Militarizing the American Criminal Justice System - Peter B. Kraska 2001
Controlling threats to national security has long been the mission of the U.S. military, while civilian law enforcement has dealt with domestic problems of crime, illegal drugs, and internal disorder. This groundbreaking collection argues persuasively that the conventional distinctions between these two forces are becoming blurred and considers the far-reaching consequences of the disquieting trend to militarize the nation's criminal justice system. The contributors examine the historical and current interrelationships between the military and police, illuminating such areas as the ideological similarities between waging real wars and fighting the wars on drugs and crime, the reshaping of the military's role after the end of the Cold War, the rapidly growing influence of advanced military technology in civilian society, and the adaptation of military models such as boot camps and SWAT teams in policing and corrections. As the lines between the military industrial

complex and the criminal justice enterprise become ever more clouded, this work provides a much-needed evaluation of the thorny issues, dangers, and public policy ramifications raised by the entanglement between militari

Church Conflict - Charles H. Cosgrove 1994

If church is like a family, it fights like one too! As in any family, conflict in the church family is natural and inevitable. But the way the church family handles its fights can make or break ministry. By using stories and examples of real problems at actual churches, Cosgrove and Hatfield have applied family-systems theory to help us identify the hidden structural boundaries in any group relationship. They show how the dynamics and 'family rules' operating in the informal family-like church system powerfully influence how church members relate to each other.

How People Learn - National Research Council 2000-08-11

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see

and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

The Power of Partnership - Riane Eisler 2010-09-03

Based on the research that brought international recognition to Riane Eisler's groundbreaking work *The Chalice and the Blade* but addressing the world as it is today, *The Power of Partnership* offers inspiration and guidance for moving to the better lives we yearn for. Eisler offers us a new lens, a new paradigm, for seeing the world and living in it. The Partnership Model, which emphasizes mutual respect and a fundamental awareness of the sacredness of all life, creates a solid foundation for families, businesses, communities, and the world. In contrast, the suffocating paradigm that has guided much of recorded history — what Eisler calls the Domination Model — has led individuals and groups, acting out of fear, to oppress women, wage war, terrorize, and subjugate others. Using these simple yet far-reaching models, Eisler shows how political and personal relationships based on domination inevitably result in misery and violence, while those founded on partnership foster respect, love, and an explosion of creativity.

Attached - Amir Levine 2012-01-05

"Over a decade after its publication, one book on dating has people firmly in its grip." —The New York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book,

psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.

[The Real Wealth of Nations](#) - Riane Eisler 2008-11-10

Bestselling author Riane Eisler (*The Chalice and the Blade*, which has sold more than 500,000 copies sold) shows that at the root of all of society's big problems is the fact that we don't value what matters. She then presents a radical reformulation of economics priorities focused on the home.

Woman the Hunter - Mary Zeiss Stange 1998-07-01

Over two million American women hunt. By taking up weapons for the explicit purpose of killing, they are shattering one of Western culture's oldest and most firmly entrenched taboos. The image of a woman 'armed and dangerous' is profoundly threatening to our collective psyche—and it is rejected by macho males and radical feminists alike. *Woman the Hunter* juxtaposes unsettlingly beautiful accounts of the author's own experiences hunting deer, antelope, and elk with an argument that builds on the work of thinkers from Aldo Leopold to Clarissa Pinkola Estes. Exploring how women and men relate to nature and violence, Mary Zeiss Stange demonstrates how false assumptions about women and about hunting permeate contemporary thought. Her book is a profound critique of our society's evasion of issues that make us uncomfortable, and it

culminates in a surprising claim: that only by appreciating the value of hunting can we come to understand what it means to be human. Controversial and original, defying easy stereotypes, *Woman the Hunter* is sure to provoke strong reactions in almost every reader.

Church Conflict - Norma Cook Everist 2004-11-01

You love your work. You love the people—most of the time. They respect you, most of the time. You work together with colleagues, staff, and laity, with energy and enthusiasm, most of the time. But then something goes wrong: a word spoken in anger, a misunderstanding, and things turn sour. What do you do? How do you deal with conflict, whether it be long or short-term, low or high intensity? Conflict is a part of the human predicament, yet it need not define or control your ministry. This book is designed to help the reader ask certain key questions about the nature and scope of the conflict they are experiencing and, based on the answers to those questions, move beyond conflict. The author lays out the variety of responses to conflict, running the gamut from avoidance to accommodation to compromise to collaboration. Written with the real needs of congregations in mind, this book will serve as a reliable guide to all who wish to move through conflict into a more effective and authentic fulfillment of their calling.

Nurturing Our Humanity - Riane Eisler 2019

Nurturing Our Humanity offers a new perspective on our personal and social options in today's world, showing how we can build societies that support our great human capacities for consciousness, caring, and creativity. It brings together findings—largely overlooked—from the natural and social sciences debunking the popular idea that we are hard-wired for selfishness, war, rape, and greed. Its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule. Moving past right vs. left, religious vs. secular, Eastern vs. Western, and other familiar categories that do not include our formative parent-child and gender relations, it looks at where societies fall on the partnership-domination scale. On one end is the domination system that ranks man over man, man over woman, race over race, and man over nature. On the other end

is the more peaceful, egalitarian, gender-balanced, and sustainable partnership system. *Nurturing Our Humanity* explores how behaviors, values, and socio-economic institutions develop differently in these two environments, documents how this impacts nothing less than how our brains develop, examines cultures from this new perspective (including societies that for millennia oriented toward partnership), and proposes actions supporting the contemporary movement in this more life-sustaining and enhancing direction. It shows how through today's ever more fearful, frenzied, and greed-driven technologies of destruction and exploitation, the domination system may lead us to an evolutionary dead end. A more equitable and sustainable way of life is biologically possible and culturally attainable: we can change our course.

