Romulus' Asylum - Emma Dench 2005-06-16

Modern treatments of Rome have projected in highly emotive terms the perceived problems, or the aspirations, of the present: 'race-mixture' has been blamed for the collapse of the Roman empire; more recently, Rome and Roman society have been depicted as 'multicultural'. Moving beyond these and beyond more traditional, juridical approaches to Roman identity, Emma Dench focuses on ancient modes of thinking about selves and relationships with other peoples, including descent-myths, history, and ethnographies. She explores the relative importance of sometimes closely interconnected categories of blood descent, language, culture and clothes, and territoriality. Rome's creation of a distinctive imperial shape is understood in the context of the broader ancient Mediterranean world within which the Romans self-consciously situated themselves, and whose modes of thought they appropriated and transformed.

Shakespeare in Print - Andrew Murphy 2021-05-13

The opening chapters have been completely rewritten to offer close engagement with the careers of the network of publishers and printers who first brought Shakespeare to print, additional material has been added to all chapters, and the chronological appendix has been updated and expanded.

Fifty Years at the Sibyl's Heels - Nicholas Horsfall 2020-10-13

Nicholas Horsfall was one of the most recognizable and influential Latinists of his generation. His main legacy is his work on Virgil and the five erudite commentaries on the *Aeneid*, but he was also a prolific writer of papers, both Virgilian and non-Virgilian. A number of Horsfall's papers, including the important 'Camilla', are translated in this volume for the first time. Stretching from 1971 to 2015, the papers are drawn from his entire output demonstrating his unparalleled ability to connect Roman poetry with history, antiquarianism, and Realien. While showcasing his unique analysis of Virgil, it also highlights Horsfall's work as both a Latinist and a Romanist, illuminating the coherence in his approach. This volume includes many Virgilian papers that have become classics—on Aeneas the colonist, and on the Aeneas-legend, for example. This does not detract from the value of the non-Virgilian papers, many of which—on the collegium poetarum, and on discussions of reading and libraries at Rome, for example—have become standard treatments of their subjects. Throughout all these works there is an astonishing degree of connection, with glimpses in many papers of his other research interests. 'Nicholas Horsfall needs to be approached through his short papers, typically fresh, innovative and stimulating, and he has been so productive that nobody can claim to have had a full view of his scholarship. When it comes to placing a literary text in the frames offered by material culture, documents, landscapes, history, and by religious, legal, military and antiquarian studies, he was unrivalled.' Professor Alessandro Barchiesi, Professor of Classics, New York University.

The Case Against Sugar - Gary Taubes 2016-12-27

From the best-selling author of *Why We Get Fat*, a groundbreaking, eye-opening exposé that makes the convincing case that sugar is the tobacco of the new millennium: backed by powerful lobbies, entrenched in our lives, and making us very sick. Among Americans, diabetes is more prevalent today than ever; obesity is at epidemic proportions; nearly 10% of children are thought to have nonalcoholic fatty liver disease. And sugar is at the root of these, and other, critical society-wide, health-related problems. With his signature command of both science and straight talk, Gary Taubes delves into Americans' history with sugar: its uses as a preservative, as an additive in cigarettes, the contemporary overuse of high-fructose corn syrup. He explains what research has shown about our addiction to sweets. He clarifies the arguments against sugar, corrects misconceptions about the relationship between sugar and weight loss; and provides the perspective necessary to make informed decisions about sugar as individuals and as a society.

Tacitus, Annals, 15.20-23, 33-45 - Mathew Owen 2013-09-23

The emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' *Annals* have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought.

Poetic Autonomy in Ancient Rome - Luke Roman 2014-01-30

In *Poetic Autonomy in Ancient Rome*, Luke Roman offers a major new approach to the study of ancient Roman poetry. A key term in the modern interpretation of art and literature, 'aesthetic autonomy' refers to the idea that the work of art belongs to a realm of its own, separate from ordinary activities and detached from quotidian interests. While scholars have often insisted that aesthetic autonomy is an exclusively modern concept and cannot be applied to other historical periods, the book argues that poets in ancient Rome employed a 'rhetoric of autonomy' to define their position within Roman society and establish the distinctive value of their work. This study of the Roman rhetoric of poetic autonomy includes an examination of poetic self-representation in first-person genres from the late republic to the early empire. Looking closely at the works of Lucilius, Catullus, Propertius, Horace, Virgil, Tibullus, Ovid, Statius, Martial, and Juvenal, *Poetic Autonomy in Ancient Rome* affords fresh insight into ancient literary texts and reinvigorates the dialogue between ancient and modern aesthetics.

Social Isolation and Loneliness in Older Adults - National Academies of Sciences, Engineering, and Medicine 2020-05-14

Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation and Loneliness in Older Adults* summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. Social

Isolation and Loneliness in Older Adults considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

When Scotland Was Jewish - Elizabeth Caldwell Hirschman 2015-05-07

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family

crests, portraiture, and geographic place names.

Night Noise Guidelines for Europe - World Health Organization. Regional Office for Europe 2009

The WHO Regional Office for Europe set up a working group of experts to provide scientific advice to the Member States for the development of future legislation and policy action in the area of assessment and

control of night noise exposure. The working group reviewed available scientific evidence on the health effects of night noise, and derived health-based guideline values. In December 2006, the working group and stakeholders from industry, government and nongovernmental organizations reviewed and reached general agreement on the guideline values and key texts for the final document of the "Night noise guidelines for Europe". Considering the scientific evidence on the thresholds of night noise exposure indicated by "L_{night,outside}" [L suffix night,outside] as defined in the Environmental Noise Directive (2002/49/EC), an L_{night, outside} of 40 dB should be the target of the night noise guideline (NNG) to protect the public, including the most vulnerable groups such as children, the chronically ill and the elderly. "L_{night,outside}" value of 55 dB is recommended as an interim target for the countries where the NNG cannot be achieved in the short term for various reasons, and where policy-makers choose to adopt a stepwise approach. These guidelines are applicable to the Member States of the European Region, and may be considered as an extension to, as well as an update of, the previous WHO "Guidelines for community noise" (1999).
