for each fundamental theme and presents lots of instructive modern examples. He then concentrates on those sacrifices that have become standard features of positional play. Solving the exercises he

has added will further enhance your skills. Playing a positional sacrifice will always require courage. Merijn van Delft takes you by the hand and not only teaches the essential technical know-how, he also helps you to recognize the opportunities when to take the plunge.

Mastering Positional Sacrifices is bound to become a modern-day classic.

The Art of Sacrifice in Chess - Rudolf Spielmann 2017-07-26

The 21st Century Edition of Spielmann's Classic Work Austrian Grandmaster Rudolf Spielmann's The Art of Sacrifice in Chess first appeared in the mid-1930s. It was immediately recognized as a classic, a masterpiece that examined the nature of chess sacrifices. In this modernized, 21st century edition, all of Spielmann's original work has been preserved. The antiquated English Descriptive Notation has been replaced with modern Figurine Algebraic, and German grandmaster Karsten Müller has added his own notes to Spielmann's original text. But the German grandmaster has gone far beyond simply inserting clarifying

commentary. Müller has virtually doubled the size of the original work by adding eleven new chapters, including: The Greek Gift Sacrifice Bxh2/7+; Disaster on g7; The Achilles' Heel f7; Strike at the Edge; Destroying the King's Shelter; Sacrifices on f6; Sacrifices on e6; The Magic of Mikhail Tal; Shirov's Sacrifices; and The Fine Art of Defense. There are exercises at the end of each new chapter to help you hone your skill of sacrificing.

"Grandmaster Karsten Müller's notes to the original text, along with the new material, brilliantly complements Spielmann's classic work. A welcome addition to any chessplayer's library..." - Garry Kasparov

Steve Fein, his Brother, is a New York City Homicide Detective assigned to the search for a serial killer targeting young women who are found clutching a Queen Chess piece, and papers with a puzzling code. The nature of the murders leads Steve to consult his brother as an expert on pathology, and they find that the messages left with the dead women resemble one found in Ludlows waiting room, and point to the Queen Sacrifice, a desperate move in chess. It is not clear what this means to the madman, Simon Sawyer, but it awakens in Ludlow a memory of how he had failed a young boy many years ago. The tension builds as the madmans calls increase. He becomes more brazen in his attacks, and Ludlow is nearly killed while following a suspect. The conflict finally leads to a deadly meeting between the madman, and the Psychoanalyst.
