**Drawdown** - Paul Hawken 2017-04-18

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

[Mark Twain for Kids](#) - R. Kent Rasmussen 2004-07-01

Nineteenth-century America and the world of Samuel L. Clemens, better known as Mark Twain, come to life as children journey back in time with this history- and literature-laden activity book. The comprehensive biographical information explores Mark Twain as a multi-talented man of

his times, from his childhood in the rough-and-tumble West of Missouri to his many careers—steamboat pilot, printer, miner, inventor, world traveler, businessman, lecturer, newspaper reporter, and most important, author—and how these experiences influenced his writing. Twain-inspired activities include making printer's type, building a model paddlewheel boat, unmasking a hoax, inventing new words, cooking cornpone, planning a newspaper, observing people, and writing maxims. An extensive resource section offers information on Twain's classics, such as Tom Sawyer and The Adventures of Huckleberry Finn, as well as a listing of recommended web sites to explore.

Through the Bible in Felt - Betty Lukens 1994-08-01

*What We Believe* - Laleña Garcia 2020-10-27

This powerful activity book will engage hands, hearts, and minds as it introduces children to the guiding principles of the Black Lives Matter movement. When the Black Lives Matter movement began in 2013, the three founders--Alicia Garza, Patrisse Khan-Cullors, and Opal Tometi--anchored its work in a list of guiding principles, developed through conversation with other activists. These principles commit the movement to empathy, loving engagement, and just action among its participants; affirm the importance of Black women, families, elders, and LGBTQ folk; and celebrate the strength and diversity of Black people in their communities and around the globe. Now young people can explore these powerful principles in *What We Believe: A Black Lives Matter Principles Activity Book*. Created by two teachers with more than thirty-five years of educational experience between them, the book presents the guiding principles in down-to-earth, child-friendly language, with each principle accompanied by writing prompts, space for children or adults to create their own reflections, and a coloring page. Supporting materials guide adults in sharing the principles with children and encourage kids to dream big and take action within their communities. An essential resource for anyone discussing racial equity with young people, *What We Believe* offers a beautiful and inspiring lens on the most important social justice movement of our time. Lee & Low Books will donate a portion of its proceeds from the book to the Black Lives Matter Global Network Foundation, Inc.

*Lessons in Chemistry* - Bonnie Garmus 2022-03-29

A delight for readers of *Where'd You Go, Bernadette*, this blockbuster debut set in 1960s California features the singular voice of Elizabeth Zott, a scientist whose career takes a detour when she becomes the star of a beloved TV cooking show. Elizabeth Zott is not your average woman. In fact Elizabeth Zott would be the first to point out that there is no such

thing as an average woman. But it's the 1960s and despite the fact that she is a scientist, her peers are very unscientific when it comes to equality. The only good thing to happen to her on the road to professional fulfillment is a run-in with her super-star colleague Calvin Evans (well, she stole his beakers). The only man who ever treated her—and her ideas—as equal, Calvin is already a legend and Nobel nominee. He's also awkward, kind and tenacious. There is true chemistry. But as events are never as predictable as chemical reactions, three years later Elizabeth Zott is an unwed, single mother (did we mention it's the early 60s?) and the star of America's most beloved cooking show *Supper at Six*. Elizabeth's singular approach to cooking ("take one pint of H<sub>2</sub>O and add a pinch of sodium chloride") and independent example are proving revolutionary. Because Elizabeth isn't just teaching women how to cook, she's teaching them how to change the status quo. Laugh-out-loud funny, shrewdly observant and studded with a dazzling cast of supporting characters (including the best canine character in years), *Lessons in Chemistry* is as original and vibrant as its protagonist.

**Different Different** - Jyoti Gupta 2019-01-15

Different Different is an activity book for children, that thoughtfully addresses everyday skin color consciousness and bias in a way that's easy to understand. Children's rich observations and questions about color, caste, and race elicit accurate yet straightforward responses. Jyoti's art-and-craft-based book takes you on a playful and creative discovery to find answers that work for you and your family--while creatively introducing facts of history and 15-plus new words. Make art. Perform a play for the nanas when they're in town. Eat a yummy homemade dessert. Ooh! and aah! about how each member of the family has a different skin color. It's really a beautifully-illustrated, educational

tool that sets the context for hard conversations about self-awareness, color, and identity. Subjects in the book include biology of skin (e.g. melanin); culturally-related aspects (e.g. food); colorism's social impact (e.g. bullying) and solutions (e.g. bystander intervention). Illustrated by Tarannum Pasricha, *Different Different* reflects the world of the child, in all its diverse exuberance. The book's creators have worked hard to spawn a visual culture that centers cultures and children of color. Do away with the rhetoric, the baggage of what's taboo or political correct! Lead the dialogue with your children and help them embrace the values of social justice and equity.
