The Formation of Islamic Law - Wael B. Hallaq 2016-12-05

The fourteen studies included in this volume have been chosen to serve several purposes simultaneously. At a basic level, they aim to provide a general - if not wholly systematic - coverage of the emergence and evolution of law during the first three and a half centuries of Islam. On another level, they reflect the different and, at times, widely divergent scholarly approaches to this subject matter. These two levels combined will offer a useful account of the rise of Islamic law not only for students in this field but also for Islamicists who are not specialists in matters of law, comparative legal historians, and others. At the same time, however, and as the Introduction to the work argues, this collection of distinguished contributions illustrates both the achievements and the shortcomings of paradigmatic scholarship on the formative period of Islamic law.

Fate and Destiny - Michael Meade 2012-07-01

Drawing on the experiences of his life, traditional wisdom stories, poetic and metaphoric language, etymology, and his personal brand of scholarship, Michael Meade leads us to an undeniable truth: that the only story we came here to live is our own. Often called "an instant classic," in this newly revised and expanded edition of *Fate and Destiny*, Meade has taken his original message of the uniqueness of each life to new levels of meaning and inspiration. By elaborating key themes and polishing the gems of wisdom, Meade gives us an even more powerful opportunity to change

ourselves and the world. Meade shows how the limitations of family and fate form the inner threads from which our individual destiny must emerge. He explains how our wounds can become doorways to our deepest gifts and how our greatest obstacles are intended to lead us to a treasure divinely seeded within us before birth. Amidst the current turmoil of the world, *Fate and Destiny* speaks directly to young people seeking to find a genuine path in life and trying to awaken to the dream they carry inside. At the same time, stories of the elders help older people find new ways to value their lives and touch the threads of their own destiny. *Fate and Destiny* offers everyone penetrating insights for those caught in life's inevitable struggles and shows the wisdom of elders depends upon remembering the spirit of eternal youth.

A Neighborhood in Ottoman Istanbul - Cem Behar 2012-02-01

A detailed history of a small neighborhood community of Ottoman Istanbul. Combining the vivid and colorful detail of a micro-history with a wider historical perspective, this groundbreaking study looks at the urban and social history of a small neighborhood community (a mahalle) of Ottoman Istanbul, the Kasap İlyas. Drawing on exceptionally rich historical documentation starting in the early sixteenth century, Cem Behar focuses on how the Kasap İlyas mahalle came to mirror some of the overarching issues of the capital city of the Ottoman Empire. Also considered are other issues central to the historiography of cities, such as rural migration and urban integration of migrants, including avenues for professional

integration and the solidarity networks migrants formed, and the role of historical guilds and non-guild labor, the ancestor of the “informal” or “marginal” sector found today in less developed countries. Cem Behar is Professor of Economics at Bogáaziçi University and the author of many books, including (with Alan Duben) *Istanbul Households: Marriage, Family, and Fertility, 1880-1940*.

A Global Perspective of Social Justice

Leadership for School Principals - Pamela S. Angelle 2017-05-01

Within education there have been some notable attempts to frame social justice in ways that can help to explain and understand the practices of those working in schools, especially school leaders. The research contained in this book seeks to enhance our understanding of school leaders' actions as they work to promote socially just practices and/or outcomes in a range of different national contexts. The unique nature of this research is that studies took place in numerous schools across the globe in a variety of contexts yet utilized the same research protocols. This has allowed the researchers to draw conclusions at an international level about social justice decision making, the supports and barriers brought on school leaders by national policy and mandates, and the essential nature of context in the work of social justice leadership. The audience will include scholars on a global scale, given that cases in the book include authors and principals from around the world. The book can also serve as a text for leadership preparation courses as well as courses in social justice, research design, and qualitative research methodologies. Courses in human relations and communication can use the content as examples of the negotiations and challenges of teamwork in international settings. A primary audience for the book is system/school level leaders in contexts and communities throughout the world for understanding comparative leadership and social justice decision making. Current principals will find the cases useful as reflexive tools for their own work. Educational leaders, educational reformers, and policy makers will benefit from this book as they seek to understand the impact of their work and its influence on promoting equity in schools across the globe.

