The Sumerians - Samuel Noah Kramer
2010-09-17

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most

fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology
"An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

The Anatomy of a Mesopotamian City - Elizabeth Caecilia Stone 2004-01-01

This substantial volume presents the results of the Mashkan-shapir project which surveyed the extensive remains of this Old Babylonian city to the north of Nippur in the deserts of Iraq.

Sumerian Literary Texts in the Schøyen Collection - Christopher Metcalf 2019-08-15

The first in a series of volumes publishing the Sumerian literary texts in the Schøyen Collection, this book makes available, for the first time, editions of seventeen cuneiform tablets, dating to ca. 2000 BCE and containing works of Sumerian religious poetry. Edited, translated, and annotated by Christopher Metcalf, these poems shed light on the interaction between cult, scholarship, and scribal culture in Mesopotamia in the early second millennium BCE. The present volume

contains fourteen songs composed in praise of the various gods of the Mesopotamian pantheon; it is believed that these songs were typically performed in temple cults. Among them are a song in praise of Sud, goddess of the ancient Mesopotamian city Shuruppak; a song describing the statue of the protective goddess Lamma-saga in the "Sacred City" temple complex at Girsu; and a previously unknown hymn dedicated to the creator god Enki. Each text is provided in transliteration and translation and accompanied by hand-copies and images of the tablets themselves. Expertly contextualizing each song in Babylonian religious and literary history, this thoroughly competent editio princeps will prove a valuable tool for scholars interested in the literary and religious traditions of ancient Mesopotamia.

Aramaic Inscriptions and Documents of the Roman Period - John F. Healey 2009-10-29

In the first centuries AD, although much of the Near East was ruled by Rome, the main local

language was Aramaic, and the people who lived inside or on the fringes of the area controlled by the Romans frequently wrote their inscriptions and legal documents in their own local dialects of this language. This book introduces these fascinating early texts to a wider audience, by presenting a representative sample, comprising eighty inscriptions and documents in the following dialects: Nabataean, Jewish, Palmyrene, Syriac, and Hatran. Detailed commentaries on the texts are preceded by chapters on history and culture and on epigraphy and language. The linguistic commentaries will help readers who have a knowledge of Hebrew or Arabic or one of the Aramaic dialects to understand the difficulties involved in interpreting such materials. The translations and more general comments will be of great interest to classicists and ancient historians.

Time and History in the Ancient Near East -
Lluís Feliu 2013-06-28

In July, 2010, the International Association for Assyriology met in Barcelona, Spain, for 5 days to deliver and listen to papers on the theme "Time and History in the Ancient Near East." This volume, the proceedings of the conference, contains 70 of the papers read at the 56th annual Rencontre, including the papers from several workshop sessions on "architecture and archaeology," "early Akkadian and its Semitic context," "Hurrian language," "law in the ancient Near East," "Middle Assyrian texts and studies," and a variety of additional papers not directly related to the conference theme. The photo on the back cover shows only a representative portion of the attendees, who were warmly hosted by faculty and students from the University of Barcelona.

Old Babylonian Inscriptions, Chiefly from Nippur - Hermann Vollrat Hilprecht 1896

Inscriptions of the Iron Age - John David
Hawkins 2000-01-01

This is an edition of the Hieroglyphic inscriptions of the Late Hittite states of Turkey and Syria. These inscriptions, surviving largely on stone, include monuments of kings to their reigns and works as well as the humbler memorials of subordinates. A few precious survivals of documents in the form of lead strips give us a different type of document: letters and economic texts. Recent discoveries have improved the decipherment and understanding of these inscriptions to a point where new and comprehensive translations can be offered, and the presentation of this in English will make them available for the first time to the wide

audience of the English-speaking world. At the same time we are in a position to present more reliable texts than those which have appeared in editions hitherto regarded as standard.

The World's Oldest Literature - William W. Hallo 2010
Literature begins at Sumer, we may say. Given

that this ancient crossroads of tin and copper produced not only bronze and the entire Bronze Age, but also by necessity, the first system of record-keeping and the technique of writing. Scribal schools served to propagate the new technique and their curriculum grew to create, preserve and transmit all manner of creative poetry. In a lifetime of research, the author has studied multiple aspects of this most ancient literary oeuvre, including such questions as chronology and bilingualism, as well as contributing fundamental insights into specific genres such as proverbs, letter-prayers and lamentations. In addition, he has drawn conclusions for the comparative or contextual approach to biblical literature. His studies, widely scattered in diverse publications for nearly fifty years, are here assembled in convenient one-volume format, made more user-friendly by extensive cross-references and indices.