The Art of Everyday Ecstasy - Margot Anand 2015-02-18

"Ecstasy is about waking up and finding that you are in love with life." Most people think of ecstasy in terms of sexual ecstasy, which Tantric sex expert Margot Anand wrote about in her bestselling *The Art of Sexual Ecstasy*. Now, in *The Art of Everyday Ecstasy*, Anand expands our definition of ecstasy and shows how we can harness its energy to help us live, work, and love more passionately, joyfully, and with true spiritual focus. Our modern, work-obsessed, stress-filled culture--what Anand calls the "anti-ecstatic conspiracy"--has dulled our spirits, thrown us off balance, and alienated us from meaningful everyday experiences. In this inspirational journey toward finding the healing nature of ecstasy, Anand explains how the two types of ecstatic experiences--the moments of epiphany called Ecstatic Awakenings, and EveryDay Ecstasy, or the Ecstasy of Flow, a connection to our power and inner wisdom--can help us move beyond pain and doubt to reach our highest potential. Based on the spiritual path of Tantra, Anand shows how to use the natural energy system of our bodies--the seven chakras--as a map to ecstasy. As she guides us through the chakras, she explains how each one plays an important role in transforming energy into erotic passion, healing, empowerment, compassion, creativity, insight, and gratitude. Blocked chakras manifest themselves in surprising ways; wholeness can be achieved only when all of the chakras are open with energy flowing freely. By transforming negative behavioral patterns into positive ones and strengthening ourselves physically, emotionally, and spiritually, we

can improve our health, sex life, career, relationships, and find profound meaning in everyday moments. With personal anecdotes, exercises, meditations, and rituals, *The Art of Everyday Ecstasy* shows us how to bring ecstatic energy into the body, mind, heart, and spirit--"to embrace every moment in our totality, to respond bodily, feel from the heart, perceive with clarity, and be fully present to others and to life."

The Fourth Industrial Revolution - Klaus Schwab 2017-01-03

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are

affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

From the Middle East, to Europe, Africa, and the Americas, the images of feminine divinity presented in this work are as uniform in their beauty as they are diverse in cultural tradition. For each location—be it the shrines in Kyoto and Kamakura or the sites worshipping the Virgin Mary in Bolivia, France, Trinidad, and the Saut D'Eau Waterfalls of Haiti—this book provides a history of each site in conjunction with the photography.

Different Visions of Love - Brian Griffith 2008

Griffith's narrative moves like a searchlight over each phase of church history, illuminating the visions, options, and choices behind events. He traces the rise of a dominator version of Christianity, in which the primary concern was a chain of command to be followed, with rewards or punishments according to the degree of obedience. And beside this he illuminates another face of Christianity, concerned with healing all divisions between loved and unloved people. The story Griffith presents is often deeply disturbing, as in his unflinching accounts concerning the gospel for women, or the age of holy wars and witch hunts. But ultimately his story offers solid grounds for optimism. He shows that all contention between different religious visions can be a process of building partnership. As Griffith points out, Jesus himself wished to debate his opponents openly, not to silence or eliminate them. He was not afraid of real encounter, or the potential of creative conflict. I want to congratulate Brian Griffith on this masterful, controversial, and highly readable account. His book offers hope in a divided world, where reaction against globalized godless corporate secularism meets with a war on religious fundamentalism. I hope to see other writers do comparable work in highlighting the partnership and dominator visions within their religious traditions around the world. Riane Eisler, author of *The Chalice & the Blade*, *Sacred Pleasure*, *Tomorrow's Children*, *The Power of Partnership*, *The Real Wealth of Nations* "I find it gives me an incredibly clarifying perspective on Christianity way beyond my previous understanding. It should be read by everyone with an interest in Western Civilization. It is a marvelous companion to *The Great Turning*." David Korten, author of *The Great Turning: From Empire to Earth Community*

Fair Play - Eve Rodsky 2021-01-05

AN INSTANT NEW YORK TIMES BESTSELLER A REESE'S BOOK CLUB PICK Tired, stressed, and in need of more help from your partner?

Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the "shefault" parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family--and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is *Fair Play*: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, *Fair Play* helps you prioritize what's important to your family and who should take the lead on every chore, from laundry

to homework to dinner. "Winning" this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space--the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

Critical Multiculturalism - Stephen May 2005-08-18

This book aims to bring together two movements - multiculturalism and anti-racism - which, though having aims in common, have been at arms length in the past. Differences of emphasis have meant that classroom practice has been the natural realm of multiculturalism, while anti-racism has been dissatisfied with an approach that accentuates life-style at the expense of challenging or changing the racism that minority students experience. In these debates, there has been a concentration on culturally specific topics and this book goes beyond national boundaries

to find how international concerns and contexts might provide answers to problems faced in single countries. Leading figures in the USA, Canada, South Africa, the UK and Australasia write on the issues. *Human Rights for the 21st Century* - Peter Juviler 2016-06-16
Leading specialists and activists from Russia and the USA join, in this volume, to offer a searching assessment of human rights in their own countries and in the world at large. They reflect on past history, present problems associated with system breakdown and decline, and the obstacles and opportunities on the way to the realisation of human rights in this uncertain post-Cold War era and the millennium that is now dawning. The participants in the discussions detailed here include Yelena Bonner, Viktor Chkhikvadze, Norman Dorsen, Riane Eisler, David Forsythe, Paula Garb, Charles Henry, Susan Heuman, Irina Lediakh, Vladimir Kudriavtsev, Pavel Litvinov, Richard Schifter, Henry Shue, Evgenii Skripilev, Vladimir Vlashihin, Oleg Vorobiev and the editors.