Global Bioethics - Henk ten Have 2016-02-10

The panorama of bioethical problems is different today. Patients travel to Thailand for fast surgery; commercial surrogate mothers in India deliver babies to parents in rich countries; organs, body parts and tissues are trafficked from East to Western Europe; physicians and nurses migrating from Africa to the U.S; thousands of children or patients with malaria, tuberculosis and AIDS are dying each day because they cannot afford effective drugs that are too expensive. Mainstream bioethics as it has developed during the last 50 years in Western countries is evolving into a broader approach that is relevant for people across the world and is focused on new global problems. This book provides an introduction into the new field of global bioethics. Addressing these problems requires a broader vision of bioethics that not only goes beyond the current emphasis on individual autonomy, but that criticizes the social, economic and political context that is producing the problems at global level. This book argues that global bioethics is a necessity because the social, economic and environmental effects of globalization require critical responses. Global bioethics is not a finished product that can simply be applied to solve global problems, but it is the ongoing result of interaction and exchange between local practices and global discourse. It combines recognition of differences and respect for cultural diversity with convergence towards common perspectives and shared values. The book examines the nature of global problems as well as the type of responses that are needed, in order to exemplify the substance of global bioethics. It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices.

Psychiatric Nursing Care Plans - E-Book - Katherine M. Fortinash
2006-05-16

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools

they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

Bridge Leadership - Autumn K. Tooms
2010-01-01

This is the first chronicle of the history of social justice as a line of inquiry within the field of educational administration. Editors Tooms and Boske have amassed a collective voice of leaders in the field of Educational Administration who have broken barriers and expanded the field through their own work and scholarship within a national and international arena. Many of these narratives are the first time tellings of the challenges and successes found in the works of this group of scholars of historic significance.

This collection is written and organized into practical and easy to digest sections. They are part history lesson, and part practical teaching tool for those who prepare school leaders.

Anyone from school leaders to academics interested or charged with unpacking the messy intersections between school leadership and issues of social justice will find inspiration and easy to understand explanations of leadership and equity work within the chapters presented. Endorsement: "Bridge Leadership is a powerful and fascinating new volume that explores the intersections of social justice and educational leadership. What distinguishes it from other social justice work is that it is much more personal than most such texts. Many of the book's authors share poignant excerpts of their life stories and connect them to the theoretical constructs, historical events, and political struggles of social justice. The foregrounding of these personal stories and the bridges they create with social justice gives the volume a raw power not found in other social justice works. I

could not put the volume down!" ~ Ulrich C. Reitzug, University of North

Introduction to UAV Systems - Paul Fahlstrom 2012-07-11

Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. Introduction to UAV Systems, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues

that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. Introduction to UAV Systems, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in a course that goes into more depth in one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems. *2020 IEEE ACM Innovating the Network for Data Intensive Science (INDIS)* - IEEE Staff 2020-11-12

Many fields of science continue to experience a large influx of data. Managing and transporting data, architecting systems, as well as building tools to cope with the delivery of this data has become increasingly important. Furthermore, the ecosystem of information and communication frameworks supporting data management and transport is becoming more and more complex. Networks for data intensive sciences have more extreme requirements than general purpose networks. These requirements not only closely impact the design of processor interconnects in supercomputers and cluster computers, but they also impact campus networks, regional networks and national backbone networks. In addition, wide area networks are now an integral and essential part of this data driven supercomputing ecosystem connecting information sources, data storage, processing, simulation, visualization, real time user interaction and user communities together. Leadership and Diversity - Jacky Lumby 2007-03-01

