*How to Write a Good Scientific Paper* - CHRIS A. MACK 2018

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

**The European Dream** - Walter Schwimmer 2004-01-01

Europe is a strange continent. Strictly speaking it is not a continent at all but a mere peninsula tacked on to Asia, from where many of its first inhabitants undoubtedly came. And yet, despite its huge variety- of features, languages, landscape and peoples- this smallest of continents has achieved a clear cultural identity. It is certainly true that 'Eurospeak' lacks poetry and that the myths of today are mainly nationalist, chauvinistic and of the 'No to Europe-type'. But, says the author, 'My Europe is not the Europe that regulates the curve on bananas, quarrels over subsidies for farmers or fights for places on the Council or Commission. I still believe in dreams, especially the European dream.' The author quotes Vaclav Havel 'Without dreaming of a better Europe, we shall never build a better Europe'. Going back to the origins of the European idea, Dr Schwimmer traces the true content of Robert Schumann's vision and shows how this must still be our inspiration. But the author goes back beyond that and looks at other visions of a Federal Europe. From the Hapsburg Empire to the League of Nations and Woodrow Wilson's celebrated speech in 1918, various concepts are examined carefully. In propounding his dream for the future, the author takes on the Eurosceptics directly and shows how Europe must be the key to its inhabitants tackling the problems of world terrorism, human rights and the internal strife of Russia and the Balkan States.

**Uncorrected Papers** - Wallace Matson 2012-02-29

The Uncorrected Papers of Wallace Matson extend over an extraordinarily wide range of philosophical questions, a range beginning with such ancients as Plato and Parmenides and concluding with his own 1991 Commencement Address commending the 'study of philosophy as a prophylactic against bullshit.' In describing the papers published in this book as uncorrected Matson is claiming that their arguments have not been refuted. This is a book which must be read and pondered by everyone seeking philosophical truth.-

Antony Flew, Emeritus Professor of Philosophy, Reading University, England These essays address a spectrum of fundamental topics in a way that will be illuminating for philosophers and lay readers alike. Matson's straightforward, no-holds-barred approach provides welcome relief from the usual pale gray philosophical fare.-John Heil, Professor of Philosophy, Monash University, Australia, and Washington University, St Louis, MO These incisive, witty, and completely accessible essays on a wide range of topics by historian of philosophy Wallace Matson admirably demonstrate that philosophy can still be based on careful reasoning and presented with clarity of expression. Against fashionable contemporary views, Matson asserts that philosophy is the most important subject in the college curriculum, because it is the investigation into what rationality is. Getting the answer wrong to the question What does it mean to be reasonable? is the most catastrophic of errors. The motivation for most of the essays in this collection is his perception that this error is being widely committed and that received opinion on many topics is dead wrong. Accordingly, he takes issue with the following beliefs: bodily resurrection is possible; zombies are logically possible (as David Chalmers claims); John Rawls wrote a book on justice; religion is an aid to morality; Zeno and Parmenides tried to prove that nothing really moves; the actual world is only one out of an infinity of possible worlds; and much more. Also included are two essays on Matson's distinctions between high and low beliefs, four essays on Spinoza, and, in conclusion, The Study of Philosophy as a Prophylactic against Bullshit. Wallace Matson (Berkeley, CA) is professor of philosophy emeritus at the University of California, Berkeley, and the author of A New History of Philosophy, Sentience, and The Existence of God.

*Lives of the Laureates, seventh edition* - Roger W. Spencer 2020-06-23

Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process; with six new laureates. Lives of the Laureates offers readers an informal history of modern economic thought as told through autobiographical essays by thirty-two Nobel Prize laureates in economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This seventh edition adds six Nobelists to its pages: Roger B. Myerson (co-recipient in 2007) describes his evolution as a game theorist and his application of game theory to issues that ranged from electoral systems to perverse incentives; Thomas J. Sargent (co-recipient in 2011), recounts the development of the rational expectations model, which fundamentally changed the policy implications for macroeconomic models; Amartya Sen (recipient in 1998) reflects on his use of a bicycle (later donated to the Nobel Museum) to collect data early in his career; A. Michael Spence (co-recipient in 2001) describes, among other things, his whiplash-inducing first foray into teaching an undergraduate class; Christopher A. Sims (co-recipient in 2011) discusses his "non-Nobel" research; and Alvin E. Roth (co-recipient in 2012) chronicles the "three insurrections" he has witnessed in mainstream economics. Lives of the Laureates grows out of a continuing lecture series at Trinity University in San Antonio, which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. The Laureates W. Arthur Lewis, Lawrence R. Klein, Kenneth J. Arrow, Paul A. Samuelson, Milton Friedman, George J. Stigler, James Tobin, Franco Modigliani, James M. Buchanan, Robert M. Solow, William F. Sharpe, Ronald H. Coase, Douglass C. North, John C. Harsanyi, Myron S. Scholes, Gary S. Becker, Robert E. Lucas, Jr., Vernon L.

**The Civil War Papers of George B. McClellan** - Stephen W Sears 1989-02-27

From the author of Gettysburg: A "valuable" collection of the letters of this controversial Civil War general (James M. McPherson, The New York Review of Books). No one played as many major roles during the Civil War as Gen. George B. McClellan, nor did any other figure write such candid letters about himself, his motivations, and his intentions. For Civil War buffs, this collection is a gold mine, revealing nuggets of fresh information on military operations and political machinations, from the battle of Antietam through McClellan's 1864 race for the presidency—as well as the uninhibited correspondence McClellan wrote to his wife—selected and introduced by the prize-winning author Stephen W. Sears, "a first-class writer and splendid historian" (The Wall Street Journal). "A treasure-trove . . . Nothing of importance concerning [McClellan's] military strategies and tactics or the politics, policies, and issues of the war has been omitted. Sears has edited the collection with consummate economy and skill, and his introductory essays to the book's eleven sections weave the disparate facts of McClellan's wartime experience together." —Library Journal "The letters are most valuable as a revelation of McClellan's personality, which lay at the root of his military failure. They make clear that his initial success and fame went to his head." —James M. McPherson, The New York Review of Books "Introduced with insightful essays . . . [McClellan] emerges as the Captain Queeg of the Civil War." —Harold Holzer, Chicago Tribune Transactions and Proceedings of the ... **The Frederick Douglass Papers** - Frederick Douglass 2009-12-08

This volume of The Frederick Douglass Papers represents the first of a four-volume series of the selected correspondence of the great American abolitionist and reformer. Douglass's correspondence was richly varied, from relatively obscure slaveholders and fugitive slaves to poets and politicians, including Horace Greeley, William H. Seward, Susan B. Anthony, and Henry Wadsworth Longfellow. The letters acquaint us with Douglass's many roles—politician, abolitionist, diplomat, runaway slave, women's rights advocate, and family man—and include many previously unpublished letters between Douglass and members of his family. Douglass stood at the epicenter of the political, social, intellectual, and cultural issues of antebellum America. This collection of Douglass's early correspondence illuminates not only his growth as an activist and writer, but the larger world of the times and the abolition movement as well.

Coll Sci Pap V5 - Paul Anthony Samuelson 1986

"It is a measure of Professor Samuelson's preeminence that the sheer scale of his work should be so much taken for granted," observes a reviewer in the Economist who goes on to note that "a cynic might add that it would have been better for Professor Samuelson to write less merely to give others a chance to write at all." In fact, Samuelson's output, his "extraordinary mastery of methods, both mathematical and linguistic" (review of Volume 4 of The Collected Scientific Papers), have not diminished. Volume 5 collects 108 articles written since 1976, bringing the total to nearly 400 important contributions to economics. As in earlier volumes, the papers are arranged by subject. They cover Economic Theory: Marx, Keynes, and Schumpeter; International Economics; Stochastic Theory; Classical Economics; Mathematical Biology; Biographical and Autobiographical Writings; and Current Economics and Policy. Volumes 1 through 4 encompass more than 280 articles. The first two contain virtually all of Samuelson's contributions to economic theory through mid-1964; Volume 3 contains all the scientific papers written from mid-1964 through 1970, and the last volume brings his work up to through 1976. Paul Samuelson received the Nobel Prize in Economics in 1970 and is Institute Professor of Economics Emeritus at MIT. Kate Crowley edited volume 4 of The Collected Scientific Papers with Hiroaki Nagatani.

**Mr. Smithfield** - Louise Bay 2021-04-13

Wanted: American nanny for an adorable four-year old. Must be able to handle a moody, brooding, sexy British boss. I'm a single father, a lawyer and some say the most serious man in London. I'm completely focused on raising my four-year-old daughter. Since my wife walked out three years ago, the only woman who has ever caught my eye is the strictly off-limits sister-in-law of my best friend, Autumn Lumen. But temptation is easy to resist because Autumn is only visiting London from Oregon. Until she moves to London. The nanny quits. And she's the only woman for the job. **Why Public Higher Education Should Be Free** - Robert Samuels 2013-08-15

Universities tend to be judged by the test scores of their incoming students and not on what students actually learn once they attend these institutions. While shared tests and surveys have been developed, most schools refuse to publish the results. Instead, they allow such publications as U.S. News & World Report to define educational quality. In order to raise their status in these rankings, institutions pour money into new facilities and extracurricular activities while underfunding their educational programs. In *Why Public Higher Education Should Be Free*, Robert Samuels argues that many institutions of higher education squander funds and mislead the public about such things as average class size, faculty-to-student ratios, number of faculty with PhDs, and other indicators of educational quality. Parents and students seem to have little knowledge of how colleges and universities have been restructured over the past thirty years. Samuels shows how research universities have begun to function as giant investment banks or hedge funds that spend money on athletics and administration while increasing tuition costs and actually lowering the quality of undergraduate education. In order to fight higher costs and lower quality, Samuels suggests, universities must reallocate these misused funds and concentrate on their core mission of instruction and related research. Throughout the book, Samuels argues that the future of our economy and democracy rests on our ability to train students to be thoughtful participants in the production and analysis of knowledge. If leading universities serve only to grant credentials and prestige, our society will suffer irrevocable harm. Presenting the problem of how universities make and spend money, Samuels provides solutions to make these important institutions less expensive and more vital. By using current resources in a more effective manner, we could even, he contends, make all public higher education free.

*Writing Science* - Joshua Schimel 2012-01-26

This book takes an integrated approach, using the principles of story structure to discuss every aspect of successful science writing, from the overall structure of a paper or proposal to individual sections, paragraphs, sentences, and words. It begins by building core arguments, analyzing why some stories are engaging and memorable while others are quickly forgotten, and proceeds to the elements of story

structure, showing how the structures scientists and researchers use in papers and proposals fit into classical models. The book targets the internal structure of a paper, explaining how to write clear and professional sections, paragraphs, and sentences in a way that is clear and compelling.