What makes this book stand out in the crowd is the engaging approach the authors have taken to present their argument and the novel

treatment they offer of diversity and diversity management...a must-read for anyone in a leadership position or interested in investigating education leadership and diversity' - Gender and Education 'The authors should be congratulated for tackling the crucial topic of diversity within educational leadership....the book makes a major contribution to the small but emergent body of studies in this area' - Journal of Educational Administration & History 'This book sets out a central aim of stimulating reflection on diversity and implications for leaders in education. It also aims to support the development of practice. It is a useful book for those involved in educational management and for policy makers at all levels' - ESCalate 'The authors challenge the reader to reconsider leadership theory in light of notions of social justice and diversity, and to put into place newly articulated frameworks for action...The text is richly supported by strong empirical research and a sometimes-intricate philosophical approach in making its case for justice and fairness in education and beyond' - Choice Magazine What do we mean by diversity? Why is it an important issue for leaders of schools, colleges and universities? As society becomes increasingly diverse, there is significant international awareness in education about how this impacts on leaders and leadership. For decades the emphasis has been placed on increasing the number of leaders with specific attributes, such as women or those from ethnic minorities, to encourage a true representation of society. This far-reaching book takes a wider view, challenging the reader to recognise the importance of diversity issues and to embed diversity as central within leadership theory and practice. Drawing on their extensive research the authors establish a clear understanding of what diversity means and use this to develop a distinct approach to conceiving leadership, preparing leaders and acting as leaders. They explain how diversity should be a holistic issue which touches every aspect of leadership and is vital to ensuring effective and appropriate leadership for education in pluralist societies. The authors explore the history of approaches to addressing inequities in access to leadership positions and the experience of leadership, from equal opportunities, to diversity and inclusion, to capabilities approaches. The

book also proposes fundamental and concrete changes that leaders can undertake both in their own and their organisation's practice, to reflect a real commitment to social justice in a diverse society.

Politics and Government in Turkey - Clement Henry Dodd 1969

The Decline and Fall of the Ottoman Empire - Alan Palmer 1994

Like England's Charles II, the Ottoman Empire took "an unconscionable time dying." Since the seventeenth century, observers had been predicting the collapse of this so-called Sick Man of Europe, yet it survived all its rivals. As late as 1910, the Ottoman Empire straddled three continents. Unlike the Romanovs, Habsburgs, or Hohenzollerns, the House of Osman, which had allied itself with the Kaiser, was still recognized as an imperial dynasty during the peace conference following World War I. "The Decline and Fall of the Ottoman Empire" offers a provocative view of the empire's decline, from the failure to take Vienna in 1683 to the abolition of the Sultanate by Mustafa Kemal (Ataturk) in 1922 during a revolutionary upsurge in Turkish national pride. The narrative contains instances of violent revolt and bloody reprisals, such as the massacres of Armenians in 1896, and other "ethnic episodes" in Crete and Macedonia. More generally, it emphasizes recurring problems: competition between religious and secular authority; the acceptance or rejection of Western ideas; and the strength or weakness of successive Sultans. The book also highlights the special challenges of the early twentieth century, when railways and oilfields gave new importance to Ottoman lands

in the Middle East. Events of the past few years have placed the problems that faced the last Sultans back on the world agenda. The old empire's outposts in the Balkans and in Iraq are still considered trouble spots. Alan Palmer offers considerable insight into the historical roots of many contemporary problems: the Kurdish struggle for survival, the sad continuity of conflict in Lebanon, and the centuries-old Muslim presence in Sarajevo. He also recounts the Ottoman Empire's lingering interests in their oil-rich Libyan provinces. By exploring that legacy over the past three centuries, "The Decline and Fall of the Ottoman Empire" examines a past whose effect on the present may go a long way toward explaining the future. Praise for "The Decline and Fall of the Ottoman Empire" "Alan Palmer writes the sort of history that dons did before 'accessible' became an academic insult. It is cool, rational, scholarly, literate."--John Keegan "A scholarly, readable and balanced history."--"The Independent on Sunday" "A marvellously readable book based on massive research."--Robert Blake

Islamic Jurisprudence in the Classical Era - Norman Calder 2010-03-22

Norman Calder is still considered a luminary in the field of Islamic law. He was one among a handful of Western scholars who were beginning to engage with the subject. In the intervening years, much has changed, and Islamic law is now understood as fundamental to any engagement with the study of Islam, its history, and its society. In this book, Colin Imber has put together and edited four essays by Norman Calder that have never been previously published. Typically incisive, they categorize and analyze the different genres of Islamic juristic literature that was produced between the tenth and fourteenth centuries, showing what function they served both in the preservation of Muslim legal and religious traditions and in the day-to-day lives of their communities. The essays also examine the status and role of the jurists themselves and give clear answers to the controversial questions of how far Islamic law and juristic thinking changed over the centuries, and how far it was able to adapt to new circumstances.

Rural Tourism in Europe - World Tourism Organization 2004

With an expected growth rate of around 6 per cent rural tourism is developing faster than the overall growth rate for international tourism arrivals. Due to its special importance for the European region, three seminars were held in Belgrade (Serbia), Kielce (Poland) and Yaremcha (Ukraine) to focus on three major issues: to contribute to a better understanding of rural tourism and to offer additional tools for planning and execution of initiatives; to enhance the importance of rural tourism in the agendas of governments and international organizations; to generate political and financial support for the development of rural tourism. Constructivist Instructional Design (C-ID) -

Jerry W. Willis 2009-07-01

This book is about emerging models of design that are just beginning to be used by ID types. They are based on constructivist and chaos (non-linear systems or "soft systems") theory. This book provides constructivist instructional design (C-ID) theorists with an opportunity to present an extended version of their design model. After an introductory chapter on the history of instructional design models, and a chapter on the guiding principles of C-ID, the creators of six different C-ID models introduce and explain their models. A final chapter compares the models, discusses the future of C-ID models, and discusses the ways constructivist designers and scholars can interact with, and work with, instructional technologists who use different paradigms.

The Liar in Your Life - Robert Feldman

2009-08-03

In *The Liar in Your Life*, psychology professor Robert Feldman, one of the world's leading authorities on deception, draws on his immense body of knowledge to give fresh insights into how and why we lie, how our culture has become increasingly tolerant of deception, the cost it exacts on us, and what to do about it. His work is at once surprising and sobering, full of corrections for common myths and explanations of pervasive oversimplifications. Feldman examines marital infidelity, little white lies, career-driven resumé lies, and how we teach children to lie. Along the way, he reveals—despite our beliefs to the contrary—how it is nearly impossible to spot a liar (studies have shown no relationship between nervousness, lack of eye contact, or a trembling voice, and acts of deception). He also provides startling evidence of just how integral lying is to our culture; indeed, his research shows that two people, meeting for the first time, will lie to each other an average of three times in the first ten minutes of a conversation. Feldman uses this discussion of deception to explore ways we can cope with infidelity, betrayal, and mistrust, in our friends and family. He also describes the lies we tell ourselves: Sometimes, the liar in your life is the person you see in the mirror. With incisive clarity and wry wit, Feldman has written a truthful book for anyone whose life has been touched by deception.

Ashes of Hama - Raphael Lefevre 2013-10-01

When the convulsions of the Arab Spring first became manifest in Syria in March 2011, the Ba'athist regime was quick to blame the protests on the "Syrian Muslim Brotherhood" and its "al-Qaeda affiliates." But who are these Islamists so determined to rule a post-Assad Syria? Little has been published on militant Islam in Syria since Hafez Assad's regime destroyed the Islamist movement in its stronghold of Hama in February 1982. This book bridges that gap by providing readers with the first comprehensive account of the Syrian Muslim Brotherhood's history to date. In this ground-breaking account of Syria's most prominent, yet highly secretive, Islamist organisation, the author draws on previously untapped sources: the memoirs of former Syrian jihadists; British and American archives; and also a series of wide-ranging interviews with the Syrian Muslim Brotherhood's historical leaders as well as those who battled against them—many speaking on the record for the first time. *Ashes of Hama* uncovers the major aspects of the Islamist struggle: from the Brotherhood's radicalisation and its "jihad" against the Ba'athist regime and subsequent exile, to a spectacular comeback at the forefront of the Syrian revolution in 2011—a remarkable turnaround for an Islamist movement which all analysts had pronounced dead amid the ruins of Hama in 1982.
